Ocular® Coupe Tower
Conference and Collaborative Tables

Ocular® Coupe Tower brings furniture and technology together to support seamless hybrid meetings that keep the focus on people and the conversation.

Applications

Quick Team Touchpoints

Short updates and check-ins require a setting where people can gather and engage quickly. The standing-height Ocular Coupe Tower supports on-demand hybrid exchanges in open or enclosed spaces, connecting three or four people in the room with remote colleagues.

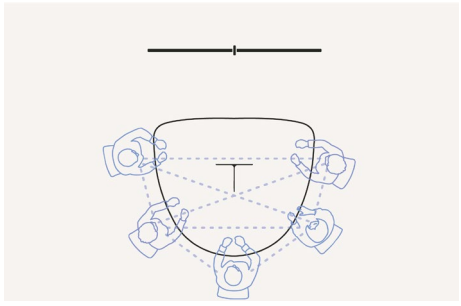

Focused Hybrid Collaboration

Workshops, planning sessions and deeper discussions need a comfortable setting that allows teams to exchange ideas for longer periods of time. The seated-height Ocular Coupe Tower creates a dedicated hybrid destination that brings furniture and technology together, allowing the focus to remain on people and the conversation.

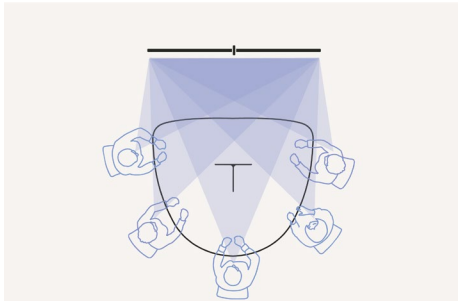

Design Principles

Ocular Coupe Tower's curved worksurface was intentionally designed around three key sightlines for people participating in a hybrid meeting: people to people, people to screens and people to cameras.

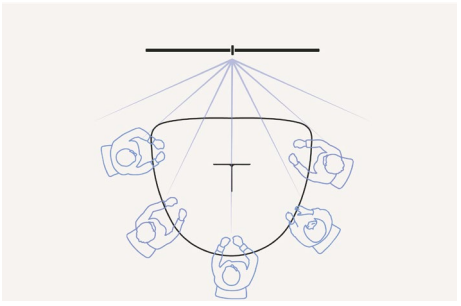

People to People

Conversation and collaboration should feel natural and comfortable between people around the table.

People to Screens

When meeting virtually or sharing content, everyone should have a clear view of the screen and a good experience following the conversation.

People to Camera

The room's camera should capture everyone clearly so remote participants can feel connected and engaged throughout the meeting.

Product Range

Standing Height

Designed for open or enclosed huddle spaces, with seating for three or four people.

Seated Height

Designed for small hybrid meetings in enclosed spaces, with seating for three or four participants.

Features + Options

Table Aperture

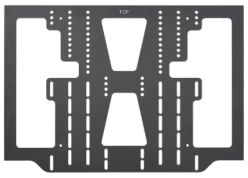

Tech Panel

Tech Chanel Cover

Monitor Shroud (Optional)
