

Answer Solutions Specification Guide

Availability

Electronic price list updated with release 204.A (U.S.) and 158.A (Canada), dated February 16, 2026.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a **T**. Products that are scheduled to be culled are indicated with an **X**, followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

► For a list of all trademarks, refer to the last page of this specification guide. © 2026 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing/. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

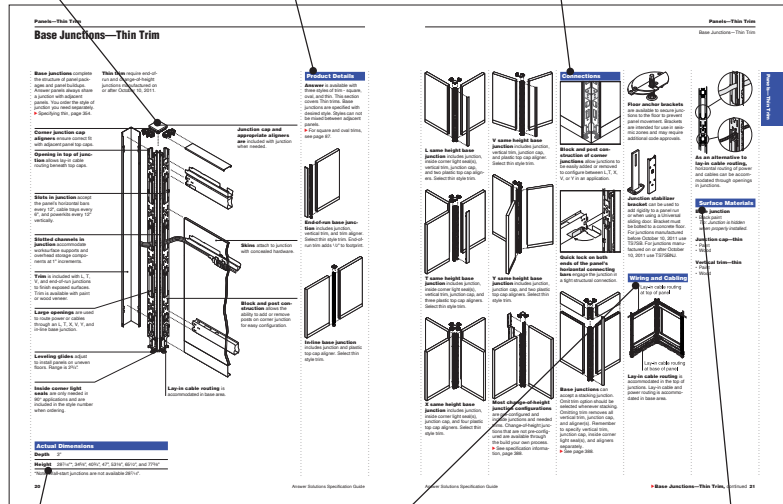

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
 - Dimensions
 - Style Number
 - Price

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Product Drawing shows you what the product looks like.

Standard Includes (under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify (under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information (under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Options (under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products provide specification information for products that are directly related.

Product Drawing shows you what the product looks like.

Tip 6

Required to Specify

Specify with *Customiz Stain*

Italic typeface on specifying pages usually identifies wording that you should use in your order.

i

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.

Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you need a style number and you need to find the page that has more details about the product.

Additional Resources

Answer is supported with an array of informational materials, tools, and software to help you plan an installation efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Additional storage products can be found in the *Storage Specification Guide*.

Printed Materials

Answer Product Brochure

This resource is your single source for everything you need to sell Answer. It contains photography showcasing a range of aesthetic and planning options. A complete statement of line, which highlights worksurfaces and storage options, also is included.
Form number 11-2374

Storage Specification Guide contains storage that attaches to Answer and the full offering of large case storage for use outside of workstations.

Answer Freestanding Specification Guide contains lighting, wall-mount storage, screens, and wire management products.

Express Program Specification Guide

This specification guide describes all Steelcase and Coalesse products including the finishes and options that are available as Express orders - manufactured and shipped within 7 business days.

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools – Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project-Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Answer Product Training

Basic training for Answer and many other Steelcase products is available as part of the Building Product Muscle curriculum on the Steelcase University Web site at village.steelcase.com.

The Answer BPM web-based module is an interactive course filled with pictures, product detail, and practice exercises designed to build knowledge of Answer's positioning, statement of line, features and benefits, competitive products, application, and sales presentation. It also provides printable job aids of all content covered in the course to serve as ongoing performance support for Steelcase and dealer salespeople. The Answer BPM is course SAL140.

Planning Ideas

Planning ideas are available to help inspire, envision, and plan great solutions. 2D and 3D AutoCAD drawings, Sketch-Up files, and SmartTools drawings are available on the Planning Ideas site: www.steelcase.com/planningideas.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Related Products

Worktools include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

► For additional information, refer to *Steelcase Worktools Specification Guide* or contact Steelcase at 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Height-adjustable desks include a full line of crank, counterbalance, and electric height-adjustable desks which promote well-being in the office.

► For additional information, refer to *Height-Adjustable Desks Specification Guide* or call 1.888.STEELCASE or send an email to lineone@steelcase.com.

Answer Assembly Tool

As an alternative to using a rubber mallet, frames can be assembled using the Answer Assembly Tool.

Call Steelcase for pricing and order information. 1.888.STEELCASE (1.888.783.3522) or send an email to lineone@steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/> Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

Answer Panel Overview—Thin Trim

Thin, square, and oval trim styles are available on Answer panels. Trim styles are not compatible with each other. Applications must use one consistent trim style.

Panel buildups allow you to create unique configurations by mixing surface materials and colors on segmented panels. Order skins and horizontal frame packages separately.

Panel frame is made up of two major elements—vertical base junctions and base horizontal connecting bars.

Stacking components can be used on both panel buildups and panel packages.

Panel packages are used to create common configurations quickly and easily. Packages include a horizontal frame package and skins for both sides of the panel.

Stacking junctions do not come with trim. Vertical trim must be ordered separately to cover any exposed junctions.
▶ Page 32

Stacking horizontal frame package must be used with stacking junctions.
▶ Page 62

Stacking junctions can be used in panel buildups and panel packages. They are available for in-line, L, T, X, V, Y, and end-of-run configurations.
▶ Page 32

Skins attach to frame without tools and can be removed and repositioned easily.
▶ Page 118

Base junctions are always shared by adjacent panels. They are available for in-line, L, T, X, V, Y, and end-of-run configurations. Wall-start junctions and off-module connectors are also available.
▶ Page 20

Base trims, open base, or big open base trim styles are available on panels with Thin trim style.

Base horizontal connecting bars lock into the vertical junctions at the top and the bottom location of base junction to provide structural stability for the panels.

Thin end-of-run trim has an integral finished end.

Alternate powerkit harness routing can be accommodated through the junction opening. In in-line applications installed on uneven floors, route harness through junction opening to prevent harness from being exposed.

Leveling glides adjust to install panels on uneven floors. Range is 2³/₄".

Powerkits include powerblocks attached to a supporting power tray.
▶ Page 178

Actual Dimensions

Height 29¹/₂", 35¹/₁₆", 41⁷/₈", 48¹/₁₆", 54¹/₄", 66¹⁹/₃₂", and 78³¹/₃₂"

Note: Height is minimum from floor to top of top caps. Leveling glides can extend 2³/₄".

Panel Buildups

Order panel components separately to create unique configurations.

1. Begin by planning your frames. Junctions determine height and horizontal connecting bars determine width.

1a. Corner junctions can easily be reconfigured by adding or removing a junction post (available on junctions shipped on or after October 10, 2011).

2. Order skins for both sides of panel.
Exception: Windows accommodate both sides of the panel.

Performance tackable acoustical fabric-covered skins

Tackable acoustical fabric-covered skins

Steel skins (12"H, 18"H, and 24"H have ribbed and perforated options)

Laminate skins

Wood skins

Tip: Wood skin sets are available for 42", 48", 54", and 66" panel heights.

Back painted glass skins

Markerboard skins

Slatwall

Windows

Technology skins

Answer allows a wide variety of skin arrangements to meet specific functional and aesthetic needs. Skins are not dedicated to a specific location and can be used anywhere on the face of the panel.

2. Order skins for both sides of panel, continued

When specifying skins, the total skin height will be 6" less than the overall panel height. For example, if the panel is 66"H the total skin height will be 60".

When planning skin segments, add skin heights together and add an additional 6" for total height.

Skins = 12" + 12" + 36" = 60"

Trim = 6"

Total = 66"H

Skins to the floor are available in fabric, steel, laminate, wood, or wood skin sets. Skins to the floor also plan 6" shorter than the height of the panel, but are taller in actual height to cover the base trim area of the panel. For example, a 54"H panel with to the floor skins would require a 48" skin with suffix "F", which would be approximately 53"H actual dimension.

Tip: Omit base trim option should be selected on the frame package when using a skin to the floor.

Panel Height	Total Standard Skin Height	Style Number	Total Skin To The Floor Height	Style Number
30"H Panel	24"	TS72430TK	24"	TS72430TKF
42"H Panel	36"	TS73630TK	36"	TS73630TKF
48"H Panel	42"	TS74230TK	42"	TS74230TKF
54"H Panel	48"	TS74830TK	48"	TS74830TKF

3. Specify powerkits where you will need power.

Base Junctions—Thin Trim

Base junctions complete the structure of panel packages and panel buildups. Answer panels always share a junction with adjacent panels. You order the style of junction you need separately. ▶ Specifying thin, page 332.

Thin trim require end-of-run and change-of-height junctions manufactured on or after October 10, 2011.

Corner junction cap aligners ensure correct fit with adjacent panel top caps.

Opening in top of junction allows lay-in cable routing beneath top caps.

Slots in junction accept the panel's horizontal bars every 12", cable trays every 6", and powerkits every 12" vertically.

Slotted channels in junction accommodate worksurface supports and overhead storage components at 1" increments.

Trim is included with L, T, V, and end-of-run junctions to finish exposed surfaces. Trim is available with paint or wood veneer.

Large openings are used to route power or cables through an L, T, X, V, Y, and in-line base junction.

Leveling glides adjust to install panels on uneven floors. Range is 2³/₄".

Inside corner light seals are only needed in 90° applications and are included in the style number when ordering.

Lay-in cable routing is accommodated in base area.

Junction cap and appropriate aligners are included with junction when needed.

Skins attach to junction with concealed hardware.

Block and post construction allows the ability to add or remove posts on corner junction for easy configuration.

Product Details

Answer is available with three styles of trim - square, oval, and thin. This section covers Thin trims. Base junctions are specified with desired style. Styles can not be mixed between adjacent panels.

▶ For square and oval trims, see page 85.

End-of-run base junction includes junction, vertical trim, and trim aligner. Select thin style trim. End-of-run trim adds 1/2" to footprint.

In-line base junction includes junction and plastic top cap aligner. Select thin style trim.

Actual Dimensions

Depth 3"

Height 28⁷/₁₆"*, 34⁵/₈", 40³/₄", 47", 53¹/₈", 65¹/₂", and 77³/₈"

*Note: Wall-start junctions are not available 28⁷/₁₆".

L same height base junction includes junction, inside corner light seal(s), vertical trim, junction cap, and two plastic top cap aligners. Select thin style trim.

V same height base junction includes junction, vertical trim, junction cap, and plastic top cap aligner. Select thin style trim.

T same height base junction includes junction, inside corner light seal(s), vertical trim, junction cap, and three plastic top cap aligners. Select thin style trim.

Y same height base junction includes junction, junction cap, and two plastic top cap aligners. Select thin style trim.

X same height base junction includes junction, inside corner light seal(s), junction cap, and four plastic top cap aligners. Select thin style trim.

Most change-of-height junction configurations are pre-configured and include junctions and needed trims. Change-of-height junctions that are not pre-configured are available through the build your own process. ▶ See specification information, page 366.

Wall-start junction secures to the stud in a structural wall or drywall fasteners can be used. Vertical trim is not needed. Also used in off-module applications. Wall-start junction adds $\frac{3}{16}$ " dimension to panel run.

An in-line top cap aligner is included with in-line junctions. Select thin style.

Top cap aligners are included with end-of-run, L, T, X, V, and Y junctions.

Posts can be added or removed from corner junctions to change from one corner to another.

Connections

Block and post construction of corner junctions allow junctions to be easily added or removed to configure between L, T, X, V, or Y in an application.

Quick lock on both ends of the panel's horizontal connecting bars engage the junction in a tight structural connection.

Base junctions can accept a stacking junction. Omit trim option should be selected whenever stacking. Omitting trim removes all vertical trim, junction cap, and aligner(s). Remember to specify vertical trim, junction cap, inside corner light seal(s), and aligners separately. ▶ See page 366.

Floor anchor brackets are available to secure junctions to the floor to prevent panel movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Junction stabilizer bracket can be used to add rigidity to a panel run or when using a Universal sliding door. Bracket must be bolted to a concrete floor. For junctions manufactured before October 10, 2011 use TS7SB. For junctions manufactured on or after October 10, 2011 use TS7SBNJ.

Bracket foot is visible on one side of panel when installed.

Junction stabilizer bracket blocks power routing in the panel base and just above the base areas. The bracket covers the slots on the junction where the powerkit connects in these two zones. It also blocks the ability for a powerkit harness, pass-through powerkit, or modular harness to route in the base area from an adjacent panel.

Junction stabilizer bracket also blocks lay in of cables in base area of panel.

Base Junctions—Thin Trim, continued

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Panels can support work-surfaces, shelves, and bins.

Wiring and Cabling

Lay-in cable routing at top of panel

Lay-in cable routing at base of panel

Lay-in cable routing is accommodated in the top of junctions. Lay-in cable and power routing is accommodated in base area.

As an alternative to lay-in cable routing, horizontal routing of power and cables can be accommodated through openings in junctions.

Junction tall sleeves can be ordered to cover the exposed metal edges in the large cable routing opening of junctions. Tall junction sleeve can only be used on junctions manufactured on or after October 10, 2011.

Lay-in junction cable sleeves can be added in the field to cover the exposed metal edges in lay-in cable space.

Modular harnesses that are 43" or 80" are available to change the height at which you are routing power kits or to route power from the panel base to different heights.

Carpet gripper glide caps may be added to panel glides to help hold panel in place (used only on junctions manufactured on or after October 10, 2011).

Surface Materials

Base junction

- Black paint
- *Tip: Junction is hidden when properly installed.*

Junction cap—thin

- Paint
- Wood

Vertical trim—thin

- Paint
- Wood

Painted style numbers

include all painted trim and wood style numbers include all wood trim. It is not recommended to mix painted and wood trim. Wood trim is slightly thicker as a result of adding veneer so some misalignment between elements may result.

Tip: Answer panel wood trims are only available with quarter-cut finishes with the exception of maple finishes. Maple on wood trims is only available with flat-cut finishes. For ordering simplicity, both flat-cut and quarter-cut finishes can be specified on panel trims. However, for all finishes except maple, if a flat-cut finish is selected, the trims will have the coordinating quarter-cut finish. For maple finishes, if quarter-cut is selected, the trims will have the coordinating flat-cut finish. Blending panel trims with other wood products that have flat-cut finishes will be visually acceptable for most applications. If a more exact match is desired for non-maple finishes, please specify quarter-cut finishes for the entire project. If a more exact match is desired for maple finishes, please specify flat-cut finishes for the entire project.

Application Topics

Stacking junctions

can be used with any height base junction.

Stability Guidelines

for application rules.
▶ See page 142

Change-of-Height—Thin Trim

Change-of-height trim

is available for base panels and stacking panels. It is used in in-line and corner applications.

► Specifying thin, page 337.

Note: Change-of-height trims are available in 6"H, 12"H, 18"H, 24"H, 30"H, and 36"H.

Change-of-height (two different panel heights) L, T, X, V, and Y junctions

are supported by style numbers in the following pages. Change-of-height (three different panel heights) T, X, and Y and change-of-height (four different panel heights) X junctions are not supported by style numbers and will need to be specified in the build your own section.

► See page 35 for understanding.

► See page 366 for specifying.

Note: Change-of-height junctions include the necessary change-of-height trim (including junction cap and aligners) for the change-of-height portion. See the following pages for panel height change-of-height applications (two different panel heights) and what is included in each style number.

Change-of-height junctions are shipped assembled. L, V, and some T junctions are handed. A post may have to be moved during installation to achieve the proper "hand".

90° Planning Application

An end-of-run aligner is included with the end-of-run change-of-height trim to provide tight alignment between the top cap and the change-of-height trim. No junction cap is required.

End-of-run change-of-height trim is used at end-of-run or in-line change-of-height. The top of the trim aligns with the top cap on the panel.

90° Planning Application

L corner change-of-height trim is used in a T or X change-of-height application when there are two panels at the tallest height located adjacent to each other. No aligners are required to connect the L corner change-of-height trim to the junction cap.

T vertical trim is used to finish trimming out the base of the panel. Base panel trim is included when specifying the change-of-height junction.

An L to T aligner should be specified when an L corner change-of-height trim resides directly above a T trim in a change-of-height application. The L to T aligner creates a tight connection between the two trim pieces.

Actual Dimensions

Depth	3"
Height	6 ³ / ₁₆ ", 12 ⁵ / ₃₂ ", 18 ¹ / ₂ ", 24 ¹ / ₂ ", 30 ⁷ / ₈ ", and 36 ⁷ / ₈ "

An L to T aligner must be specified if an L change-of-height trim is located directly above a T.

No aligners are required to connect a T corner change-of-height trim to the junction cap or top cap.

T corner change-of-height trim is used in T or X change-of-height applications where there are two panels at the same height located in-line with each other.

90° Planning Application

120° Planning Application

120° corner change-of-height trim is used in a V or Y change-of-height application when there is only one panel at the tallest height. No aligners are required to connect the trim to the junction cap or top cap.

120° to V aligner should be specified when a 120° corner change-of-height trim resides directly above a V trim. The 120° to V aligner creates a tight connection between the two trim pieces.

V corner change-of-height trim is used in a Y change-of-height application when there are two panels at the tallest height. No aligners are required to connect the trim to the junction cap or top cap.

Surface Materials

Change-of-height trim

- Paint
- Wood veneer

Junction cap

- Paint
- Wood veneer

Aligner

- Black plastic only

Application Topics

Change-of-height top cap option must be specified on the lower panel of in-line applications.

Tip: Change-of-height top cap option is only needed when using in-line change-of-height.

Thin trim top caps have a notch in one or both ends to accommodate in-line change-of-height applications.

Specify an in-line change-of-height junction to connect panels. In this application the in-line change-of-height junction includes a 42" high in-line base junction with a 24" end-of-run stacker. A horizontal stacking beam is required when using an in-line change-of-height junction to support the stacker.

Specify change-of-height top caps at one end unless the panel is adjacent to taller panels on both sides. Then specify a top cap change-of-height on both ends.

Change-of-Height Visual Overview—Thin Trim

Selecting a Junction

To determine the application you need, follow these steps:

1. Find the type of junction you are constructing – L, T, X, V, Y, or in-line. An array of the applications that are supported by style numbers are shown on the following pages. All same height corner junctions are supported by style numbers on pages 333-336. All change-of-height applications (with two different heights) are included on the following pages. If your application is not included (three heights in an T, X, or Y junction or four heights in an X junction) please see *Build Your Own—Thin Trim*, page 40, to build your desired application.
2. It may help if you make a sketch of the junction you are trying to build and then match it with the junction shown on the following pages.
3. Find the type of junction you are looking for in the following pages and see the corresponding specifying page.

Style numbers for junctions are based on the heights of the frames.

Digit in Style Number	Corresponding Frame Height
3	30"
Q	36"
4	42"
5	54"
6	66"
7	78"

Off-Module Panel Connector—Thin Trim

Off-module panel connectors allow a fin wall to be attached off-module to a spine wall in 1" increments.

► Specifying, page 354

Product Details

Wall-start junctions connect to the off-module panel connectors to start a panel run off from the spine. Available in 30"H, 36"H, 42"H, 48"H, 54"H, 66"H, and 78"H. Wall-start junction must match the height of the fin wall. Wall-start junctions are ordered separately.

Connections

Off-module fin wall must always be the same height or shorter than the spine wall.

24" maximum

When fin wall is more than 24" shorter than the spine wall an additional horizontal beam must be added to the spine wall at the same height as the fin wall. Order a stacking horizontal frame kit.

Spine wall skins must be segmented with a seam matching the height of the shorter fin wall. This allows access to the top bracket and the spine wall horizontal beam.

Actual Dimensions

Width 22¹/₂", 34¹/₂", 40¹/₂", 46¹/₂", 58¹/₂", and 70¹/₂"

Slatwall skins cannot be placed on the spine panel when an off-module fin panel is positioned below it.

When stacking on the fin panel, the spine wall skins must be segmented with a seam matching the height of the fin base panel.

When stacking wall-start junctions in an off-module application, the off-module panel connector connects to the base wall-start junction.

Two off-module panels can be connected back to back at the same location.

Spine: 36"H or 48" base junctions with stackers

36"H or 48"H Fin

For off-module fin walls 36"H or 48"H, base junctions must match the height of fin wall base junctions. Taller spine wall heights can be achieved by stacking.

When connecting two off-module fins at different heights on either side of the spine panel, an additional horizontal beam must be ordered and installed at the same height of the shorter fin panel.

An off-module fin wall cannot connect flush to the end of a panel in the spine wall. The closest connection point will leave a 2 1/2" tail on the spine including the end-of-run trim.

An off-module fin wall cannot attach at a junction in the spine wall. There is a 2" area of dead space on either side of the junction rendering a total of 4" dead space.

An off-module fin wall cannot be installed over a window that is located at the top of a spine panel.

An off-module connector cannot be used on a spine wall with open base trim.

An off-module connector cannot be used on a spine wall with big open base.

A fin panel connected off-module can have open base trim.

A fin panel connected off-module can have big open base trim.

Wiring & Cabling

Wiring and cabling components cannot be routed internally from a spine wall to an off-module fin wall without cutting openings in the spine wall skin. *Tip: It is recommended that you route wiring and cabling through the spine wall.*

Modular power components should be used to bring power from the spine wall to the workstation.

Surface Materials

Off-module bracket

- Black paint

Tip: Bracket is hidden when properly installed.

Off-module installation requires field modification of the light seal on the top skin. Surface covering is not affected.

Application Topics

Stability Guidelines for Application Rules

▶ Page 142

Stacking junctions can be used with any height base junction.

Bins, shelves, and workspaces cannot be attached off-module.

Off-module panel connector works with Thin trims. Thin style trims do not require a top cap filler.

When using a wall-start junction manufactured before October 10, 2011 with an off module panel connector manufactured on or after October 10, 2011 the "old" bottom bracket must be used. It can be ordered from Service Parts, part number TSS00938MP. If using an old off-module panel connector manufactured before October 10, 2011 with a wall-start junction manufactured on or after October 10, 2011 the bottom bracket included with the off module panel connector should be used.

When using frameless glass with clip attachment on a spine panel, with a same height off-module panel connection, the off-module cannot connect within 10" of an end-of-run or in-line junction connection.

Recessed frameless glass cannot be used on a spine panel hosting the same height off-module connection. The off-module fin panel can use recessed frameless glass, but must have the wallstart option specified.

Stacking Junctions—Thin Trim

Stacking junctions allow you to adjust the panel heights within a workstation.
 ▶ Specifying thin, page 355

Stacking junctions are available for in-line, L, T, X, V, Y, end-of-run, and wall-start configurations.

Stacking horizontal frame package, specified separately, must be used with stacking junctions. Each package includes one horizontal connecting bar.

When stacking, omit base junction trim and specify full height (base height plus stacking height) vertical trim, junction cap, and aligners separately.

Fork connectors are included with stacking junction for proper connection to the base panel.

Top cap from base panel is used to trim the panel.

Same height stacking corner junction posts and block come plant assembled in a designated L, T, X, V, or Y configuration.

Slots in stacking junctions are identical to base junctions to accept horizontal connecting bars, power-kits, and cable trays.

Cables can be laid into top of base panel. During initial installation, it is important to keep cabling loose so it can be temporarily moved aside to install stacking fork connector at a later date.

Base panel must always have two horizontal connecting bars. The bars must be in place prior to adding fork connectors into the junction.

Product Details

All existing base panels can accept a stacking junction.

Stacking junctions do not include any trim. The omit trim option should be specified on base junctions when stacking. All vertical trim, junction caps, and aligners are specified separately when stacking on base junction.

End-of-run stacking junction includes junction and fork connector. Full height trim must be specified separately. End-of-run trim adds 1/2" to footprint.

Actual Dimensions

- Depth** 3"
- Height** 6³/₁₆", 12³/₈", 18¹/₂", and 24³/₄"

In-line stacking junction includes junction and fork connectors.

L-stacking junction includes junction and fork connectors. Full height trim, junction cap and aligner(s) must be specified separately.

T-stacking junction includes junction and fork connectors. Full height trim, junction cap and aligner(s) must be specified separately.

X-stacking junction includes junction and fork connectors.

V-stacking junction includes junction and fork connectors. Full height trim, junction cap and aligner(s) must be specified separately.

Y-stacking junction includes junction and fork connectors.

Full height vertical trim is available in the specifying section in 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", and 90".
▶ Specifying thin, page 360.

Standard skins, cable trays, and powerkits are used in stackable solutions. To maximize the benefits of stackability, consider matching the skin height to the stacking junction height.

Connections

Skins on base panel do not need to be removed to install a stacking junction in most cases.

Fork connector is included with stacking junction for proper connection to the base panel. Two fork connectors are included with in-line, L, and V stacking junctions, three are included with T and Y stacking junctions, and four are included with X stacking junctions. One fork connector is included with each wall-start stacking junction and end-of-run.

Fork connectors secure into the base junction. Stacking junction is bolted to fork connectors.

Wiring & Cabling

Junction tall sleeves can be ordered to cover the exposed metal edges in the large cable routing opening of the junctions manufactured on or after October 10, 2011.

Horizontal routing of power and cables can be accommodated through openings in stacking junctions.

Power and data cables cannot route through the joint, the top of base panel and bottom of 6"H stacker interfere.

Powerkit installation for stacking components is the same process as for installation in base panels.

Stacking Junctions—Thin Trim, continued

Surface Materials**Stacking junction**

- Black paint

Tip: Junction is hidden when properly installed.

Application Topics**Stacking stability**

guidelines provide detailed information on applications.

▶ Page 142

Maximum height that can be stacked on a base panel is 36", consisting of one 24"H and one 12"H, or two 18"H stacking junction.

Maximum height that an Answer panel configuration can reach is 90".

Maximum number of stacking junctions that can be added to a base panel is two.

Any height base panel can be used with stacking junctions.

Bins and shelves can hang from the first stacked tier only.

When using 6"H stacking junctions, a stacking horizontal beam is not needed.

Hanging components are not allowed on the 6"H stacking junctions.

Frameless glass, transaction tops, Universal and Sarto top cap screens, and top cap mounted storage cannot be mounted on a 6"H stacking junction.

12"H slatwall skin cannot be placed on the top of the 6"H stacking junction.

6"H stacking junction can be placed only on base junction. It cannot be used on top of another stacking junction.

Glass windows cannot be placed in the top position of a panel segment that has a 6"H stacker.

Junction Posts

► Specifying, page 366

Product Details

Junction posts are available in 30"H, 36"H, 42"H, 48"H, 54"H, 66"H, and 78"H and can be ordered separately for use in building change-of-height junctions that are not supported by style numbers.

Junction posts do not come with trim. All trim must be specified separately.

Junction posts can be fastened to 90° corner or 120° corner junction blocks. Posts can be easily added or removed from the junction blocks to reconfigure the application.

Fasteners are included with the junction blocks. For additional fasteners order part number T521882MP (quantity 50).

Surface Materials

- Black paint only

Junction Blocks

► Specifying, page 367

Product Details

90° corner and 120° corner junction blocks can be ordered separately for use in building change-of-height junctions that are not supported by style numbers.

90° corner and 120° corner junction blocks are available in packages of three, four, or five.

Four fasteners are included with each junction block.

Junction post can be easily added or removed from junction blocks to reconfigure the application.

Surface Materials

- Black paint only

Inside Corner Light Seal

► Specifying, page 367

Product Details

Inside corner light seals are available in 54"H, 66"H, and 78"H and need to be specified in 90° corner junction applications (they are not required in 120° corner applications).

Inside corner light seals are available in packages of four.

Inside corner light seals should be specified to the panel in a shorter 90° change-of-height corner.

Inside corner light seals can be field cut to accommodate shorter post heights.

Surface Materials

- Black paint only

Build Your Own Elements—Thin Trim, continued

Junction Caps

► Specifying, page 368

Product Details

90° junction caps, 90° change-of-height junction caps, and 120° junction caps can be ordered separately for use in building change-of-height junctions that are not supported by style numbers.

Junction cap corner aligners (TS7CJCA10) must be ordered separately (package of 10).

90° junction caps can be used in L, T, or X applications and can be converted between applications by adding or removing a junction cap corner aligner.

120° junction caps can be used in V or Y applications and can be converted between applications by adding or removing a junction cap corner aligner.

90° change-of-height junction caps are used in some L, T, and X change-of-height junctions.

Surface Materials

- Plastic
- Wood veneer

Junction Cap Aligner

► Specifying, page 369

Product Details

Junction cap aligners need to be ordered for all corner junctions that are not supported by style numbers.

Junction cap aligners are available in packages of 10.

Junction cap aligners need to be ordered for use with 90° change-of-height caps.

Surface Materials

- Black plastic only

Vertical Trim Aligners

► Specifying, page 369

Product Details

L to T aligners and 120° to V aligners can be ordered separately for use in building change-of-height junctions that are not supported by style numbers.

Vertical trim aligners are available in packages of four.

L to T aligners are used in change-of-height applications to connect an L change-of-height trim to a T vertical trim.

120° to V aligners are used in change-of-height applications to connect a 120° change-of-height trim to a V vertical trim.

Surface Materials

- Black plastic only

End-of-Run Vertical Trim—Thin Trim

► Specifying, page 360

Product Details

Thin end-of-run vertical trim should be specified for the full height of the panel (base height plus stacking height, if stacking).

Thin end-of-run applications do not require a junction cap as the end-of-run trim connects with the panel top cap.

Vertical trim aligners to connect the end-of-run vertical trim to the top cap are included with the end-of-run vertical trim.

Thin end-of-run vertical trim can only be applied to end-of-run junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 28¹⁵/₁₆" , 34³/₄" , 41¹/₄" , 47⁷/₁₆" , 53⁵/₈" , 59¹³/₁₆" , 66" , 72³/₁₆" , 78³/₈" , 84⁹/₁₆" , and 90¹¹/₁₆"

L Vertical Trim—Thin Trim

► Specifying, page 361

Product Details

L vertical trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

90° junction caps and junction cap aligners are not included with L vertical trim and must be ordered separately.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 28¹⁵/₁₆" , 34³/₄" , 41¹/₄" , 47⁷/₁₆" , 53⁵/₈" , 59¹³/₁₆" , 66" , 72³/₁₆" , 78³/₈" , 84⁹/₁₆" , and 90¹¹/₁₆"

T Vertical Trim—Thin Trim

► Specifying, page 361

Product Details

T vertical trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

90° junction caps and junction cap aligners are not included with T vertical trim and must be ordered separately.

An L to T aligner needs to be specified in applications connecting a thin L change-of-height trim to a T vertical trim.
► See page 369.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 28¹⁵/₁₆" , 34³/₄" , 41¹/₄" , 47⁷/₁₆" , 53⁵/₈" , 59¹³/₁₆" , 66" , 72³/₁₆" , 78³/₈" , 84⁹/₁₆" , and 90¹¹/₁₆"

Build Your Own Elements—Thin Trim, continued

V Vertical Trim—Thin Trim

► Specifying, page 362

Product Details

V vertical trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

120° junction caps and junction cap aligners

are not included with V vertical trim and must be ordered separately.

A 120° to V aligner needs to be specified separately in applications connecting a thin 120° change-of-height trim to a V vertical trim.

► See page 369.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 28¹⁵/₁₆" , 34³/₄" , 41¹/₄" , 47⁷/₁₆" , 53⁵/₈" , 59¹³/₁₆" , 66" , 72³/₁₆" , 78³/₈" , 84⁹/₁₆" , and 90¹/₁₆"

End-of-Run/In-Line Change-of-Height Trim—Thin Trim

► Specifying, page 363

Product Details

End-of-run/in-line change-of-height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

Vertical trim aligners

to connect the change-of-height end-of-run/in-line vertical trim to the top cap are included with the end-of-run vertical trim.

Thin end-of-run/in-line change-of-height trim

can only be applied to junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 6³/₁₆" , 12⁵/₁₆" , 18¹/₂" , 24¹/₁₆" , 30⁷/₈" , 35³/₃₂" , and 37¹/₁₆"

L Corner Change-of-Height—Thin Trim

► Specifying, page 364

Product Details

L corner change-of-height trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

An L to T aligner

needs to be specified in applications connecting a thin L change-of-height trim to a T vertical trim.

► See page 369.

Thin L change-of-height trim

can only be applied to junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
 - Wood
- Tip: Composite veneers are not available on Answer trims.*

Actual Dimensions

Height: 6³/₁₆" , 12⁵/₁₆" , 18¹/₂" , 24¹/₁₆" , 30⁷/₈" , 35³/₃₂" , and 37¹/₁₆"

T Corner Change-of-Height—Thin Trim

► Specifying, page 364

Product Details

T corner change-of-height trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

An L to T aligner needs to be specified in applications connecting a thin L change-of-height trim to a T vertical trim.
► See page 369.

Thin T change-of-height trim can only be applied to junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
- Wood

Tip: Composite veneers are not available on Answer trims.

Actual Dimensions

Height: 6³/₁₆" , 12⁵/₁₆" , 18¹/₂" , 24¹/₁₆" , 30⁷/₈" , 35³/₃₂" , and 37¹/₁₆"

120° Corner Change-of-Height—Thin Trim

► Specifying, page 365

Product Details

120° corner change-of-height trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

A 120° to V aligner needs to be specified separately in applications connecting a thin 120° change-of-height trim to a V vertical trim.
► See page 369.

