LEARNING

Inspiring a *Life of Learning*

A Life of Learning

Learning is how we explore our boundless potential and connect to the world around us. At Steelcase Learning, we inspire a life of learning by creating places that engage and ultimately empower people, within and beyond the classroom.

Throughout our history we've focused on how the design of spaces can impact every stage in a learner's path — from early to higher education, and eventually, to their work experience and beyond. At the same time, we know that learning is different for everyone. We serve the unique needs for each level and type of learning, while also understanding the common threads that improve learning outcomes.

And, we're always learning, too — from schools, colleges, universities and educational organizations that we partner with throughout the world. Our human-centered, primary research approach gives us the insights to design solutions for the specific conditions that students, educators and institutions face, in both current and emerging learning environments.

In everything we do, we believe in a life of learning. We're helping to make the spaces that can prepare people to grow and thrive, in all the places where learning happens.

How We Support Lifelong Learning

People take part in a continuum of learning throughout their lives. We research and design solutions that engage and ultimately empower everyone to learn — understanding the unique needs of students and educators at each level, in all the places where learning happens.

University of Glasgow,
JMS Building

The University of Glasgow had complex challenges in envisioning a new learning hub for their nearly 200-year-old campus. Our approach with the University helped create a future-facing, adaptive environment. Designed for flexibility, it supports active learning, diverse study modes and social interaction through multi-method and technology-enabled learning.

[Read the full story.](#)

We study and support key behaviors that can positively impact learning outcomes and foster a love of learning. With these principles, we help create learning experiences that:

Engage

Active and inclusive learning environments improve both student and teacher engagement, fostering the skill development and deeper relationships that help everyone succeed in their learning experiences.

Empower

Strong engagement allows for greater empowerment as people have more agency and independence, are able to focus on their wellbeing, and feel motivated to truly own their learning both in and out of the classroom.

Expand

Anyone can carry a learning mindset forward — marking an expansion into lifelong learning that will positively impact their personal and professional growth for years to come.

SRH University, Berlin

When SRH University set out to create a campus aligned with its learner-centered philosophy, the goal was about far more than new spaces. Working with Steelcase, SRH transformed a traditional academic environment into a dynamic learning ecosystem that encourages cross-disciplinary exchange, fosters community, and empowers students to design their own futures.

[Read the full story.](#)

Leaders in education engage us in their biggest challenges related to learning environments and experiences. We work closely with decision makers and their institutions to study, interpret, solve problems and measure, and then share what we learn to improve the design of spaces and their outcomes.

Maarif Group, Sherborne School Jeddah

To help shape the future of education in Saudi Arabia, Maarif Group created Sherborne School Jeddah, a learning environment designed to unlock every child's potential. Inspired by Vision 2030, the school combines flexible spaces, shared learning commons and learner-centered pedagogy to support collaboration, curiosity and lifelong learning. The result is a new model for education where learning extends beyond the traditional classroom.

[Read the full story.](#)

How We Support Lifelong Learning

We're Always Learning

People are at the heart of everything we do. Using human-centered, primary research, we observe and learn directly from educators and students around the world. Then we use our findings to help design innovative learning spaces, translating our insights into furnishings and solutions that support better learning experiences today and into the future.

Our dedicated team of researchers, strategists, designers and space experts studies many forces that impact learning outcomes. Steelcase Learning partners with a wide range of primary and secondary educational institutions to understand how teaching and learning are evolving — and how smarter, more active environments can help.

To date we've measured outcomes from over 110 educational institutions, including more than 75 K-12 schools and 35 colleges/universities, surveying over 16,500 students and 650 educators.

[Explore the latest findings of our study.](#)

Efrei New Republic, Villejuif (France)

To support its rapid growth and evolving student expectations, Efrei created New Republic, a new campus building designed around learning, collaboration, and community. Developed with Steelcase, the project brings together a wide variety of spaces that support focused work, teamwork, well-being, and social connection. By aligning the environment with its educational vision, Efrei has created a campus experience that helps students prepare for the ways they will learn and work in the future.

[Read the full story.](#)

Learning Involves Everyone

We consider all the people who are impacted by the investment in learning spaces, including students, educators and leaders across many types of school districts, institutions and communities.

