

Be Mine: 9 Things That Have Stolen Our Heart

We're spreading the love with a few new things that caught our eye at the office.

It's that time of year when hearts are candy-coated and Cupid's arrow is fully loaded. So, in honor of the lovey-doviest holiday, we're sharing some of the things we're head over heels for in our [social](#) and [informal spaces](#) at work.

A Fool for This Stool

If "x" marks the spot, then the [Turnstone Shortcut X Base](#) is where we want to be. With sleek legs, soft seating and a flexible shell, this stool brings cool elegance to any room. P.S. It comes in a chair, too.

Sealed With A Couch

Can you have a crush on a couch? We weren't sure until we saw [West Elm Work Mesa Sectional](#), part of the [new collection](#) from Steelcase and West Elm. With its modern form, luxe upholstery and tapered bronze legs, this stylish sectional has our heart.

The Armchair Affair

The [Philippa](#) from [Bolia](#) combines modern Nordic flair with classic 1950s style. Designed by Busetti Garuti Redaelli, Philippa has a sleek, organic form that pulls you in. Smitten? So are we.

Love at First Light

Designer Michael Anastassiades paired his passion for industrial simplicity with intricate symbolism to create the [FLOS IC Light Series](#). Each sleek lamp has a blown glass opaline design and moody light that warms our hearts — and any space.

On Cloud Nine

With those pillowy outdoor cushioned, [cane-and-canvas chairs](#) and [organically shaped porcelain stoneware tables](#), the EMU Terramare Series from [Coalesse](#) is one outdoor collection we can't stop swooning over.

Decor Amore

Roses are red, violets are blue, [Mitchell Gold + Bob Williams](#) have some sweet pieces for you. We adore their whimsical wall art, tabletop accessories and pillows that take your space from bland to beloved.

Loveable Leather

Meet the seat that swept us off our feet. The [West Elm Work Slope Lounge Chair](#) features top-grain aniline-dyed leather and hot-rolled steel frame that creates a cool, industrial loft vibe.

The Ottoman of Our Dreams

The Hecks Ottoman from [Blu Dot](#) is a bold little piece that works great on its own or in a group. With a variety of bright colors and versatile uses, this one-of-a-kind design makes us do a double take.

Table for Two...or Ten

Our hearts are a-flutter for this al fresco style. The [Hopper from Extremis](#) is a stylish take on traditional picnic tables, designed to allow for easy exits and added comfort, and roomy enough for work meetings or unwinding.

Let's keep the love alive. Take a look at [last year's list](#).
