

Steelcase®

Qivi®
Side + Conference Chairs

Qivi is classic in both form and movement. Its pivoting backrest and gliding seat move together with the body to support posture changes and offer immediate comfort in collaborative spaces.

Applications

Formal Conference Rooms

Formal moments require structure and continuity, with meetings often extending beyond the original agenda. Through its pivoting backrest, Qivi supports posture continuity during long, structured discussions, helping attendees stay comfortable during presentations or decision-making moments.

Training + Learning Areas

The right seating solution should contribute, and not draw attention from presenting, exchanging ideas or active participation during trainings. By removing the need for adjustments, Qivi enables participants to stay focused on the learning itself, as activities shift between listening, discussing and exchanging new information.

Open Collaboration Spaces

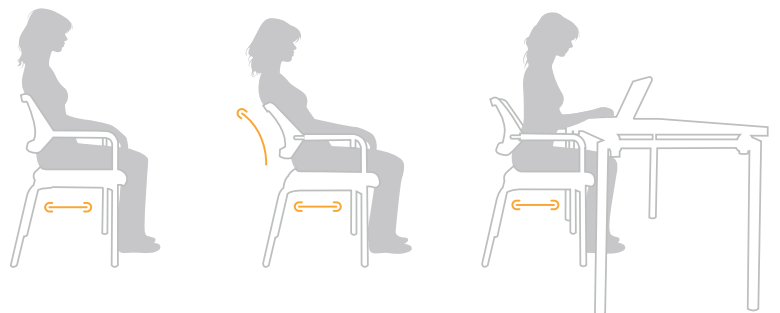

People tend to gravitate towards open settings where teamwork, informal exchanges and impromptu interactions happen more naturally. Through its versatile range, Qivi caters to a wide range of collaboration zones, offering a fitting seating option for each interaction while preserving a cohesive look and feel across the space.

Design Principles

Effortless Focus

Regardless of how long a meeting lasts, people need to stay focused as they collaborate in groups of all sizes. Always staying on the move helps upkeep concentration and alertness as discussions continue.

Intuitive Motion

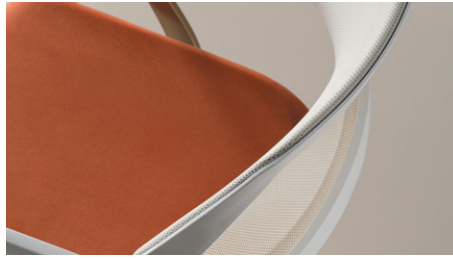

As conversations unfold, people naturally lean forward, sit upright or recline in response to what is being shared. Seating should support these forward and backward shifts seamlessly, allowing posture changes to happen in sync with interaction.

Features + Options

Pivoting Backrest

Responds automatically to people leaning or sitting upright, following the spine.

Gliding Seat

Moves forward and back with the body, enabling seamless posture changes.

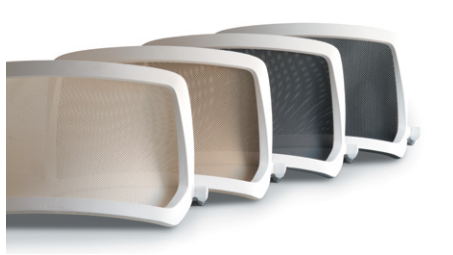

Seat Height-Adjustment

Available on the 5-star conference chair version, it allows for individual positioning.

Matching Seating

Available in coordinated side and conference seating options, for a cohesive visual language.

Qivi Net Uphostery

Provides breathable support during extended periods of use.

Stackable Version

Supports efficient stacking, storage and reconfiguration for flexible layouts.

Product Range

Conference Chair:
5-Star Base on Castors
