

Webinar: IBM + Steelcase

Watch Our Webinar

Organizations around the world face uncertainty on multiple fronts. How will hybrid work evolve? How will economic conditions change? The need for flexibility is crucial. Join IBM and Steelcase for our webinar on demand for the latest global research, design ideas and inspiration for a more flexible workplace designed for hybrid work.

IBM global director of workplace, technology, design & integrated services, Kent Taylor, will join Chris Congdon, Work Better Editor in Chief and podcast host, and Meg Bennett, Steelcase global principal designer, to share how the new hybrid neighborhood is coming to life. IBM's new world-class facility in downtown Toronto was forward-thinking. Conceptualized prior to the pandemic, it put flexibility at the core of the work experience. Taylor will share what he calls the "amoeba space" as it continues to evolve.

Our expert panel will explore how hybrid neighborhoods can be designed differently to address people's need

Host: Katie Pace, Steelcase global communications director

Panel:

- Kent Taylor, IBM, global director of workplace, technology, design & integrated solutions
- Chris Congdon, Work Better, editor in chief + podcast host
- Meg Bennett, Steelcase, designer, global principal
