Get to know your Amia

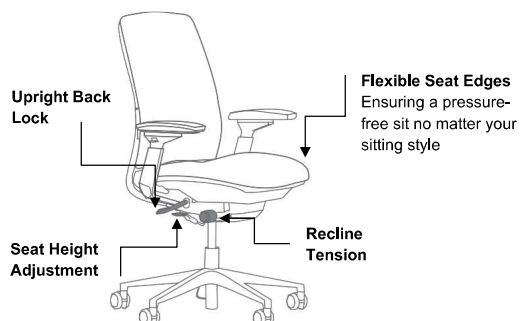

Amia which means “beloved” truly, lives up to its name as a fan favorite and offers hardworking baseline manual adjustments and a visually simple chair design with a significant level of comfort that feels different “at first sit.” Designed with high-performing features both seen and unseen – it was designed to help reduce our carbon footprint, designed for circularity, and uses materials that were chosen responsibly. Amia and Amia Air do not contain PVC and use string, instead of glue, to bound textile with foam. This eliminates the need for additional materials and enables easier recyclability.
