

Breaker

An effective occasional or work height table range

orangebox

Product Description

The Orangebox expression of this heavily specified table archetype works equally well at occasional table height or work height, its simple column and disc foot combining with either a solid top or a glass top bonded to the column on the lower tables.

Breaker's simplicity and adaptability means that it can be used almost universally, whatever your requirements. Both the tops and metal column and base are available in the standard Orangebox range of finishes.
