

Joy

THE SUPREME COMFORT OF JOY

Within a short period of time, Joy has become the benchmark against which task chairs of this market sector are judged. Joy has redefined great value task seating and the introduction of the Joy high back chair expands the specification range for this iconic product.

**At Orangebox we have a simple goal -
to provide our customers with the best tools possible**

to excel at what they do. Joy expresses this idea perfectly.

great value

task seating has a new name

IT'S CALLED JOY

EVERYONE HAS THE RIGHT TO EXPECT GREAT DESIGN,

smart engineering, sound ergonomics and robust performance. The success Joy has achieved is an endorsement of these values, which we believe are unique in this price sector.

Orangebox's continuous ergonomic research defines the form, contours and proportions of Joy. Irrespective of your body shape or size or the level of chair function you select,

JOY WILL ALWAYS BE COMFORTABLE.

an intuitive chair that's **quick to adjust**
and **easy to use**

**ORANGEBOX PRODUCTS ARE SMART, NEVER
OVERCOOKED AND ARE FOCUSED ON**

bringing innovation to real market needs. We've worked hard to ensure our core values are inherent in the design of Joy as well as its levels of comfort and its user interface.

Joy works equally well when specified in a reserved fabric or in a more intense, more contemporary patterned fabric.

>> Joy Visitor Chair

Joy also extends to visitor options that share the same design and manufacturing values as the task chairs as well as meeting the requirements of the most demanding office environments.

Instruction Booklet

The operating instructions are stored in a prominent position on the back of the chair and in keeping with the Orangebox way of doing things you have a choice of the cover on the booklet. You will find that we have approached the internals of the booklet in a fresh way

and we're very serious about the use of a little light humour to engage the reader to follow them - ergonomics, user training can be a dry subject. We feel that you have to be as inventive as possible to help motivate people to break poor postural habits and get real value from there 'Joy'.
