

## Divisio Space division

The Divisio Screen collection helps create a welcoming work environment by improving focus and reducing distractions in shared spaces. By delivering territorial privacy and allowing people to personalize their space based on the type of work that needs to be done, this reliable range enhances privacy, wellbeing and concentration in the open plan.

## Applications

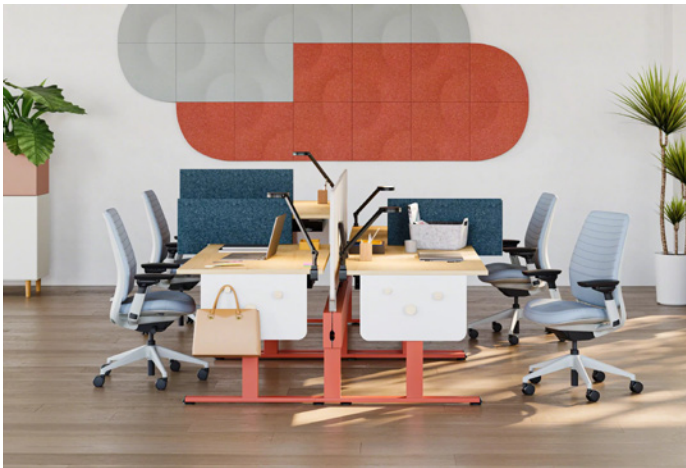

### Personalized Visual Boundaries

Whether placed on an individual desk or a bench, Divisio Frameless Screen provides the right level of visual or acoustic privacy and brings a cozy atmosphere to the workstation. It features a practical accessory rail with pinnable and magnetic functions, which allows people to hook organization tools, keeping important documents and personal items within hand's reach. Add in a marker board that facilitates personal tasking, and people get ample opportunities to personalize the space as desired.

### Adaptable Lateral Privacy Solutions

With a maximum weight of 4 kg, Divisio Lateral Screen is a freestanding screen with a stable metal base that can be easily moved anytime, anywhere. People can instantly amp up the privacy of their space, placing the screen on the side of the workstation or behind their device on an open bench. Available in both frameless and acoustic options, the Divisio Lateral Screen matches the style of all Divisio screens to create a consistent aesthetic throughout the office.

### Flexible Side Boundaries

Divisio Side Screen allows people to personalize their space based on the type of work that needs to be done. Its height does not prevent impromptu collaboration while providing a comfortable boundary between two desks. In addition, this user-movable side screen features a 200mm overhang of the worksurface for additional peripheral privacy.

### Interchangeable Privacy + Modesty Screens

Divisio Light Screen provides optimal visual privacy, helping people maintain their focus. Its light design, weighing under 2,3 kg, makes this solution easy to handle, allowing people to use it as a privacy panel or a modesty screen. They can switch between the two as they see fit throughout the day, enjoying more choice and control over their work environment.

## Features

### Acoustic comfort

With Divisio Acoustic Screen, people working in an open-plan environment enjoy increased wellbeing at work. This solution offers a great sound absorption coefficient of 0.7, while providing privacy.

### Desk Organization

The acoustic version of the screen is pinnable, adding an additional storage element. People can pin and organize notes or personal artifacts, so that their worksurface stays clean and uncluttered.

### Personal storage

Trays offer storage on both sides of the screen for personal items. The cork infills of the trays add a biophilic element of design, giving the screen a natural touch in either a light or dark color. The acoustic version of the screen is pinnable, adding an additional storage element. Workers can pin up and organize notes or personal artifacts so the worksurface stays clean and clear.

### Aesthetic Diversity

Available in a broad range of fabrics, Divisio screens provide ample room for personalization.

Between the unique design elements and performance features of each screen, there are plenty of ways to make these screens your own.
