

Answer™ Fence Solutions

A Framework for Smarter Space

Steelcase

Structure for Open Spaces

Open workplaces need enough structure to support focus, connection and technology without feeling closed in. Answer Fence is a light-scale planning system that defines personal and shared spaces while keeping the floorplan open and inviting.

Designed for Efficiency

Part of the Answer portfolio, Answer Fence supports a wide range of people, applications and planning needs. Its light-scale design helps organizations use space efficiently while keeping even compressed footprints open and inviting.

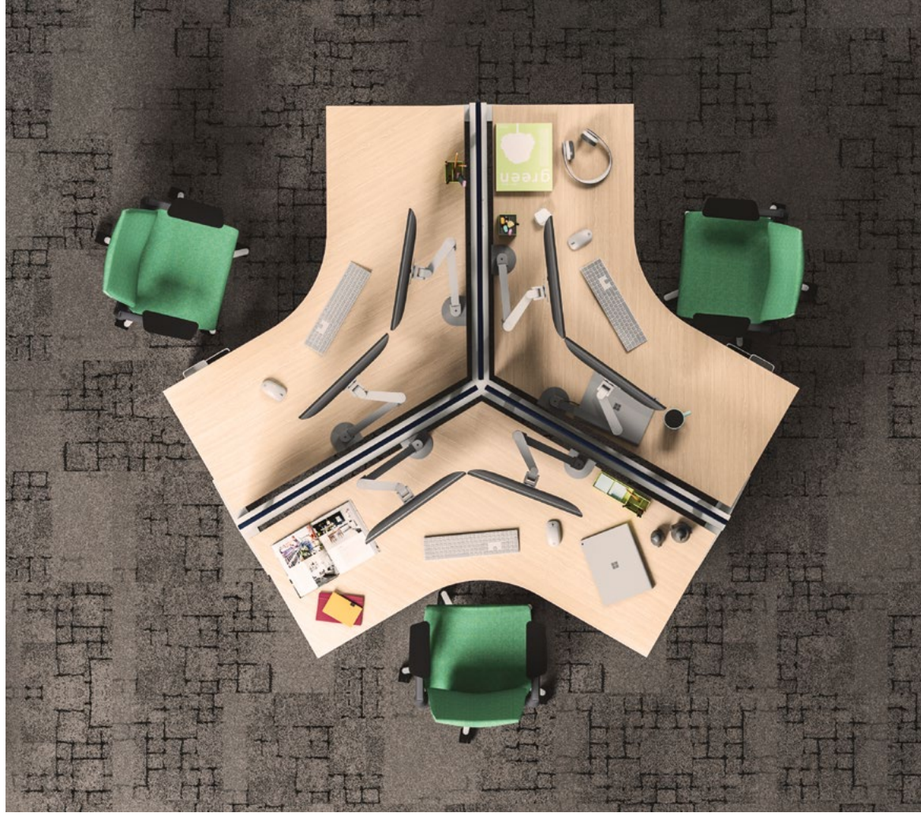

Definition Without Enclosure

Compatible with height-adjustable desks, Answer Fence creates in-line 90° and 120° applications for individual work, collaboration in pairs and team settings.

Room to Focus or Connect

Create personal and shared zones that give people a sense of privacy without separating them from the surrounding workplace.

Power Where It's Needed

Power and data route directly to fixed-height or height-adjustable desks, keeping access close to the work.

Choice That Keeps Space Open

Screen height, shape and transparency help determine how open or defined a setting feels. Answer Fence offers a range of screen and glass options to balance privacy, expression and connection across the open plan.

Choice in Transparency

Frameless glass screens add separation while maintaining a light visual presence. The ¼-inch glass is available in 13½"H and 19½"H options, with Clear, Frosted, Clear Bronze and Clear Smoke finishes offering a range of transparency and expression.

Integrated Portfolio

Screen, worksurface and storage choices help Answer Fence settings coordinate across the floorplate while supporting different needs for privacy, tools and technology.

Shape Privacy with Screens

Universal, Sarto and boundary screens provide different levels of definition and expression. Select the screen that supports the setting, from lower personal boundaries to taller separation.

Junctions and Connections

A flexible kit of junctions and connections supports a range of configurations for organizing individual and shared spaces.

End-of-Run

In-line

L Junction

T Junction

V Junction

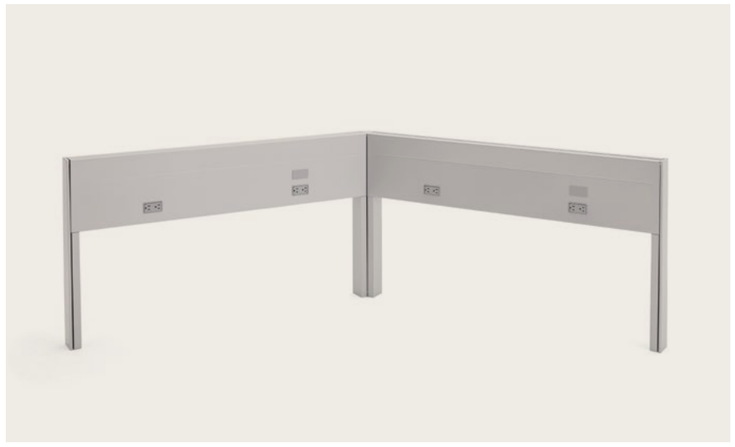

X Junction

Y Junction

Fence Foot

Style	Dimensions
