Steelcase Flex Perch Stools + Poufs

Steelcase Flex Perch offers a quick place to sit – while staying fully engaged in mind, body and collaboration. It's part of the Steelcase Flex collection made for dynamic teams. Space-saving and sustainability forward, this stool makes room for new possibilities.

Key Benefits

Just when you need it

When it isn't busy working the room, Steelcase Flex Perch saves space in style. Nest any number of these stools in a compact row, and fan them out across the room right when people want them for a quick think or sharing session. Super lightweight, with glides that work on hard floors and carpet, Steelcase Flex Perch transforms a space to suit the team's needs in seconds.

Good for you and your team

Movement matters to well-being at work. Neither standing still nor sitting down for long periods of time is ideal. As you move through your day, Steelcase Flex Perch offers something in between: a transitional leaning stance that relieves pressure, engages the core, promotes healthy posture and keeps you in good proximity to others in the room.

Taking recycling forward

Through a partnership with BASF, Steelcase Flex Perch is the first furniture product globally that reduces the use of fossil resources through Ccycling™. This innovation in sustainability transforms post-consumer waste from electronics production, once impossible to recycle into like-new raw material needed for high-quality products – reducing waste and reliance on fossil resources associated with carbon emissions.

Surface Materials

- Merle MG
- Fog 6BE3
- Saffron 6BD7
- Light Peacock 6BE2
- Baltic 6BE4

The colors are indicative and may vary slightly from the actual material.