By understanding each group’s distinct goals and challenges, we can design for a wide set of needs across diverse learning environments.

Campus STREAM, Brussels

Designed to support learning at every stage of life, Campus STREAM brings together early childhood education, primary and secondary schools, and adult learning on a single site in Brussels. The campus combines a shared educational vision with flexible, age-appropriate spaces that foster collaboration, inclusion, and continuous learning. By creating connections across generations and learning experiences, Campus STREAM offers a new model for lifelong learning in an evolving urban environment.

[Read the full story.](#)

Every Level of Learning

We serve the unique needs of each stage of learning, while also understanding the common threads that improve learning outcomes.

From early to higher education, and onward into work experiences and beyond, we bring in-depth expertise to many specialized learning spaces, both in and out of the classroom.

Yet we always connect the dots, promoting the core behaviors and wellbeing that help people thrive at any age, across the learning continuum.

University of Glasgow, ARC Building

To accelerate innovation and tackle increasingly complex global challenges, the University of Glasgow created the Advanced Research Centre (ARC), a purpose-built environment designed to bring researchers from different disciplines together. In collaboration with Steelcase, the university shaped a diverse ecosystem of spaces for focused research, collaboration, and informal exchange, fostering the connections and unexpected encounters that spark new ideas. The result is a dynamic research ecosystem where interdisciplinary thinking can thrive.

Spaces

Today’s best learning spaces are designed to improve engagement, with active learning experiences that help students and educators collaborate and thrive — cognitively, physically and emotionally. From classrooms to libraries and beyond, having access to a variety of tailored and empowering learning environments across any grade level, subject matter or class size encourages people to grow into a life of learning.

Classrooms

Highly engaging classrooms can seamlessly support many modes of learning, with integrated technology and tools that facilitate class instruction, small group collaboration, independent reflection, discussion and more.

Collaboration and creativity lead to empowerment.

As students come to own their own learning, they need spaces for more collaborative project work as well as places equipped for hands-on making and creativity, where they can develop points of view, craft new content and share it.

79% of high school and higher education students preferred their Steelcase active learning space over a traditional classroom. Subjects reported gains in many areas, including movement in the classroom, communication with peers and teachers, creative activities, critical thinking and collaborative learning.

Classrooms

Technology integration for better teaching and learning.

The human connection in learning is essential, whether a class is in-person, hybrid or remote. Modern, more effective and integrated uses of technology allow students to interact easily with teachers and peers, enhancing their engagement, building inclusion and improving learning outcomes.

“The digital transformation of learning is redefining how students and educators interact with the school environment. Knowledge transmission, such as lectures, is increasingly shifting outside the class session to computer-based delivery. Also, more active, hybrid learning models are leading to new value for the built environment. It’s exciting to see how space and technology can come together to deliver these new learning experiences.”

Andrew Kim
Director, Research and Innovation
North America

Beyond the Classroom

Any place can be a learning space throughout a campus. In libraries, learning commons, cafés and in-between spaces, design solutions outside the classroom can help learners collaborate, socialize and focus.

The heart of a campus in libraries and learning commons.

Building on their legacy role as the academic heart of a school, today's libraries are multi-purpose places of oasis and connection — where students, faculty, library staff and even members of the community can work and interact freely.

German University of Digital Science (UDS)

Built on the vision of a university that exists in the metaverse, the German University of Digital Science (UDS) reimagines how people learn, connect and collaborate in a digital world. While its educational model is virtual-first, UDS recognized the importance of physical space in fostering community, creativity and innovation. Working closely with Steelcase, the university created a flexible hub in Potsdam that brings people together and provides a tangible foundation for the future of digital education.

Social learning builds community.

Before and after class, social lounge spaces and commons areas invite students to meet and work with each other in comfort. Learning is amplified in these spaces by building the most important of campus commodities: a community.

Gaming becomes learning.

Esports and immersive learning give leaders in education new, compelling ways to engage students. The social benefits of camaraderie and belonging add to these multisensory experiences as more opportunities for gaming in the learning process are activated.

237 million

Europeans aged 6 to 64
regularly play video games.

3 billion

gamers worldwide.

74,000 people

people work in the European
video game industry.

