

Steelcase introduces *ORIGIN.Build*

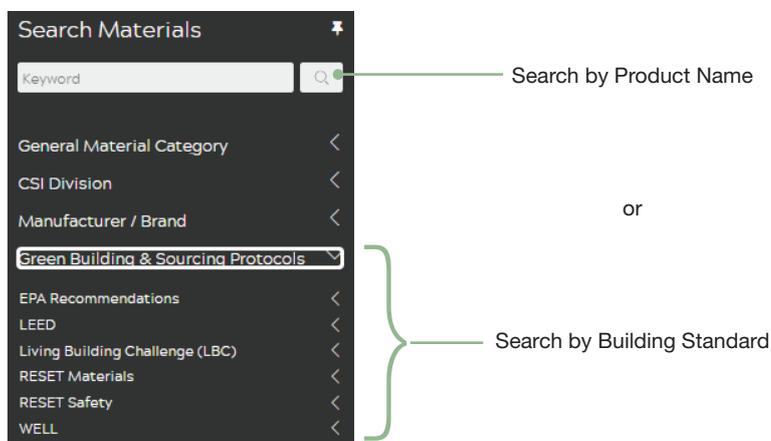

What is ORIGIN?

- ORIGIN is a searchable web platform that summarizes sustainability information for building materials, including furniture.
- For Steelcase products, the following key sustainability information is available on ORIGIN:
 - Embodied carbon
 - Recycled content & recyclability
 - Material composition
 - Sustainability certifications
 - Building certification contribution

How to access ORIGIN

There is no requirement to sign up for an ORIGIN account:

1. Simply go to ORIGIN.Build and start searching using “Steelcase EMEA” or the Steelcase product name.
2. You can also select Green Building & Sourcing Protocols to search by building standard.

3. Select a product name link to display a product profile. Make sure to select products with “EMEA”, mention in search results, unless you are interested in products available in other regions.
4. Open (+) any or all the sustainability fields listed on the product page.
5. Select the globe icon on the top right to access the French, German, or Spanish language pages.
6. You can also access sustainability data in ORIGIN from Steelcase product pages on Steelcase.com.

How can you use ORIGIN to support your sustainability priorities?

Generate and download a Product Environment Profile (PEP)

1. Select the desired product from the results list.
2. Click the Print icon to download a Product Environment Profile in PDF format.

Access Steelcase product sustainability data, download a product certificate, or assess products for potential contributions to building certifications (e.g., LEED and WELL)

1. Use the Search Materials field to search by product name.
2. Select the desired product from the results list.
 - Open (+) the Features, Certifications, and/or Specifications fields to access product sustainability data
 - Open (+) “Certifications / Declarations / Test Reports” to expand that data category, and navigate to the desired certification. Select the Supporting Docs link or pdf, to view and download the certificate
 - Open (+) the Possible Compliance section to assess building certification contributions
