BEAUTIFUL AND LONG-LASTING FABRICS

CHANGEABLE COVERS

Most of our sofa series and all our garden sofa series are designed with changeable covers, extending their lifetime while allowing you to refresh and renew their expression over the years, as true beauty is not fleeting, but evolving. Crafted by some of the finest craftspeople in Europe, each BOLIA sofa is thoughtfully constructed with durability at its core. From the inner frame to the immaculate sewn stitches, inside and out, every detail reflects uncompromising quality.

Our collection of sofas, armchairs, dining chairs, and cushions is designed to embrace you with softness and luxury – from traceable leathers to rich fabrics like linen, wool and bouclé.

Indulge in a refined play of texture, tactility, and tones. Soft, inviting surfaces meet richer, more structured finishes, creating a sensory balance that feels both modern and timeless. The palette moves effortlessly from deep green and burgundy to dark brown and warm amber – earthy, layered colours that add depth, warmth, and a quiet sense of luxury.

CUSTOMISED JUST FOR YOU

Creative customisation lies at the heart of the collection. Choose your design, fabric, and colour, and shape a space that feels unmistakably yours. Every detail becomes part of your personal expression – crafted to match your life, your style, and the moments that unfold at home. With carefully curated materials and endless combinations, you can design a piece that feels uniquely yours.

CERTIFIED QUALITY

Quality is woven into every thread. All our fabrics are OEKO-TEX® STANDARD 100 certified, tested for harmful substances and created with care for both comfort and durability. Because the fabrics you choose should feel beautiful today – and remain just as comforting for years to come.

BOUCLÉ *and texture*

With luxurious, inviting softness, textured fabrics and bouclé beautifully awaken the senses — woven with elegant techniques that create a tactile feel while adding depth and refined patterns. Textured fabrics are excellent at concealing small imperfections, making them ideal for both formal and casual settings.

Page 4 AVELOU, shown in Memory, Green. *Designed by Ferriani Sbolgi.*

MEMORY

Memory has a roughly textured weave, with a fine melange effect that creates a fabric with a vibrant structure and an eye-catching interplay of colours. Woven in Belgium in a blend of natural and synthetic European yarns.

SMOOTH *weave*

Smoothly woven fabrics have an airy and inviting quality that blends effortlessly into any space, allowing the shapes and curves of a design to take full focus. The tight weave ensures fantastic durability and gives a sleek and serene expression – making them both beautiful and practical in any home.

CLASSIC CUSHION, shown in Baize, Sand. *Designed by BOLIA Design Team.*

LONDON

London is woven with a distinct structure and a shiny surface. The fabric is made from durable polyester with very high abrasion resistance, making it suitable for both private and professional use.

DURABLE AND TACTILE MATERIALS

EVERLASTING FABRICS AND LEATHERS

Our collection of sofas, armchairs, dining chairs, and cushions is designed to embrace you with softness and luxury – from traceable leathers to rich fabrics like linen, wool and bouclé. Each material is chosen not only for its beauty, but also for its durability. All our fabrics are OEKO-TEX® STANDARD 100 certified, and all leather types are OEKO-TEX® LEATHER STANDARD certified. For every textile, we trace its full journey – from where the fibre was grown, to how it was produced or recycled, and where it was dyed and woven. We even show the estimated climate footprint per square metre. We do all this because we believe in transparency, so you can make informed choices.

LONG-LASTING WOOD

Inspired by nature's constant evolution, we place materials like solid wood at the heart of our designs. It's not just beautiful – it's durable, luxurious, and richly tactile, bringing us closer to nature. At BOLIA, we use only FSC™-certified wood, meaning it's responsibly sourced from forestry that protects biodiversity, and wood from other responsible sources. Oak and ash – natural, oiled, lacquered or stained. Everything is crafted with enduring quality and timeless silhouettes, and our wood designs are made to last and to be passed down for generations.

There's a certain kind of calm you feel when stepping into a space shaped by intention – where natural materials soften the edges of everyday life, and thoughtful design reminds you to slow down. At BOLIA, we live and breathe to create interiors that feel quietly luxurious, timeless, and deeply human. We believe in the enduring power of spaces that restore rather than overwhelm.

There is nothing more soothing and inviting than tactile designs. Tactility can be expressed through the shape and form, through craftsmanship, detailing and soft edges, or it can be expressed in the smooth surface or soft cover through the choice of fabrics and material textures.

Our materials are carefully curated with respect and timeless quality, inspired by the changing seasons, the unique textures of nature, soft hues, and the calming atmosphere that surrounds us. Choosing the right materials lies at the heart of creating designs that are not only beautiful but also everlasting.

EXCLUSIVE MARBLE AND TRAVERTINE

Our designs are brought to life through breathtaking beauty of natural stones such as marble and travertine. Formed and shaped over millions of years, each stone carries its own unique composition and timeless elegance. And just like you and me, no two stones are ever alike. Combined with soft fabrics, warm wood, and natural leather, they create designs that are exquisitely beautiful and calming.