Thin 120° change-of-height trim can only be applied to junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
- Wood

Tip: Composite veneers are not available on Answer trims.

Actual Dimensions

Height: 6³/₁₆" , 12⁵/₁₆" , 18¹/₂" , 24¹/₁₆" , 30⁷/₈" , and 37¹/₁₆"

V Corner Change-of-Height—Thin Trim

► Specifying, page 365

Product Details

V corner change-of-height trim height should be determined by using the build your own change-of-height junctions or build your own stacking junction sections of this specification guide.

A 120° to V aligner needs to be specified separately in applications connecting a thin 120° change-of-height trim to a V vertical trim.
► See page 369.

V corner change-of-height trim can only be applied to junctions manufactured on or after October 10, 2011.

Surface Materials

- Paint
- Wood

Tip: Composite veneers are not available on Answer trims.

Actual Dimensions

Height: 6³/₁₆" , 12⁵/₁₆" , 18¹/₂" , 24¹/₁₆" , 30⁷/₈" , and 37¹/₁₆"

Build Your Own Change-of-Height—Thin Trim

Usage Rules

Follow these for all three height T, X, or Y applications and for all four height X applications. The change-of-height overview pages illustrate and provide a style number for all other standard combinations.

Example

Four change-of-height X application.

Post heights:

- 66"
- 54"
- 42"
- 30"

Trim:

- 12" change-of-height end-of-run
- Change-of-height corner junction cap
- 12" L change-of-height trim
- L to T aligner
- 12" T change-of-height trim
- Aligners

The specification guide supports specific style numbers for all L, T, X, V, and Y change-of-height applications with two heights (see page 338). If the change-of-height application has three or more heights, you must follow the directions on the following pages to properly specify your desired application.

Junction caps are always located at the second tallest panel height. If there are two panels at the same tallest height, the junction cap will be located there.

L to T aligners or 120° to V aligners are required to be specified in certain change-of-height applications to provide consistent alignment of trim pieces.

How to Build Your Own Change-of-Height Applications

Step 1: Draw out the panel application you would like to build (T, X, or Y).

Step 2: Junction Posts
Determine the post heights for each leg of the corner junction corresponding to the panel heights.

Side A (e.g. 78")
Side B (e.g. 66")
Side C (e.g. 54")
Side D (e.g. 42") (For use in X configurations with four different heights only)

Step 3: Junction Blocks
From the list below, select the change-of-height application type that matches your drawing:

- T or Y junction with three different panel heights (go to step 3a).
- X junction with three different panel heights (go to step 3b).
- X junction with four different panel heights (go to step 3c).

Step 3a: If the shortest panel is 48" high or lower, order three blocks.
▶ See specifying page 367.

If the shortest panel is 54" high, order four blocks.
▶ See specifying page 367.

Step 3b: If there are two panels at 78" high and the lowest panel is 54" high, order five blocks.
▶ See specifying page 367.

If there is a panel less than or equal to 48" high and only ONE panel at the tallest height, order three blocks.
▶ See specifying page 367.

For all other change-of-height configurations order four blocks.
▶ See specifying page 367.

Step 3c: For all X junctions with four different panel heights use four blocks.
▶ See specifying page 367.

Step 4: Inside Corner Light Seals

- You will need two inside corner light seals for a T corner and four inside corner light seals for an X corner (none are needed for a Y corner).
 - Inside corner light seals are sold in packages of four.
 - Packages come in three heights: 54", 66", and 78".
 - Specify the height to correspond to the tallest junction and field cut as necessary.
- Inside corner light seal—54"H, package of four **TS754ICLS**
Inside corner light seal—66"H, package of four **TS766ICLS**
Inside corner light seal—78"H, package of four **TS778ICLS**

Step 5: Vertical Trim
Locate the application below that is the same as the application you originally illustrated.
Specify the trims listed in the option you selected below. You will be required to refer back to your original drawing several times to calculate the proper trim heights.

Practice Examples—Thin Trim

Example One

Step 1: Draw out the application - X - 4 Change-of-Height

Step 2: Vertical Junction Posts	Quantity	Style Number
A 66" H	1	TS766JP
B 54" H	1	TS754JP
C 42" H	1	TS742JP
D 30" H	1	TS730JP
Step 3 (a-c): Junction Blocks (3c)	1	TS790JB4
Step 4: Light seal	1	TS754ICLS (4 pack)
Step 5: Trim		
End-of-run change-of-height = A - B	1	TS712TCICHT
L change-of-height = B - C	1	TS712TCLCHT
T change-of-height = C - D	1	TS712TCTCHT
90° change-of-height junction cap	1	TS790COHJC
L to T aligner	1	TS7LTA4 (4 pack)
Junction cap aligner	1	TS7CJCA10 (10 pack)

Note: Junction cap resides at the second tallest panel height. In this case there is a panel higher so it is a 90° change-of-height junction cap instead of a 90° corner junction cap.

Example Two

Step 1: Draw out the application - X - 3 Change-of-Height

Step 2: Vertical Junction Posts	Quantity	Style Number
A 54" H	1	TS754JP
B 54" H	1	TS754JP
C 42" H	1	TS742JP
D 30" H	1	TS730JP
Step 3 (a-c): Junction Blocks (3c)	1	TS790JB4
Step 4: Light seal	1	TS754ICLS (4 pack)
Step 5: Trim		
L change-of-height = A - C	1	TS712TCLCHT
T change-of-height = C - D	1	TS712TCTCHT
90° junction cap	1	TS790JC
L to T aligner	1	TS7LTA4 (4 pack)
Junction cap aligner	2	TS7CJCA10 (10 pack)

Note: Junction cap resides at the second tallest panel height. In this case there are two panels at the tallest height so a 90° junction cap would be specified instead of a 90° change-of-height junction cap as in the previous example.

Example Three

Step 1: Draw out the application - Y - 3 Change-of-Height

Step 2: Vertical Junction Posts	Quantity	Style Number
A 54" H	1	TS754JP
B 42" H	1	TS742JP
C 30" H	1	TS730JP
Step 3 (a-c): Junction Blocks (3b)	1	TS7120JB3
Step 4: Light seal	N.A.	N.A.
Step 5: Trim		
120° change-of-height = A - B	1	TS712T120CHT(W)
V change-of-height = B - C	1	TS712TVCHT(W)
120° corner junction cap	1	TS7120JC(W)
120° to V aligner	1	TS7120A4 (4 pack)

Build Your Own 3" In-Line Junction—Thin Trim

Usage Rules

If you need to add inches to your application while planning, order the following parts in the appropriate heights to create an "I" junction or a 3" in-line junction connection.

Tip: Junctions 48"H or shorter require two junction blocks. Junctions 54"H or higher require three junction blocks.

Normal In-Line Connection

3" In-Line Junction

TOP VIEW

How to Build Your Own 3" In-Line Junction

- Step 1:** 2 Panel Junction
TS7___JP
- Step 2:** Junction Blocks (pack of 3 - use 2 or 3 depending on height)
- Step 3:** 1 Junction Cap
TS790JC
- Step 4:** 1 Junction Cap Aligner (pack of 10 - use 1)
TS7CJCA10
- Step 5:** 2 T Vertical Trim
TS7___TTVT

Practice Example

Quantity	Style Number
2	TS754JP
1	TS790JB3
1	TS790JC
1	TS7CJCA10
2	TS754TTVT

Build Your Own Stacking Junctions—Thin Trim

Stacking junctions have several implications on the actual frame components of the panel, as well as how the frame is trimmed.

Note: Same height stacking junctions are supported as style numbers, see page 355. This section should only be used when you need to stack and there is not a pre-configured stacking junction style number.

When stacking be sure to follow the steps listed below:

Step 1: Start by drawing out your base application ONLY (do not include stackers).

Corner

Example: 42"H T panel application label one panel A, one panel B, and one panel C.

In-Line

Example: 42"H in-line panel application label one panel A and one panel B.

Step 2: Label each panel with a letter and dimensions (remember to work counterclockwise).

Corner

Example: 42"H T panel application label one panel A, one panel B, and one panel C.

In-Line

Example: 42"H in-line panel application label one panel A and one panel B.

Step 3: Omit **ALL** trims (this will omit the junction cap and aligners as well).

Step 4: Determine where you would like stacking junctions on your application and label them with a letter and dimension.

Remember: Maximum height that an Answer panel can reach is 90". Maximum height that can be stacked on a base panel is 36" consisting of one 24"H and one 12"H or two 18"H stacking junctions.

Corner

In-Line

Step 5: Look at your application in total. Does your application have an in-line or corner (L, T, X, V, or Y) stacking junction?

- For in-line stacking, go to step 6
- For corner (L, T, X, V, or Y) stacking go to step 7

Step 6: In-line stacking junctions

Step 6a: Specify in-line stacking junction for the shared junction. The height specified is the shortest height of the stacking junction. In this example it would be the height of stacking junction D (12").

Step 6b: Specify an end-of-run stacking junction for the difference between the tallest stacking junction and the lowest stacking junction. In this example it would be the height of stacking junction C minus the height of stacking junction D (24" - 12" = 12").

Step 6c: Go to step 7 to specify end-of-run stacking junctions for the stacking junctions that are not in-line. To complete specifying the stacking junctions in this example, one 24" end-of-run and one 12" end-of-run stacking junction would need to be specified.

Step 7: Corner (L, T or X, V, or Y) stacking junctions

Look at each panel individually. Start with panel A and determine what you would like to stack to that panel (if anything). Repeat on the remaining panels in the application.

Base panel A: Add 12" thin end-of-run stacking junction (Panel D)

Base panel B: No change

Base panel C: Add 12" thin end-of-run stacking junction (Panel E)

Specify the proper height and type of stacking junction

1. End-of-run stacking junction
2. L, T, X, V, or Y stacking junction

Stacking junction panel D: 12" stacking junction requires two 12" end-of-run stacking junctions

Stacking junction panel E: 12" stacking junction requires two 12" end-of-run stacking junctions

Base panel A: Add 12" thin end-of-run stacking junction (Panel D)

Base panel B: Add 12" thin end-of-run stacking junction (Panel E)

Base panel C: No change

Stacking junction panel D: 12" stacking junction requires one 12" end-of-run stacking junction and a 12" "L" to be shared with panel E

Stacking junction panel E: 12" stacking junction requires one 12" end-of-run stacking junction

Note: 1. Corner stacking junctions are created by attaching thin end-of-run stacking junctions and junction blocks.

2. Thin end-of-run stacking junctions are also used when creating an in-line change-of-height condition.

3. In-line stacking junctions are only used when creating in-line stacking conditions when adjacent panels are the same height.

► See page 356 to specify.

Build Your Own Stacking Junctions—Thin Trim, continued

Step 8: Stacking horizontal frame packages

Each stacking junction needs to be connected by at least one stacking horizontal frame package.

If one side of the panel section has two stacking junctions, and the other side has one, two stacking horizontal frame packages need to be specified.

If there is one stacking junction on both sides of the panel, specify one stacking horizontal frame package to be shared between the two stacking junctions.

▶ See page 372 to specify.

Step 9: Junction blocks

Junction blocks are required at the top of each junction whenever there are two or more junctions or stacking junctions adjacent to each other in a corner application.

▶ See page 367 to specify.

Step 10: Junction caps and aligners

Now that the application is constructed, trims need to be added (since ALL trims were omitted in step 2).

90° Applications (In-Line, L, T, and X)

- Same height base application stacking to same height application
- Change-of-height base application stacking to a change-of-height application
- Change-of-height base application stacking to same height application
- Same height base application stacking to change-of-height application

Same height base application stacking to same height application (see drawing)

Specify: Junction cap: 90° corner
Junction cap aligner: Number required is equal to the number of panels connecting to the junction cap

Change-of-height base application stacking to a change-of-height application (see drawing)

Specify: Junction cap: 90° corner change-of-height
Junction cap aligner: Number required is equal to the number of panels at the second tallest height

Step 10: Junction caps and aligners, continued**Change-of-height base application stacking to same height application (see drawing)**

Specify: Junction cap: 90° corner
Junction cap aligner: Number required is equal to the number of panels connecting to the junction cap

Same height base application stacking to change-of-height application (see drawing)

Junction cap: 90° corner change-of-height
Junction cap aligner: Number required is equal to the number of panels at the second tallest height

120° applications (V or Y) - All 120° applications require:

Junction cap: 120° junction cap
Junction cap aligner: Number required is one less than the number of panels connecting to the junction cap

For complete list of style numbers:

Junction cap ▶ See page 368.
Junction cap aligner ▶ See page 368.

Step 11: Trim**90° Applications****Level 1**

One panel at the tallest height
Two panels at the tallest height in an "L" configuration
Two panels at the tallest height along the spine of a "T" configuration
Look at both sides of the spine individually as two T trims (different heights) will need to be specified.
Three panels at the tallest height

Level 2

Two panels at the second height or higher in an "L" configuration
Two panels at the second height along the spine of a "T" configuration

Three panels at the second height or higher

Level 3

Three panels at third height

120° Applications**Level 1**

One panel at the tallest height
Two panels at the tallest height in a "V" configuration

Level 2

Two panels at the second height or higher in a "V" configuration

Required to Specify

End-of-run/change-of-height trim = tallest height minus second height
L trim = tallest height minus the third height (could be to the floor)
T trim = tallest height minus the third height (could be to the floor).

T trim = tallest height minus the fourth height (could be the floor).

L trim - second height minus third height
T trim = second height minus the third height (could be to the floor).
Look at both sides of the spine individually as two T trims (different heights) will need to be specified.
T trim - second height minus third height

T trim - third height minus fourth height

Required to Specify

120° change-of-height trim = tallest height minus second height
V trim = tallest height minus the third height (could be to the floor)

V trim = second height minus the third height (could be to the floor)

Step 12: Inside corner light seal

Specify Inside corner light seal to match the overall height of the lower panel in the application (used only on 90° applications).

Step 13: Change-of-height aligners

If you have both L and T aligners at one junction, an L/T aligner is needed.
If you have both 120° and V trims at one junction, a 120°/V aligner is needed.

Reconfiguring with Answer—General Guidelines

General Junction Guidelines

Junctions manufactured **before** 10/10/11 are purpose built and have specific features.

- Skin clip attachment locations every 12"
- Cannot accept 6" technology skin
- Cannot accept the open base trim
- Large opening for routing power and data is only at worksurface height
- Corner junctions are purpose built and cannot change configuration from one application to the next

Junctions manufactured **after** 10/10/11 are universal corner junctions.

- Skin clip attachment locations every 6"
- Can accept 6" technology skin
- Can accept the open base trim
- Large openings for routing power and data are located every 12" inside the panel
- Corner junctions are considered universal. The junction can easily be transformed from one configuration to another (i.e. turn an L- into a T-junction)

Purpose built and universal corner junctions can be used in the same application.

Junctions Manufactured Before and After 10/10/11

In-line junctions can be used with Oval, Square, or Thin panel trim. In-line junctions manufactured before OR after 10/10/11 can be used with Thin trim. The only differences between the junctions are those listed in the general guidelines above.

Corner Junctions

Same Height

- Same height are interchangeable between Oval, Square, or Thin panel trim.
- Same height corner junctions manufactured before OR after 10/10/11 can be used with Thin trim.

• **Universal junction configuration** (manufactured after 10/10/11)

- Post and block configuration – all the posts are the same height.
- Can be reconfigured to another style corner junctions.
- Can accept Oval, Square, or Thin panel trims.

Examples:

1 Change an L to a T

- Add one junction post
- Replace the L trim with a T trim
- Add a junction cap aligner
- Inventory L trim

2 Change an L to an X

- Add one junction post
- Add two junction cap aligners
- Inventory L trim

3 Change a T to an L

- Remove one junction post
- Remove one junction cap aligner
- Replace the T trim with an L trim

4 Change an X to an L

- Remove two junction posts
- Remove two junction cap aligners
- Add an L trim

5 Change an X to a T

- Remove one junction post
- Remove one junction cap aligner
- Add a T trim

• **Purpose Built Junction configuration** (manufactured before 10/10/11)

- Cannot be reconfigured to be another style corner junction. If desire to change from an L- to a T-junction, the entire junction must be changed out.
- Can accept Oval, Square, or Thin panel trims.

Corner Junctions – Change-of-Height

Thin Trim

- Change-of-height corner junctions can only accept universal junctions manufactured after 10/10/11.
- Junction posts will **only go up to the height of the panels**

Example:

1 42/54" L-junction

- One junction post at 42"H
- One junction post at 54"H

- Cannot accept purpose built change-of-height junctions manufactured before 10/10/11.
- When reconfiguring from Square or Oval trim to Thin trim, purpose built corner junctions must be change to universal corner junctions.

Junctions Manufactured Before and After 10/10/11, continued

Corner Junctions – Change-of-Height, continued

Oval and Square Trim

- Can accept junctions manufactured before 10/10/11 (purpose built configuration).
- Can accept junctions manufactured after 10/10/11 (universal junction configuration).
- Junction posts will go up to the **highest** panel height

Example:

- ❶ 42/54" L-junction
 - Two junction posts at 54"H

End-of-Run Junctions

Thin Trim

- Thin trim requires Thin end-of-run junctions
- When reconfiguring from Square or Oval trim to Thin trim, all end-of-run junctions must be changed to Thin end-of-run junctions

Square and Oval Trim

- The end-of-run junction utilized in a Square or Oval application is the same as the in-line junction.
- Square and Oval applications cannot use Thin end-of-run junctions.

Stacking Junctions

- Stacking junctions manufactured before 10/10/11 can be stacked on purpose built junctions (before 10/10/11) or universal junctions (after 10/10/11).
- Stacking junctions manufactured after 10/10/11 can be stacked on purpose built junctions (before 10/10/11) or universal junctions (after 10/10/11).

Trims

Trim style must be consistent across the entire application. Trim styles cannot be mixed and matched across applications.

Example:

- ❶ Square top caps cannot be used with Thin vertical trims. The entire application must be Thin trim (top caps and vertical trim) OR the entire application must be Square trim (top caps and vertical trim).

New Junctions (after 10/10/11) to New Junctions

End-of-Run Junctions

- **End-of-run junction** includes junction post plus an end-of-run trim and aligner.
 - When reconfiguring a junction post can be used at an end-of-run or as a post to make up a 90° or 120° corner.
 - End-of-run junctions are not the same as in-line junctions.

In-line Junctions

- **End-of-run junction** includes a junction and an in-line aligner.
 - In-line junctions cannot be used at an end-of-run with Thin trim.
 - In-line junctions can be used at an end-of-run with Square or Oval trim.
 - In-line junctions **cannot** be used at a corner junction.

Corner Junctions

- Universal corner junctions are made up of blocks and posts.
- Universal corner junctions can be changed from one configuration (i.e. L) to another configuration (i.e. T, X, V, or Y) by adding blocks and/or junction posts.
- When reconfiguring corner junctions, additional corner trim and aligner pieces will need to be ordered.

SmartTools Specification Tips

- Before 10/10/11 Oval and Square junctions were manufactured with purpose build junctions. Starting 10/10/11 Oval and Square junctions began being manufactured with universal junctions. The style number stayed the same but the junction construction changed.
- SmartTools designates new and old junctions. Old junctions are designated with an asterisk (*).
- SmartTools provides the ability to change between new and old junctions, as well as connect them together where applicable.
- For assistance in reconfigurations, SmartTools allows designers to create "alternatives". Alternatives will allow designers to create an original application (alternative one) and make a copy of it (alternative two). The designer can then make design changes to alternative two to reflect what the reconfigured space will look like.
- Once design changes are made, the designer will be able to use SmartTools outputs to compare alternative one to alternative two to determine the following information:
 - Bucket one: What product from alternative one can be used in alternative two.
 - Bucket two: What product from alternative one will not be needed in alternative two.
 - Bucket three: What additional product will be needed in alternative two.
 - Since universal junctions can be broken down into individual components (blocks, posts, light seals, and trim), to re-use the maximum number of parts a designer can manually determine if a match can be made between the parts left in bucket two and the parts needed in bucket three.

Base Horizontal Frame Packages—Thin Trim

Base horizontal frame packages include horizontal connecting bars that lock into vertical junctions and complete the structure of a panel. A top cap and pair of base trims are also included. Cable tray and base cable tray are available as options.

► Specifying, page 370

Top cap snaps onto top of panel skins. Top caps to accommodate change-of-height are also available. Wood veneer is available as an option.

Quick lock connects horizontal bars to vertical junctions for quick assembly.

Horizontal connecting bars lock into vertical junctions. The top bar can be lowered to a maximum of 24" from the top position. The bottom bar must always be positioned in the lowest slot in a junction.

Optional base cable tray can be used to support lay-in of cables.

Big open base option includes vertical trim.

Optional cable tray can be used for additional support of cables. Additional cable trays can be installed and arranged at various heights within the frame for communications access and cable routing.

Base trims, open base, or big open base trim styles are available on panels with Thin trim style.

Base trim with knockouts accommodates power and communication terminations. Top knockout is for power, bottom knockout is for communication. Filler to close unused openings is available from Service Parts (**TS7BTFSR**).

Actual Dimensions

Width 17¹³/₁₆" , 23¹³/₁₆" , 29¹³/₁₆" , 35¹³/₁₆" , 41¹³/₁₆" ,
47¹³/₁₆" , 59¹³/₁₆" , and 71¹³/₁₆"

Base trim height 3³/₄"

Big open base height 9¹¹/₁₆"

Receptacle Opening

Width of opening 2⁵/₈"

Height of opening 1³/₈"

Product Details

Horizontal frame packages are available when you want to build up your own panel. The package includes all the components of a panel except the skins so you can order the skins separately to mix combinations of skin surface materials and colors. These frame packages do not include vertical junctions. Options for big open base and open base are available. Cable trays and base cable trays are optional.

Two horizontal connecting bars must be used in each base panel.

Horizontal bars determine panel width. They are not dedicated to a specific panel height; any horizontal bar can be used or reused with any junction height.

Top horizontal bar may be lowered to allow for a 12"H, 18"H, or 24"H glass window to be placed at the top of the panel. Bottom horizontal bar in base panel must remain in lowest position.

Top caps are available in three styles - thin, square, and oval. This section covers Thin trims. Horizontal frame packages should be specified with Thin trim. Thin, square, and oval top caps can not be mixed between adjacent panels.

Tip: Change-of-height top cap option is only needed when using in-line change-of-height.

Omit top cap option is available and should be selected when adding a frameless glass screen to the top of the panel, when spanning a single top cap across multiple panels, or when adding a Universal or Sarto screen to the top of the panel.

Spanning top caps are available for Thin trims.

When spanning a single top cap across multiple panels, select the omit top cap option and specify a spanning top cap separately. Top cap width must match total width of spanned panels.

Spanning top caps can only be used in an in-line condition. They cannot span over a corner junction.

Spanning top caps can be used on any panel height.

In-line spanning top cap lightseals should be specified separately for each in-line panel joint the top cap spans.

Omit base trim option should be selected when using skins to the floor.

Base trims are available with or without knockouts. Base trims with knockouts accommodate power and communication terminations.

Open base trims are available. They do not accommodate power and data routing or entry in the base. Open base trim can only be added on a junction manufactured on or after October 10, 2011.

Open base trims occupy the same space as the standard base trims. Open base trims occupy the bottom 3¾" of the panel; the height of the opening is 2½".

A panel with open base trim cannot serve as the spine panel in an off-module connection.

Big open base option is available on Thin trim panel. The horizontal frame package includes two inside vertical trims in addition to two horizontal connecting bars and a Thin trim top cap.

Big open base option provides a larger open base aesthetic for the panel. The opening is about 10"H.

When the big open base option is specified, big open base skins must be used.

When big open base is used, power is available only at 20"H or higher.

Big open base trim package is available for reconfiguring a panel segment to the big open base. The big open base trim package includes two inside vertical trims. The big open base reconfiguration package is **TSBBOBTRM**.

An off-module connector cannot be used on a spine wall with big open base.

For a power and data infed cover for use with Answer panel or Answer Beam big open base trim, contact Specials.

Cable tray can be positioned every 6" vertically above the base to support cable routing.

Cable tray can accept added cable carriers attached below tray to expand horizontal cable management options.

▶ See *Montage Specification Guide* for cable carrier (**ZCC**).

Base cable tray is used only in the base to support lay-in cable routing in the base. Base cable tray cannot be used if omit base trim option is selected for one or both sides of panel or if open base trim is used.

Base Horizontal Frame Packages—Thin Trim, continued

Connections

Quick lock on both ends of the panel's horizontal connecting bars engage the junction in a tight structural connection.

Wiring & Cabling

Vertical lay-in cable routing can be accommodated behind skins.

As an alternative to lay-in cable routing, vertical routing of power and cables through panel interior can be accommodated by openings in horizontal connecting bars. Also, see lay-in utility packages for vertical lay-in of power and cables.
▶ Page 168

Power and data enter a panel with big open base from underneath the panel. Route power and data up through large vertical routing openings in the horizontal bar. Use a multipurpose infeed to bring power into a panel with big open base.

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Knockouts in base trim can be removed in the field where needed. Knockout dimensions are 1³/₈"H by 2⁵/₈"W.

Communication outlets attach to openings in panel base trim. Order communication outlets from an outside vendor. Knockouts for communication in base accommodate modular furniture size only.

Surface Materials

Top cap base trim, open base trim, and big open base vertical trim

- Paint color chosen on base trim will also apply to the top cap. They are not chosen independently.
 - Wood veneer (option)
- Tip: Answer panel wood trims are only available with quarter-cut finishes with the exception of maple finishes. Maple on wood trims is only available with flat-cut finishes. For ordering simplicity, both flat-cut and quarter-cut finishes can be specified on panel trims. However, for all finishes except maple, if a flat-cut finish is selected, the trims will have the coordinating quarter-cut finish. For maple finishes, if quarter-cut is selected, the trims will have the coordinating flat-cut finish. Blending panel trims with other wood products that have flat-cut finishes will be visually acceptable for most applications. If a more exact match is desired for non-maple finishes, please specify quarter-cut finishes for the entire project. If a more exact match is desired for maple finishes, please specify flat-cut finishes for the entire project.*

Horizontal connecting bars

- Black paint
- Tip: Components are hidden when properly installed.*

Application Topics

Use a cable tray to provide extra support for 60"W and 72"W full skins where people may lean against the panel.

Stacking Horizontal Frame Packages

Stacking horizontal frame package provides structural stability for stacking junctions.
▶ Specifying thin, page 372

Each stacking junction is specified separately.
▶ Page 355

When stacking, vertical trim must be specified separately to span the full-height of the base junctions plus the stacking junction.

Each stacking segment must have one horizontal connecting bar.
Exception: If a window is used with stacking junctions, a horizontal connecting bar is not needed.

Horizontal connecting bar is included with each stacking horizontal frame package.

Skins, ordered separately, are added to both sides of stacking frame.

Actual Dimensions

Width 17¹/₄", 23¹/₄", 29¹/₄", 35¹/₄", 41¹/₄", 47¹/₄", 59¹/₄", and 71¹/₄"

Product Details

Stacking horizontal frame package includes one horizontal connecting bar. Stacking junction is not included.

Stacking horizontal frame package is available in eight widths— 18", 24", 30", 36", 42", 48", 60", and 72"—to match panel width. These horizontal connecting bars are identical to those in horizontal frame packages and can be re-used with any type of junction.

Connections

Quick-lock mechanism on the horizontal connecting bar engages the stacking junction in a tight structural connection.

Base panel must always have two horizontal connecting bars.

Wiring & Cabling

Vertical lay-in cable routing

Vertical lay-in cable routing can be accommodated behind skins.

Vertical routing of power and cables through panel interior is accommodated by openings in horizontal connecting bars.

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Power kit installation for stacking components is the same process as for installation in base panels.

Surface Materials**Stacking horizontal frame package**

- Black
- Tip: Components are hidden when properly installed.*

Application Topics

When stacking a 12"H, 18"H, or 24"H window, a stacking horizontal frame package is not needed. Remember, the base panel always has two horizontal connecting bars for support.

When double stacking junctions, each stacking junction must have a horizontal beam.

No more than two windows can be stacked on top of each other.

Stacking horizontal frame package

is used when additional horizontal bar is needed in off-module application. See off-module guidelines.

Stacking Stability Guidelines

provides detailed information on applications.

▶ Page 142

Frameless Glass Screens with Recessed Attachment—Thin Trim

Frameless glass screen with recessed attachment can be added to the top of a panel to help define space and provide some privacy while still providing access to natural light and promoting communication between adjacent workers.

► Specifying, page 374

Actual Dimensions

Glass Width—standard: 23⁷/₈", 29⁷/₈", 35⁷/₈", 41⁷/₈", 47⁷/₈", 53⁷/₈", 59⁷/₈", 65⁷/₈", 71⁷/₈", 77⁷/₈", 83⁷/₈", 89⁷/₈", and 95⁷/₈"

Glass Width—change-of-height one end Thin trim: 23⁷/₁₆", 29⁷/₁₆", 35⁷/₁₆", 41⁷/₁₆", 47⁷/₁₆", 53⁷/₁₆", 59⁷/₁₆", 65⁷/₁₆", 71⁷/₁₆", 77⁷/₁₆", 83⁷/₁₆", 89⁷/₁₆", and 95⁷/₁₆"

Glass Height: 9⁵/₁₆", 15¹/₂", 21¹/₁₆", and 27⁷/₈"

Glass Thickness: 3⁸/₁₆"

Product Details

Frameless glass screen with recessed attachment is secured to horizontal connecting bar by supports below the top cap. Two brackets are used below the top cap to attach the glass to the panel on 24"–66"W panels. Three brackets are used on panels 72" and wider.

Frameless glass screens with recessed attachment can be used on panels with thin profile trim.

Frameless glass kit includes glass screen, supports, and top caps.

Gap between adjacent glass screens is 1/8".

Surface Materials

Glass

- 6500 Clear Glass
- 6530 Frosted Glass

Tip: Frosted glass for recessed frameless glass attachment is a laminated construction. There may be variation in color, texture, and finish between the sample of 6530 Frosted Glass and the actual product.

Top cap

- Paint
- Wood veneer

Application Topics

Frameless glass screen can be placed on the top of a panel only. Top beam in the panel must be located in the top position of the frame in order to support frameless glass. Frameless glass can be used on base panels or stacking panels.

Frameless glass screen cannot be used when a window is located in the top position of the panel.

Frameless glass screen cannot be added to a panel segment with a 6" stacker.

At an in-line change-of-height condition, a change-of-height top cap should be specified. Change-of-height top cap option is available to allow for positioning of glass next to change-of-height trim on one side only. Glass is shortened and top cap provided supports change-of-height on one end only. A change-of-height top cap is not needed at a corner change-of-height condition.

Frameless glass screen will not fit between two in-line change-of-height trims.

Frameless glass kit is available without glass screen to accommodate customer's own glass. See chart of field installed glass size requirements for specific dimensions required for glass to fit in frameless glass brackets. Steelcase recommends the use of safety glass meeting ANSI Z97.1 for field installed glass. Check with your local building authority for requirements in your area.

A single frameless glass screen can span over two or more in-line panels up to 96".

Frameless glass screens with recessed attachment cannot span a corner junction.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap lightseal attaches to underside of top cap to fill space between skin lightseals. Specify one for each in-line junction the frameless glass screen spans.

Before November 2012

After November 2012

Plastic end-of-run and junction cap aligners manufactured after November 2012 will have features to accommodate recessed frameless glass. Aligners manufactured before November 2012 will not be able to accommodate recessed frameless glass and new aligners will need to be ordered.

Each Answer frameless glass with recessed attachment kit will come with two aligners to align top caps when two frameless glass kits are used in an in-line condition.

When specifying frameless glass or top cap mounted storage in a wall-start application or an off module fin panel, the wall-start option should be selected. A recessed frameless glass top cap connector (**TS7TFGR**) must also be ordered for this application.

A recessed frameless glass top cap connector (TS7TFGR) must be specified when a frameless glass screen is adjacent to a corner junction and the frameless glass top caps are located at a different (lower) height than the junction cap.

A recessed frameless glass top cap connector must be specified when recessed frameless glass is coming into an in-line change-of-height condition and the recessed frameless glass is located on the lower panel.

A recessed frameless glass top cap connector (TS7TFGR) must be specified when a frameless glass screen is adjacent to a boundary screen that is the same or taller height as the panel.

A recessed frameless glass top cap connector must be specified when recessed, frameless glass is adjacent to a utility pole.

Frameless Glass Screens with Recessed Attachment—Thin Trim, continued

Recessed frameless glass cannot be used on a spine panel hosting the same height off-module connection. The off-module fin panel can use recessed frameless glass, but must have the wall-start option specified.

Both ends of the frameless glass screen must be at a junction. The frameless screen cannot end in the middle of a panel segment.

When omitting glass and using acrylic or 3 form material in place of glass additional support clamps may need to be ordered as service parts (**T522096SR** or **T522097SR**). Frameless glass kits 54" to 66" will also require additional support clamps to be ordered. When installing the support clamps the maximum allowed distance between the clamps is 48".

