

# ARA

Europe's first Cradle-to-Cradle  
task chair

orangebox

## Product Description

The award-winning Ara is the first task chair developed and manufactured in Europe to achieve Cradle-to-Cradle accreditation. Cradle-to-Cradle sets new standards of environmental accountability, offering an optimistic agenda on how we can manufacture products in a world where resources are increasingly scarce.

Ara offers three back specification options: mesh, polymer and upholstered:

**Mesh** delivers a soft touch and uses materials and assembly techniques that deliver a long and useful life, while facilitating effective recycling. The ergonomic refinement of the mesh comes from its ability to locally deform to the shape of your back, providing superb support over a large contact area.

**Polymer** comes in a wide range of colours and has a contrasting upholstered seat.

The fully **upholstered** option helps give this task chair family universal appeal, while retaining the Ara's clarity of design and refined performance.

And, as we are all different shapes and sizes, Ara also offers an enhanced height and depth-adjustable lumbar pad option, which can be fine-tuned to provide individualised lower back support.

**Top** – ARA-MBA & ARA-EBA, **Bottom** – ARA-MBA

Product Range

**ARA-EB**  
Elastomer back swivel  
task chair

H997 [H39]
