MIGRATION SE PRO

Across Asia Pacific, the pace of work has changed. Leading organisations are looking for ways to support highly collaborative work across diverse and cross-disciplinary agile teams. A holistic approach to the whole work environment provides work tools and settings to help teams transition between collaborative 'we' work and focused 'me' work, allowing creation and innovation to flourish at greater speed.

The foundation for a dynamic collaborative work place is the team bench. Height adjustable workstations invite postural changes to support an innovative and collaborative workforce with better wellbeing.

As work and life continue to integrate, productive work environments are welcoming, colourful and informal, with a diverse mix of soft furniture settings designed to encourage social connection and build trust between colleagues.

“The health of any organisation is dependent on the wellbeing of its most important asset – its employees.”

**LYNNE SULLIVAN**

Director, Steelcase Wellbeing Consulting

## Meet Migration SE Pro

Migration SE Pro is Steelcase's next generation height-adjustable desking platform. Improved performance and a wide selection of structural and technical components set a new standard in flexible dynamic planning. Its curated selection of finishes will contribute to a unique, tailored expression in the workplace.

## Designed for wellbeing

Regular movement throughout the day is known to bring benefits to the health, happiness and performance of people at work. Height-adjustable benching lets teams sit together, while individuals can take control of their own work surface height.

## Engineered for smooth transitions

Standing posture helps smooth transitions between focused and collaborative work modes. Raising or lowering the work surface can help shift gears when changing tasks, while spontaneous interactions allow colleagues to solve problems and learn from each other.

Standing height postures are beneficial in stimulating new ideas, connections and creative thinking, as well as for eye-to-eye discussions with teammates. Brainstorming and sharing in an active posture will energise engagement.

# Plan for flexibility

With more modular freedom than ever, Migration SE Pro offers the flexibility to evolve your workplace strategy over time. Curate your own space by mixing soft settings and workstations to create a diverse work environment that suits every work mode.

# Create your own team space

Teams clustered together can share stronger connections and work more efficiently and harmoniously. Bundle Migration SE Pro desks with Diversal spine to create a dynamic team zone. By nesting collaborative work tools in close proximity to individual spaces you will support the transition from “me” work to “we”work mode.

Shielding the team with settings that help increase visual and acoustic privacy will enhance focus and define the team’s work zone, creating a sense of belonging.

## Silent and powerful

The new motor enables a smooth, seamless and remarkably silent transition between postures. The controller can also store four different posture settings, ensuring ease of adjustments.

## Advanced anti-collision technology

Re-engineered for enhanced safety and stability, the anti-collision sensor detects any change in angle from any point on the work surface to rebound on contact with objects below the desk.

## Robust stability

The refined understructure is visually lighter, yet has improved structural integrity due to new connection points, that make Migration SE Pro more sturdy than ever – suitable for heavy daily use and multiple reconfigurations.

# Multi-purpose meeting spaces

Whether teammates are brainstorming on their feet or retreating to process ideas, Migration SE Pro desks can be used to create a break-out space to host spontaneous meetings, completing a dynamic team hub.

Use mobile digital and analog work tools to transform an open meeting table into a high-performance team collaboration space.

# A touchdown bench for nomadic workers

Modern workspaces thrive on the ebb and flow of teams that are constantly on the move. Migration SE Pro can be configured as touchdown benching, welcoming mobile workers and helping them settle.

For high-performance touchdown spaces, complete the zone by adding access to settings for privacy.

## Cable management

More choice of components brings greater flexibility in integrated cable management. Choose from new metal cable trays or a metal and PET hybrid – all are available in varying depths to support hard or soft wiring, with options for cable segregation, where required.

## Dock and store

The flip-top cover on the work surface can be used to dock and charge mobile devices and tablets, allowing easy viewing and minimising disruptions.

## Sarto screens

For added privacy, shield workstations with Sarto screens in a range of colours and textiles. The finish option of SartoRaw blends sustainable material choice with minimal material usage.

## Tailored expression

Creative expression injects inspiration and energy into the workplace. Choose round legs for a softer look or rectangular legs to define stronger lines. An extended selection of work surfaces and a fresh palette of colours also help Migration SE Pro to harmonise with soft settings in your team neighbourhoods, creating a welcoming work environment.

## Approachable design

You will appreciate the attention that has gone into refining every detail, aesthetically and structurally. Migration SE Pro integrates contoured, soft rounded curves and harmonious arcs throughout its design – from structural elements, columns and feet, to radius corners on worksurfaces.

# Features summary

## Silent and powerful

A powerful new digital motor makes smooth, seamless, and silent transition between postures and the controller can store four different posture settings.

## Advanced anti-collision technology

The anti-collision sensor protects even light equipment from accidental knocks. A highly sensitive new mechanism detects any change in angle, from any point on the work surface.

## Approachable design

Contoured, soft rounded curves and harmonious arcs contribute to a welcoming work environment.

## Sarto screens

For added privacy and a soft welcoming experience, shield workstations with Sarto screens in a range of colours and material finishes.

## Robust stability

The refined understructure is visually lighter, yet sturdier than ever.

## Cable management

More choice of components brings greater flexibility in cable management, with new metal cable trays or a metal and PET hybrid in a range of depths.

# Statement of Line

## Migration SE Pro Desk

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 700, 750, 800, 900mm  
 Width: 1200, 1400, 1500, 1600, 1800mm

## Migration SE Pro Dual Sided Bench

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 700, 750, 800, 900mm  
 Width: 1200, 1400, 1500, 1600, 1800mm

## Migration SE Pro Single Sided Bench (Egress)

Basic Range: 720-1180mm  
 Extended Range: 650-1250mm  
 Fixed Height: 720mm  
 Depth: 700, 750, 800, 900mm  
 Width: 1200, 1400, 1500, 1600, 1800mm

## Worksurface

Rounded corners

Square corners

## Leg column option