Frameless Glass Screens with Clip Attachment—Thin Trim

Frameless glass screen with clip attachment

can be added to the top of a panel to help define space and provide some privacy while still providing access to natural light and promoting communication between adjacent workers.

► Specifying, page 378

Product Details

Frameless glass screen with clip attachment

is secured to horizontal connecting bar by supports below the top cap and brackets above the top cap. Two brackets are used above the top cap to attach the glass to the panel on 24"–60"W panels. Three brackets are used on panels 78" and wider.

Frameless glass screens with clip attachment

can be used on panels with thin profile trim.

Frameless glass kit

includes glass screen, brackets, supports, and top cap with holes to accommodate brackets.

Gap between adjacent glass screens is $\frac{1}{4}$ ".

Actual Dimensions

Glass Width – standard: 23 $\frac{3}{4}$ ", 29 $\frac{3}{4}$ ", 35 $\frac{3}{4}$ ", 41 $\frac{3}{4}$ ", 47 $\frac{3}{4}$ ", 59 $\frac{3}{4}$ ", 71 $\frac{3}{4}$ ", 77 $\frac{3}{4}$ ", 83 $\frac{3}{4}$ ", 89 $\frac{3}{4}$ ", and 95 $\frac{3}{4}$ "

Glass Width – change-of-height one end thin trim: 23 $\frac{1}{4}$ ", 29 $\frac{1}{4}$ ", 35 $\frac{1}{4}$ ", 41 $\frac{1}{4}$ ", 47 $\frac{1}{4}$ ", 59 $\frac{1}{4}$ ", 71 $\frac{1}{4}$ ", 77 $\frac{1}{4}$ ", 83 $\frac{1}{4}$ ", 89 $\frac{1}{4}$ ", and 95 $\frac{1}{4}$ "

Glass Height: 11 $\frac{3}{4}$ "

Glass Thickness: $\frac{3}{8}$ "

Surface Materials

Glass

- 6500 Clear Glass
- 6530 Frosted Glass

Tip: Frosted glass for clip attachment frameless glass is a double opaque glass construction. There may be variation in color, texture, and finish between the sample of 6530 Frosted Glass and the actual product.

Brackets

- Paint

Top cap

- Paint
- Wood veneer

Application Topics

Frameless glass screen

can be placed on the top of a panel only. Top beam in the panel must be located in the top position of the frame in order to support frameless glass. Frameless glass can be used on base panels or stacking panels.

Change-of-height top cap option is available to allow for positioning of glass next to change-of-height trim on one side only. Glass is shortened and top cap provided supports change-of-height on one end only.

90" and 96" wide frameless glass screen kits include three brackets. Two brackets attach to supports below the top cap. The third bracket attaches only to the top cap through a hole that is drilled in the top cap by the installer on site.

Frameless glass screen will not fit between two change-of-height trims.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap lightseal attaches to underside of top cap to fill space between skin lightseals. Specify one for each in-line junction the frameless glass screen spans.

Frameless glass screen cannot be used when a window is located in the top position of the panel.

Frameless glass screen

cannot be added to a panel segment with a 6" stacker.

A single frameless glass screen can span over two or more panels.

Field-Installed Glass Size Requirements

Style Number	Maximum Height	Maximum Width	Thickness Range (min-max)
Standard			
TS71224TFG	11 ³ / ₄ "	23 ³ / ₄ "	.350-.400"

TS71242TFG	11 ³ / ₄ "	41 ³ / ₄ "	.350-.400"
TS71248TFG	11 ³ / ₄ "	47 ³ / ₄ "	.350-.400"
TS71260TFG	11 ³ / ₄ "	59 ³ / ₄ "	.350-.400"
TS71272TFG	11 ³ / ₄ "	71 ³ / ₄ "	.350-.400"
TS71278TFG	11 ³ / ₄ "	77 ³ / ₄ "	.350-.400"
TS71284TFG	11 ³ / ₄ "	83 ³ / ₄ "	.350-.400"
TS71290TFG	11 ³ / ₄ "	89 ³ / ₄ "	.350-.400"
TS71296TFG	11 ³ / ₄ "	95 ³ / ₄ "	.350-.400"
Change-of-Height – one end			
TS71224TFG	11 ³ / ₄ "	23 ¹ / ₄ "	.350-.400"
TS71230TFG	11 ³ / ₄ "	29 ¹ / ₄ "	.350-.400"
TS71236TFG	11 ³ / ₄ "	35 ¹ / ₄ "	.350-.400"
TS71242TFG	11 ³ / ₄ "	41 ¹ / ₄ "	.350-.400"
TS71248TFG	11 ³ / ₄ "	47 ¹ / ₄ "	.350-.400"
TS71260TFG	11 ³ / ₄ "	59 ¹ / ₄ "	.350-.400"
TS71272TFG	11 ³ / ₄ "	71 ¹ / ₄ "	.350-.400"
TS71278TFG	11 ³ / ₄ "	77 ¹ / ₄ "	.350-.400"
TS71284TFG	11 ³ / ₄ "	83 ¹ / ₄ "	.350-.400"
TS71290TFG	11 ³ / ₄ "	89 ¹ / ₄ "	.350-.400"
TS71296TFG	11 ³ / ₄ "	95 ¹ / ₄ "	.350-.400"

Tip: Field installed glass should always be tempered. Laminated glass must not be used.

When using frameless glass on a spine panel with a same height off-module panel connections, the off-module cannot connect within 10" of an end-of-run or in-line junction connection.

Universal Screens with Answer Thin Trim Top Cap

Universal screens provide a tackable boundary element along the Answer panel. They are available in two heights to accommodate varying levels of privacy.
 ▶ Specifying, page 380

Actual Dimensions

Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: 13½"H screen aligns with a 42" overall height from the floor, when installed to a 30"H panel. 19½" screen aligns with a 48" overall height from the floor, when installed to a 30"H panel.

Product Details

Universal screens with Answer top cap can only be used with thin profile trim.

Universal screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

Brackets are included with screens. Two brackets are used on all screens.

Universal screens include a thin trim top cap with slots for the screen brackets.

Universal screen and top cap slide onto brackets.

Screen brackets install on horizontal connecting bar prior to installation of skins and top cap.

When Universal screens are placed directly adjacent to each other in-line, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Application Topics

Universal screen can be placed on the top of a panel only. Top bar in the panel must be located in the top position of the frame in order to support Universal screens. Universal screens can be used on base panels or stacking panels.

The Universal screen cannot be added to a panel segment with a 6" stacker.

Universal screens cannot be used when a window is located in the top position of the panel.

Universal screens on Answer panel cannot be added to the lower panel segment of an in-line change-of-height condition.

A single Universal screen can span over two or more in-line panels up to 96".

Universal screens for Answer panel cannot span a corner junction.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap lightseal attaches to underside of top cap to fill space between skin lightseals. Specify one for each in-line junction the Universal screen spans.

Universal screens can be used on a spine panel hosting the same height off-module connection. The off-module panel cannot connect to the spine where the Universal screen bracket connects to the horizontal bar.

Sarto Fence Screens with Answer Thin Trim Top Cap

Sarto screens provide a light scale tackable boundary element along the Answer panel. They are available in two heights to accommodate varying levels of privacy.

► Specifying, page 380

Actual Dimensions

Screen Height	12½" or 18½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: 13½"H screen aligns with a 42" overall height from the floor, when installed to a 30"H panel. 19½"H screen aligns with a 48" overall height from the floor, when installed to a 30"H panel.

Product Details

Sarto screens with Answer top cap can only be used with thin profile trim.

Sarto screens are tackable. They are available in two heights, 13½"H and 19½"H, and have widths ranging from 24"W to 96"W.

Brackets and hard stops are included with screens. Two brackets are used on screens 54"W and smaller. Three brackets are used on screens 60"W and larger.

Universal screens include a thin trim top cap with slots for the screen brackets

Sarto screen slides onto brackets after top cap and hard stops are installed on the brackets.

Screen brackets install on horizontal connecting bar prior to installation of skins and top cap.

Application Topics

Sarto screen can be placed on the top of a panel only. Top bar in the panel must be located in the top position of the frame in order to support Sarto screens. Sarto screens can be used on base panels or stacking panels.

The Sarto screen cannot be added to a panel segment with a 6" stacker.

Sarto screens cannot be used when a window is located in the top position of the panel.

Sarto screens on Answer panel cannot be added to the lower panel segment of an in-line change-of-height condition.

A single Sarto screen can span over two or more in-line panels up to 96".

A single Sarto screen that is 60"W or wider cannot span two panel sections of equal width. The middle bracket of the Sarto screen will interfere with the inline junction.

Sarto screens for Answer panel cannot span a corner junction.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap lightseal attaches to underside of top cap to fill space between skin lightseals. Specify one for each in-line junction the Sarto screen spans.

Sarto screens can be used on a spine panel hosting the same height off-module connection. The off module panel cannot connect to the spine where the Universal screen bracket connects to the horizontal bar.

Top Cap Mounted Storage

Top cap mounted storage allows for existing Duo, Elective Elements, and Currency storage to be mounted on top of Answer panels.
▶ Specifying, page 382

Duo, Currency, and Elective Elements storage can be mounted on top of Answer panels with thin trim.

Top cap mounted storage can be mounted both on- and off-module.

Top cap mounted storage can be specified for both center-mounted (shared) and aisleway applications.

Product Details

Top cap mounted storage utilizes existing Duo, Currency, and Elective Elements storage and secures it to the horizontal connecting bar using supports below the top cap. Storage units can be mounted both centered (shared) or in an aisleway condition (personal). There are unique brackets for each application. Two brackets are used below the top cap to attach storage units that are center mounted (all sizes) or in aisleway applications where the storage is between 30"W and 48"W. Three brackets are used in aisleway applications where the storage units are 54"W to 72"W.

The top cap mounted storage solution is comprised of three elements specified separately:

- standard Duo, Currency, or Elective Elements storage.
▶ See complete listing for compatible storage, page 76.
- top cap mounted storage bracket.
- top cap and aligner packages.

Top cap mounted storage can be used on panels with thin trim only.

Front View

When installed, there is a 1/2" gap between the top cap and the bottom of the storage unit.

When mounting **Selective Elements personal storage**, a proud back should be specified. While inset is also an option, proud will provide you with a cleaner aesthetic.

The maximum storage unit length that can be used in a top cap mounted application is 72". Storage wider than 72" cannot be top cap mounted.

Application Topics

Top cap mounted storage can be placed on top of a thin trim panel only. It can be used with both painted and wood trims. The top beam in the panel must be located in the top position of the frame in order to support top cap mounted storage.

Top cap mounted storage can only be used on base panels. It cannot be used on stacking panels.

Top cap mounted storage can not be used in an in-line change-of-height condition when the storage is located on the lower panel and matches the panel width. It can be used if the storage width is smaller than the panel width.

Top cap mounted storage will not fit between two change-of-height trims if the storage is the same width as the panel it is mounted to. Storage must be narrower width than panel in this application.

Top cap and aligner packages are ordered together as one style number. The aligner package includes two end-of-run aligners, two in-line aligners, and one pair of recessed-to-recessed aligners.

In certain application conditions a **top cap connector aligner (TS7TFGR)** will also need to be specified. These include when storage or frameless glass is used on-module next to a wall-start junction, adjacent to a boundary screen, on an off-module panel, or in a corner change-of-height where the storage is used on the lower panel.

Top cap mounted storage has the ability to be mounted on panel module, or in off-module conditions. When the storage matches the panel width, the standard top caps from the horizontal frame package can be omitted as the top cap mounted storage top caps will be sufficient.

When the top cap mounted storage does not match the panel width, standard top caps will need to remain specified with the horizontal frame packages. Center mounted top caps will be used under the storage. The standard top caps will be used to finish off the top of the panel where there is not storage present. The standard top caps will need to be field cut to size.

Top cap mounted storage has the ability to span both in-line and corner junctions.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap light seal attaches to the underside of the top cap to fill space between skin lightseals. Specify one for each in-line junction the top cap mounted storage spans over.

End-of-run and junction cap aligners manufactured after November 2012 will have features to accommodate top cap mounted storage top caps. Aligners manufactured before November 2012 will not be able to accommodate top cap mounted storage top caps and new aligners will be needed.

Duo, Currency, and Elective Elements storage can be top cap mounted on Answer panels up to 48"H.

When top cap mounted storage is used in an aisleway application the back of the storage unit will overhang the back of the panel 3 1/2".

Connections

Both center and aisleway conditions can accept storage units up to 72"W. Center mounted conditions can accept storage up to 25"D. Aisleway mounted applications can accept storage up to 17"D.

Top cap mounted brackets should be mounted within 10" from the end of the storage unit. When possible, use the predrilled holes in the Answer horizontal bar. In some applications and in aisleway applications where the storage is larger than 48"W, additional holes will need to be drilled into the beam.

Both center and aisleway mounted storage units cannot overhang an end of run or corner junction more than 3 1/2" due to ADA guidelines.

Top Cap Mounted Storage, continued

Universal tie plates (TS7TIEPLATE) can be used to help align two storage units mounted in-line with no gap between them. Two tie plates should be used, one near each edge. When using with Duo, Currency, or Elective Elements storage, the hardware shipped with the plates can be used.

Panel Packages—Thin Trim

Panel packages include two monolithic fabric skins and a horizontal frame package. Answer panels always share a junction with adjacent panels. Order the style of junction you need separately.

► Specifying, page 384

Top cap snaps onto top of panel skins. Top caps are available in Thin trim. Change-of-height top caps, wood veneer top caps, and omit top caps are also available as options on Thin trim.

Power can be field-installed every 12" vertically using powerkits.

Junctions, ordered separately, are always shared by adjacent panels. They are available for in-line, L, T, V, X, Y, and end-of-run configurations. Wall-start junctions and off-module connector brackets are also available.

Optional cable tray can be used for additional support of cables. Additional cable trays can be installed and arranged at various heights within the frame for communications access and cable routing.

Skins attach to frame without tools and can be removed and repositioned easily. They are not dedicated to a specific location.

Power and communication can be accessed by cutting skin in the field. Templates for cutting both receptacle and communication cutouts are available from Service Parts (T500940SR). Filler to close unwanted cutout in a skin is available from Service Parts (**TS7STFSR**).

Powerkits include powerblocks attached to a supporting power tray. ► Page 178

Base trim or open base trim styles are available on panels with Thin trim as standard.

Base cover has knockouts to accommodate power and communication terminations. Top knockout is for power, bottom knockout is for communication. Filler to close unwanted knockouts is available from Service Parts (**TS7BTFSR**).

Horizontal connecting bars lock into the vertical junctions at the top and the bottom location to provide structural stability for the panels.

Optional base cable tray can be used to support lay-in of cables.

Actual Dimensions

Depth	3"
Width	17 ⁵ / ₆₄ ", 23 ⁵ / ₆₄ ", 29 ⁵ / ₆₄ ", 35 ⁵ / ₆₄ ", 41 ⁵ / ₆₄ ", 47 ⁵ / ₆₄ ", 59 ⁵ / ₆₄ ", and 71 ⁵ / ₆₄ "
Height	41 ³ / ₄ ", 47 ¹⁵ / ₁₆ ", 54 ³⁵ / ₆₄ ", and 66 ¹⁵ / ₃₂ "

Order panel packages to create common panel configurations quickly and easily.

1. Specify a panel package of the width and height you need in thin top caps.

Note: Cable trays and base cable trays are optional.

2. Order vertical junctions to complete panel packages and to join panels in in-line, L, T, V, X, and Y configurations and to terminate an end-of-run. Junctions are available with trim.

3. Specify powerkits where you will need power. You can specify a powerkit as an option on the panel package, or you can order powerkits separately.

Answer Boundary Screens

Boundary screens provide light scale space division and privacy for a variety of worksettings.

Answer boundary screens attach to the Answer panel at the end-of-run as an alternative to a panel, when power and hang-on components are not required.
 ▶ Specifying, pages 386 - 402

Answer boundary screens have a thickness of 13/16".

Screens are available in laminate or wood veneer.

Boundary screens come standard with adjustable glides, with a range of 1 1/2". The glides are located 1 1/2" from the outside of each edge.

Product Details

Boundary screens are available in two attachment versions – single-connect and dual-connect.

Single-connect boundary screens attach to the Answer panel using an end-of-run junction.
Tip: Single-connect boundary screens do not require any additional attachment for stability.

Dual-connect boundary screens have two attachment points: the end-of-run junction, and an adjacent workspace or 1.5-H or higher storage unit.

Boundary screens with dual connections can be used in place of a leg to support a workspace.

Actual Dimensions

Height	30", 36", 42", 48", and 54"
Single-Sided Width	27", 33", 39", 45", 51", 57", 63", 69", and 75"
Spanning Width	51", 57", 63", 69", and 75"
Split Width	25 1/2", 31 1/2", 37 1/2", 43 1/2", 49 1/2", 55 1/2", 61 1/2", 67 1/2", and 73 1/2"
Return Width	18", 24", and 30"
Thickness	13/16"

Note: Answer boundary screen widths can also be specified parametrically.

Boundary screen heights align with thin trim top cap panel heights at 30", 42", 48", and 54". 36"H boundary screens are also available.

Boundary screens have modular heights and widths. Parametric widths are allowed from 24"W to 75"W increasing in 1/16" increments. Boundary screen return widths are available at 18", 24", and 30", and are also available parametrically from 18"W to 75"W increasing in 1/16" increments.

Answer boundary screens are available in five different configurations.

1. Single-sided boundary screens provide boundary to one side of an Answer panel and are specified as either left or right. Right handed application is shown above.

3" Answer panel thickness

Single-sided boundary screens will always include the 3" thickness of the Answer panel to which they attach. Minimum width for a single-sided boundary screen is 27" (24" inside, and 3" for the Answer panel thickness). The maximum width is 75" (72" inside, and 3" for Answer panel thickness). The above image is shown with a right handed application.

Note: The above image shows a 75" specified width. The planning width is 72".

2. Spanning boundary screens use one screen segment to provide boundary of equal widths to both sides of an Answer panel.

Spanning boundary screens always extend in equal dimension from the panel to which they attach and include the 3" thickness on the Answer panel. Minimum width for a spanning boundary screen is 51" (48" inside, and 3" for the Answer panel thickness). The maximum width is 75" (72" inside and 3" for Answer panel thickness). *Note: The above image shows a 75" specified width. The planning width is 72".*

3. Split boundary screens use two screen segments to provide boundary to both sides of an Answer panel. Both sides of a split boundary screen are the same height.

Split boundary screens can either be equal or asymmetrical in dimension from the panel to which they attach and include the 3" thickness of the Answer panel. Minimum width for a split boundary screen is 25 1/2" (24" inside, and 1 1/2" for half of the Answer panel thickness) for each side of the panel. The maximum width is 73 1/2" (72" inside, and 1 1/2" for half of the Answer panel thickness) for each side of the panel.

Note: The above image shows a 25 1/2" specified right width and a 73 1/2" specified left width. The planning right width is 24" and the planning left width is 72".

Answer Boundary Screens, continued

4. Single-sided L return boundary screens provide boundary and additional privacy to one side of an Answer panel. Both screen segments (primary and return screen) are the same height and are specified as either left or right handed. Right handed application is shown above.

3" Answer panel thickness

Single-sided L return boundary screens in modular widths have inside clearance in 6" increments to wrap standard width worksurfaces in 6" increments. Panel connected segments (the primary screens) are available in widths of 27" (24" inside, and 3" for Answer panel thickness) to 75" (72" inside, and 3" for Answer panel thickness). The inside width of modular returns are 18", 24", or 30". There is an additional 1³/₁₆" that will be added to the return width for the primary screen thickness. Both boundary screens have equal heights and are specified as either left or right handed. Right handed application is shown above. *Note: The above image shows a 75" specified width. The planning width is 72".*

5. Split L return boundary screens consist of four segments to provide boundary and additional side privacy to both sides of an Answer panel. Split L configuration screens do not have to have symmetrical widths, but must have the same height.

Split L return boundary screens in modular widths have inside clearance in 6" increments to wrap standard width worksurfaces from 24" to 72" in 6" increments for each side of the split. The inside width of modular returns will be 18", 24", or 30". There is an additional 1³/₁₆" that will be added to the return width for the primary boundary screen thickness. Each panel connected segment is available in widths from 25¹/₂" (24" inside, and 1¹/₂" for half of the Answer panel thickness) to 73¹/₂" (72" inside, and 1¹/₂" for half of the Answer panel thickness). *Note: The above image shows a 61¹/₂" specified left width and a 73¹/₂" specified right width. The planning left width is 60" and the planning right width is 72".*

Connections

Boundary screens can be attached to Answer panels that are of equal height to the screen, higher than the screen, or lower than the screen.

Boundary screens cannot be more than 18" taller than the Answer panel to which they connect.

Boundary screens may be shorter than connecting Answer panel in 6" increments between 12" and 36". In this situation, specify change-of-height trim separately.

Tip: When specifying a boundary screen equal to the height of the Answer panel, order a same height end-of-run junction for height of Answer panel with the "omit trim" option.

Tip: When specifying a boundary screen shorter than the height of the Answer panel, order a same height end-of-run junction for height of Answer panel with the "omit trim" option, and order a change-of-height trim.

Tip: When specifying a boundary screen taller than the height of the Answer panel, order a same height end-of-run junction for height of Answer panel with the "omit trim" option.

When boundary screen is shorter than connecting Answer panel in increments not supported with standard trim heights, order change-of-height trim through Specials.

When attaching to Answer panels with a stacking junction, boundary screens must be at least 6" lower than the start of the stacking segment.
Tip: Order change-of-height end-of-run trim separately.

On both single- and dual-connect boundary screens, there is a metal cover plate that covers the connection bracket that connects the boundary screen to the end-of-run junction. The cover is located 22" from the bottom of the screen and is 3"W and 14"H.

Return segments also have a second metal cover plate that covers the connection bracket that connects the return to the primary screen segment.

Surface Materials

Boundary screens

- Laminate
- Wood veneer

Edge on laminate

- Plastic

Bracket cover

- Paint

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

Open Line laminates with grain direction

can only be applied vertically. Open Line laminates are not allowed on boundary screens that are 60" or wider, or have segments that are 60" or wider.

On single-sided boundary screens,

horizontal wood grain laminates and veneers can be applied up to 75"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 75"W.

On spanning boundary screens,

wood grain laminates and veneers can be horizontal grain direction up to 75"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 75"W.

On split boundary screens,

horizontal wood grain laminates and veneers can be applied up to 73½"W. Vertical wood grain laminates can be applied up to 59"W. Vertical wood grain veneers can be applied up to 73½"W.

On split boundary screens with horizontal grain direction,

the grain pattern of two screen segments may not align.

All boundary screen sides

will have the same finish applied.

Application Topics

Answer boundary screens

fulfill the same stability requirements as Answer panels of the same heights and widths. Answer boundary screens do not support hang-on components.

▶ See *Stability Guidelines*, page 142

Boundary screens

attach at the end-of-run location of an Answer panel with thin trim top detail.

Single-connect boundary screens

are for use with height-adjustable or freestanding work surfaces when storage is not available or is shorter than 1.5-High.

▶ Page 80

Dual-connect boundary screens

can be used as a support in place of a leg. They are not for use with height-adjustable work surfaces.

▶ Page 80

Applications using split boundary screens must use dual connections on both sides, or a single connection on each side.

Boundary screens

cannot attach to an Answer end-of-run junction where an Answer panel and beam foot is being used.

Boundary screens can attach to panels with frameless glass application.

Tip: Use the base junction height as the connecting panel height.

Boundary screens are not for use with wall starts.

One single-sided boundary screen

may be attached at the end of the Answer panel. If the intent is to have a boundary screen in both directions of the panel, use either spanning or split boundary screens.

Single-sided and split boundary screens

are available left and right handed. This is determined by the user facing the attaching Answer panel. Left sided application is shown above.

Split boundary widths do not have to be symmetrical.

Dual-connect boundary screens of any configuration

must always utilize both connection points to ensure stability.

Dual-connect split and spanning boundary screens

must have a properly secured work surface and/or storage units on each side of the Answer panel to make a second connection.

When dual-connect screens

are attaching to a work surface, the work surface must attach to the panel in two points along the back or sides of the panel.

Tip: The second connection must be within 6" of the end of the panel-supported work surface. Connection point to work surface must have a flat back edge.

When using boundary screens with low storage,

the storage must be attached to the panel using storage-to-panel connectors. Storage units must be 1.5-High or higher. The storage must be connected to the panel at the opposite end of the boundary screen.

Work surface supports

cannot overlap with the secondary dual-connect bracket.

If storage specified on one side of an Answer panel

does not have a storage to panel connection, the boundary screen must be single-connect.

Side support bracket

can be used adjacent to dual-connect boundary screens and Answer panel connections at the end-of-run junction.

Tip: Other panel-mounted supports such as a cantilever will not fit.

Answer Boundary Screens, continued

Applications that have a panel connected work-surface on one side and a freestanding table on the other side of the panel must use single-connect boundary screens.

All L return boundary screens have a step miter detail at the adjoining edge.

Answer Panel Overview—Square and Oval Trim

Panel buildups allow you to create unique configurations by mixing surface materials and colors on segmented panels. Order skins and horizontal frame packages separately.

Panel frame is made up of two major elements—vertical base junctions and base horizontal connecting bars. Vertical junctions are ordered separately.

Stacking components can be used on both panel buildups.

Standard change-of-height trim has either a rounded bottom edge to fit the curve of oval panel top caps or a straight edge to fit square panel top caps.

Leveling glides adjust to install panels on uneven floors. Range is 2³/₄".

Actual Dimensions

Height 29³/₈", 41³/₄", 47¹⁵/₁₆", 54¹/₈", 66¹⁵/₃₂", and 78²⁷/₃₂"

Note: Height is minimum from floor to top of top caps. Leveling glides can extend 2³/₄".

Stacking change-of-height trim has a straight bottom edge to fit on top of standard change-of-height trim.

Stacking horizontal frame package must be used with stacking junctions.

Stacking junctions are always shared by adjacent panels and can be used in panel buildups. They are available for in-line, L, T, V, X, Y, and end-of-run configurations.

Skins attach to frame without tools and can be removed and repositioned easily.

Base junctions, are always shared by adjacent panels. They are available for in-line, L, T, V, X, Y, and end-of-run configurations. Wall-start junctions and off-module connectors are also available.

Base horizontal connecting bars lock into the vertical junctions at the top and the bottom location of base junction to provide structural stability for the panels.

Powerkits include power-blocks attached to a supporting power tray.

Alternate powerkit harness routing can be accommodated through the junction opening. In in-line applications installed on uneven floors, route harness through junction opening to prevent harness from being exposed.

Panel Buildups

Panels—Square and Oval Trim

Order panel components separately to create unique configurations.

1. Begin by planning your frames. Junctions determine height and horizontal connecting bars determine width.

1a. Corner junctions can easily be reconfigured by adding or removing a junction post (available on junctions shipped on or after October 10, 2011).

2. Order skins for both sides of panel.

Exception: Windows accommodate both sides of the panel.

Performance tackable acoustical fabric-covered skins

Tackable acoustical fabric-covered skins

Steel skins (12"H, 18"H, and 24"H have ribbed and perforated options)

Laminate skins

Wood skins

Tip: Wood skin sets are available for 42", 48", 54", and 66" panel heights.

Back painted glass skins

Markerboard skins

Slatwall

Windows

Technology skins

Answer allows a wide variety of skin arrangements to meet specific functional and aesthetic needs. Skins are not dedicated to a specific location and can be used anywhere on the face of the panel.

When planning skin segments, add skin heights together and add an additional 6" for total height.

Skins = 12" + 12" + 36" = 60"
 Trim = 6"
 Total = 66"H

3. Specify powerkits where you will need power.

Base Junctions—Square and Oval Trim

Base junctions complete the structure of panel buildups. Answer panels always share a junction with adjacent panels. You order the style of junction you need separately.
 ▶ Specifying square and oval, page 412

Corner junction cap aligners ensure correct fit with adjacent panel top caps.

Opening in top of junction allows lay-in cable routing beneath top caps.

Slots in junction accept the panel's horizontal bars every 12", cable trays every 6", and powerkits every 12" vertically.

Slotted channels in junction accommodate worksurface supports and overhead storage components at 1" increments.

Trim is included with L, T, V, and end-of-run junctions to finish exposed surfaces. Trim is standard with paint and available with a fabric wrapped option.

Large openings are used to route power through an L, T, X, V, or Y base junction.

Leveling glides adjust to install panels on uneven floors. Range is 2¾".

Junction cap is included with junction when needed. Caps are available in two styles: square or oval.

Skins attach to junction with concealed hardware.

Lay-in cable routing is accommodated in base area.

Product Details

Answer is available with three styles of top trim - thin, square, and oval. Base junctions are specified with desired style. Styles can not be mixed between adjacent panels.

End-of-run base junction includes junction, vertical trim, and junction cap. Select square or oval style trim. End-of-run trim adds 1" to footprint.

In-line base junction includes junction and plastic top cap aligner. Select square or oval style trim.

L-base junction includes junction, vertical trim, junction cap, and plastic top cap aligner. Select square or oval style trim.

Actual Dimensions

Depth	3"
Height	28 ⁷ / ₁₆ ", * 40 ³ / ₄ ", 47", 53 ¹ / ₈ ", 65 ¹ / ₂ ", and 77 ³ / ₈ "

*Note: Wall-start junctions are not available 28⁷/₁₆".

T-base junction includes junction, vertical trim, junction cap, and two plastic top cap aligners. Select square or oval style trim.

Y-base junction includes junction, junction cap, and two plastic top cap aligners. Select square or oval style trim.

X-base junction includes junction, junction cap, and three plastic top cap aligners. Select square or oval style trim.

V-base junction includes junction, vertical trim, junction cap, and plastic top cap aligner. Select square or oval style trim.

Wall-start junction secures to the stud in a structural wall or drywall fasteners can be used. Vertical trim is not needed. Also used in off-module applications. Wall-start junction does not add any dimension to panel run.

An **in-line top cap aligner** is included with in-line junctions. Select square or oval style.

Quick lock on both ends of the panel's horizontal connecting bars engage the junction in a tight structural connection.

Base junctions can accept a stacking junction of the same type only. *Example: An L-base junction will accept an L-stacking junction.*

Floor anchor brackets are available to secure junctions to the floor to prevent panel movement. Brackets are intended for use in seismic zones and may require additional code approvals.

Junction stabilizer bracket can be used to add rigidity to a panel run or when using a Universal sliding door. Bracket must be bolted to a concrete floor. For junctions manufactured before October 10, 2011 use TS7SB. For junctions manufactured on or after October 10, 2011 use TS7SBNJ.

Bracket foot is visible on one side of panel when installed.

Junction stabilizer bracket blocks power routing in the panel base and just above the base areas. The bracket covers the slots on the junction where the powerkit connects in these two zones. It also blocks the ability for a powerkit harness, pass-through powerkit, or modular harness to route in the base area from an adjacent panel.

Junction stabilizer bracket also blocks lay in of cables in base area of panel.

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Panels can support work-surfaces, shelves, and bins.

Wiring and Cabling

Lay-in cable routing is accommodated in the top of junctions. Lay-in cable and power routing is accommodated in base area.

Base Junctions—Square and Oval Trim, continued

As an alternative to lay-in cable routing, horizontal routing of power and cables can be accommodated through openings in junctions.

Modular harnesses that are 43" or 80" are available to change the height at which you are routing power kits or to route power from the panel base to different heights.

Junction tall sleeves can be ordered to cover the exposed metal edges in the large cable routing opening of junctions. Tall junction sleeve can only be used on junctions manufactured on or after October 10, 2011.

Lay-in junction cable sleeves can be added in the field to cover the exposed metal edges in lay-in cable space.

Surface Materials

Base junction

- Black paint
- Tip: Junction is hidden when properly installed.*

Junction cap—Square

- Paint

Junction cap—Oval

- Plastic

Vertical trim

- Paint (standard)
- Fabric (option)

Fabric application is standard in the warp horizontal direction. Warp vertical direction is available as an option.
 ▶ See *Specification Guidelines for Directional Fabrics*, page 678, for more information.

Application Topics

Stacking junctions can be used with any height base junction.

Stability Guidelines

for application rules.
 ▶ See page 142

Carpet gripper glide caps may be added to panel glides to help hold panel in place (used only on junctions manufactured on or after October 10, 2011).

Change-of-Height—Square and Oval Trim

Change-of-height trim is available for base panels and stacking panels. It is used in in-line and corner applications.
 ▶ Specifying square and oval, page 434

Stacking change-of-height trim has a straight bottom edge to fit on top of standard change-of-height trim.

Oval standard change-of-height trim has a rounded bottom edge to fit the curve of top caps.

Top cap on lower panel must be change-of-height. Remember to specify the change-of-height top cap option on the lower panel for either square or oval trim applications.