THE FINEST QUALITY RUGS

Each of our rugs is 100% handmade using traditional techniques and crafted from materials such as wool, jute, recycled PET, and specially developed yarns created exclusively for BOLIA designs. We partner only with responsible producers supported by amfori BSCI, and every rug is Care & Fair-labelled, and also OEKO-TEX® STANDARD 100 certified. Using wool in its purest, often undyed form alongside carefully selected dyes, each rug reflects timeless craftsmanship, understated elegance, and lasting beauty.

UNIQUE AND EXCLUSIVE *stones*

Our designs are brought to life with the stunning beauty of authentic materials like marble and travertine. These breathtaking stones, formed over millions of years, offer unique compositions and timeless aesthetic appeal. Just as no two people are alike, no two stones are the same. Combined with soft fabrics, warm wood and natural leather, they create designs that are as beautiful as they are enduring.

 NEW PODI COFFEE TABLES with Brown Marble tabletops. *Designed by Studio Nooi.*

MARBLE

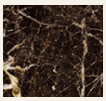

Marble is a breathtakingly beautiful natural stone that has formed over millions of years. Depending on its unique composition and the influence of nature at its place of origin, different types of marble are formed with unique patterns and colours. No two pieces are alike, which is why every piece of marble furniture is utterly unique.

TRAVERTINE

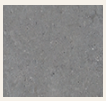

Travertine is a unique natural stone with a beautiful and dreamy expression. The tranquil patterns and colours invite calm and nature inside, and together with wood and other natural materials, it creates a light and soothing environment.

Beige

CONCRETE

Concrete has a calm and stylish appearance that is reminiscent of the clean lines of modern architecture and the raw aesthetics of industry. A natural material with unique and beautiful properties consisting of only cement, sand, stone, and water.

LONG-LASTING *wood*

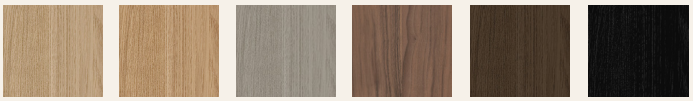

Inspired by nature's constant evolution, we place organic materials like solid wood at the heart of our designs. It's not just beautiful – it's durable, luxurious and richly tactile, bringing us closer to nature. At BOLIA, we use only FSC™-certified wood, meaning it's responsibly sourced from forestry that protects biodiversity, and other controlled materials. Our wooden furniture is crafted to last, with timeless silhouettes and enduring quality made to be passed down for generations.

NEW LELOU DINING TABLE, shown in Oiled Oak. *Designed by Ramos Bassols.*

SOLID WOOD

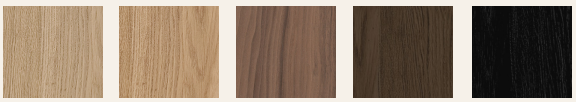

Solid wood isn't just beautiful, it's also a durable and luxurious material that brings us closer to nature. Its tactile surface is warm, sensuous and beautiful, and every single piece of wood is unique and develops a beautiful patina over the years. Wood is a living material that will naturally be affected by its surroundings over time. A dry, warm room can cause the wood to dry out and contract, and a room with high humidity can cause it to expand. It's precisely because of the natural properties of wood that proper maintenance helps extend its lifespan.

White Pigmented | Oiled | Grey Lacquered | Oiled Walnut | Dark Oiled | Black Stained

VENEER

Veneer is formed from very thin slices of wood cut from tree trunks. The fine craftsmanship of veneer was originally developed to cover furniture and interiors with rare and expensive wood types – today we use it to retain the beautiful, natural properties of solid wood in a more uniform, thin and stable form, which also requires less raw material to produce.

White Pigmented | Oiled | Oiled Walnut | Dark Oiled | Black Stained

TEAK

Our teak is FSC™ 100% certified and produced in Panama. The trees are planted exclusively on grassland, never at the expense of natural forest areas, and are cultivated with minimal use of pesticides. Teak has unique properties and is extremely durable. The wood naturally has a high oil content, which prevents water and moisture from penetrating the wood and thereby protects it from the elements. When the furniture is new, it has a beautiful golden colour and, as the wood is exposed to sunlight and oxidation, it gradually fades and turns silvery grey. If you love the grey, weathered look, don't apply oil. If you prefer a warmer glow, you should treat it with oil regularly.

Teak

LAMINATE

Laminate is a durable material with many beautiful possibilities, with a soft and pleasant surface that is both durable and flexible. It is suitable for busy homes, dining tables and public spaces that experience a lot of wear and tear. We only use HPL laminate and FENIX NTM nanolaminate, created by the Italian company Arpa Industriale.
