Steelcase

Steelcase Eclipse Light

The Steelcase Eclipse Light transforms both residential and commercial environments, allowing users to both look and feel their best during remote collaboration – no matter where they're working. By offering wireless charging for personal devices, superior color performance and the ability to reposition the light where it's most needed, the Steelcase Eclipse Light illuminates new ways to work and collaborate.

Features + Adjustability

Innovative, multi-functional and highly adjustable, the Steelcase Eclipse Light empowers employees to feel good and be their most productive at work, either virtually or in person. Its 15W silicone charging pad effortlessly powers cellphones, earbuds and more.

Flicker-Free technology and superior color performance make shadows disappear and reduce eyestrain, illuminating the worksurface or user. The kickstand supports mobile devices in landscape or portrait, and a copper tinted mirror helps users join calls with confidence.