Square standard change-of-height trim has a square bottom edge to fit square top caps.

Junction cap is included with standard change-of-height trim. Cap is available in two styles - square and oval.

Plastic aligner is included with stacking change-of-height trim.

Top cap from base panel is used to trim the top of the stacked panel.

L-junction application square trim

L-junction application oval trim

Product Details

Square standard slim trim includes junction cap. In-line or corner application must be specified. Available in 12"H, 18"H, 24"H, 30"H, and 36"H.

Oval standard slim trim includes junction cap and top cap filler. Plastic filler is not the same filler that ships with cable-routing trim. In-line or corner application must be specified. Available in 12"H, 18"H, 24"H, 30"H, and 36"H.

Stacking slim trim includes plastic aligner and works with both square and oval trim styles. Available in 12"H, 18"H, and 24"H.

Actual Dimensions

	Standard slim profile	Stacking slim profile	Standard cable-routing	Stacking cable-routing
Depth	3"	3"	3"	3"
Width	1 1/8"	1 1/8"	2 1/4"	2 1/4"
Height	12 ⁵ / ₃₂ ", 18 ⁵ / ₁₆ ", 24 1/2", 30 ¹¹ / ₁₆ ", and 36 ⁷ / ₈ "	12 ⁵ / ₃₂ ", 18 ⁵ / ₁₆ ", and 24 1/2"	12 ⁵ / ₃₂ ", 18 ⁵ / ₁₆ ", 24 1/2", 30 ¹¹ / ₁₆ ", and 36 ⁷ / ₈ "	12 ⁵ / ₃₂ ", 18 ⁵ / ₁₆ ", and 24 1/2"

Square standard cable-routing trim includes junction cap. In-line or corner application must be specified. Available in 12"H, 18"H, 24"H, 30"H, and 36"H.

Oval standard cable-routing trim includes junction cap and top cap filler. Plastic filler is not the same filler that ships with slim trim. In-line or corner application must be specified. Available in 12"H, 18"H, 24"H, 30"H, and 36"H.

Stacking cable-routing trim includes plastic aligner and works with both square and oval trim styles. Available in 12"H, 18"H, and 24"H.

36"H standard change-of-height trim is the tallest trim available. If the area you need to trim is taller than 36"H, use stacking change-of-height trim.

Wiring & Cabling

Oval cable-routing trim allows lay-in cable routing in change-of-height applications.

Square cable-routing trim allows lay-in cable routing in change-of-height applications.

Surface Materials

Change-of-height trim

- Paint
- Fabric (option)

Fabric application is standard in the warp horizontal direction. Warp vertical direction is available as an option.
▶ See *Specification Guidelines for Directional Fabrics*, page 678, for more information.

Square junction cap

- Paint

Oval junction cap and filler

- Plastic

Aligner

- Black plastic only

Application Topics

Change-of-height top cap option must be specified on the lower panel.

Square trim top caps have a notch in one or both ends to accommodate change-of-height applications.

Oval trim top caps are shortened on one or both ends to accommodate change-of-height applications.

Specify change-of-height top caps at one end unless the panel is adjacent to taller panels on both sides. Then specify a top cap change-of-height on both ends.

Specify the tallest height junction to connect your panels. A 66"H junction would be shared between these panels.

When stacking only one panel on your base panel with square or oval trim, always use standard change-of-height trim.

When stacking more than one panel on your base panel, use standard change-of-height trim on the first tier. Only the second tier requires stacking change-of-height trim.

Off-Module Panel Connector—Square and Oval Trim

Off-module panel connectors allow a fin wall to be attached off-module to a spine wall in 1" increments.

► Specifying, page 422

Top brackets attach to top horizontal connecting beam and secure top of the wall-start junction. If fin wall is 12", 18", or 24" shorter than spine wall, the top horizontal connecting bar can be lowered to attach brackets.

Wall-start junction must be ordered separately.

Bottom bracket attaches to lower horizontal connecting beam and secures to lower portion of bottom channel.

Bottom channel has slots in 1" increments to attach panel off-module. Channel must match width of panel and be attached between two junctions.

Bottom bracket for wall-start junction attaches the junction and bottom channel to secure the lower portion of the wall-start junction.

Product Details

Wall-start junctions connect to the off-module panel connectors to start a panel run off from the spine. Available in 42"H, 48"H, 54"H, 66"H, and 78"H. Wall-start junction must match the height of the fin wall. Wall-start junctions are ordered separately.

Connections

Off-module fin wall must always be the same height, or shorter than the spine wall.

When fin wall is more than 24" shorter than the spine wall, an additional horizontal beam must be added to the spine wall at the same height as the fin wall. Order a stacking horizontal frame kit.

Spine wall skins must be segmented with a seam matching the height of the shorter fin wall. This allows access to the top bracket and the spine wall horizontal beam.

Actual Dimensions

Width 22½", 34½", 40½", 46½", 58½", and 70½"

When stacking on the fin panel, the spine wall skins must be segmented with a seam matching the height of the fin base panel.

When stacking wall-start junctions in an off-module application, the off-module panel connector connects to the base wall-start junction.

Two off-module panels can be connected back to back at the same location.

When connecting two off-module fins at different heights on either side of the spine panel, an additional horizontal beam must be ordered and installed at the same height of the shorter fin panel.

An off-module fin wall cannot connect flush to the end of a panel in the spine wall. The closest connection point will leave a 3" tail on the spine including the end-of-run trim.

An off-module fin wall cannot attach at a junction in the spine wall. There is a 2" area of dead space on either side of the junction rendering a total of 4" dead space.

An off-module fin wall cannot be installed over a window that is located at the top of a spine panel.

Wiring & Cabling

Wiring and cabling components cannot be routed internally from a spine wall to an off-module fin wall without cutting openings in the spine wall skin.

Tip: It is recommended that you route wiring and cabling through the spine wall.

Modular power components should be used to bring power from the spine wall to the workstation.

Surface Materials

Off-module bracket

- Black paint

Tip: Bracket is hidden when properly installed.

Off-module installation requires field modification of the light seal on the top skin. Surface covering is not affected.

Application Topics

Stability Guidelines for Application Rules

▶ Page 142

Stacking junctions

can be used with any height base junction.

Bins, shelves, and workspaces

cannot be attached off-module.

Off-module panel connector

works with both square and oval style trims. Top cap filler included in package is only used with oval style trims. Square style trims do not require a top cap filler.

When using a wall-start junction

manufactured before October 10, 2011 with an off module panel connector manufactured on or after October 10, 2011 the "old" bottom bracket must be used. It can be ordered from Service Parts, part number T500938MP. If using an old off-module panel connector manufactured before October 10, 2011 with a wall-start junction manufactured on or after October 10, 2011 the bottom bracket included with the off module panel connector should be used.

When using frameless glass on a spine panel with a same height off-module panel connections, the off-module cannot connect within 10" of an end of run or in-line junction connection.

Stacking Junctions—Square and Oval Trim

Stacking junctions allow you to adjust the panel heights within a workstation.
 ▶ Specifying square and oval, page 423

Junction top cap is standard on base panel junctions. Use the same top cap in stacking configurations.

Stacking junctions are always shared by adjacent panels. They are available for in-line, L, T, V, X, Y, end-of-run, and wall-start configurations.

Stacking horizontal frame package, specified separately, must be used with stacking junctions. Each package includes one horizontal connecting bar.

Stacking junction trim is included with L, T, V, and end-of-run stacking junctions. Stacking end-of-run trim adds 1" to footprint.

Plastic aligner is included with L, T, V, and end-of-run stacking junctions.

Fork connectors are included with stacking junction for proper connection to the base panel.

Top cap and junction cap from base panel are used to trim the top of the panel.

Slots in stacking junctions are identical to base junctions to accept horizontal connecting bars, power-kits, and cable trays.

Cables can be laid into top of base panel. During initial installation, it is important to keep cabling loose so it can be temporarily moved aside to install stacking fork connector at a later date.

Base panel must always have two horizontal connecting bars. The bars must be in place prior to adding fork connectors into the junction.

Product Details

All existing base panels can accept a stacking junction.

Aligner is included with fabric-wrapped vertical trim but may not be needed depending on the thickness of the fabric.

End-of-run stacking junction includes junction, fork connectors, vertical trim, and plastic trim aligner. End-of-run stacking trim adds 1" to footprint.

In-line stacking junction includes junction and fork connectors.

Actual Dimensions

Depth 3"

Height 12³/₈", 18¹/₂", and 24³/₄"

L-stacking junction
includes junction, fork connectors, vertical trim, and plastic trim aligners.

V-stacking junction
includes junction, fork connectors, vertical trim, and plastic trim aligners.

T-stacking junction
includes junction, fork connectors, vertical trim, and plastic trim aligners.

Y-stacking junction
includes junction and fork connectors.

X-stacking junction
includes junction and fork connectors.

Full L, T, V, and end-of-run square and oval vertical trim is available through Service Parts in 30", 42", 48", 54", 66", and 78" heights if a segmented visual on the trim is not desired.

Stacking change-of-height trim is used when you stack on a change-of-height configuration. The bottom edge of stacking trim is straight so it can join with the top of the standard change-of-height trim. Oval standard change-of-height trim is rounded at the bottom to fit around the top cap of the lower panel. Square standard change-of-height trim has a straight bottom edge to fit with square top trim.
▶ Page 436

Standard skins, cable trays, and powerkits are used in stackable solutions. To maximize the benefits of stackability, consider matching the skin height to the stacking junction height.

Connections

Skins on base panel do not need to be removed to install a stacking junction in most cases.

Fork connector is included with stacking junction for proper connection to the base panel. Two fork connectors are included with each in-line, end-of-run, L, and V stacking junctions, three are included with T and Y stacking junctions, and four are included with X stacking junctions. One fork connector is included with each wall-start stacking junction.

Fork connectors secure into the base junction. Stacking junction is bolted to fork connectors.

Wiring & Cabling

Lay-in cable routing at top of stacking junctions

Lay-in cable routing is accommodated in top of stacking junctions.

Junction tall sleeve can be ordered to cover the exposed metal edges in the large cable routing openings of junctions manufactured on or after October 10, 2011.

As an alternative to lay-in cable routing, horizontal routing of power and cables can be accommodated through openings in stacking junctions.

Powerkit installation for stacking components is the same process as for installation in base panels.

Surface Materials

Stacking junction

- Black paint
- *Tip: Junction is hidden when properly installed.*

Vertical trim

- Paint
- Vertical surface fabric (option)

Stacking Junctions—Square and Oval Trim, continued

Application Topics

Stacking Stability

Guidelines provides detailed information on applications.

▶ Page 142

Maximum height that can be stacked on a base panel is 36", consisting of one 24"H and one 12"H, or two 18"H stacking junctions.

Maximum height that an Answer panel configuration can reach is 90".

Maximum number of stacking junctions that can be added to a base panel is two.

Any height base panel can be used with stacking junctions.

Bins and shelves can hang from the first stacked tier only.

For initial installations order the appropriate top cap for your stacked segment, while you are specifying the base panel.

Change-of-Height Top Cap Standard Top Cap

For retrofit installations you will have to order a new top cap through Service Parts based on application changes.

When adding stacking junctions to base panels made prior to January 2000, you must replace vertical trim on end-of-run base junction. We recommend replacement of L base junction trim and standard change-of-height trim because the new trim can be easily removed, while the existing trim will be trapped by the stacking junction. To determine if you have trim made prior to January 2000, remove trim piece. If there are hooks at the top of your trim, you need to replace it. Replacement trim is available through Service Parts.

Base Horizontal Frame Packages—Square and Oval Trim

Base horizontal frame packages include horizontal connecting bars that lock into vertical junctions and complete the structure of a panel. A top cap and pair of base trims are also included. Cable tray and base cable tray are available as options.

► Specifying square and oval, pages 438 and 440

Top cap snaps onto top of panel skins. Two styles of top cap are available - square and oval. Top caps to accommodate change-of-height are also available.

Quick lock connects horizontal bars to vertical junctions for quick assembly.

Horizontal connecting bars lock into vertical junctions. The top bar can be lowered in 12" increments to a maximum of 24" from the top position. The bottom bar must always be positioned in the lowest slot in a junction.

Optional cable tray can be used for additional support of cables. Additional cable trays can be installed and arranged at various heights within the frame for communications access and cable routing.

Base trim is available with or without knockouts. Knockout dimensions are 1 3/8"H by 2 5/8"W.

Base trim with knockouts accommodates power and communication terminations. Top knockout is for power, bottom knockout is for communication. Filler to close unused openings is available from Service Parts (TS7BTFSR).

Optional base cable tray can be used to support lay-in of cables.

Product Details

Horizontal frame packages are available when you want to build up your own panel. The package includes all the components of a panel except the skins so you can order the skins separately to mix combinations of skin surface materials and colors. These frame packages do not include vertical junctions. Cable trays and base cable trays are optional.

Two horizontal connecting bars must be used in each base panel.

Horizontal bars determine panel width. They are not dedicated to a specific panel height; any horizontal bar can be used or reused with any junction height.

Top horizontal bar may be lowered to allow for a 12"H, 18"H, or 24"H glass window to be placed at the top of the panel. Bottom horizontal bar in base panel must remain in lowest position.

Actual Dimensions

Width 17 15/16", 23 15/16", 29 15/16", 35 15/16", 41 15/16", 47 15/16", 59 15/16", and 71 15/16"

Base trim height 3 3/4"

Receptacle Opening

Width of opening 2 5/8"

Height of opening 1 3/8"

Top caps are available in three styles - thin, square, and oval. This section is about square and oval trims. Horizontal frame packages should be specified with square or oval trim. Thin, square, and oval top caps can not be mixed between adjacent panels.

Omit top cap option is available on square trims and should be selected when adding a frameless glass screen to the top of the panel or when spanning a single top cap across multiple panels.

Spanning top caps are available for square style trims.

When spanning a single top trim across multiple panels, select the omit top cap option and specify a spanning top cap separately. Top cap width must match total width of spanned panels.

Spanning top caps can only be used in an in-line condition. They cannot span over a corner junction.

Spanning top caps can be used on any panel height.

In-line spanning top cap lightseals should be specified separately for each in-line panel joint the top cap spans.

Omit base trim option should be selected when using skins to the floor or open base trim.

Base trims are available with or without knockouts. Base trims with knockouts accommodate power and communication terminations. Plain base trims with no knockouts do not.

Open base trims are available. They do not accommodate power and data routing or entry in the base. Open base trim can only be added on a junction manufactured on or after October 10, 2011.

Open base trims are specified by omitting base trims and ordering open base trim kit separately.

Open base trims occupy the same space as the standard base trims. Open base trims occupy the bottom 3/4" of the panel; the height of the opening is 2 1/2".

Cable tray can be positioned every 6" vertically above the base to support cable routing.

Cable tray can accept added cable carriers attached below tray to expand horizontal cable management options. ▶ See *Montage Specification Guide* for cable carrier (ZCC).

Base cable tray is used only in the base to support lay-in cable routing in the base. Base cable tray cannot be used if omit base trim option is selected for one or both sides of panel or if open base trim is used.

Connections

Quick lock on both ends of the panel's horizontal connecting bars engage the junction in a tight structural connection.

Wiring & Cabling

Vertical lay-in cable routing

Vertical lay-in cable routing can be accommodated behind skins.

As an alternative to lay-in cable routing, vertical routing of power and cables through panel interior can be accommodated by openings in horizontal connecting bars. Also, see lay-in utility packages for vertical lay-in of power and cables. ▶ Page 168

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Knockouts in base trim can be removed in the field where needed. Knockout dimensions are 1 3/8"H by 2 5/8"W.

Communication outlets attach to openings in panel base trim. Order communication outlets from an outside vendor. Knockouts for communication in base accommodate modular furniture size only.

Surface Materials

Top cap and base trim
• Paint color chosen on base trim will also apply to the top cap. They are not chosen independently.

Horizontal connecting bars
• Black paint
Tip: Components are hidden when properly installed.

Application Topics

Use a cable tray to provide extra support for 60"W and 72"W full skins where people may lean against the panel.

Stacking Horizontal Frame Packages—Square and Oval Trim

Stacking horizontal frame package provides structural stability for stacking junctions.

► Specifying, page 441

Horizontal connecting bar is included with each stacking horizontal frame package.

Each stacking segment must have one horizontal connecting bar.
Exception: If a window is used with stacking junctions, a horizontal connecting bar is not needed.

Each stacking junction is specified separately.
► Page 423

Skins, ordered separately, are added to both sides of stacking frame.

Actual Dimensions

Width 17¼", 23¼", 29¼", 35¼", 41¼", 47¼", 59¼", and 71¼"

Product Details

Stacking horizontal frame package includes one horizontal connecting bar. Stacking junction is not included.

Stacking horizontal frame package is available in eight widths— 18", 24", 30", 36", 42", 48", 60", and 72"—to match panel width. These horizontal connecting bars are identical to those in horizontal frame packages and can be re-used with any type of junction.

Connections

Quick-lock mechanism on the horizontal connecting bar engages the stacking junction in a tight structural connection.

Base panel must always have two horizontal connecting bars.

Wiring & Cabling

Vertical lay-in cable routing

Vertical lay-in cable routing can be accommodated behind skins.

Vertical routing of power and cables through panel interior is accommodated by openings in horizontal connecting bars.

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Power kit installation for stacking components is the same process as for installation in base panels.

Surface Materials

Stacking horizontal frame package

- Black
- Tip: Components are hidden when properly installed.*

Application Topics

When stacking a 12"H, 18"H, or 24"H window, a stacking horizontal frame package is not needed. Remember, the base panel always has two horizontal connecting bars for support.

When double stacking junctions, each stacking junction must have a horizontal beam.

No more than two windows can be stacked on top of each other.

Stacking horizontal frame package is used when additional horizontal bar is needed in off-module application. See off-module guidelines.

Stacking Stability Guidelines provides detailed information on applications.
▶ Page 142

Frameless Glass Screens—Square Trim Only

Frameless glass screen can be added to the top of a panel to help define space and provide some privacy while still providing access to natural light and promoting communication between adjacent workers.

► Specifying, page 443

Product Details

Frameless glass screen is secured to horizontal connecting bar by supports below the top cap and brackets above the top cap. Two brackets are used above the top cap to attach the glass to the panel on 24"–60"W panels. Three brackets are used on panels 78" and wider.

Frameless glass can be used on panels with thin or square profile trim.

Frameless glass kit includes glass screen, brackets, supports, and top cap with holes to accommodate brackets.

Gap between adjacent glass screens is $\frac{1}{4}$ ".

Actual Dimensions

Glass Width – standard: 23 $\frac{3}{4}$ ", 29 $\frac{3}{4}$ ", 35 $\frac{3}{4}$ ", 41 $\frac{3}{4}$ ", 47 $\frac{3}{4}$ ", 59 $\frac{3}{4}$ ", 71 $\frac{3}{4}$ ", 77 $\frac{3}{4}$ ", 83 $\frac{3}{4}$ ", 89 $\frac{3}{4}$ ", and 95 $\frac{3}{4}$ "

Glass Width – change-of-height one end square trim: 22 $\frac{1}{2}$ ", 28 $\frac{1}{2}$ ", 34 $\frac{1}{2}$ ", 40 $\frac{1}{2}$ ", 46 $\frac{1}{2}$ ", 58 $\frac{1}{2}$ ", 70 $\frac{1}{2}$ ", 76 $\frac{1}{2}$ ", 82 $\frac{1}{2}$ ", 88 $\frac{1}{2}$ ", and 94 $\frac{1}{2}$ "

Glass Height: 11 $\frac{3}{4}$ "

Glass Thickness: $\frac{3}{8}$ "

Surface Materials

Glass

- 6500 Clear Glass
- 6530 Frosted Glass

Tip: Frosted glass is a laminated construction. There may be variation in color, texture, and finish between the sample of 6530 Frosted Glass and the actual product.

Brackets

- Paint

Top cap

- Paint
- Wood veneer

Application Topics

Frameless glass screen

can be placed on the top of a panel only. Top beam in the panel must be located in the top position of the frame in order to support frameless glass. Frameless glass can be used on base panels or stacking panels.

Frameless glass screen cannot be used when a window is located in the top position of the panel.

Change-of-height top cap option is available to allow for positioning of glass next to change-of-height trim on one side only. Glass is shortened and top cap provided supports change-of-height slim one end only.

When using frameless glass on a 48" H panel in a change-of-height condition with a taller panel, the taller panel must use a 48" H base junction and stacking junction to achieve the taller height to allow correct upper horizontal beam placement.

Frameless glass screen will not fit between two change-of-height trims.

Frameless glass kit

is available without glass screen to accommodate customer's own glass. See chart of field installed glass size requirements for specific dimensions required for glass to fit in frameless glass brackets. Steelcase recommends the use of safety glass meeting ANSI 297.1 for field installed glass. Check with your local building authority for requirements in your area.

A single frameless glass screen can span over two or more panels.

90" and 96" wide frameless glass screen kits include three brackets. Two brackets attach to supports below the top cap. The third bracket attaches only to the top cap through a hole that is drilled in the top cap by the installer on site.

In-line spanning top cap lightseal must be specified separately when used in this application. Spanning top cap lightseal attaches to underside of top cap to fill space between skin lightseals. Specify one for each in-line junction the frameless glass screen spans.

A template tool is available from Service Parts (**T511082SR**) to assist in locating where holes are to be drilled on the beam of an existing panel to allow supports to be attached. This only applies to beams produced prior to September 2009. Beams produced after this date include holes to allow frameless glass supports to be attached.

Field-Installed Glass Size Requirements

Style Number	Maximum Height	Maximum Width	Thickness Range (min-max)
Standard			
TS71224SFG	11¾"	23¾"	.350-.400"
TS71230SFG	11¾"	29¾"	.350-.400"

Fabric-Covered Panel Skins

Performance Tackable Acoustical Fabric-Covered Skins and Tackable Acoustical Fabric-Covered Skins

Performance tackable acoustical fabric-covered skins and tackable acoustical fabric-covered skins finish the appearance of a panel. Skin combinations can vary to accommodate a variety of appearances and functions of the workspace. *Note: A sound-blocking barrier is added to the back side of the performance tackable acoustical skins.*

- ▶ Specifying, page 446
- Tip: When specifying skins, the total skin height will be 6" less than the panel height. For example if the panel is 54"H the total skin height will be 48"H. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.*
- ▶ See Panel Buildups, page 18, for more information.

Fabric skins can be removed and repositioned.

Power and communication can be accessed by cutting skin in the field. Templates for cutting both receptacle and communication cutouts are available from Service Parts (**T500940SR**). Filler to close unwanted cutout in a skin is available from Service Parts (**TS7STFSR**).

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Skins are available in standard heights, to the floor heights, and a big open base height. Standard height skins are not dedicated to a specific location.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position. *Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.*

Actual Dimensions

Width	17 ⁵³ / ₆₄ ", 23 ⁵³ / ₆₄ ", 29 ⁵³ / ₆₄ ", 35 ⁵³ / ₆₄ ", 41 ⁵³ / ₆₄ ", 47 ⁵³ / ₆₄ ", 59 ⁵³ / ₆₄ ", and 71 ⁵³ / ₆₄ "
Height Standard Size	12 ²³ / ₆₄ ", 18 ⁷ / ₁₆ ", 24 ³ / ₄ ", 30 ¹³ / ₁₆ ", 37 ⁵ / ₆₄ ", 43 ¹ / ₄ ", 49 ⁷ / ₁₆ ", and 61 ¹³ / ₁₆ "
Height to the Floor Size	28 ³³ / ₆₄ ", 34 ⁵ / ₈ ", 40 ⁷ / ₈ ", 42", 47 ¹ / ₁₆ ", 53 ¹⁵ / ₆₄ ", and 65 ¹⁹ / ₃₂ "
Height for Big Open Base Size	19 ³ / ₁₆ "

Big open base skins are sized to work in conjunction with big open base trims, leaving the bottom of the panel open. They must be used on both sides of a panel.

Tip: Select the big open base option on horizontal frames that are receiving big open base height skins.

Tackable acoustical skins are available in big open base sizes. Performance tackable skins are not available in big open base sizes.

Wiring & Cabling

Powerkits are available in widths that correspond to panel widths.

Faceplate is used to surround receptacle when field-cutting fabric skins.

Faceplate, ordered separately, is used to surround modular furniture size communication outlet when field-cutting fabric skins.

NEMA-size communication outlets can be installed on the face of a panel skin without using a faceplate, but just the screws. Order communication outlets from an outside vendor. NEMA-size communication outlets cannot be used in the base.

Surface Materials

Skins
• Fabric

Fabric application is standard in the warp horizontal direction. Warp vertical direction is available as an option. Exceptions to this include:

- 72" wide standard and to the floor skins can only accommodate fabric in the horizontal direction.
- 60" high to the floor skins can only accommodate fabric in the vertical direction.
- 48" high to the floor skins accommodate select fabrics in the vertical direction only.

▶ See *Specification Guidelines for Directional Fabrics*, page 678, for more information.

Application Topics

Panel buildups

▶ Page 18

Big open base skins are 19³/₁₆"H and placed on the junctions just above the big open base vertical trim.

Big open base skins are sized to finish a 30"H panel.

Big open base skins can be added to panels taller than 30"H. Standard sized skins are used to finish the remaining panel height. For example a 42"H panel with big open base will need a big open base skin and a 12"H skin on each side of the panel.

Steel Panel Skins

Steel panel skins finish the appearance of a panel. Skin combinations can vary to accommodate a variety of appearances and functions of the workspace.

► Specifying, page 452

Tip: When specifying skins, the total skin height will be 6" less than the panel height. For example if the panel is 54"H the total skin height will be 48"H. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

► See Panel Buildups, page 18, for more information.

Actual Dimensions

Width 17⁵³/₆₄", 23⁵³/₆₄", 29⁵³/₆₄", 35⁵³/₆₄", 41⁵³/₆₄", 47⁵³/₆₄", 59⁵³/₆₄", and 71⁵³/₆₄"

Height 12⁹/₃₂", 18⁷/₁₆", 24⁴/₆₄", 30¹³/₁₆", and 37"

Height to the Floor Size 28²⁹/₆₄", 34⁵/₈", and 40¹³/₁₆"

Height for Big Open Base Size 19³/₁₆"

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Skins are available in standard heights, to the floor heights, and a big open base height. Standard height skins are not dedicated to a specific location.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position.

Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.

Big open base skins are sized to work in conjunction with big open base trims, leaving the bottom of the panel open. They must be used on both sides of a panel.

Tip: Select the big open base option on horizontal frames that are receiving big open base height skins.

Wiring & Cabling

Power and data can be accessed in 24"H standard base, 24"H to the floor, and big open base steel skins by specifying power and data cutouts.

Steel skins with power and data cutouts are placed in the lowest skin position on the panel and provide power access at 20".

For power access in steel skins, specify **TS7RC** receptacles and **TS7RCT** trim rings for each cutout.

Receptacle fillers are available to fill unused receptacle openings in steel skins. Use **TSBRF**.

Data fillers are available to fill unused furniture style data openings. Use **TS7DF**.

For 24"W and 30"W steel skins, hardwire receptacle cutout option will always have a single centered hardwire cutout.

For 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and right hardwire cutout.

Data cutouts are available in furniture style data cutouts and NEMA data cutouts.

For USB power access in steel skins, specify **TS7USB** receptacles and **TS7RCT** trim rings for each cutout.

Surface Materials

Skins

- Painted steel
- Ribbed steel (option)
- Perforated steel (option)

Application Topics

Panel buildups

▶ Page 18

Horizontal connecting bars will be visible when perforated skins are used on the panel.

When specifying the perforated option, order perforated skins for both sides of the panel to maximize the visual aesthetic.

Perforated skins cannot be used in installation with steel or ribbed steel skins made prior to July 10, 2000.

Big open base skins are 19³/₁₆"H and are placed on the junctions just above the big open base vertical trim.

Big open base skins are sized to finish a 30"H panel.

Big open base skins can be added to panels taller than 30"H. Standard sized skins are used to finish the remaining panel height. For example a 42"H panel with big open base will need a big open base skin and a 12"H skin on each side of the panel.

Steel skins with hardwire power cutouts are available in the following cutout configurations.

24"W and 30"W steel skins are available in the following hardwire power and data cutout configurations:

36"W steel skins are available in the following power and data cutout configurations:

42", 48", 60", 72"W steel skins are available in the following power and data cutout configurations:

Markerboard Surfaces for Steel Skins

Markerboard surface

adheres to steel skins to provide a writing surface for dry erase markers.

► Specifying, page 457

Magnetic border on back of markerboard affixes to steel skin. Markerboard surface can be removed and repositioned.

Write on markerboard surface with dry erase markers only.

Product Details

Not for use on steel panels with the ribbed surface.

For best adhesive performance, place magnetic markerboard on skin with the largest dimension horizontal.

Markerboard surface, can adhere to additional steel products such as universal steel storage.

Surface Materials

- **Markerboard**
- White only

Actual Dimensions

Width 23⁴⁵/₆₄" , 29⁴⁵/₆₄" , 35⁴⁵/₆₄" , 41⁴⁵/₆₄" , and 47⁴⁵/₆₄"

Height 12⁵/₃₂" , 24¹/₂" , and 36⁷/₈"

Note: Markerboard heights and widths can also be specified parametrically.

Markerboard Skins

Markerboard skins finish the appearance of a panel and provide a writing surface for dry erase markers.

Tip: When ordering skins to the floor an F suffix will be added to the end of the style number. The total height will still be 6" less than the panel height. Using the same example, if the panel is 54"H, 48" of skin height will need to be specified.

▶ Specifying, page 458

Markerboard skins can be removed and repositioned. They are not dedicated to a specific location.

Skin is steel construction and can accept magnets to display and share information.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position.

Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.

Wiring & Cabling

Power and communication cannot be accessed in markerboard skins.

Surface Materials

Markerboard skin

- White only

Application Topics

Panel buildups

▶ Page 18

Cleaning Instructions for Answer Markerboard Skins

1. Use clean dry eraser or microfiber cloth to remove as much ink as possible.
2. Use Expo cleaner or other markerboard cleaner with microfiber cloth. If the markerboards are used daily, cleaning may be required 2-3 times a week.
3. For heavily used boards and persistent markings, clean with 91% Isopropyl Alcohol (IPA) on a microfiber cloth. It is recommended that the markerboard skins be cleaned with 91% IPA once a week.

Note: Use of household cleaners on Answer markerboard skins is not recommended.

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Actual Dimensions

Width 17⁵³/₆₄", 23⁵³/₆₄", 29⁵³/₆₄", 35⁵³/₆₄", 41⁵³/₆₄", 47⁵³/₆₄", 59⁵³/₆₄", and 71⁵³/₆₄"

Height 12⁹/₃₂", 18⁷/₁₆", 24¹/₆₄", 30¹³/₁₆", and 37"

Height to the Floor Size 28²⁹/₆₄", 34⁵/₈", and 40¹³/₁₆"

Slatwall Skins

Slatwall skins have horizontal channels that support Steelcase worktools and accessories on 1" increments. Maximum load on skin is 80 pounds.
 ▶ Specifying, page 460

Product Details

Slatwall skins can be removed and repositioned. They are not dedicated to a specific location.

Wiring & Cabling

Power and cables cannot be accessed in a slatwall skin.

Back-to-back slatwall skins cannot be installed at the top of a panel when using a ceiling access lay-in utility package.

Surface Materials

- Paint

Application Topics

Accessories are available for use on slatwall skins.
 ▶ For additional information, refer to *Steelcase Worktools Specification Guide*.

Slatwall channels will not align when the top of a 12"H slatwall skin is adjacent to the top of an 18"H or 24"H slatwall skin.

Actual Dimensions

Width 23¹³/₁₆" , 29¹³/₁₆" , 35¹³/₁₆" , 41¹³/₁₆" , and 47¹³/₁₆"

Height 12⁵/₁₆" , 18¹/₂" , and 24¹¹/₁₆"

Slatwall channels will align when the bottom of a 12"H slatwall skin is adjacent to the bottom of an 18"H or 24"H slatwall skin.

Binder bin or shelf can be hung in front of a slatwall skin. If two bins or shelves are hung side-by-side in front of slatwall skins, the top hook must use either the third or fourth full slot down from the top. The first and second full slots from the top will not accept side-by-side shelves.

Binder bin or shelf can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Slatwall skins cannot be hung next to a cantilever or on module end panel.

Slatwall skins cannot be used in the bottom 12" of an Answer panel.

Off-module work surface to panel connector cannot be used in front of or on the adjacent panel at the same elevation as a 12"H or 24"H slatwall skin.

Slatwall skin brace package is required when mounting a flat panel monitor arm on an Answer slatwall skin.

One single or dual monitor arm can be mounted on 12"H slatwall skin that has an installed brace package.

Up to two single monitor arms can be mounted on 18"H or 24"H Answer slatwall skin that has an installed brace package. For optimal stability, the monitor arm should be mounted as shown below:

Slatwall skins cannot be placed on the spine panel when an off-module fin panel is positioned below it.