Workspaces

Learning institutions are workplaces, too. Faculty, educators and administrators need valued spaces where they can do their work independently as well as collaboratively. A combination of settings for individual focus, meetings with colleagues and student interactions allows them to thrive professionally.

Solutions

The right furniture can make a difference in supporting better learning spaces. We create insight-led products using our foundations in primary research, to help impact specific learning outcomes. We bring our deep expertise in learning together with industry leaders from our community of brands and partners to deliver added specialization in key educational stages. These proven solutions allow us to serve the many ways people learn.

Node®

Highly mobile Node chairs support collaboration, transition and movement for all the ways learning happens — both in and out of the classroom. With a wide range of base, seat, color and finish options, there's a Node for every body and every space.

Our mission is to create inspiring, flexible and functional spaces for learning environments. We believe that the environment plays an essential role in the intellectual, emotional and social development of individuals.

That's why we are committed to providing innovative, sustainable and aesthetic design solutions that encourage collaboration, creativity and development among students, teachers and professionals.

Our Community of Brands

Coalesse

Coalesse Design Line brings refined expression to communal spaces that work.

Beautiful furniture pieces balance form, function and materiality to create workspaces that energize people, inviting them to connect in comfort

and collaborate in community. Bringing the highest caliber of contemporary design together with a passion for supporting individual expression, these solutions empower people to create spaces that reflect their identity.

Viccarbe

An international reference in the manufacture of collaborative furniture, Viccarbe provides a collection from a blend of different cultures — the result of years collaborating with the most prestigious designers. Our aim is to inspire Mediterranean experiences through the design of timeless chairs, stools, armchairs, sofas, tables and accessories.

Orangebox

At Orangebox, we believe truly great workspaces should remove barriers and bring people together. Our Smartworking™ furniture solutions respond to our ever-evolving workplace needs with UK designed and manufactured furniture made to promote engagement, productivity, flexibility and flow so you can work wherever you want and however you choose.

BOLIA

For BOLIA, great design is not only what meets the eye, but just as importantly, how it is created – and the way it makes us feel. That is why BOLIA's collection is created by a brilliant community of designers from around the world. From brave new talents to world-renowned design studios – all with a shared passion for sustainable ideas, natural materials and New Scandinavian Design.

Proven Performance

Building a More Sustainable Future

Steelcase is committed to reporting annually on our sustainability vision, goals and progress. Steelcase first engaged with the Climate Disclosure Project (CDP) in 2011. We have reported Scope 1, 2 and ten categories of Scope 3 emissions through this program every year since 2015.

Certified Quality

We choose and use materials that are safe for people and the planet, helping our clients reach their sustainability goals. Many of our products are certified according to one or several programs: BREEAM, WELL, LEED, SCS Indoor Advantage™, Blue Angel, NF Environment, FEMB level®, GS Zertifikat.

How We Can Help

Research + Insights

Steelcase invests in human-centered research about the ways and places people work and learn. We study directly and in collaboration with leading research organizations, to uncover insights that lead us to innovation and breakthrough design.

People + Planet

As designers and makers of products in the 21st century, we believe that doing our best work for the places we all share starts with designing better futures for the wellbeing of people and the planet. We're doing better for people by developing initiatives that help communities thrive and foster inclusion, in our own Steelcase family and around the globe, and by always acting with integrity. We're doing better for the planet by committing to a net-zero future – making, sourcing and delivering products to reduce our carbon footprint, designing for circularity, and choosing and using materials responsibly. Working toward a more inclusive, sustainable and resilient future has always been part of who we are. Because when we do better, we help the world work better.

Design Inspiration

Our expert design team draws on research and insights to develop design principles for different learning space types. Translating these principles, we can share a variety of application ideas and digital files for easy planning and specifying. Our services include a unique focus on materials, to help our customers source these design elements from our partners.

Industry-Leading Warranty

No one in the industry offers a warranty as broad, deep and extensive as Steelcase. Our comprehensive warranty coverage reflects the quality, durability and long-term performance of our products.

The Steelcase Dealer Community

Creating the places where people can do their best work is a complex effort. Every Steelcase dealer is an engaged partner who can help you navigate every aspect of your workplace journey, from creation to installation and beyond — providing the capabilities and tailored solutions you need. We're with you every step of the way. Together, we deliver local expertise with the global power of Steelcase behind every experience.
