Share It®
Cabinet and Selves

Steelcase

Share It supports individuals and groups with hardworking storage and hybrid collaboration solutions that offer choice and control over the environment. Its modularity makes it easy to structure team and meeting spaces while increasing real estate efficiency. It also enables organizations to integrate the technology of choice in their private offices, leading to better virtual meeting experiences.

Applications

Structure for Team Spaces

Thanks to its modularity, Share It makes it easy to structure team spaces. Cupboards for personal and team storage can be used as space dividers, allowing for high-traffic areas to be placed adjacent to focus areas. It also helps users balance privacy and contact with others, even in a large team space.

Supports Hybrid Collaboration

Hybrid collaboration is essential for creative and innovative teamwork. Share It offers many different combinations to support instant collaboration. The Media Wall provides an easy way to integrate technology in enclosed meeting spaces, enabling teams to share ideas seamlessly regardless of their physical location.

Secure Storage Space

Technology gives people choice and control over where they work. At the same time, assigned workstations are shrinking, yet research shows that personal space is incredibly important. Share It offers secure lockers for dedicated personal storage or shared use, providing complete peace of mind.

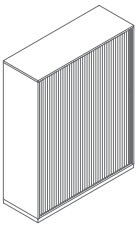

Fosters Concentration

The open plan is known to boost collaboration, build relationships and spark new ideas. With improved communication and increased transparency, people are seeking ways to control their privacy. And the number one distraction in the workplace is no longer visual – it´s noise.

Share It acoustic backs and fronts improve the acoustical performance (rating coefficient: 0,55) of your workspace while providing a pleasing aesthetic.