Laminate Skins

Laminate skins attach to frames to finish the appearance of a panel and can be used in combination with any other skin type.

► Specifying, page 462

Tip: When specifying skins, the total skin height will be 6" less than the panel height. For example if the panel is 54"H the total skin height will be 48"H. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but are taller in actual height to cover the base trim area.

► See *Panel Buildups*, page 18, for more information.

Laminate skins consist of a laminate surface captured by a painted metal trim border on all sides.

Laminate skins are non-tackable.

Skins can be removed and repositioned.

Individual laminate skins are available for use in monolithic applications or in combination with other types of skins on the same frame.

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Skins are available in standard heights and to the floor heights.

Standard heights are not dedicated to a specific location.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position.

Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.

Actual Dimensions

Width	23 ⁵³ / ₆₄ " , 29 ⁵³ / ₆₄ " , 35 ⁵³ / ₆₄ " , 41 ⁵³ / ₆₄ " , and 47 ⁵³ / ₆₄ "
Height Standard Size	127/ ₃₂ " , 18 ³ / ₈ " , 24 ³⁷ / ₆₄ " , 30 ³ / ₄ " , 36 ¹⁵ / ₁₆ " , 43 ¹ / ₈ " , 49 ¹⁹ / ₆₄ " , and 61 ²¹ / ₃₂ "
Height to the Floor Size	28 ²⁷ / ₆₄ " , 34 ⁵ / ₈ " , 40 ²⁵ / ₃₂ " , 47" , 53 ⁹ / ₆₄ " , and 65 ¹ / ₂ "

Woodgrain and directional laminate patterns run vertical as standard with an option of running horizontally.
Tip: All 60"H skins are only available in vertical direction for woodgrain and directional laminates.

Grain direction pattern may not align on segmented laminate skins on a single frame.

Wiring & Cabling

Power and communication cannot be accessed in laminate skins.

Surface Materials

Laminate skins

- Laminate (standard)
- Open Line laminate (option)

Trim

Wood Skins and Wood Skin Sets

Wood skins and wood skin sets attach to frames

to finish the appearance of a panel and can be used in combination with any other skin type.

► Specifying, page 464

Tip: When specifying skins, the total skin height will be 6" less than the panel height. For example if the panel is 54"H the total skin height will be 48"H. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

► See Panel Buildups, page 18, for more information.

Wood skin sets contain specific combinations of sizes and are used when segmenting all wood skins on 42"H, 48"H, 54"H, or 66"H panels. The use of sets ensures the correct cathedral wood grain alignment of all segmented skins on a frame.

Wood skins consist of a wood veneer surface captured by a painted metal trim border on all sides.

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Skins are available in standard heights and to the floor heights.

Standard heights are not dedicated to a specific location.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position.

Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.

Wood skin sets should be selected when grain pattern alignment of all segmented skins on a frame is desired.

Wood skins are non-tackable.

Skins can be removed and repositioned.

Grain of wood veneer cathedrals runs vertically. Horizontal grain direction is available as an option.

Individual wood skins are available for use in monolithic applications or in combination with other types of skins on the same frame.

Actual Dimensions

Width 23⁵³/₆₄" 29⁵³/₆₄" 35⁵³/₆₄" 41⁵³/₆₄" and 47⁵³/₆₄"

Height Standard Size 12⁷/₃₂" 18³/₈" 24³⁷/₆₄" 30³/₄" 36¹⁵/₁₆" 43¹/₈" 49¹⁹/₆₄" and 61²¹/₃₂"

Height to the Floor 28²⁷/₆₄" 34⁵/₈" 40²⁵/₃₂" 47" 53⁹/₆₄" and 65¹/₂"

Wiring & Cabling

Power and communication cannot be accessed in wood skins.

Surface Materials

Wood skins and wood skin sets

- Natural wood veneer (standard)
- Customiz stain (option)

Trim

- Paint

Price Group 2 (Metallic)

- 4799 Platinum Metallic

Tip: Consider adjacent panel trim paint color.

Back Painted Glass Skins

Back painted glass skins attach to frames to finish the appearance of a panel and can be used in combination with any other skin type.

► Specifying, page 476

Tip: When specifying skins, the total skin height will be 6" less than the panel height. For example, if the panel is 42"H the total skin height will be 36"H. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

► See *Panel Buildups*, page 18, for more information.

Back painted glass skins are non-tackable.

Connections

Skins extend onto junction and meet skin of adjacent panel. The slotted channel of the junction is accessible between these two skins.

Tip: Back painted glass skins do not attach to wall start junctions.

Skins are available in standard heights and to the floor heights.

Standard heights are not dedicated to a specific location.

Skins sized to go to the floor extend to the bottom of the panel. They can be used on one or both sides of the panel. They can only be used in the bottom position.

Tip: Omit base trim option should be selected on the panel frame when using a skin to the floor.

Actual Dimensions

Width 17⁵³/₆₄", 23⁵³/₆₄", 29⁵³/₆₄", 35⁵³/₆₄", 41⁵³/₆₄", 47⁵³/₆₄", 59⁵³/₆₄", and 71⁵³/₆₄"

Height 12⁷/₃₂", 18³/₈", 24³⁷/₆₄", 30³/₄", and 36¹⁵/₁₆"

Standard Size

Height to the Floor 28²⁷/₆₄", 34⁵/₈", and 40²⁵/₃₂"

Application Topics

A magnetic backer is available as an option on all skin sizes. There is a 2³/₈" dead zone around edge with magnetic backer option.

Tip: Rare earth magnets should be used with the magnetic backer.

Wiring & Cabling

Power and communication cannot be accessed in glass skins.

Surface Materials

Glass skins

- Back painted glass

Trim

- Paint

Technology Skins and Covers

Technology skin provides easy access to power and cabling behind the skin.
 ▶ Specifying, page 480

Skin is made of steel, slatwall, or markerboard.

Cutout is positioned at receptacle location.

Technology cover is specified separately and can accommodate a receptacle and a NEMA or DECORA communication port.

Product Details

Technology skins are available in 24" to 72" widths to match standard panel widths.

Technology skins are available in steel, ribbed steel, fabric over steel, slatwall, or markerboard. Not all materials are available on all skin heights or widths.

Technology skins 30" or under are available with all cutouts or with only right- or left-hand cutouts.

60"W and 72"W skins will have double cutouts and can be optioned to have them on both sides, right hand only or left hand only.

6"H technology skin has an option to omit all cutouts.

Slatwall technology skins include a painted trim for each cutout that is used behind the technology cover. It is painted to match the skin.

Slatwall technology skins must follow the same vertical placement rules as slatwall skins.

▶ See page 126 for Vertical Placement Rules.

Actual Dimensions

Width 23⁵³/₆₄", 29⁵³/₆₄", 35⁵³/₆₄", 41⁵³/₆₄", 47⁵³/₆₄", 59⁵³/₆₄", and 71⁵³/₆₄"

Height 6¹/₈", 12²⁹/₃₂", and 18⁷/₁₆"

Thickness 13³²/₃₂"

Technology cover accommodates both power only and power communication. Technology cover includes all necessary adapters and fillers needed for both applications. When expressing communication only, receptacle covers are available through Service Parts (891700204MP).

Connections

Skin attaches to junctions with the same clip used on all Answer skins.

Technology covers snap on to the powerkit after receptacle is installed.

Wiring & Cabling

Standard modular powerkits must be used with technology skins and covers. They cannot be used with hardwire kits.

Top opening of cover accommodates a NEMA or modular communication port and have been designed around ANSI/TIA-569-C standards for furniture mounted communication faceplates that snap into furniture openings or knockouts. Communication ports can never be back-to-back. Cover also includes a filler if no communication is being used.

Receptacle cover is available through Service Parts (891700204MP) to cover the receptacle opening if no receptacle is specified.

Surface Materials

Technology skins-6"H

- Painted steel
- Fabric covered steel (option)

Technology skins-12"H and 18"H

- Painted steel
- Ribbed steel (option)
- Fabric covered steel (option)
- Slatwall-painted
- Markerboard

Fabric application is standard in the warp horizontal direction. Warp vertical direction is available as an option.

▶ See *Specification Guidelines for Directional Fabrics*, page 678, for more information.

Technology covers

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6654 Sand
- 6697 Fog

Application Topics

24"W skin

24"W technology skins have one cutout. Communication ports cannot be supported back to back, so in this skin width, communication can only be accommodated on one side of the panel at the same elevation.

36"W skin

42"W skin

48"W skin

All 36"W, 42"W, and 48"W technology skins have one or two cutouts. The right-hand cutout can accommodate power only or power and communication. Left-hand cutout can only accommodate the power.

30"W skin

60"W skin

72"W skin

All 30"W, 60"W, and 72"W technology skins have one or two cutouts. For each double cutout the right-hand opening can accommodate power only or power and communication. Left-hand cutout can only accommodate the power.

Number of technology covers specified must match the number of cutouts in a skin.

If using powerkits shipped prior to April 2000 in an existing application, power and communication cover must be placed on the left-hand side of the technology skin.

6"H technology skin can only be used in the position just above the work surface. The skin includes powerkit brackets to be used to reposition the powerkit location on the junction.

When using a 6" technology skin on one side of the panel (only used at worksurface height) a 12" or 18" technology skin cannot be used on the opposite side of the panel at the same location as the 6"H skin.

6"H technology skins cannot be used on a 30" high panel.

6"H technology skins with no cutouts can be used in any 6" position on the panel with the exception of the bottom 12" of the panel.

18"H technology skins must be planned in 12"H increments from the bottom of the panel to align with powerkit locations.

Slatwall technology skins must follow applicable slatwall skin vertical placement rules. ▶ See page 126 for rules.

Technology skin cover fillers are available to allow technology skin cover to work with technology skins manufactured before October 10, 2011. Fillers are available for single or double cutouts and are painted.

Slatwall skin brace package is required when mounting a flat panel monitor arm on an Answer slatwall technology skin.

One single monitor arm can be mounted on a 12"H or 18"H slatwall technology skin with a single cutout. The skin must have an installed brace package. When planning location of technology skins, factor in location of height-adjustable desk to avoid interference with cords.

Glass Windows

Glass windows provide a visual space definition, yet allow light to pass through the workstation. They are available in single pane. Also available is a single pane kit that ships without glass and is used with custom glass, ordered separately.

► Specifying, page 485

Safety glass is provided, unless custom glass window kit is ordered.

Metal frame is painted and fully assembled.

Product Details

Glass window is secured by brackets in the window frame.

Wiring & Cabling

Power and cables cannot be routed vertically or accessed in a glass window.

Top channel of a window used in the top position of a panel can accommodate lay-in cable routing beneath top cap.

Surface Materials

Frame
• Paint

Single-pane window

- 6500 Clear Glass
- 6530 Frosted Glass

Tip: Frosted glass is a laminated construction. There may be variation in color, texture, and finish between the sample of 6530 Frosted Glass and the actual product.

Application Topics

12"H, 18"H, and 24"H glass windows

can be placed in the top position of a panel by either using stacking junctions, or by lowering the top horizontal connecting bar (24" maximum) in the base panel.

► See *Stability Guidelines* for rules regarding stacking and glass windows, page 142.

A 18"H or 24"H glass window

installed in the top of a base panel cannot accommodate any windows stacked on top. Tackable acoustical skins and steel skins can be stacked. Only 12"H glass windows can be stacked on top of each other.

Actual Dimensions

Depth	2 ⁷ / ₈ " (single pane)
Width	23 ⁵ / ₆₄ ", 29 ⁵ / ₆₄ ", 35 ⁵ / ₆₄ ", 41 ⁵ / ₆₄ ", 47 ⁵ / ₆₄ ", 59 ⁵ / ₆₄ ", 71 ⁵ / ₆₄ ", 77 ⁵ / ₆₄ ", 83 ⁵ / ₆₄ ", 89 ⁵ / ₆₄ ", and 95 ⁵ / ₆₄ "
Height	12 ⁹ / ₃₂ ", 18 ⁷ / ₁₆ ", and 24 ⁴ / ₆₄ "

No more than two windows may be stacked on top of each other.

Glass windows cannot be placed in the top position of a panel segment that has a 6"H stacker.

Glass window cannot be used at the base of a panel.

When installing windows, you must consider ceiling height. Windows slide into junctions from the top and require clearance above the panel.

A single glass window can span over two or more in-line panels.

Spanning windows should be used in the top position only.

Spanning window in-line support must be specified separately when spanning windows. One support is used at each in-line junction to provide a light seal and help support the window.

Spanning windows of any width cannot be stacked on top of each other.

When a spanning window is used, it is recommended that the same size spanning top cap also be specified for use on the window.

When double stacking junctions, at least one of the stacking junctions must be connected with a horizontal beam.

When ordering a 72"W or wider single pane window kit to be used with steel or fabric skins located directly below it, two clips (890146001SR) should be ordered and installed on the top edge of the skins.

Field-Installed, Single-Pane Custom Glass Kits will accommodate 4 mm – 6 mm glass

Frame Size	Style Number	Height	Width	Maximum Thickness
12"H	24"W	TS71224SCW	9.760"	21.280" 0.245"
	30"W	TS71230SCW	9.760"	27.280" 0.245"
	36"W	TS71236SCW	9.760"	33.280" 0.245"
	42"W	TS71242SCW	9.760"	39.280" 0.245"
	48"W	TS71248SCW	9.760"	45.280" 0.245"
	60"W	TS71260SCW	9.760"	57.280" 0.245"

	90"W	TS72490SCW	22.120"	87.280" 0.245"
96"W	TS72496SCW	22.120"	93.280" 0.245"	

Sliding Panel Doors

Sliding door is handed and can be added to workstations for additional privacy.

► Specifying, page 488

Door must be installed on the outside of the workstation.

Door is attached to the host panel only; therefore, the stability of the door is closely related to the stability of the host panel.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Receiving panel – height of receiving panel must match height of the door.

Host panel – height of the host panel must match the height of the door.

Sliding door frame and threshold are constructed from extruded aluminum and painted.

Lock mechanism is on the right-hand side for left-hand sliding door.

Door handle is integral and is ADA compliant.

Left-hand sliding door closes from right to left.

Door slides along threshold on wheels. Wheels have 1" adjustment for installation on uneven floors. Threshold is ADA compliant.

Right-hand sliding door closes from left to right.

Lock mechanism is on the left-hand side for right-hand sliding door.

Actual Dimensions

Door Height 66" and 78"

Door Width 36" and 42"

Door Thickness 1 1/4"

Product Details

Sliding door is handed. Right-handed sliding door or left-handed sliding door must be specified.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Door infill is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options.

Surface Materials

Frame and door track

- Paint

Door infill

- 6625 Translucent Plastic
- 6500 Clear glass
- 6541 White laminated

Application Topics

Sliding door is not free-standing. It must mount to panels.

Door is attached to the host panel only. Therefore, the stability of the door is closely related to the stability of the host panel.

▶ See Guidelines for Sliding Door Applied to Answer, page 158.

Door track is attached to both host panel and opposite panel.

Height of door must match height of host panel – 66"H or 78"H.

Match the width of the host panel to the width of the door, if possible.

When attaching the sliding door to an Answer panel, a junction stabilizer bracket is available for added rigidity to the host panel. If a host and/or receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host and/or receiving panel run. On long runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Sliding panel door cannot attach to a stacking junction. Host panel must be a single base junction.

The doorway side of the host panel must be an end-of-run junction. The doorway end of the host panel cannot be an L junction.

Panel and Beam Foot

The panel and beam foot supports up to a 48"H panel run freestanding without additional support from fin panels, tethered worksurfaces, or support legs.
 ▶ Specifying, page 490

A panel and beam foot can also be used to make a panel run taller than 48"H feel more stable, but is not an alternative to a perpendicular panel or other panel support for stability purposes.
 ▶ See Stability Guidelines page 142, for more information.

Actual Dimensions

Width	31/4"
Length	21"
Height	5/8"

Product Details

Panel and beam foot attaches to end-of-run and in-line junctions to support a freestanding panel run.

Vertical attachment post is offset on the panel and beam foot and allows for a choice of proud or inset installation at the end-of-run by rotating the panel and beam foot.

Panel and beam foot positioned proud of the end of run accommodates Ology, Migration, and Airtouch height adjustable desks. It is used parallel to the panel without overlapping table supports and panel feet.

Panel and beam foot positioned inset from the end-of-run provides a cleaner visual and accommodates Ology, Migration, and Airtouch desks.

Panel and beam foot will be centered on in-line junctions.

Panel and beam foot only attaches to junctions manufactured on or after October 10, 2011.

Glide for use with panel and beam foot is included in the hardware package and installs in the field to maintain standard panel height and minimize the gap between the panel and floor.

Standard glides can be used in conjunction with the panel and beam foot but will result in a 5/8" larger gap between the bottom of the panel and the floor.

Set screws in the end of the foot provide 1/4" of micro adjustment.

Surface Materials

Foot
• Paint

Application Topics

Open base trim cannot be used in conjunction with a panel and beam foot.

Big open base trim can be used in conjunction with a panel and beam foot.

Top cap mounted storage is not permitted on freestanding panel runs supported by panel feet.

Panel hung storage is not permitted on freestanding panel runs supported by feet.

Slatwall skins are not allowed on freestanding panel runs supported by panel feet.

Wiring & Cabling

Panel and beam foot blocks power routing in the panel base and just above the base areas. The vertical attachment post covers the slots on the junction where the powerkit connects in these two zones. It also blocks the ability for a powerkit harness, pass-through powerkit, or modular harness to route in the base area from an adjacent panel.

Multipurpose infeed connects power from the building floor into a panel run supported by panel feet. Conduit can be run under the panel or through a knockout in the basetrim, and must be attached to the bottom horizontal beam with 24206001SR strain relief bracket from service parts.

San Francisco power infeed can be used if liquid tight conduit is required. Plan to have a long enough infeed to attach to a modular power kit in the panel adjacent to the entry panel.

Power can be accessed in the third position up from the base through field cut fabric skins or technology skins.

Stability Guidelines

Answer, when installed properly, is an exceptionally stable furniture system. That applies to workstations using panels alone, panel-supported components, or freestanding furniture.

Counterweight packages for storage products are required to ensure product stability.

▶ See page 273 for *Counterweight Requirements for Storage Products*.

The following section on panel stability gives some guidelines to be used with common system furniture configurations. Guidelines are given to panels with and without components. Consult your local dealer or Steelcase representative prior to deviating from these guidelines.

When panel height exceeds six feet in seismic geographical areas rated at a 3 or 4, floor plans must be submitted to a certified structural engineering firm to assure the product application complies with applicable building codes. Steelcase is not responsible for consultation fees. Maximum allowable stacked panel height is 90".

Change-of-height has no effect on these stability guidelines unless otherwise specified.

There are several ways to anchor the end of a panel run:

With a return panel.

With a pedestal, pedestal filler, or a lateral file with a storage-to-panel connector.

With an end panel.

Guidelines for Panel-Hung Components

▶ Page 157

Guidelines for Sliding Panel Door Applied to Answer
▶ Page 158

Guidelines for Freestanding Panels Supported by Panel and Beam Foot
▶ Page 157

Guidelines for Answer Panel-Hung Components

These guidelines treat shelves and bins as interchangeable.

- If bins or shelves are applied at an elevation higher than 66", a perpendicular panel of same height (or up to 24" lesser height) is required.
- Top of universal sliding door bin is not designed to support the weight of a seated person.
- When ganging bins or shelves, the use of a tie plate is required.
- When stacking bins, at least 2 inches of clearance from the bottom is required to access the lock.

In all cases, up to two panel-hung components may be used per panel, per side. These are some common applications:

Hanging one component on one side.

Hanging one component on each side.

Hanging two components on one side.

Hanging two components on each side.

When 24"W return panels are placed adjacent to each end of components, you may use up to four shelves or bins on a panel (without worksurfaces).

Three shelves or bins, 48" maximum vertical loading space including top.

Three shelves or bins, 48" maximum vertical loading space including top.

Four shelves or bins, 60" maximum vertical loading space including top.

Four shelves or bins, 60" maximum vertical loading space including top.

Guidelines for "L" Configurations

Panels with Panel-Hung Components

If **A** is up to 12' or less, you need to have either a pedestal with filler, a jetty or bubble jetty worksurface, or an end panel on end. Maximum 8' of shelves or bins per panel run.

Guidelines for "T" Configurations

An 8' run with no panel-hung component does not require a return panel. For additional stability or longer runs, apply a junction stabilizer bracket every 8' bolted to a concrete floor.

In change-of-height configuration when panel A height is shorter than panel B height, a junction stabilizer bracket must be applied to the panel A.

When back painted glass is located on the return panels, the return panel height must be equal to or shorter than the spine panel height.

Note: The minimum spine length is 6'.

For runs over 8' up to 18', you must use at least a 30"W return panel.

When back painted glass skins are used on the spine panels, a rear facing return panel is required.

Guidelines for "T" Configurations, continued

Panels without Panel-Hung Components

For runs over 18', you must locate a 48"W perpendicular panel every 12'.

Panels with Panel-Hung Components Counterbalanced on Both Sides

If A is 4' long and B is 6' long, you must use an end panel and a cantilever.

If B is 6' to 12', you must use one center support panel per side. Maximum 8' of shelves or bins per panel run.

If B is up to 6' long, you can use cantilevers to support adjoining worksurfaces.

If B is up to 6' long, you can use cantilevers to support adjoining worksurfaces. Maximum 8' of shelves or bins per panel run.

Guidelines for Support Brackets: No Overheads or Panel-Hung Components

One end of panel run must be supported by:

- Panel that is minimum 24" wide.
- Tower with tall storage-to-panel connector (24"D or 30"D)

Other end of panel run can be supported by:

- Open loop leg
- Closed loop leg
- Pedestal with filler
- End panel
- 1.5H or 2H storage with storage-to-panel connector
 - 18"D or 24"D cabinet in perpendicular application
 - 24"D cabinet in parallel application
- Tower with medium storage-to-panel connector

Worksurfaces 26" D or less:

- Can be completely supported by cantilever brackets or a combination of cantilever and side support brackets, pedestals, legs (post, open loop, closed loop), end panel support, and 1.5H storage with intermediate support.
- When using cantilevers to support a 26"D or less worksurface, minimum return panel width is 30". Panel width can be reduced to 24"D to match the worksurface depth of a 24"D worksurface if side support brackets are applied.

Worksurfaces greater than 26" D:

- Straight and transition worksurfaces require additional floor support along the front edge at each end, such as side support brackets, pedestal, or post leg.

Guidelines for Support Brackets: Overheads or Panel-Hung Components

Tip: Overhead bin or shelf cannot span over or be positioned over tower.

One end of panel run must be supported by:

- Panel that is minimum 24" wide.
- Tower with tall storage-to-panel connector (24"D or 30"D)

Other end of panel run can be supported by:

- Open loop leg
- Closed loop leg
- Pedestal with filler
- End panel
- 1.5H or 2H storage with storage-to-panel connector
 - 18"D or 24"D cabinet in perpendicular application
 - 24"D deep cabinet in parallel application
- Tower with medium storage-to-panel connector

Worksurfaces 26" D or less:

- Can be completely supported by cantilever brackets or a combination of cantilever and side support brackets, pedestals, legs (post, open loop, closed loop), end panel support, and 1.5H storage with intermediate support.
- When using cantilevers to support a 24"D worksurface, minimum return panel width is 30". Panel width can be reduced to 24"D to match the worksurface depth if side support brackets are applied.

Worksurfaces greater than 26" D:

- Straight and transition worksurfaces require additional floor support along the front edge at each end, such as side support brackets, pedestal, or post leg.

Guidelines for Support Brackets

If A is between 8' and 10', side support brackets are required at each end of the run. Both ends of loaded panel run must be supported by perpendicular panels.

Note: Panel fin on one side can be replaced by a tower with a tall storage-to-panel connector as long as the tower is not outside the panel run and the overhead bin or shelf is not spanning over or positioned over the tower.

If A is greater than 10', side support brackets are required at both ends of each worksurface. Full height perpendicular panels need to support the loaded panels every 8'.

Guidelines for "U" Configurations

If A is 12' or less, no floor support is required mid-run. Maximum 8' of shelves or bins per panel run.

If A is between 12' and 16', some type of floor support is required mid-run. Maximum 8' of shelves or bins per panel run.

Guidelines for "X" Configurations

Panels without Components

For additional stability or longer runs, apply a junction stabilizer bracket every 8' bolted to a concrete floor.

Panels with Components

If panel is 6' or less, no center support is needed.

Center support panel is needed every 6'. Cantilevers can be used to tie spanner in. Maximum 8' of shelves or bins per panel run.

Guidelines for "V" Configurations

Panels with Components

If A is up to 12' or less, you need to have either a pedestal with filler, a jetty or bubble jetty worksurface, or an end panel on end. 26"D or greater straight worksurfaces and 30"D transition worksurfaces require additional floor support along the front edge, such as a pedestal or post leg. Maximum 8' of shelves or bins per panel run.

"U" configuration must have a cantilever with the 120° V junction. The other end needs to be supported with a full-height panel, end panel, or a pedestal with filler.

No components can be hung on back side of panel run unless in a "Y" configuration.

When back painted glass skins are used on the spine panels a rear facing return panel is required.

Guidelines for "Y" Configurations

Panels without Components

For additional stability or longer runs, apply a junction stabilizer bracket every 8' bolted to a concrete floor.

Panels with Components

If panel is 6' or less, no center support is needed.

Center support panel is needed every 6'. Cantilevers can be used to tie spanner in. Maximum 8' of shelves or bins per panel run.

"Y" configuration must have an end panel with a connector bracket with the 120° Y junction. The other end needs to be supported with a full-height panel, end panel, or a pedestal with filler. For worksurfaces 26"D or less, the center can be supported by a cantilever when bins and worksurfaces are used on both sides (as shown). 26"D or greater straight worksurfaces and 30"D transition worksurfaces require additional floor support along the front edge, such as a pedestal or post leg.

Note: When using cantilevers to support a work surface 26"D or less, minimum panel width is 30". Panel width can be reduced to 24" to match a 24"D work surface if side support brackets are applied.

Guidelines for Bench Configurations without Top Cap Mounted Storage

Single Sided Bench

Tip: Single sided applications using half loop leg require a cantilever between the leg and the next support.

Double Sided Bench

End-of-run support options include:

- Post leg and cantilever
- Half loop leg
- Open loop leg
- Closed loop leg
- Worksurface end panel
- Pedestal with filler
- 1H, 1.5H, or 2H (18" on 24"D) cabinet with panel-to-storage connector in perpendicular application.
Note: 1H and 1.5H cabinet requires intermediate support.
- 1H, 1.5H, or 2H (24"D) cabinet with panel-to-storage connector in parallel application.
Note: 1H and 1.5H cabinet requires intermediate support.
- Tower with medium storage-to-panel connector

Maximum worksurface depth is 26" with front support every 12'.

Worksurfaces greater than 26"D require legs in the front of each worksurface on both ends of the worksurface.

Center support panels cannot be used as supports.

Slim shelves and slatwall skins (including monitor arm attachment) can be applied, but bins and universal shelves are not allowed.

Guidelines for Bench Configurations with Top Cap Mounted Storage, continued

Single Sided Bench with Aisleway Top Cap Mounted Storage

For single sided bench with aisleway top cap mounted storage, worksurface support must include at least one of the following:

- Pedestal with filler
- 1H, 1.5H, or 2H (18" on 24"D) cabinet with panel-to-storage connector in perpendicular application.
Note: 1H and 1.5H cabinet requires intermediate support.
- 1H, 1.5H, or 2H (24"D) cabinet with panel-to-storage connector in parallel application.
Note: 1H and 1.5H cabinet requires intermediate support.
- Tower with medium storage-to-panel connector

End-of-run support options include:

- Post leg and cantilever
- Half loop leg
- Open loop leg
- Closed loop leg
- Worksurface end panel
- Pedestal with filler
- 1H, 1.5H, or 2H (18" on 24"D) cabinet with panel-to-storage connector in perpendicular application.
Note: 1H and 1.5H cabinet requires intermediate support.
- 1H, 1.5H, or 2H (24"D) cabinet with panel-to-storage connector in parallel application.
Note: 1H and 1.5H cabinet requires intermediate support.
- Tower with medium storage-to-panel connector

For single sided bench applications with aisleway top cap mounted storage, worksurface depth must be 30"D.

30"D worksurfaces require legs in the front of each worksurface on both ends of the worksurface.

Center support panels cannot be used as supports.

Slim shelves and slatwall skins (including monitor arm attachment) can be applied, but bins and universal shelves are not allowed.

- 1** *Tip: The maximum panel height with Duo, Currency storage, and Elective Elements storage is 48".*
- 2** *Tip: In aisleway applications, the back of the storage overhangs the panel 3.5".*
- 3** *Tip: Aisleway mounting can accept storage up to 17"D.*
- 4** *Tip: When using storage to panel connectors to support the panel application, the maximum distance between storage to panel connection is 6'.*

Guidelines for Bench Configurations with Top Cap Mounted Storage, continued

Double Sided Bench with Center Top Cap Mounted Storage

- 1 Tip: The maximum panel height with Duo, Currency, and Elective Elements storage is 48".
- 2 Tip: 10' max between legs when using legs and cantilevers to support panel.
- 3 Tip: When top cap storage is center maintained, the storage is shared equally on top of the panel.
- 4 Tip: Center mounting can accept storage up to 25"D.

End-of-run support options include:

- Post leg and cantilever
- Half loop leg
- Open loop leg
- Closed loop leg
- Worksurface end panel
- Pedestal with filler
- 1H, 1.5H, or 2H (18" on 24"D) cabinet with panel-to-storage connector in perpendicular application.
Note: 1H and 1.5H cabinet requires intermediate support.
- 1H, 1.5H, or 2H (24"D) cabinet with panel-to-storage connector in parallel application.
Note: 1H and 1.5H cabinet requires intermediate support.
- Tower with medium storage-to-panel connector

Maximum worksurface depth is 26" with front support every 10'.

Worksurfaces greater than 26"D require legs in the front of each worksurface on both ends of the worksurface.

Center support panels cannot be used as supports.

Slim shelves and slatwall skins (including monitor arm attachment) can be applied, but bins and universal shelves are not allowed.

Guidelines for Wall-Start Junction Configurations

Panels with Components

When using a wall-start junction, an end panel must be used with the wall-start junction and the other end must be supported by a full panel, an end panel, or a pedestal with a filler. For worksurfaces 26"D or less, the center can be supported by a cantilever. 26"D or greater straight worksurfaces and 30"D transition worksurfaces require additional floor support along the front edge, such as a pedestal or post leg.

Wall hang channels for shelves and overhead storage bins cannot be used with a wall-start junction.

Tip: Wall-start junctions must secure to the stud in a building wall or use drywall fasteners.

Guidelines for Answer Off-Module Bracket Configurations

Panels with Components

"U" configuration

When using an Answer off-modular connector bracket, a cantilever must be used with the connector bracket. The other end needs to be supported with a panel, end panel, or a pedestal with filler. For worksurfaces 26"D or less, the center can be supported by a cantilever. 26"D or greater straight work-surfaces and 30"D transition worksurfaces require additional floor support along the front edge, such as a pedestal or post leg.

Note: When using cantilevers to support a worksurface 26"D or less, minimum panel width is 30". Panel width can be reduced to 24" to match a 24"D worksurface if side support brackets are applied.

"T" configuration

When using an Answer off-modular connector bracket, a cantilever must be used with the connector bracket. The other end needs to be supported with a panel, end panel, or a pedestal with filler. For worksurfaces 26"D or less, the center can be supported by a cantilever when bins and worksurfaces are used on both sides (as shown). 26"D or greater straight worksurfaces and 30"D transition worksurfaces require additional floor support along the front edge, such as a pedestal or post leg.

Wall-start junction must match the fin panel height coming off the spine wall. Change-of-height trim is not available to cover exposed wall-start junction.

Loading on spine wall with change-of-height off-module fin

is allowed with a maximum of 12" height difference between spine and fin. No loading on spine is permitted if the spine is 24"H or higher than the off-module fin. End panels or a pedestal with a filler is required to support a worksurface attached to spine.

Guidelines for Sliding Panel Door Applied to Answer

Receiving Panel

- Height of receiving panel must match height of door.
- If receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the receiving panel run. On long receiving panel runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Host Panel

- Height of host panel must match height of door.
- Match the width of the host panel to the width of the door.
- If host panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host panel run. On long host panel runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Guidelines for Freestanding Panels Supported by Panel Feet

Single Panel
4' Min

48" Max

- 1 Tip: The maximum panel height is 48"H with up to an additional 12"H frameless glass screen.
- 2 Tip: Single panels supported by panel feet must be at least four feet wide.
- 3 Tip: Freestanding panel runs with multiple panels must have a panel and beam foot every 10 feet.
- 4 Tip: A panel and beam foot is required within three feet of the end of run.

Multiple Panel Run

Slim shelves, slatwall skins, and panel-hung or top cap mounted overhead storage bins are not allowed in panel and beam foot supported applications.

Guidelines for media:scape Integration

For runs up to 12'6" that have return panels on the same side as the shared workspace, use at least a 30"W return panel that matches the height of the spine wall. For spine walls that exceed 66"H, a 30"W rear facing return panel is required. The monitor mount is not to exceed 66"H.
Tip: Monitor not included with media:scape assembly.

For runs up to 12'6" that have return panels on the opposite side as the shared workspace, use at least a 24"W return panel. The monitor mount is not to exceed 66"H.
Tip: Monitor not included with media:scape assembly.

Wiring Schematics

Details for the Electrician

Answer offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

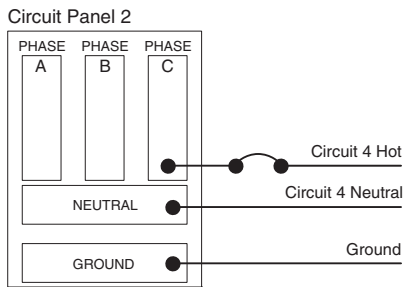

Rust = Three-circuit, separate neutrals (3SN)

Shared neutrals = 10 gauge

Non-shared neutrals = 12 gauge

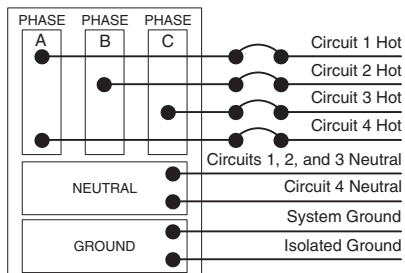

Hot wires = 12 gauge

Four-Circuit, 3+1

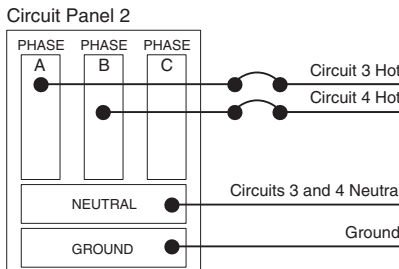

In the four-circuit 3+1 schematic, circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

Single 3-Phase Circuit Panel

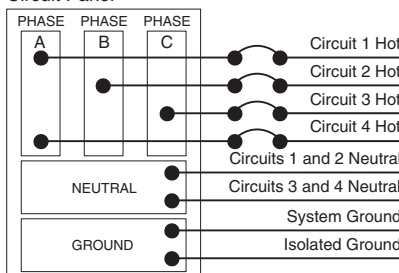

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Four-Circuit, 2+2

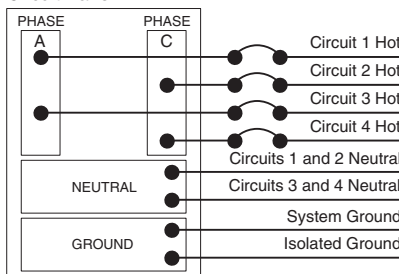

In the four-circuit 2+2 schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

Single 3-Phase Circuit Panel

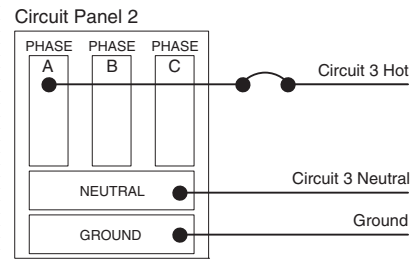

On a single 3-phase circuit panel, all four circuits are distributed as shown.

Split-Phase Circuit Panel

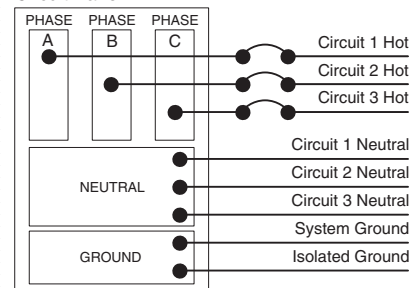

On a split-phase circuit panel, all four circuits are distributed as shown.

Three-Circuit, Separate Neutrals

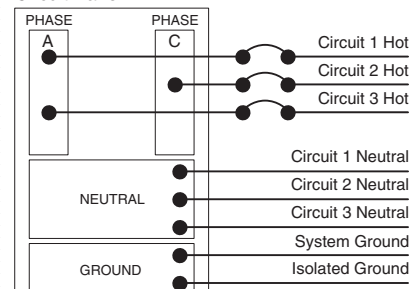

In the three-circuit, separate neutral schematic, circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

Single 3-Phase Circuit Panel

On a single 3-phase circuit panel, three circuits are distributed as shown.

Split-Phase Circuit Panel

On a split-phase circuit panel, three circuits are distributed as shown.

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance: The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit
Laptop (Low)	30	0.25	120	64
Laptop (High)	100	0.83	120	19
CPU/Desktop Computer (Low)	65	0.54	120	30
CPU/Desktop Computer (High)	150	1.25	120	13
Monitor (Low)	15	0.13	120	128
Monitor (High)	80	0.67	120	24
Phone	5	0.04	120	384
High Power Tablet	10	0.08	120	192
Lower Power Tablet	45	0.38	120	43

Microwave (High)	1000	8.33	120	2
Refrigerator (Low)	200	1.67	120	10
Refrigerator (High)	1500	12.50	120	1
Vacuum (Low)	200	1.67	120	10
Vacuum (High)	1500	12.50	120	1
Space Heater (Low)	400	3.33	120	5
Space Heater (High)	1500	12.50	120	1
Height-Adjustable Desk (Low Power Consumption)*	200	1.67	120	10
Height-Adjustable Desk (High Power Consumption)*	550	4.58	120	3

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

** Refer to the Height-Adjustable Desks Specification Guide for specific product information.*

Cable Capacities

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this table are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity for cable study performed on junctions manufactured on or after October 10, 2011.

Note: Tests were performed on junctions with tall sleeves installed.

Cables Tested

A CommScope Systimax Gigaspeed 1071E Series Category 6 Cable
OD=0.23"

B CommScope Systimax X10D 1091B Series Category 6A Cable
OD=0.285"

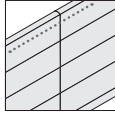

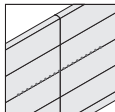

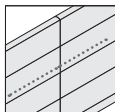

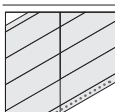

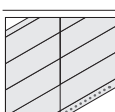

Power harnesses reduce cable capacity.

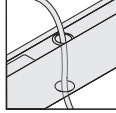

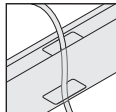

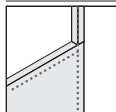

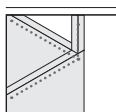

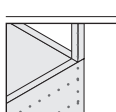

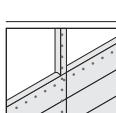

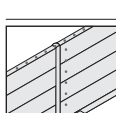

An average of 10-15 cables will be reduced per harness used. However, this number varies according to installation practices and the type of cables used.

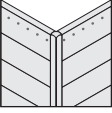

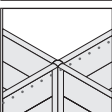

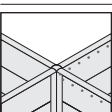

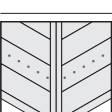

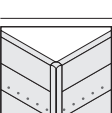

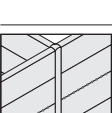

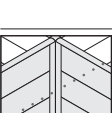

If glass window is used at the top of a panel, top cap lay-in cable capacity is 20 for category 6 cables.

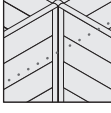

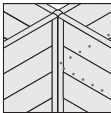

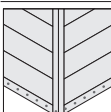

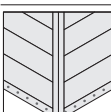

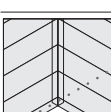

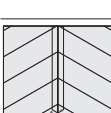

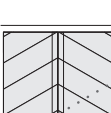

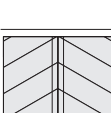

When laying cables vertically behind skins, capacity is dependent on skin width.

When using stacking junctions, the fork connector does not reduce cable capacity.

		A	B
Straight Horizontal Routing			
	Lay-in cable routing at top of panel (in-line junction)	40	30
	Horizontal pass-through (straight) at cable routing opening (available every 12" inside frame)	12	7
	Horizontal pass-through (straight) at rectangular opening for modular power harness (available every 12" inside frame)	72	47

Ceiling-Access Lay-In Utility Package

Ceiling-access lay-in utility packages allow panels to accommodate a large amount of power and cable brought in from the ceiling. Standard skins are used to finish the panel.
 ▶ Specifying, pages 358 and 431

Utility carrier routes power and cables from the ceiling into the panel. Carrier is integrated within a panel run and does not exceed the width of the panel.

Utility carrier and cover stop at top of junction so cables can go in either direction.

Standard horizontal connecting bars are used on adjacent panels. Cables routed vertically can be laid behind panel skin or routed through the openings in the horizontal connecting bar. Power is routed vertically through the opening in the horizontal connecting bar.

Utility carrier and cover for thin is 96"H or can be field cut to size. Square and oval are adjustable from 60"H to 120"H. The pole's inside dimension is 3"D x 5⁵/₈"W.

Top cap is shortened to accommodate utility carrier and cover. Wood veneer is available as an option. Top cap is available in three styles - thin, square, or oval.

Narrow horizontal connecting bars allow modular harnesses and large bundles of cables to be routed vertically over the front of the bars.

Standard base trim is included with ceiling lay-in utility package.

Product Details

Ceiling-access lay-in utility package includes: utility carrier and cover with hardware, top cap, two lay-in horizontal connecting bars, and two base trims. Package is available in 30", 36", 42", and 48" widths to match standard panel widths. Package can be specified with thin, square, or oval top trim. Base cable trays are optional.

Ceiling attachment carrier and kit secures the top of the utility carrier and cover to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Ceiling-access lay-in utility package takes the place of a standard horizontal frame package. Don't double order.

Connections

Bracket attaches the utility carrier to the lay-in horizontal connecting bar.

Ceiling-access lay-in utility package can be installed in in-line, L, T, X, V, Y, and end-of-run panel configurations. End-of-run condition reduces cable capacity.

Quick-lock mechanism on the lay-in horizontal connecting bar engages the junction in a tight structural connection. Quick-lock mechanism is the same as on the standard horizontal connecting bars.

Wiring & Cabling

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Ceiling-access lay-in utility package was designed to be used with Answer power harnesses. If using any other type of conduit, the diameter of the conduit cannot be greater than 1/2". Skins will not install properly if conduit exceeds 1/2".

Square and oval change-of-height cable routing trim allows lay-in cable routing in change-of-height applications. Specify change-of-height top cap for the lower panel to allow clearance.

Power harness, ordered separately, acts as a shield to permit the ceiling-access lay-in utility package to accommodate power and communication cable routing at the same time.

Surface Materials

Utility carrier and cover, base trim, and top cap

- Paint
- Wood veneer (option on top cap only)

Lay-in horizontal connecting bars

- Black paint
- Tip: Components are hidden when panel is properly installed.*

Oval junction cap

- Plastic
- Tip: Junction cap is included for end-of-run configurations.*

Square junction cap

- Paint
- Tip: Junction cap is included for end-of-run configurations.*

Application Topics

Utility carrier and cover are designed to be located at either end of the panel. However, they can be installed in any location, but field cutting of the top cap will be required.

Utility carrier and cover cannot be located next to a taller panel.

For thin trim: ceiling-access lay-in utility package cannot be used on the taller panel in a 6" in-line change of height application. Ceiling access lay-in utility package cannot be used on a panel with 6" stacking junctions. For square and oval trim: ceiling access lay-in utility package cannot be used on a 36" or 48"H panel when that panel is used in an in-line change-of-height application with a taller panel.

Back-to-back slatwall skins cannot be installed at the top of a panel when using a ceiling access lay-in utility package. Slatwall can be used on one side only.

Windows cannot be installed in the top position of a lay-in frame.

Floor-Access Lay-In Utility Package

Floor-access lay-in utility packages allow panels to accommodate a large amount of power and cable brought in from the floor. Standard skins are used to finish the panel.
▶ Specifying, pages 359 and 432

Narrow horizontal connecting bars allow modular harnesses and large bundles of cables to be routed vertically over the front of the bars.

Base utility box covers power and cables entering from the floor.

Standard top cap is included with floor-access lay-in utility package. Top cap is available in three styles - thin, square, or oval. Wood veneer is available as an option.

Standard base trim is included and used on the side of the panel opposite from the base utility box.

Modified base trim is included and consists of two pieces to allow attachment of base utility box.

Product Details

Floor-access lay-in utility package includes: top cap, two lay-in horizontal connecting bars, base utility box with hardware, one standard base trim, and one modified base trim. Package can be specified with thin, square, or oval top trim. It is available in 30", 36", 42", and 48" widths to match standard panel widths.

Base utility box is positioned at the left-hand side of the modified base trim. Entry on the other end would be accomplished from the other side of the panel.

Floor-access lay-in utility package takes the place of a standard horizontal frame package. Don't double order.

Connections

Bracket attaches the base utility box to the lower lay-in horizontal connecting bar.

Floor-access lay-in utility package can be installed in in-line, L, T, X, V, Y, and end-of-run panel configurations. End-of-run condition reduces cable capacity.

Quick-lock mechanism on the lay-in horizontal connecting bar engages the junction in a tight structural connection. Quick-lock mechanism is the same as on the standard horizontal connecting bars.

Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne foot base, or c:scape glide.

Wiring & Cabling

24"W powerkit, ordered separately, can be used in the base of 36"W, 42"W, and 48"W floor-access lay-in utility packages. Power kit must be located to the right of the base utility box. No powerkit can be used in 30"W floor-access lay-in utility packages.

Power harness, ordered separately, is shielded to permit the floor-access lay-in utility package to accommodate power and communication cable routing at the same time.

Base utility box routes cables and/or Answer harnesses into the panel from the floor. Base power infeeds are not intended for use with the floor-access lay-in utility package.

Floor-access lay-in utility package can accommodate up to 80 cat 6 cables. Deduct 10-15 cables for each power harness or modular connector routed through the base utility box.

Surface Materials

Base utility box, base trim, and top cap

- Paint
- Wood veneer (option on top cap only)

Lay-in horizontal connecting bars

- Black paint
- Tip: Bars are hidden when panel is properly installed.*

Application Topics

Base utility box protrudes 4" from the base trim on one side of the panel. When planning, locate the base utility box underneath a workstation instead of a hallway.

Specify change-of-height top cap on your lay-in utility package if it is the lower panel in a change-of-height configuration.

Base utility box is for routing of cable and power only. Not to be used as a termination point or for the routing of power cords.

Utility Pole—Thin Trim

Utility pole—thin trim brings power and cabling from the ceiling and introduces it into a panel with thin trim only through openings positioned vertically every 12". Junction is not included as utility pole connects into the existing panel junction (used with junctions manufactured on or after October 10, 2011).

► Specifying, page 357

Utility pole is flush with the footprint of the panel.

Product Details

Ceiling attachment kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the panel to make a modular connection to a power kit.

Tip: Power harnesses are ordered separately from the utility pole.

Utility pole can reach ceilings 7'6" higher than connection point (two panels at the highest height) of the panels.

Shield on power harness permits a utility pole to accommodate power and communication cable routing at the same time. For applications where more cable routing is needed, you can use the utility pole without a power harness or use a lay-in utility package.

Ceiling trim plate measures 7" x 7" when installed.

Connections

Utility pole—thin trim works with base and stacking junctions. It can be used at an L, T, or X configuration. It cannot be used in an end-of-run, V, Y, or in-line configuration. Utility pole is not shipped with a junction.

"L" application requires two panels at the same height. Utility pole is flush with the panel run.

"T" application requires at least two panels at the highest height. Utility pole is flush with the panel run.

"X" application requires two panels at the same height. Δ

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements.

Junction with Utility Pole

Utility pole brings power and cabling from the ceiling and introduces it into the panel through openings positioned vertically every 12 inches. Includes a junction and replaces the need to order one separately.
 ▶ Specifying, page 428

Utility pole extends beyond the footprint of the panel.

Product Details

Ceiling attachment kit secures the top of the utility pole to the suspended ceiling grid. Hardwired connection to the building's power can be made in the junction box.

Power harness for use with utility pole is available to bring power down from the ceiling and into the panel to make a modular connection to a powerkit.
Tip: Power harnesses are ordered separately from the utility pole.

Ceiling heights up to 10' can be accommodated.

Shield on power harness permits a utility pole to accommodate power and communication cable routing at the same time. For applications where more cable routing is needed, you can use the utility pole without a power harness or use a power harness or use a lay-in utility package.
 ▶ Pages 358 and 430 for lay-in utility package.

Connections

Utility pole works with base and stacking junctions. It can only be used at an end-of-run, in-line, L- or T-configuration. It cannot be used in an X, V, or Y-configuration. Utility pole is always shipped with a junction, so don't double order.

End-of-run application uses an in-line junction. Utility pole extends 3" beyond the footprint of the panels. This works with thin, square, or oval trim.

In-line application uses T junction and adds 3" to panel run. This works with square or oval trim only.

"L" application uses T junction. Utility pole extends 3" beyond the footprint of the panels. This works with square or oval trim only.

"T" application uses X junction. Utility pole extends 3" beyond the footprint of the panels. This works with square or oval trim only.

Wiring & Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

▶ Page 163

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements.

▶ Pages 177 and 182

Base Power Infeed

Base power infeed connects power in the building floor to a powerkit in the base of a panel. Infeed occupies one receptacle opening.

► Specifying, page 499

Connector on end of base power infeed harness occupies one receptacle location in power block.

Flexible harness makes hardwired connection to building monument. The harness must be backfed through the base trim prior to connection into the building monument.

Cover is included with base power infeed to conceal the connection.

Wiring & Cabling

Connector on base power infeed must be placed behind panel base trim and harness must be backfed through base trim opening prior to an electrician making the connection to power in the building floor.

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 163

All Answer electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Panel segments with big open base cannot use base power infeed. Bring power in using a multi-purpose infeed.

Special requirements are needed for San Francisco.

► See page 499 for specification.

Special Requirements for New York City

New York City electrical code requires modular power components to be field installed by the electrician. Because Answer power components are always field installed, they are okay for use in New York.

Modular connector on end of harness attaches to powerkit in adjacent panel.

Junction box, included with infeed, allows electrician to make a hardwire connection to the building power supply. Box covers opening in base cover.

Conduits supplied by electrician.

Order New York City power infeed of the width that corresponds to the width of the panel it will be installed in.
Tip: Remember that the panel with the New York City power infeed installed cannot accommodate any receptacles in the base because a powerkit cannot be installed. Install a powerkit higher in the panel to accommodate receptacles or use adjacent panels to install receptacles.

Distribution Products

Powerkits are a combination of modular power blocks, harnesses, and connectors that attach to a power tray for installation inside an Answer panel. Powerkits are available in widths that correspond to panel widths.

► Specifying, page 492

Powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Pass-through powerkits are available for applications where you want to extend the power between panels but have no need for access in a specific panel.

► Specifying, page 493

Pass-through powerkits may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Cable trays can be installed every 6" vertically and rearranged at various heights within a panel for communications access and cable routing.

► Specifying, page 491
Exception: Cable tray cannot be used in the base of the panel.

Cable tray can accept added cable carriers attached below tray to expand horizontal cable management options.
 ► See *Montage Specification Guide* for cable carrier (ZCC).

Product Details

Powerkits can be installed every 12" vertically. Typically they are positioned in the panel base, at worksurface height, or in both locations.

Pass-through powerkits extend power between panels.

Standard Base Trim Width of panel application determines how many receptacle and communication locations are available.

12"

 24"W with one power block. Communication opening is located below and to the right of the power block.

12"

 30"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

12"

 36"W to 48"W with two power blocks. Communication openings are located below and to the right of each of the power blocks.

12"

 60"W to 72"W with four power blocks. Communication openings are located below and to the right of each right-hand power block of each power block pair.

Tip: For non-base locations, same power block locations apply, but communication openings line up above the right-hand power block.

Hardwired Base Trim Width of panel application determines how many receptacle and communication locations are available.

12"

 24"W with one power block. Communication opening is located below and to the right of the power block.

10.3"

 30"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

12"

 36"W with two power blocks. Communication opening is located below and to the right of the right-hand power block.

12"

 42"W to 48"W with two power blocks. Communication openings are located below and to the right of each of the power blocks.

12"

 60"W to 72"W hardwire powerkit comes with two power blocks. The hardware base trim has two power knockout options on each end of the base trim. The power block can be installed at either knockout location. Communication openings are located below and to the right of each right-hand power block of each power block pair.

Tip: For non-base locations, same power block locations apply, but communication openings line up above the right-hand power block.

Tip: Communication openings are located 2 1/2" further right than standard base trims to accommodate wider hardwired junction boxes.

15-amp or 20-amp duplex receptacles snap into powerkits on one side or both sides of the panel.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

USB receptacles available in three wiring schematics with multiple line options, snap into powerkits on one side or both sides of the panel. USB receptacles offer easy access to two charging ports. Each port provides 1 ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

Power and data can be accessed in 24"H standard base, 24"H to the floor, and big open base steel skins by specifying power and data cutouts.

For power access in steel skins, specify **TS7RC** receptacles and **TS7RCT** trim rings for each power cutout specified in steel skins.

For USB power access in steel skins, specify **TS7USB** receptacles and **TS7RCT** trim rings for each power cutout specified in steel skins.

Receptacle fillers are available to fill unused receptacle openings in steel skins. Use **TSBRF**.

Data fillers are available to fill unused furniture style data openings. Use **TS7DF**.

Install duplex or USB receptacles only where you want them. Add more receptacles in the future. *Exception: When using technology skins, receptacles are required in all power block locations. Tip: If receptacles are not specified for all power block locations, you must order filler through Service Parts (891500350MP, package of 20).*

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

► Page 163

Distribution Products, continued

Performance tackable acoustical skins and tackable acoustical skins can be cut in the field to allow access to duplex receptacles, USB receptacles, and communication outlets. Order cutting templates through Service Parts (T500940SR). Steel skins do not have cutouts and cannot accommodate receptacles. Install power receptacles and communication ports in the panel base cover below the steel skin or use a technology skin.

Knockouts and cut-outs for receptacles in the panel base trim and skins are always 10⁵/₈" from the outside edges of the panel. Knockouts for communication in base accommodate modular furniture size only.

Filler to close unwanted openings in base trim is available from Service Parts.

Wire separators are not required. All electrical harnesses are shielded.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

Chicago and New York have special requirements. ▶ Pages 177 and 182

A pass-through harness is required when connecting powerkits in the top position of a 36"H or 48"H junction. A pass-through harness should be used for both in-line and corner applications.

Modular Harness

▶ Specifying, page 503

Modular harnesses are available to connect powerkits at different heights. Available in 43" and 80" lengths.

Extra length modular harness is required when connecting two power kits located at different heights inside the panel in a corner or in-line application.

In an in-line application extra length modular harness is not required when a powerkit is in the bottom (not base) location in a panel with open base.

In a corner application extra length modular harness is required when a powerkit is in the bottom (not base) location in a panel with open base trim. In this circumstance, the modular harness will need to be routed through the first large opening in the junction located above the powerkit. The modular harness cannot be routed through the foot area of the panel due to the open base trim.

Harnesses plug into connection points on the powerkit. Every powerkit has multiple connection points to allow branching of power.

Modular harness may be specified in a non-PVC version.

T-connection is formed by connecting two harnesses to a power block.

X-connection is formed by connecting two harnesses to two successive power blocks.

Modular harness may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Multipurpose Power Infeed

► Specifying, page 502

Product Details

Multipurpose power infeed is shielded to allow power and communication routing side by side. Available in 6', 12', and 24' lengths.

Multipurpose power infeeds bring power into the panel and make a modular connection to a powerkit.

Multipurpose power infeeds can be used with ceiling- and floor-access lay-in utility packages and utility poles. Specify power harness separately.

Multipurpose power infeeds may be specified in a non-PVC version. For those trying to gain the LEED Innovation in Design credit, non-PVC should be selected.

Special Requirements for Hardwired Solution

Chicago electrical code requires the power distribution network to be hardwired on site. These installations require hardwired powerkits.
 ▶ Specifying, page 501
Tip: Any hardwired installation can use the components of the hardwired powerkit.

Order panel without power and order a hardwired powerkit of the corresponding width.
 ▶ Page 501

Power tray is included in hardwired powerkit to secure junction boxes and to attach to panel frame.

When power is placed in a non-base application, skins must be field-cut. Technology skins cannot be used with hardwired solution.
Tip: Hardwire powerkit applications in the base location require a hardwire base trim for correct alignment of power and data receptacles.

Receptacle openings are knocked out in the field.

Junction boxes are included in hardwired powerkit.

Receptacles are supplied by the electrician.

Conduits are supplied by the electrician.

Connections

Powerkit can be installed in panel base or at 12" vertical increments.

Junction boxes are typically mounted below the power tray; however, they can be mounted above when power is routed in a location other than the panel base. A bracket is included for mounting junction boxes above the powertray.

When using a hardwired solution with segmented skins, you may need to install junction boxes above the power tray to avoid interference with the steel frame of the skin. Approximately 3" of clearance is required when mounting junction boxes above the power tray. Keep in mind the upper horizontal connecting bar location to ensure enough space for mounting junction boxes above.

Tip: Don't forget to discuss junction box location and skin configuration prior to electrician installing the power.

Number of Junction Boxes is Determined by Panel Width

Panel width	Junction boxes
24"	1
30"	2
36"	2
42"	2
48"	2
60"	2
72"	2

Wiring & Cabling

Junction box can accommodate two receptacles back to back. Electrician can use Leviton 5325 or equivalent receptacles.

Order Chicago-version of shelf lights. These lights have a built-in circuit breaker.

Duplex Receptacles

► Specifying, page 494

Product Details

15-amp or 20-amp receptacles, ordered separately, snap into both faces of power block in the field.

Orange triangle indicates to users the receptacles that are connected to isolated grounds.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

For power access in steel skins, specify **TS7RC** receptacles and **TS7RCT** trim rings for each cutout.

Surface Materials

Duplex receptacle

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6651 Tungsten
- 6652 Titanium
- 6654 Sand
- 6697 Fog
- 6B03 Red

USB Receptacles

► Specifying, page 496

Product Details

USB receptacles, ordered separately, snap into both faces of power block in the field.

USB receptacles are type USB-A.

USB receptacles, are available in three wiring schematics with multiple line options. USB receptacles offer easy access to two charging ports. Each port provides one ampere of output. USB receptacles conveniently charge a wide range of electronic devices. Some devices may not be compatible.

For USB power access in steel skins, specify **TS7USB** receptacles and **TS7RCT** trim rings for each cutout.

Surface Materials

USB receptacle

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6651 Tungsten
- 6652 Titanium
- 6654 Sand
- 6697 Fog
- 6B03 Red

Faceplate

► Specifying, page 497

Product Details

Faceplate, ordered separately, is used to surround receptacle when skin is field-cut. Templates for field cutting are available through Service Parts (T500940SR).

Faceplate is used to surround modular furniture size communication or DECORA outlets when installed in the face of a tackable acoustical panel skin. Templates for field cutting are available through Service Parts (T500940SR).

NEMA-size communication outlets (single gang) do not require a Steelcase faceplate. Cannot be used in base.

Surface Materials

Faceplate

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6651 Tungsten
- 6652 Titanium
- 6654 Sand
- 6697 Fog

Receptacle Trim Ring

► Specifying, page 498

Product Details

Receptacle trim ring is used with each receptacle, receptacle cut-out cover, or USB on a steel skin to cover the edge of the cut-out and create a precise transition between the cut-out and the receptacle.

Trim ring will only work on receptacle **TS7RC**, **TS7USB**, and **TS7BCC**.

Only specify when using power cutouts in steel skins.

Surface Materials

Receptacle Trim Ring

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6527 Merle
- 6654 Sand
- 6697 Fog

Receptacle Filler

► Specifying, page 498

Product Details

Receptacle fillers are available to fill unused receptacle openings in steel skins. They are offered in packages of 20.

Surface Materials

Receptacle Filler

- 6000 Black
- 6009 Arctic White
- 6249 Platinum Solid
- 6527 Merle
- 6654 Sand
- 6697 Fog

Data Filler

► Specifying, page 498

Product Details

Data fillers are available to fill unused furniture style data openings in steel skins. They are offered in packages of 20.

Surface Materials

Data Filler

- 6009 Arctic White
- 6249 Platinum Solid
- 6527 Merle
- 6654 Sand
- 6697 Fog

Accessories

Junction Tall Sleeve

► Specifying, page 506

Product Details

Junction tall sleeve can be added to vertical junctions to cover the exposed metal edges in the large cable routing openings of junctions manufactured on or after October 10, 2011.

Junction tall sleeves are ordered separate from vertical junctions and are available in packages of 10.

Surface Materials

- Red plastic only

Lay-In Junction Cable Sleeve

► Specifying, page 507

Product Details

Lay-in junction cable sleeves can be added in the field to cover the exposed metal edges in lay-in cable space.

Surface Materials

- Lay-in junction cable sleeve**
- Black plastic only

Feed-Through Horizontal Cable Sleeve

► Specifying, page 507

Product Details

Feed-through horizontal connecting bar cable sleeves can be added in the field to finish the exposed metal edges of vertical cable pass-through openings.

Surface Materials

- Feed-through horizontal cable sleeve**
- Black plastic only

Grommet for Horizontal Bar and Junctions (manufactured prior to October 2011) and Horizontal Bars

► Specifying, page 507

Product Details

Grommet for horizontal bar and junctions can be added in the field to finish the exposed metal edges of cable pass-through openings. For cable sleeves used with junctions manufactured after October 2011, use junction tall sleeve (TS7JTSLVE).

Grommets can also be used with power trays or cable trays.

Surface Materials

- Black plastic only

Grommet for Junction

► Specifying, page 508

Product Details

Grommet for junction can be added in the field to finish the exposed metal edges of horizontal cable pass-through openings.

Surface Materials

- Black plastic only

Duplex Cable Grommet

► Specifying, page 508

Product Details

Cable grommets can be inserted in receptacle openings to route cables from the panel base into the panel.

Surface Materials

- Duplex cable grommet**
- 6000 Black
 - 6009 Arctic White
 - 6249 Platinum Solid
 - 6607 Woodrose
 - 6608 Driftwood

Worksurface Positioning

Universal Worksurfaces

Universal Worksurfaces is a comprehensive solution of worksurfaces, supports, and privacy screens designed to deliver flexibility, mobility, and options to create inspiring spaces that support the different ways people work. A beautiful, light-scale aesthetic which gives designers new solutions across a broad spectrum of applications including the following: traditional panel-mounted systems, freestanding light-scale desking, panel wrapped desking, private office, conference, and teaming. Consists of Universal Systems Worksurfaces, U-Free Desks and Universal Tables.

Universal Systems Worksurfaces

Main worksurface solution for the four primary space division products: Answer, Montage, and Kick. Worksurfaces can be panel-mounted or freestanding.

- Extensive shape and size offering allows designers to meet a variety of planning applications.
- Worksurfaces feature a choice of curvilinear or straight-front shapes.
- User front edge available in 3 mm edge.
- Available with 1/2" cord drop in the back of the worksurface providing the most efficient routing of cords and an uncluttered desktop.
- Also available full depth, providing an uninterrupted working surface that fits flush to the panel and allows L-configuration planning.
- Standard scallops allow large cord heads to easily pass below the desktop. Scallops can be eliminated for freestanding applications.
- Available with full offering of Steelcase High-Pressure Laminates or veneers; specifiable 3 mm edge colors.
- Worksurfaces can be supported with cantilevers, center support panels, end panels, pedestals, legs, or desk supports.
- Straight worksurface available to specify parametrically from 18"D to 36"D and from 18"W to 120"W in 1/16" increments.

Answer Freestanding Desks

Main desk solution for use with the four primary space division products: Answer, Montage, and Kick. Desks are built up from Universal components ordered separately and assembled onsite.

- Flexible product offering allows a wide range of desk applications for private offices, reception areas, and open plan settings.
- Non-handed desk components are easy to assemble and easy to reconfigure.
- Compatible with a wide range of worksurface products, including Universal Systems Worksurfaces, and many others.
- Wide range of storage available, including universal pedestals, lateral files, and hutches.
- Full-height and half-height modesty panels available for desks and peninsulas.
- Visually compatible with Universal tables, towers, and other products.

Universal Tables

Versatile freestanding tables appropriate for teaming and conferencing environments or for individual work areas. Tables can be fixed or mobile for increased flexibility or ease of reconfiguration.

- High-Pressure Laminate tables are available with a 3 mm edge. Wood veneer tables are available with a square (3 mm) edge.
- User edge on all sides of the tables and rounded corners allow a user to work on any side.
- Wide range of sizes and shapes available, from small personal tables to large conference tables.
- Available with full offering of Steelcase High-Pressure Laminates or veneers; specifiable 3 mm edge colors.
- T and X bases, post legs, C-leg, and adjustable-height legs give designers many functional and aesthetic options.

Elective Elements Worksurfaces

(See *Elective Elements Specification Guide*.)

Main worksurface solution for three primary space division products: Answer and Montage. Worksurfaces can be panel-mounted or built up into casegood solutions appropriate for private office solutions when combined with storage, end panels, and modesty panels.

- Extensive shape and size offering allows designers to meet a variety of planning applications.
- Worksurfaces feature a choice of curvilinear or straight-front shapes.
- Desk, bridge, return, peninsula, and desk return worksurfaces are also available for freestanding casegood applications in addition to the typical systems worksurface shapes.
- User-front edge is available in a choice of 3 mm plastic edges, wood edge profiles on laminate worksurfaces (square 5 mm), or wood edge profiles on wood worksurfaces (3 mm square, waterfall, or knife).
- Worksurfaces are depths 24" or 30".
- Scallops are optional, as well as round or square grommets, depending on power and cable management needs. Grommets are available, depending on the worksurface shape, typically in left, center, and right locations.
- Grommets must be used for worksurface cable or cord management to route cords below the desk top.
- Scallops are used for task light cord management only.
- Available with full offering of Steelcase laminates or veneers. Also available with Customiz stain or open line laminates.
- Worksurfaces can be supported with Elective Elements supports (center support panels, end panels, under-worksurface storage, or freestanding legs) as well as Universal cantilevers and side support brackets.
- Height adjustability is achievable by using the height-adjustable storage and/or legs. Range of maintenance adjustability is 29"H-32"H in 1/2" increments.

Panel-Mounted Worksurface Supports Integration Matrix

This matrix shows recommended panel-mounted supports for specific panel and worksurface combinations.

Refer to the appropriate Solutions Specification Guide (Answer or Montage) for detailed information.

- Tip: Alignment tabs will need to be knocked down when full-depth worksurfaces are used.*

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.

Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. A light load application is less than 40 pounds placed on a worksurface. Reinforcing channel must be specified separately.

► Page 555

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.

Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" (72"-6" = 66"). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left-Hand Support	End Panel	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	FrameOne Leg-Table Application	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	Intermediate Support	-9"	-9"	-12"	-12"	-9"	-9"	-9"
	DBL Post Leg	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	Cantilever	-6"	-6"	-9"	-9"	-6"	-6"	-6"
	All other Legs/Supports	-6"	-6"	-9"	-9"	-6"	-6"	-6"

Reinforcing Channel Sizes		
Style Number	Nominal	Actual
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Note: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Reinforcing Channel Size for Straight 120° Worksurfaces

To calculate the reinforcing channel size for a straight 120° worksurface, use the user edge length, subtract 6", and order the next shortest channel. See chart below.

Back Edge Width	Worksurface Depth	User Edge Depth	Reinforcing Channel Size
48"	23½"	61⅙"	54"W
48"	29½"	65⅙"	57"W
60"	23½"	73⅙"	66"W
60"	29½"	77⅙"	66"W
72"	23 ½"	85⅙"	72"W
72"	29½"	89⅙"	72"W

Support Requirements for Peninsula Worksurfaces

Peninsula worksurfaces smaller than 60"W do not require a reinforcing channel. Location of leg or column support, determined by pilot holes, meets the requirements for worksurface support every 54". Sizes 60"W or greater require a reinforcing channel. Determining brace size for peninsula worksurfaces: If worksurface is supported by a single column or legs, subtract 21" from span of worksurface to determine reinforcing channel size. Example: 72"W measured span has a span deduction of 21" for a reinforcing channel size of 51" ($72" - 21" = 51"$). For this application, use reinforcing channel TS7WKSPT51.

Universal Worksurface Thought Starters

Universal Worksurface Products provide a variety of traditional and non-traditional methods of applying worksurfaces and supports. Worksurfaces can be supported in on-module and off-module panel-supported applications, freestanding configurations, and many combinations of these applications. The thought starters included on the following pages can help leverage the benefits of the worksurfaces in new and unique ways.

Universal Worksurface Products provide significant planning flexibility:

- Systems Worksurfaces and Tables can be used together, and a wide range of worksurface shapes and sizes allow various footprints to be achieved.
- Systems Worksurfaces can be used with Answer and Kick panels, Montage frames, and V.I.A. walls. They can be panel-supported or freestanding. *Tip: Corner 120° Systems Worksurfaces may not be panel-supported with Montage panels due to the unique design of the Montage 120° junction.*
- Freestanding, mobile worksurfaces and tables allow user control of the workspace to provide either privacy or team collaboration.
- 26"H and 28½"H legs may be installed 3", 6", or 9" from the edge of most Tables to accommodate nesting and slip-fit capability.
- Adjustable-height legs are available on Systems Worksurfaces and Tables. Legs adjust 25½"H to 31½"H in ¾" increments.

Freestanding tables with legs installed 6" or 9" from the edge allow the worksurface to slip-fit over the panel-mounted Systems Worksurface. This configuration also allows the user to face the aisle while working at the computer.

Full depth systems worksurfaces allow L-configurations without uneven gaps. This configuration uses an angled peninsula worksurface to provide an aisle-facing place for active work and meetings. A 96" long straight worksurface creates a large, unbroken area to spread out work in progress. All the worksurfaces in this configuration are symmetrical, making it easy to plan mirror image applications.

U-Configuration with Large Footprint

Recommended Worksurfaces

One 24"D x 72"W straight table	BFS2472
One 23½"D x 60"W straight worksurface	USWS
One 23½"D x 23½"D x 41½"W x 41½"W corner, curved-front worksurface	UCC224242
One 23½"D x 30"W visitor, curved-front worksurface	UVC2430R

L-Configuration with Large Footprint

Recommended Worksurfaces

One 24"D x 24"D x 60"L angled peninsula worksurface	WPA2460
One 24"D x 24"W straight worksurface	USWS
One 24"D x 96"W straight worksurface	USWS

Universal Worksurface Thought Starters, continued

Systems worksurfaces with 1/2" cord drop

allow easy cord management with uniform gaps whenever corner worksurfaces are used. This U-configuration uses 18³/₈"D worksurfaces to create a spacious workstation in a 6x7 footprint.

U-Configuration with Medium Footprint

Recommended Worksurfaces

Two 18 ³ / ₈ "D x 30"W straight worksurfaces	USWS
Two 18 ³ / ₈ "D x 18 ³ / ₈ "D x 41 ¹ / ₂ "W x 41 ¹ / ₂ "W corner, curved-front worksurfaces	UCC114242

Tapered worksurface shapes

can maximize space for the user by providing extra depth for the computer only where it's needed. This configuration uses a taper-flat worksurface and an 18⁷/₈"D return to give the user more space in a 6x6 footprint. The user can also face toward the aisle while working at the computer.

L-Configuration with Small Footprint A

Recommended Worksurfaces

One 30"D x 24"D x 72"W taper-flat worksurface	WTTF3272
One 18 ⁷ / ₈ "D x 48"W straight worksurface	USWS

Freestanding tables with nesting-height legs

allow tables to nest under panel-mounted Systems Worksurfaces. This configuration uses an 18"D Systems Worksurface and allows a small workstation to expand and decrease, giving users control over their space.

L-Configuration with Small Footprint B

Recommended Worksurfaces

One 24"D x 48"W capsule table	BFK2448
One 18 ³ / ₈ "D x 60"W straight worksurface	USWS

Spacious U-configurations with a minimum number of panels and work-surfaces

can be created with 60"W x 60"W corner, curved-front and linking peninsula Systems Worksurfaces.

Penta Cube

Recommended Worksurfaces

Six 24"D x 60"W x 60"W x 24"D corner, curved-front worksurfaces (3 mm edge)	UCC226060
Five linking peninsula worksurfaces (3 mm edge)	UPAC2748
One straight worksurface (3 mm edge)	USWS

Tip: Size of linking peninsula worksurface to be used is determined by the panel system which it will be used with. Answer panels are shown at left.

Universal Systems Worksurfaces

Systems worksurfaces— with 1/2" Cord Drop feature built-in cable management flexibility, allowing cords to drop below the worksurface at any point along the back edge.
▶ Specifying page 510

Systems worksurfaces— Full Depth feature a tighter fit to panels for a cleaner aesthetic.

Systems straight work-surfaces with 1/2" cord drop and full depth are available in a variety of widths and depths in parametric dimensions.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Edge Profiles

Edge profile is applied to front (user's) edge only.

*Tip: Straight worksurface width is available parametric from 18"W–120"W in 1/16" increments. Straight worksurface depth can be specified parametric from 18"D–36"D in 1/16" increments.

Universal worksurfaces are undersized about 0.05 inches from ordered dimension to ensure fit in panel wrapped applications.

Straight worksurfaces are available to specify parametrically. The parametric dimensions available are from 18" to 36" deep and from 18" to 120" wide in 1/16" increments both depth and width.

Parametric straight worksurfaces are available in laminate with a 3 mm plastic edge, knife edge, or soft edge options and wood veneer with square edge or soft edge options.

Parametric straight worksurfaces have the option to specify a scallop, grommet cutouts, power and data access door and tray cutout, or power access door.

Dual-worksurfaces are two pieces - a large monitor surface with a smaller keyboard surface attached. A dual-arm spring mechanism provides superior stability when compared to the single-arm spring mechanism used in worksurfaces with an adjustable keyboard shelf.

Keyboard surface on dual worksurface can be adjusted to positions up to 6" higher or 5" lower than the monitor worksurface.

Keyboard surface tilts with a range of 25°.

A 1" gap separates the sides of the keyboard surface and adjacent worksurfaces. There is also a 1 1/2" space between the keyboard and monitor surfaces.

Dual worksurfaces cannot be used as a single worksurface. Dual worksurfaces must be tethered to a panel or connected to an adjacent worksurface in a freestanding application.

30°D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Taper-flat worksurfaces can be supported at the larger end with a side support bracket and a post leg. If the larger end is 30"D, a 24"D end panel can also be used.

Spanner worksurfaces with 3" notch accommodate Answer panels. Legs and cantilevers or column and cantilevers must be used for support.

Notch is not included on spanner worksurfaces for freestanding applications without panels.

3 mm edge bullet peninsula, jetty, and bubble jetty worksurfaces can be supported two ways:

- With a cantilever, a center support panel and a column
- With a cantilever, a side support bracket, and two post legs

In certain applications, a center support panel should not be used because the unfinished top edge of the support panel would be exposed. Use a cantilever, a side support bracket, and two post legs instead. These applications include:

- Angled peninsula with 3 mm edge and 1/2" cord drop

Linking peninsula worksurfaces and linking worksurfaces with 3" notch accommodate Answer panels. Legs and cantilevers or column and cantilevers must be used to support linking peninsula worksurfaces.

One leg and two cantilevers must be used to support linking worksurfaces.

3 mm edge visitor worksurfaces must be supported by either a cantilever and a center support panel, or by a cantilever, a side support bracket, and a leg.

Universal Systems Worksurfaces, continued

Connections

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For panel-supported applications you can use:

- Closed loop
- Open loop
- Half loop
- Intermediate support
- Off-module worksurface-to-panel connector
- Side support brackets
- Cantilever with tie plate
- End panel
- Standing-height end panel
- Support plate
- Center support panel with tie plate
- Standing-height center support panel with tie plate
- Columns or legs

▶ See page 224 for *Panel-Mounted Universal Systems Worksurface Supports*.

- Universal pedestal with filler
- Universal lateral file with underworksurface lateral file filler

▶ See *Storage Specification Guide*.

For Answer Freestanding desk applications you can use:

- End supports
 - Peninsula supports
 - Corner support
 - Columns and legs
 - Closed loop or open loop
 - Modesty panels
 - Pedestals
 - Lateral files and storage cabinets
- ▶ See *Answer Freestanding Specification Guide*.

For leg-based applications you can use:

- Closed loop
 - Open loop
 - Intermediate support
 - Post legs
 - Double post leg
 - Double post C-leg
 - Support plate
- ▶ See page 232 for *Legs and Columns for Universal Systems Worksurfaces*.
Tip: Pedestal can also be used in leg-based freestanding installations.

Intermediate supports replace the need for other types of worksurface support when used with 1-High or 1.5-High Universal storage.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPT reinforcing channel is used. Reinforcing channel must be specified separately.
 ▶ Page 555

Knife edge worksurfaces require reinforcement channels for spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Heavy load worksurfaces spanning greater than 60", or all worksurface spans wider than 72" require additional support of a cantilever, pedestal, intermediate support, or leg.

Wiring & Cabling

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers are included with wood veneer worksurfaces. Wire managers for use with laminate worksurface must be ordered separately.

Corner worksurfaces have scallops located 12 1/2" from the rear corner of the worksurface to the center of the scallop. Taper-flat worksurfaces have a single scallop located 18 1/2" from the larger end. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable scallop can be omitted for freestanding applications or panel-supported applications where plugs do not need to pass over the back edge of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.
 ▶ See *Worksurface Power and Communication*, page 575.

Parametric straight worksurfaces have two grommet cutout options. The 2" round grommet cutout option fits the AWAG2 grommet which is specified separately.
 ▶ See page 577

The 3" round grommet cutout option fits the TSAEGROM grommet which is specified separately.
 ▶ See page 578

The grommet cutout option is not available on a worksurface when the power access door option is selected.

Grommet cutouts in parametric straight work-surfaces can be specified in the center, the left, or the right sides of the worksurface. Grommet cutouts are available in the below configurations.

Grommet Location on Worksurface	Minimum Worksurface Widths
Center, Right, or Left	All widths
Right and Left	At least 25"W
Right and Center	At least 34"W
Left and Center	At least 34"W
Center, Right, and Left	At least 34"W

FrameOne post legs will interfere with the left or right grommet cutouts on parametric Universal straight worksurfaces.

Grommet cutouts in parametric straight work-surfaces are located $3\frac{5}{16}$ " from the back edge of the worksurface to the back edge of the grommet cutout. Left and right grommet cutouts are located $6\frac{1}{2}$ " from the edge of the worksurface to the outside edge of the grommet cutout.

Surface Materials

High-Pressure Laminate Worksurfaces

- Laminate
- ▶ See *Surface Materials Reference Manual*.
- Open Line laminate (option) A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Front (user's) edge(s)

- Plastic

Back and side edges

- Plastic color default to match user's edge

Wood Veneer Worksurfaces

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match worksurface

Front (user's) edge(s)

- Wood edge band

Application Topics

Full-depth worksurfaces provide an uninterrupted working surface and are designed to allow traditional corner or L-configuration planning without creating uneven gaps.

Plan using worksurfaces actual dimensions when panel-wrapping worksurfaces because worksurface depths and widths vary by type. Straight and transition worksurfaces are full-width to correspond directly with panel width. Corner, extended corner, 120° corner, bullet peninsula, jetty, visitor, and linking worksurfaces are $\frac{1}{2}$ " less than panel width to allow for a consistent $\frac{1}{2}$ " cable-management gap when used in combination with straight worksurfaces.

Tip: To avoid uneven gaps in panel-supported applications, use full-depth worksurfaces to create L-configurations.

Screens mount to worksurfaces in privacy position or below the worksurface for modesty.

- ▶ See *Screens*, page 563.

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

- ▶ Page 142

Do not use a Universal Systems Worksurface

as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are slightly undersized for panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

- ▶ See *Storage Specification Guide*.

Knife edge worksur-

faces have limitations for support options and application restrictions.

- ▶ See page 234 for *Knife Edge Worksurface Application Guidelines*

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5–50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray

Soft edge provides a comfortable user experience reducing strain on wrists and forearms.

▶ Specifying page 514

Power and data access door and tray provides desk top access and management of cords.

▶ Specifying page 548

Soft edge and power and data access door and tray cutout are available in modular and parametric straight worksurfaces, both 1/2" cord drop and full depth.

Cutout is optional; power and data access door and tray is ordered separately. 24"W cutout is centered near the back of the worksurface.

Edge is soft to the touch and flexes to conform to the arm.

Power and data access door and tray is available with cord or with modular or hardwire connection.

Soft edge is 36" wide centered on the worksurface; balance of front edge is 3 mm radius. Back and side edges are flat.

Soft edge and power and data access door and tray are available on straight and taper Universal Systems Worksurfaces with 1/2" cord drop and full depth.

Tray includes six simplex receptacles and cutout for data access.

Height	N.A.	N.A.	4 3/4"

Product Details

Soft edge profile is polyurethane.

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

3 mm front edge is specifiable. Back and side edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on worksurface when cutout for power and data access door and tray option is selected.

Power and data access door and tray cutouts are 3⁵/₁₆" from the back edge of the worksurface and always centered on the width of the worksurface.

Power and data access door and tray cutouts are available on worksurfaces 24"D through 36"D.

Inner tray provides under the surface power and data connections and access and cord management.

Outer tray provides cover and management for harness, cord, and/or data cables to and from the panel.

Power and data access door and tray flips toward the user.

Modular, cord and plug, or hardwire options are available.

Corded version includes 10' cord with plug. Modular and hardwire versions each include 8' of harness.

Three wiring schematics are available in the modular version – 3+1, 2+2, and 3 separate neutrals (3SN). Each has a single circuit. 3+1 and 2+2 have the option for line 1, 2, 3, or 4 with either a system or isolated ground. 3SN has the option for line 1, 2, or 3 with either a system or isolated ground.

Data cutout in tray can accommodate either a single gang or a modular furniture communication faceplate. Tray includes adapter to accommodate modular faceplate.

Filler packages are available to fill unused data cutouts. Order separately in packages of 20.

With the modular and hardwire version, the harness enters the panel through a field cut opening in a fabric skin. A grommet is included to provide a finished edge to the field cut opening in the skin where the harness enters the panel. Inside the panel the harness can connect to a powerkit or it can use either a harness to harness connector or a branching harness to harness connector to connect to other modular harness trays or modular harnesses.

Cord and plug version has an integrated overload circuit breaker.

Non-PVC versions are available for each power solution.

Connections

Fixed storage can be used with worksurfaces with soft edge but must not encroach the 36" width of the edge.

Worksurfaces connected perpendicular should not encroach the 36" width of the soft edge.

Soft edge worksurfaces are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

▶ See page 210 for Universal Systems Worksurfaces Understanding. *Exception: 48"W worksurface with soft edge used with the FrameOne post leg has some limitations.*

In an end-of-run condition, the FrameOne post leg will not fit when used with 48"W soft edge worksurfaces, use half, open, or closed loop legs.

In shared applications, the FrameOne post leg can be angled and positioned at the front edge or for a square orientation it must be inset 1" from the front edge when used with 48"W soft edge worksurfaces.

Access holes in tray allow power and data to be routed straight back when worksurface is against the panel or routed to the sides when the worksurface is perpendicular to the panel.

Worksurfaces with power and data access door and tray are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.

▶ See page 210 for Universal Systems Worksurfaces Understanding.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray, continued

Tray with cord and plug can be used in a freestanding table application.

Worksurfaces with power and data access door and tray with modular or hardwire power cannot be used in a freestanding application. The worksurface must either be attached to a panel on one end or if the worksurface is attached to low storage with an intermediate support on one end, the cabinet must be attached to the panel or ganged to another storage cabinet. This applies to both parallel or perpendicular to the panel applications.

Height of tray is 4³/₄" so lower storage height must be accounted for when used adjacent to tray.

Width of outer tray below the worksurface is 27¹/₈" so adjacent lower storage dimensions must be accounted for on each worksurface width.

Tray with cord and plug includes two cord clips to help manage the cord below the worksurface.

Tray with modular harness or hardwire harness includes two harness clips to help manage the harness below the worksurface.

Soft edge worksurfaces and power and data access door and tray worksurfaces require reinforcement channel or other support on worksurfaces 60"W or larger.

Worksurfaces greater than 72"W require additional support such as cantilevers, pedestals, or legs beyond the brace.

Wiring & Cabling

Chicago, New York, and Los Angeles have special requirements.

Underwriter Laboratory (UL) listed. The power and data tray has been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Access Door and Tray

Universal Systems Worksurfaces with Power Access Door

Power access door option on worksurfaces

allows for convenient pass through access to panel outlets.

► Specifying page 510

Systems straight worksurfaces with power access door

are available in a variety of widths and depths in modular and parametric dimensions.

Power access door provides desk top access and management of cords.

Power access door is only available on worksurfaces with a 1/2" cord drop.

Actual Dimensions

Modular*	Parametric*	Centered	Left	Right	Left and Right	Left and Center	Right and Center	Left, Right, and Center
Straights – 18³/₈", 23¹/₂", and 29¹/₂"D*	Straights – 18"D - 36"D							
30"W	30"W – 35 ¹⁵ / ₁₆ "W	●						
36", 42", and 48"W	36"W – 53 ¹⁵ / ₁₆ "W	●	●	●				
54", 60", and 66"W	54"W – 71 ¹⁵ / ₁₆ "W	●	●	●	●

Dimensions

Cutout for Door

Width	16 ¹ / ₈ "
Depth	4 ¹ / ₄ "

*Tip: Modular 29¹/₂"D worksurface is only available up to 72"W. Worksurface width is available parametric from 18"W–120"W in 1/16" increments. Worksurface depth can be specified parametric from 18 3/8"D–36"D in 1/16" increments.

Product Details

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See *Surface Materials Reference Manual* for specific PVC-free availability.

3 mm front edge is specifiable. Back and side-edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on all worksurfaces with a power access door.

Power access door provides access to power outlets in the panel.

Currency storage with recessed back should be used when storage will be placed in front of a power outlet.

Recessed back storage features a 3³/₄" cavity to allow access to outlets below the worksurface.

Left and right configured power access doors will interfere with FrameOne post leg support and freestanding end panels (UE18, UE24, and UE30).

Worksurface-Mounted Retractable Power and Data

Product Details

Standard with four power receptacles, two data openings and faceplates to accommodate customer supplied voice/data jacks.

Optional with two power/two data/one USB or three power/one data/one USB.

Includes 10' power cord with three-prong plug.

Can mount in any location on worksurface.

Requires a 4" x 11" hole with square corners be field cut in the worksurface.

Specify cord and cable management accessories separately to manage cords and cables back to panel.

Surface Materials

Housing

- Anodized aluminum

Receptacle

- Black

Metal Center Drawers

► Specifying, page 550

Product Details

Metal center drawer provides convenient personal storage beneath the worksurface.

Tray for pencils and paper clips is included.

Locks are not available on center drawers. For secure storage, use pedestals and other lower storage with locks.

Connections

Fits on all 24"D and 30"D panel-supported worksurfaces and 24"D, 30"D, and 36"D desks.

Tip: 24"D desk can only use the 18¹/₈"D center drawer.

Installation is in the field.

Drawer frame and attaching hardware are included for field installation.

Wiring & Cabling

Grommets cannot be used over center drawers.

Surface Materials

Center drawer

- Paint

Tip: Drawer will match the color of the supports. If you want a complementary color, you should order the drawer separately for field installation.

Application Topics

Drawer should be placed approximately 4" from the left or right end to allow for the attachment of cantilevers or end panels.

Kneespace clearance needed is 23"W.

Actual Dimensions

Depth 18¹/₈" or 23"

Inside depth 14¹/₂" or 19¹/₂"

Width 21¹/₂"

Inside width 19¹/₂"

Height 2³/₈"

Inside height 2"

Transaction Worksurfaces

Transaction worksurface

provides a surface that can be used by standing visitors or serve as a shelf.

► Specifying, page 546

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 1 3/16" thick.

Attachment brackets are included.

Shortened top caps are included with the transaction worksurface. Top caps are available in thin, square, or oval styles and are compatible with same-height or change-of-height applications.

Product Details

High-Pressure Laminate Worksurfaces

3 mm edge profile

3 mm edge profile is plastic and is specified separately from laminate color.

Wood Veneer Worksurfaces

Edge profile is wood veneer with a square (3 mm) radius. Wood edge color matches finish specified for worksurface.

Edge profile is applied to all edges.

Actual Dimensions

Square and Oval		Thin	
A	B	A	B
15"	23" for use on 30"W panel	15"	28" for use on 30"W panel
15"	29" for use on 36"W panel	15"	34" for use on 36"W panel
15"	35" for use on 42"W panel	15"	40" for use on 42"W panel
15"	41" for use on 48"W panel	15"	46" for use on 48"W panel
15"	53" for use on 60"W panel	15"	58" for use on 60"W panel

Tip: Wood veneer transaction worksurfaces are not available in 23"W.

Connections

Transaction work surface support brackets connect to the top of a horizontal connecting bar. Horizontal bar must be connected to junctions in top position.

Transaction work surfaces cannot be used when a transparent window, pass-thru window, or consolidation point cabinet are assembled at the top of a panel.

A transaction top work surface cannot be added to a panel segment with a 6" stacker.

In square and oval trim applications, a transaction top cannot be used on a 36" or 48"H panel when the panel is connected to a taller panel in a change-of-height condition.

A transaction top may be used on a 36" or 48"H panel connected to a taller panel in a change-of-height condition, but the taller panel must comprise of a 48"H base junction with a stacking junction to achieve the taller height.

For thin trim, a transaction top cannot be used on the taller panel in a 30" to 36" change-of-height, 36" to 42" change-of-height or a 42" to 48" change-of-height application.

Spanning two panels with thin trim is possible.

Exception: 58"W transaction work surface cannot span multi-panels because it has an additional support bracket that conflicts with the junction between two 30"W panels.

Spanning two panels with square or oval trim is possible.

Exception: 53"W transaction work surface cannot span multi-panels because it has an additional support bracket that conflicts with the junction between two 30"W panels.

Width of transaction work surface with thin trim is 2" shorter than the width of corresponding panel to accommodate change-of-height applications.

Width of transaction work surface with square and oval trim is 7" shorter than the width of corresponding panel to accommodate change-of-height applications.

Panels on one or on both sides of the transaction work surface can be higher or lower than the panel that supports the transaction work surface.

Transaction work surfaces with thin or oval trim include top trim that accommodates all standard and change-of-height applications (one end or both ends).

Transaction work surfaces with square trim include top trim that accommodates both standard and slim change-of-height applications (one end or both ends). Change-of-height option must be specified when used adjacent to cable management change-of-height (one end or both ends).

Recommended standing height for transaction work surface is achieved by attaching it to 42"H panels.

Utility2 shelf lights can be installed beneath transaction work surfaces using screws and keyhole slots in light fixture.

Transaction work surface must be centered on the panel.

Wiring & Cabling

Transaction work surface blocks cable routing in the top cable tray but cable routing is still available lower in the panel.

Universal Panel-Mounted Worksurface Supports

For Answer Panel Applications

On-module supports can be used to panel support worksurfaces in various configurations.

► Specifying, page 554

Worksurface supports feature alignment tab used to set a depth for Universal Systems Worksurfaces—with 1/2" cord drop. This tab is bent down when installing full-depth worksurfaces.

Cantilever can be used to panel-support a work surface at any height.

End panel can be used to support the end of a work surface.

Center support panel can be shared by two worksurfaces and may be required for longer runs of worksurfaces.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner work surface.

Product Details

On-module work surface supports engage the slots in the vertical uprights of Answer panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support brackets can be used to support the end of a work surface that is wrapped by a panel with the same width dimension that matches the work surface depth.

Actual Dimensions

	Cantilever	Center support panel	End panel
Height	12 1/4"	28 1/2" or 40 7/8"*	28 1/2" or 40 7/8"*
Depth	15 1/2"	11"	23 3/4" or 29 3/4"
Glide Range	N.A.	1 1/4"	1 1/4"

*Height dimensions include the thickness of a work surface.

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces.
Tip: For off-module fin wall applications, the single side support bracket must be handed appropriately for connection to the fin wall.

Single side support bracket can be used to support the user's side rear corner of bullet peninsula, angled peninsula, visitor, jetty, and bubble jetty worksurfaces.

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a work surface, or shared to support two work surfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return work surface.

26 1/16"D - 30"D parametric straight cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return work surface.

Adjacent cantilevered worksurfaces must be the same height in order to connect with a tie plate and provide panel stability.
Tip: Answer panel junctions can accommodate only one support at each work surface seam.

Center support panel is an alternative to a cantilever in supporting longer runs of worksurfaces for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

Center support panels are available in seated and standing heights, and cannot be used in freestanding applications or as a substitute for an end panel. One tie plate ships with each center support panel.

End panels can be used to support the end of a work surface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated and standing heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a work surface in place of an end panel.
▶ See *Storage Specification Guide*.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPT reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 555

Surface Materials

Side support bracket and reinforcing channel

- Black paint only

Cantilever, center support panel, and end panel

- Paint

Application Topics

Worksurfaces greater than 30"D can only be used in freestanding applications and cannot be panel mounted.

Worksurfaces used in panel-supported installations must follow applicable panel stability guidelines.

- ▶ Page 142

Off-Module Worksurface-to-Panel Connector

Connector attaches into the slotted channels of the panel junctions.

Product Details

Connects 18"D to 30"D worksurfaces to wider panels eliminating the need to match panel width to work-surface depth. Replaces side supports, cantilevers, and the need for front edge support with work-surfaces greater than 26"D.

Actual Dimensions

Depth	1/2"
Width	34", 30", 36", 42", 48", 60", or 72"
Height	3"

Application Topics

Worksurface can be positioned anywhere along the width of the off-module connector.

Off-module worksurface to panel connector cannot be used at the same elevation on adjacent in-line panels.

Off-module worksurface-to-panel connector can be used to support the diagonal end of a Universal straight 120° worksurface.

Off-module worksurface to panel connector can support a single worksurface only.

Off-module worksurface to panel connector cannot replace cantilevers and side support brackets when worksurface is parallel to the panel.

Off-module worksurface to panel connector cannot be used in front of or on the adjacent panel next to a 12"H or a 24"H slatwall skin positioned in the second 12" skin module from the base of the panel.

Surface Materials

- Connector**
- Paint

FrameOne Legs and Supports for Universal Worksurfaces

Legs and supports share a common visual with FrameOne bench and support Universal worksurfaces in freestanding, storage-supported, or panel-supported applications. ▶ Specifying page 558

Spacers between top of legs and worksurface provide a floating look to the worksurface and match visual of FrameOne bench.

Intermediate support is used with Universal One-High or 1.5-High storage as a worksurface support allowing for nesting of low storage.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Post leg is square to provide a complementary visual to FrameOne legs. Post leg can be used as a column support.

Product Details

Closed, open, and half-loop legs are handed when panel supporting and must be specified left or right when facing the front of the worksurface. Freestanding tethered and table versions are non-handed.

Closed, open, and half-loop legs are available in panel supporting versions. They support the ends of worksurface; they are not shared supports between two worksurfaces.

Closed and open-loop legs are available in tethered versions in which one side of the worksurface is attached to a panel or storage.

Dimensions

	Closed, Open, and Half-Loop Legs	Post Leg	Intermediate Supports	
			For One-High storage	For 1.5-High storage
Height*	28 1/2"	28 1/2"	28 1/2"	28 1/2"
Height	N.A.	N.A.	11 1/4"	5 1/4"
Depth	24" or 30"	N.A.	16"	16"
Width	N.A.	N.A.	2 3/16"	2 3/16"
Glide range	2 1/4"	1"	N.A.	N.A.

*Height dimensions include the thickness of the worksurface.

Closed and open-loop legs are available in table versions in which both sides of the worksurface are supported by the legs. Post legs can also be used to create freestanding tables.

Half-loop leg is always panel supporting, however panels cannot exceed 48"H or support overhead storage above.

Closed, open, and half-loop legs do not align properly with knife-edge worksurfaces. Instead use cantilevers.

▶ See page 234 for knife-edge worksurface application guidelines.

27"H mobile, freestanding, or fixed pedestals do not fit flush to the inside of the closed, open, or half-loop leg, there is a 3" gap due to the worksurface support plate. 25½"H freestanding pedestals or 21"H mobile pedestals will fit flush.

27"H mobile, freestanding, or fixed pedestals do not fit flush to the inside of the post leg, there is a 5¾" gap due to the worksurface support plate. 25½"H freestanding pedestals or 21"H mobile pedestals will fit flush.

Post leg can be shared between two worksurfaces.

Post leg in shared applications can be square or oriented angled to the front edge of the worksurface.

Intermediate supports replace the need for other types of worksurface support when used with One-High or 1.5-High Universal storage.

Steel top storage requires additional bracing inside the storage when used with an intermediate support. Bracing is an option to the intermediate support and is specified to match the width of the storage.

Bracing is field-installed.

Number of braces is determined by the orientation of the intermediate support to storage. It is not determined by the orientation of the worksurface to storage.

Side-to-side (parallel) orientation of intermediate support relative to storage requires one brace.

Front-to-back (perpendicular) orientation of intermediate support relative to storage requires two braces.

Storage with laminate or wood tops do not require additional bracing with intermediate support.

Side-to-side (parallel) application of intermediate support allows worksurface to be oriented perpendicular to storage.

Front-to-back (perpendicular) application of intermediate support allows worksurface to be oriented in-line with storage.

Intermediate support must be at least 1" from the front, back, or side edges of the storage unit to allow clearance for installation.

On cabinets with steel tops, in parallel applications, the intermediate support can be positioned left or right 1" or 7" from the side edge of the storage unit to align with bracing hole locations and can be positioned anywhere front to back on the unit. On cabinets with laminate or wood tops, in parallel applications, the intermediate support can be positioned left or right anywhere between 1" and 7" from the side edge of the storage unit.

On cabinets with steel tops, in perpendicular applications, the intermediate support can be positioned left or right 1" or 7" from the side edge of the storage unit to align with bracing hole locations and can be positioned anywhere front to back on the unit. On cabinets with laminate or wood tops, in perpendicular applications, the intermediate support can be positioned left or right anywhere between 1" and 7" from the side edge of the storage unit.

Worksurfaces 18"D to 24"D allow intermediate support to be positioned below the worksurface 1" from the front or back.

Worksurfaces 24½" to 30"D must be placed a minimum of 1" from the front or back edge, and a maximum of 7" from the front or back edge.

Intermediate support cannot support worksurfaces larger than 30"D.

FrameOne Legs and Supports for Universal Worksurfaces, continued

Worksurface may extend up to 10" maximum overhang of intermediate support as long as the other end of the worksurface is anchored to the panel.

FrameOne post legs will interfere with left and right oriented power access doors on Universal worksurfaces.

FrameOne post legs will interfere with left and right oriented grommet cutouts in parametric straight Universal worksurfaces.

Surface Materials

Legs and intermediate support

- Paint

Spacer caps for panel attached legs

- Black plastic only

Glide cap for legs

- 6694 Slate only

Shipping

Closed, open, and half-loop legs are packed in boxes of six when ordered on the same line item.

Bracing for intermediate supports ship separately from intermediate supports and are field installed into storage cases.

Infills for FrameOne Legs for Universal Worksurfaces

Infills for FrameOne Legs for Universal Worksurfaces

Infills are available in laminate and veneer and are used with open and closed loop FrameOne legs.

► Specifying page 559

Infills provide added privacy.

Product Details

Infills can be used with both panel connected or freestanding versions of open and closed loop FrameOne legs for universal worksurfaces.

Connectors attach to the back side of the legs.

Surface Materials

Surfaces

- Laminate
- Veneer

Planning Dimension

Infills are available 24"W and 30"W.

Legs and Columns for Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in free-standing or panel-supported applications.

▶ Specifying, page 560

Double post C-leg

can be used on a single worksurface or in a shared application.

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Column is 4" in diameter and can be used as a column support on a single worksurface. Adjustable and non-adjustable versions are available.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Adjustable-height leg adjusts from 25½"H to 31½"H in ¾" increments.

Tapered post leg available in single or package of four.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14"D or 20"D and 31½"W.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Actual Dimensions

	Column	Adjustable column	Double post leg	Post leg	Adjustable-height leg	Tapered post leg	Double post C-leg	Support plate
Height*	28½"	28½"–31⅝"	28½" or 40⅞"	26", 28½", or 40⅞"	25½"– 31½"	28½"	28½"	N.A.
Glide range, for legs equipped with glides	1½"	3⅛"	¾"	¾"	¾"	½"	¾"	N.A.

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28½"H standard, 40⅞"H standing or 25½"H to 31½"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

45° orientation

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28½"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, bubble jetty, bullet peninsula, angled peninsula, and linking peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with two cantilevers or center support panels, can be used as column support for linking worksurfaces.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor or taper-flat worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces for added stability.

Standing-height post or double post legs can be used as column support in panel-mounted applications only.

Column can be used on spanner, bullet peninsula, angled peninsula, linking peninsula, jetty, and bubble jetty worksurfaces in panel supported applications.

For Answer Freestanding desk applications, column

can be used on bullet peninsula and jetty worksurfaces. Adjustable and non-adjustable versions are available.

Column cannot be used in a shared application.

Bottom View Column

Bottom View Post Leg

Column is not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25½"H to 31½"H in ¾" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

Legs with casters cannot support freestanding worksurfaces that are less than 24" deep.

57"W

Reinforcing channel required

Worksurface spans greater than 54"

require additional support of a cantilever, pedestal, intermediate support, or leg. Exception: Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a TS7WKSPT reinforcing channel is used. Reinforcing channel must be specified separately. ▶ Specifying, page 555

Application Topics

Stability Guidelines

- ▶ Page 142

Knife Edge Worksurface Application Guidelines

When planning an L-configuration, two UFB flat brackets should be used to support the worksurfaces. A cantilever is not wide enough to support the gap where the knife edge worksurface comes together.

Freestanding L-configuration should be avoided due to profile on the backside of the worksurface.

25 1/2"H Pedestal
(cantilever supported worksurface)

Boxfile
(cantilever supported worksurface)

Compatible storage includes 25 1/2"H pedestal with freestanding conversion kit, box/file mobile pedestals, and 1-high storage.

Knife Edge with 27"H Lateral
and 27"H Pedestal

Knife Edge with 25 1/2"H Pedestal

Knife edge worksurface over 27"H storage can make files difficult to access. Use a 25 1/2"H pedestal that is flush with the front edge of the worksurface to avoid this issue.

Knife edge worksurfaces require reinforcement channels for unsupported spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Although a 25 1/2"H pedestal looks good when paired with knife edge, keep in mind that it does not align with other storage – drawers and base trim do not align. Use a box/file mobile pedestal instead.

End panels, 27"H standard pedestals, side support brackets and FrameOne legs for Universal do not align properly with knife edge worksurfaces. Instead, use cantilevers as shown.

**Side support brackets will work to support the back end of a worksurface; front end is where they won't align properly.

Universal Privacy/Modesty Screens

Universal privacy/modesty screen provides a boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration, Series 5 and 7 worksurfaces, Elective Elements, Universal tables, and Universal panel-mount worksurfaces.

► Specifying, page 564

Universal privacy/modesty screens are available in one height, 25⁷/₁₀", with two mount location options to provide either privacy or privacy/modesty.

Universal privacy/modesty screens cannot be used on surfaces that have integrated rails or an additive SOTO rail.

Universal privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on 3/4"-1 1/2" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Surface Materials

Screen

- Fabric
- See *Surface Materials*, page 672.

Edge (upper segment)

- 7360 Merle

Edge (lower segment)

- P630 Medium Heather Grey PET
- P631 Dark Heather Grey PET

Brackets

Actual Dimensions

Universal Privacy/Modesty Screen

Width	42", 48", 54", 60", or 66"
Height	25 ⁷ / ₁₀ "
Weight	9.79 lb, 10.315 lb, 10.84 lb, 11.365 lb, 11.89 lb
Thickness	3/4"

Application Topics

Universal privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned 3 3/4" in from each side of the screen.

Screen height attachment locations are determined when specifying privacy (top of screen will be at 48") or privacy/modesty (top of screen will be at 42"). The location cannot be changed in the field.

Privacy configuration provides 19 1/2" of screen above the worksurface and 5 1/2" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 48"H Answer panel.

Screen can be mounted with a 1 1/8" cord drop or flush with no cord drop.

Privacy/modesty configuration provides 13" of screen above the worksurface and 11 7/10" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 42"H Answer panel.

Both the privacy and privacy/modesty configurations allow the height-adjustable desks to be lowered to the lowest position (22") while preserving pinch point gap. Privacy version will not interfere with integrated storage.

Universal privacy/modesty screens can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

- Example 1 – Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2 – Tables with double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Privacy/modesty screens can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools Planning aid be used to ensure proper application of screen to work-surface or tables.

When used with One-High integrated storage, Universal privacy/modesty screens must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

Universal Privacy/Modesty Screens, continued

Maximum Rear Screen Sizes Based on Worksurface Edge Types on Migration Intro, Migration Pro, and Pro with Boost High-Speed

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Universal Privacy Screens and Aligners

Universal privacy screens provide a boundary and privacy element for height adjustable desks and fixed workspaces. It can be used with Ology, Migration, Series 5 and 7, Elective Elements, panel-supported Universal workspaces, and TS Series workspaces.

► Specifying, page 566

Actual Dimensions

Height	12½" or 18½"
Overall Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Product Details

Universal privacy screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on ¾"-1½" thick workspaces.

The width of the screen can be equal to or less than the width of the workspace to which it will attach. Some restrictions apply due to location of workspace legs and supports.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Brackets are included with screens. Two brackets are used on all screens.

Universal privacy screen slides onto brackets.

Tip: Measurements provided do not include cutouts and overhang rules.

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Sarto Privacy/Modesty Screens

Sarto privacy/modesty screen provides a light scale boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, universal tables, and universal panel-mount worksurfaces.

► Specifying, page 568

Sarto privacy/modesty screens are available in overall heights from 24" to 30", with a privacy height option to provide varying levels of privacy and modesty.

Actual Dimensions	
Width	23"-70"
Height	24"-30"
Thickness	9/16"

Product Details

The screen may be used on 3/4"-1 1/2" thick worksurfaces.

Screens are available in modular or parametric sizes.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Weight of screens are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 0.2 lb per bracket.

Screen can be mounted to the back edge of the worksurface with a 1/8" cord drop or flush with no cord drop.

Screens 36"W and narrower can be mounted as side screens, and are always mounted flush to the edge of the worksurface. This application grows the footprint of the workstation by 9/16" per screen.

Application Topics

Sarto privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned 3 3/4" in from each side of the screen. Two L-brackets are included with screens narrower than 60"W. Three or four L-brackets are included on screens 60"W and wider.

Screens are specified with a privacy height above the worksurface. A 1" thick worksurface is assumed. This privacy height sets the position of the brackets and cannot be changed in the field.

Screens are specified by first selecting an overall screen height (24"-30"), then specifying a privacy height. Privacy height is measured from the top of the screen to the top of the worksurface. Allowable privacy height selection changes based on the specified overall height.

Worksurface type is available for screens 60" wide or wider, and allows the Sarto privacy/modesty screen to mount to a scalloped worksurface (for example Bivi Height-Adjustable Desk).

All privacy heights allow a height adjustable desk to be lowered to the lowest position (22") while preserving pinch point gap.

To match screens

ordered on or before June 20, 2021, please consult the following information to determine proper privacy height.

- 24"H Screen, Privacy/Modesty Configuration – Privacy Height = 13½"
- 24"H Screen, Privacy Configuration – Privacy Height = 16½"
- 30"H Screen, Privacy Configuration – Privacy Height = 22½"

Sarto privacy/modesty screens

can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

- Example 1—Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2—Tables with double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Sarto privacy/modesty screens

cannot be used with Ology or Migration Pro and Intro modesty panels.

Privacy/modesty screens

can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy/modesty screens

must never be wider than the surface to which they are attached.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

**Sarto privacy/modesty screens**

can be installed with the Migration metal cable tray. When specifying a Sarto screen equal to or greater than 60"W to use with the cable tray, select the "with tray application" option. The metal tray is an option with the desk or can be ordered separately.

Tip: Screen width must be 10½" wider than the metal cable tray.

Sarto Privacy Screens

Sarto privacy screens provide a light scale boundary and privacy element for height-adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 570

Actual Dimensions

Screen Height	12½"–34½"
Overall Height	13½"–35½"
Width	24"–96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

Sarto privacy screens are tackable. They are available in four modular heights, 13½"H, 19½"H, 23½"H, and 35½"H, and have widths ranging from 24"W to 96"W. Screens can also be specified parametrically.

The screen may be used on ¾"–1½" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Brackets and hard stops are included with screens. Screens narrower than 60"W use two brackets, while screens 60"W and larger utilize three brackets. The third bracket is centered on the width of the screen.

Offset brackets are included with 29"W screens, to help maintain appropriate pinch points between the screen and adjacent objects. Side screen option is available for screens 36"W and narrower.

Sarto privacy screen slides onto brackets.

Alignment brackets are available to help eliminate gapping and misalignment between back and side screens. Alignment brackets are available as their own style (**PSCB**).

Weight of screens are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 1.2 lb per bracket.

Divisio Side Screen

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any 3/4"- to 1 1/2"-thick worksurface.

► Specifying, page 573

Product Details

Divisio side screen can be made more permanent by adding two screws through the clamp. For 3/4" thick worksurfaces and FrameOne, a #10 x 3/4" countersunk screw is recommended. For worksurfaces over 3/4" thick, a #10 x 7/8" countersunk wood screw is recommended.

Actual Dimensions

Depth	29 1/2" (total), 21 1/2" (sits on worksurface)

Universal Tables

Universal tables can be used in a variety of individual and team settings.
▶ Specifying tables, page 582

Table top has a wood core with a High-Pressure Laminate or wood veneer surface and is 1³/₁₆" thick.

Radius corner eliminates sharp edges and is appropriate for freestanding, mobile furniture.

Edge profile is continuous around all edges of the table.

Product Details

High-Pressure Laminate Tables

Continuous edge profile is available in two shapes.

3 mm edge profile Knife edge profile

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and seven woodgrain finishes. See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight and tapered systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Tables

Edges of worksurfaces are available in square (3 mm) profile.

Square (3 mm) edge profile

Square (3 mm) edge profile is achieved by adding wood veneer surfaces to table core. This technique can be applied to tables that are straight or curved.

Connections

Universal tables are supported by bases or legs, which are ordered separately and installed in the field.

Use the Table and Base Combinations matrix to determine the type and number of bases you need to order for the tables you choose.

Tip: Not all sizes and shapes of tables can be supported by bases.

► Page 262

Use the Table and Legs Combinations matrix to determine the type and number of legs you need to order for the table you choose.

Tip: Not all sizes and shapes of tables can be supported by legs.

► Page 262

Reinforcing channels are available to support tables that are wider than 60"W and supported by legs. When installed, the channels add 1" below the table. Channels are available as an option on larger tables and are field installed. Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table is 96" or smaller and will be supported by T- or X-bases. Channels are required and are always included with tables 120" and larger.

Underside of table has inset locations that support slip-fit and nesting applications.

► See *Table Leg Positions*, page 264.

Legs installed in a 90° orientation allow for greater storage and kneespace below the table.

45° leg orientation is a preferred aesthetic for many customers.

Legs may be installed inset from the edge of the table to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the table to the edge of the leg. Amount of slip-fit varies by table shape and size. ► See *Table Leg Positions*, page 264.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Table with 28½"H legs installed at 6" or 9" inset can slip over adjacent tables that are supported with 26"H legs.

Adjustable-height legs adjust 25½"H to 31½"H in ¾" increments. Legs can be used to support the table in a standard height or nesting application.

26"H legs allow tables to nest underneath an adjacent table with 28½"H legs or a panel-mounted worksurface.

Spanner table enables conferencing at the end of two tables that are placed back-to-back.

52"W or 64"W spanners should be used when tables are separated by a panel.

Surface Materials

High-Pressure Laminate Tables

- Laminate
- See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

- **3 mm profile**
- Plastic

Wood Veneer Tables

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match table

Application Topics

Table Fit in Panel Environments:

Dimensions on straight tables are ¼" less than nominal dimension. This allows for an easy fit of freestanding tables in panel-wrapped environments and allows tables to move in and out of the area with ease.

Mobile pedestals up to 24½"H will fit under 26"H tables without reinforcing channels.

Mobile pedestals up to 27"H will fit under 28½"H tables without reinforcing channels.

Tables with reinforcing channel will reduce the available space by 1".

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5-50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Hex conference tables 150"W or larger are shipped in two pieces. Tight-joint fasteners are supplied for proper assembly.

Bases for Universal Tables

Pedestal-base tables

fill a variety of needs for conference and work tables in general offices, institutions, and educational work spaces. Tables and bases are ordered separately.

► Specifying, page 593

Adjustable leveling glides allow tables to remain level when installed on uneven floors.

Column support includes a cylindrical steel column and a base with feet.

Shipping

Bases are shipped knocked down (K.D.) and will require assembly.

Legs for Universal Tables

Legs attach to a table to make it freestanding.
 ▶ Specifying, page 594

Post legs are available with non-locking casters or glides.

Alignment tab helps installers locate proper leg position under the table.

Leveling glides, included, allow table height to be adjusted on uneven floors.

Adjustable-height leg adjusts from 25½"H to 31½"H in ¾" increments.

Actual Dimensions

	Adjustable-height leg	Post leg
Height* (standard)	25½"-31½"	28½"
Glide range, for legs equipped with glides	¾"	¾"

*Height dimensions include the thickness of a table.

Product Details

Legs support tables at 28½"H overall, including table thickness.

Table legs are ordered separately and installed on site.

▶ See *Table and Leg Combinations*, page 263.

Table legs are non-handed to accommodate left- and right-hand applications.

Table legs cannot be used in a shared application with two tables. Radius corners do not provide enough attachment space for leg plate. When a shared leg application is required, order Universal Systems Worksurfaces.

Single post legs can only be installed in a 45° orientation.

▶ See *Table Leg Positions*, page 264.

90° orientation

45° orientation

Legs installed in a 90° orientation allow for greater storage and kneespace below the worksurface.

45° leg orientation is a preferred aesthetic for many customers.

Legs may be installed inset from the edge of the worksurface to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the worksurface to the edge of the leg.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Alignment tab corresponds to under worksurface alignment slots in tables. Alignment features ensure legs are installed in the proper 45° or 90° orientation and slip-fit position.

Table with 28½"H legs installed at 6" or 9" inset can slip over adjacent tables that are supported with 26"H legs.

Adjustable-height legs adjust 25½"H to 31½"H in ¾" increments. Legs can be used to support the table in a standard height or nesting application.

26"H legs allow tables to nest underneath an adjacent table with 28½"H legs or a panel-mounted worksurface.

Surface Materials

Adjustable-height legs, post, and post with caster

Tip: Hex conference tables and oval tables 42"D x 78"W and larger, can only be supported with T-bases.

Tip: Legs with casters cannot support freestanding worksurfaces that are less than 24" deep.

① = Number of legs to order.
 Blank spaces in matrix designate table and leg combinations that are not valid.

Table Leg Positions

Table leg positions

allow for slip-fit and nesting capabilities. Both 45° and 90° angled leg positions are available on most tables. However, certain tables accommodate either 45° or 90° angled positions only. Leg positions on the underside of tables are shown at right.

Legs installed in positions 1, 2, or 3 will vary in their distance from the worksurface edge:

Position 1 is 3" from edge
Position 2 is 6" from edge
Position 3 is 9" from edge
Tip: Positions 2 and 3 are not available on every table.

Answer Monitor Mount

Answer Monitor Mount

Answer monitor mount attaches to Answer panels. It provides a clean aesthetic and can be used to project information in various applications. It is not used in conjunction with media:scape.
▶ Specifying, page 598

Monitor attachment brackets are used to attach monitor display to monitor mount.

Power strip is included in the monitor mount assembly, providing four receptacles.

Monitor mount connects to a 30"W panel only. Fabric skins are required when using the monitor mount.

Product Details

The monitor mount will affix to a 30" wide panel only. When using the monitor mount, fabric skins must be located behind monitor mount.

Power strip cord is routed in the interior of the panel and exits under the base trim. Plugging into the base is recommended. Monitor mount cord length is 10'.

Power strip included with monitor mount has IEC C13 receptacles.

Tip: If the monitor has a NEMA plug, a C14 to NEMA adapter will be required. C14 to NEMA adapters are commonly available. A C14 to NEMA adapter is also available as service part **11M0465SR**.

Answer monitor mount can accommodate 40" and 42" monitors or a maximum of 75 pounds.

Application Topics

It is possible to place two monitors on an Answer panel run. Monitors will overhang adjacent panels.

Single monitors cannot be placed directly adjacent to one another. It is recommended to place a 30" panel between the two monitors.

Monitor mount can be used on panels 54"H and taller. Maximum height that the monitor mount can be installed at is 66"H. Minimum height that the monitor can be installed at is 24"H.

A horizontal seam between two skins cannot fall directly behind the monitor mount.

Monitor mount brackets must connect into in-line junctions. They cannot connect to L, T, or X junctions.

Stability Guidelines

For runs over 8' and up to 12'6", must use at least a 30"W return panel when using monitor mount or media:scape integration. The monitor mount is not to exceed 66"H.

If a counterweight is not required in any condition for a particular style number, the product specification page will indicate not required.

Counterweight Requirements for Storage Products, continued

Requirements for Freestanding Applications

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for lateral files, towers, cabinets, pedestals, and bookcases anchored to the floor.

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHDP) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.

Floor anchor brackets for Universal with FrameOne foot secure lateral files and towers to the floor for stability or in seismic zones to reduce the risk of hazards during earthquakes.

Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent.

Wall Anchors

2. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the wall.

For wall anchoring of lateral files, towers, cabinets and bookcases, consult with the building's designated design professional (architect or engineer) and work with local codes authorities for approvals to ensure adequate support when product is fully loaded.

Ganging Brackets

3. Counterweights are not required for lateral files, towers, cabinets, and bookcases ganged back-to-back with ganging hardware.

TS Series towers which do not include ganging hardware, order 8425808SR from Service Parts.

Counterweights

Units ganged side-by-side **require** counterweights.

Requirements for Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

► See *Panel Stability Guidelines* in the appropriate panel specification guide. (Storage may support panel stability)

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for Two Drawer lateral files installed right below a work surface attached to the panel system when the application is mirrored back-to-back (a two-pack minimum).

TS Series underworksurface lateral files are only intended for use under a panel-mounted work surface and cannot be used as freestanding.

2. Counterweights are not required for One-High and 1.5-High lateral files and cabinets used with an intermediate support, when the application is mirrored back-to-back (a two-pack minimum).

Note: This includes storage either perpendicular or parallel to the panel.

3. Counterweights are not required for One-High, 1.5-High, and Two Drawer lateral files and cabinets used with a storage-to-panel bracket to support the panel run if the application is mirrored back-to-back (a two-pack minimum) and the panel run is equal to or greater than 6'.

4. Counterweights are not required for towers used with a storage-to-panel connector to support the panel run, if the application is mirrored back-to-back (a two-pack minimum) and the panel is equal to or greater than 5'.

Counterweight Requirements for Storage Products, continued

Requirements for Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. A counterweight is not required for a single Two Drawer lateral file attached to desks connected in an L-configuration.

2. A counterweight is not required for a single Two Drawer lateral file attached to a desk made with corner, extended corner, or 120° corner worksurfaces.

L-configurations with two or more lateral files **require** counterweights in each file.

Configurations with two or more lateral files **require** counterweights in each file.

Counterweights are **required** for all lateral files in stand-alone desk or credenza applications.

Hutch kit applications with lateral files always **require** counterweights in the lateral files.

Requirements for Pedestals in Freestanding Applications

Counterweights are required for all freestanding applications.

1. Universal fixed pedestals converted to freestanding pedestals require a counterweight.

Universal fixed to freestanding pedestal conversion kit includes 1/8"H steel top and counterweight package.

Fixed pedestals, converted to freestanding with a laminate or veneer top, require a counterweight.

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface and cannot be converted to freestanding.

Laminate fixed pedestals can never be freestanding.

2. Mobile pedestals include counterweight as standard.

Requirements for Pedestals in Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.

▶ See *Panel Stability Guidelines* in the appropriate panel specification guide.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

Counterweights are not required for fixed pedestals installed below a worksurface attached in a panel spine application. Single workstation applications **require** a counterweight in each pedestal.

Counterweight Requirements for Storage Products, continued

Requirements for Pedestals in Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
 ▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Single pedestal desks less require an interlock. Minimum width for the single pedestal desks is 42"W. (Rules apply to pedestals produced after February 2026.)

Tip: Interlock is available as a service part for Universal pedestals, 1043575SR for box/box/file and file/file configurations.

2. Double pedestal desks 54"W and wider only require one pedestal with counterweight. (Rule applies to pedestals produced after February 2026.)

All other desk applications with multiple pedestals **require** a counterweight for each pedestal.

3. Counterweights are not required for a single fixed pedestal in desk with hutch kit applications. Any additional pedestals within the application **require** counterweights.

Requirements for Pedestals in Answer Freestanding Desk Applications, continued

4. A counterweight is not required for a single fixed pedestal attached to a desk attached to another worksurface in an L-configuration. Any additional pedestals within the application require counterweights.

5. A counterweight is not required for a single fixed pedestal attached to desks made with corner, extended corner, or 120° corner worksurfaces. Any additional pedestals within the application require counterweights.

are floor-standing and can support worksurfaces at 28½"H.

- ▶ Specifying, page 600
- ▶ Specifying *Storage Accessories*, page 658

Top is open and accommodates attachment to a worksurface. Attachment hardware is included.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.

- ▶ *Lock and Keying*, page 690

Leveling glides adjust to install pedestals on uneven floors. 25½"H pedestals have a 7⁄8" adjustable glide range, and 27"H pedestals have a 17⁄8" adjustable glide range.

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary work-surface when you need more space to spread out your work.

- ▶ Specifying, page 606
- ▶ Specifying *Storage Accessories*, page 658

Finished back and sides are standard.

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/file pedestals and concealed with the base of box/box/file and file/file pedestals.

Product Details

Box drawers are a welded steel construction and available with proud or flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction and available with proud or flush fronts. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders. *Exception: Legal-size file folders cannot be filed in 17½"D or 183⁄8"D pedestals.*

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Actual Dimensions

	Fixed	Box/File	Box/Box/File and File/File
Depth with flush steel front	17½", 225⁄8", and 285⁄8"	17½" and 225⁄8"	17½" and 225⁄8"
Depth with proud steel, laminate, or wood front	183⁄8", 23½", and 29½"	183⁄8" and 23½"	183⁄8" and 23½"
Width	15"	15"	15"
Height	25½" and 27"	N.A.	N.A.
Overall height with 1⁄8"H top	N.A.	21"	27"

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 128 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Label holders are available through Service Parts. Label holder fits inside the integral pull of flush-front drawers and over the top edge of drawer front on proud-front drawers.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 690

Non-locking pedestal is available as an option.

27"H fixed pedestals have base alignment with other Universal Storage components that have a 3"H base.

Steel, laminate, and wood veneer tops are available in place of standard 1/8"H steel tops. 1"H steel tops, 1 3/16"H laminate with square edge profile, and 1 3/16"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for longer distance transport. Cushion top is also available without a handle.

Mobile pedestal cushion top for field-installation can be used with mobile pedestals **RPM2421CP**, **RPM2421CF**, and **RPM2421CW** only.

Basic cushion enhanced is ordered separately for use on Universal mobile pedestals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener.

Basic cushion enhanced for field installation can be used with mobile pedestals **RPM1821CF**, **RPM1821CP**, **RPM1821CW**, **RPM2421CF**, **RPM2421CP**, and **RPM2421CW** only.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Fixed pedestals will be freestanding or attach under a worksurface. Three pedestal depths are available to correspond with Universal Worksurface depths. Proud-front pedestals exactly match the depth of Universal Worksurfaces. Flush-front pedestals are 7/8" shorter.

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped. *Tip: Fillers for proud front pedestals conceal a 1/2" gap. Fillers for flush front pedestals conceal a 1 3/8" gap.*

Freestanding pedestals that don't require attachment to a worksurface should be used with a conversion kit that includes a steel top, counterweight package, and components to convert the locking system to a safety interlock system.

▶ Page 604

Field-installed accessories are available, including pencil trays, stationary trays, dividers, and rails. ▶ Page 658

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Shipping

Fixed pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Mobile pedestals are shipped in corrugated board to minimize damage during transport.

Universal Sliding Door Bins

For Use with Answer

Universal sliding door bins attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.

► Specifying, page 610

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel, laminate, and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.

► *Lock and Keying*, page 690

Recess beneath unit can accommodate a shelf light.

► For lighting, see *Answer Freestanding Specification Guide*.

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	15 ³ / ₄ "
Width	36", 42", 48", 60", 66", and 72"
Height	16 ¹ / ₄ "

Upmount brackets, optional, are for use on Answer, Kick, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side-by-side in an in-line, T-, or X- application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 690

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.

► For lighting, see *Answer Freestanding Specification Guide*.

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

38"H

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.
Tip: Select the omit brackets option when ordering the bin.

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.

► For lighting, see *Answer Freestanding Specification Guide*.

Surface Materials

Overhead bin

- Paint
- Wood door (optional)

Locks

Correct

Incorrect

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

Universal Over The Case and In The Case Bins

For Use with Answer

Universal over the case bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.

► Specifying, page 612

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Universal in the case bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel, laminate, or wood.

► Specifying, page 614

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.

► Lock and Keying, page 690

Flat-front lift-up doors (steel, laminate, or wood) recess into the overhead storage bin.

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:

TAK = Answer and Kick
MON = Montage

If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth 15³/₄"

Width 24", 30", 36", 42", 48", 60", 66", and 72"

Height 16¹/₄"

Upmount brackets are optional for use on Answer, Kick, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side by side in an in-line, T-, or X-application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit application, or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Picture frame door—omit insert, optional, is available on Universal in the case bins with flat steel fronts only. An omit insert option allows custom material to be field installed in the aluminum door frame.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.
▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts*, page 297

Door assist mechanism, optional, consist of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 690

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.

▶ For lighting, see *Answer Freestanding Specification Guide*.

Divider is available as an option on overhead bins. Dividers ship in a package of four.

▶ Page 300

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

Universal over the case bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Universal Over The Case and In The Case Bins for Use with Answer, continued

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number.
Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
 ▶ For lighting, see *Answer Freestanding Specification Guide*.

66"	33" (per door)	15.000"	32.164"	0.138"
70"	35" (per door)	15.000"	34.164"	0.138"
72"	36" (per door)	15.000"	35.164"	0.138"
75"	37½" (per door)	15.000"	36.664"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal Shelves and Universal Personal Shelves

For Use with Answer

Universal shelves—supported by Answer, Kick, and Montage—provide overhead storage in the work space.

► Specifying, page 617

Universal personal shelves provide a wall-supported surface that attaches to Answer and Kick

► Specifying, page 618

Metal backstop on Universal shelves

prevents notebooks and equipment from damaging panel surface. Universal personal shelves do not have a backstop.

On-module attachment hooks

are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Actual Dimensions

	Universal shelves	Universal personal shelves
Depth	14 ³ / ₄ "	13 ¹ / ₁₆ "
Width	24", 30", 36", 42", 48", 60", and 72"	24", 30", 36", 42", and 48"
Height	7 ¹ / ₂ " (Kick and Answer)	1 ¹ / ₁₆ " (thickness of shelf)

Product Details

Shelf lights are available for use beneath shelves. Lights recess into the bottom of the overhead storage unit.

► For lighting, see *Answer Freestanding Specification Guide*.

Dividers are available field installed for use on Universal shelves. Dividers ship in a package of four. Dividers cannot attach to Universal personal shelves.

A 1¹/₂" gap exists between the personal shelf and the panel to allow for cable routing.

The height dimension of the bracket (from top of personal shelf to the bottom of the bracket) is 6¹/₂" H.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Universal shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Wiring & Cabling

Vertical wire managers conceal cords and cables that are routed vertically outside of the panels.

Wall Hang Channels and Horizontal Braces

For Use with Overhead Storage Bins and Shelves

Slotted steel channel can attach to wall of building to accept shelves, overhead storage bins, worksurfaces, or tackboards. Channel will accept all universal bins and shelves, TS Series bins and bins and shelves introduced prior to March 2007.

► Specifying, page 620
Tip: Must specify bin or shelf with Answer, Kick, or Avenir bracket to hang on wall channel.

Screw hole positions
 6 3/8" H

Actual Dimensions

Wall hang channels and horizontal braces

Depth	1 1/8" (28 mm)
Width	15/16" (24 mm)
Height	66" (1676 mm)

Product Details

Wall channel can be positioned on wall at height needed.

Connections

Wall channels can be used to support shelves, overhead storage bins, worksurfaces, and tackboards. Wall channels can be shared.

Field install:

- Concrete walls with Hilti type anchors.
- Drywall or plywood with 5/8" thick Toggler R-type 3/16" wall anchors with countersunk flat head screw.
- Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

Anchors must be used in each screw hole location on the wall channel.

Components attach at 1" increments, but screws block some slot locations.

Component limits for each pair of wall channels are as follows:

- Two bins or shelves
- One worksurface and two shelves
- One worksurface and one bin

Horizontal brace is available to reinforce vertical wall channels that support storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All worksurfaces require horizontal braces.

Wall channel horizontal brace is required for EACH storage bin or shelf that is wider than 48". The brace should be placed at the position along the vertical wall channel where the top of the bin or shelf will be placed.

Width of horizontal brace must match width of shelf or storage bin.

Wall channel horizontal brace is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Wall hang channels for shelves, overhead storage bins, or tackboards cannot be used with a wall start junction.

Worksurfaces may be attached to wall channels with cantilevers, subject to the following application guidelines:

- All worksurfaces must be 24"D or less.
- Worksurfaces must be supported by a cantilever or legs every 42" or 48". Cantilevers can be shared when worksurfaces are adjacent.
- Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
- Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Surface Materials

Wall channel

- Paint

Horizontal brace

- Paint

Application Topics

Reinforce wall by positioning studs where wall channels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Tip: Wall channels can be shared.

Wall channels (TS7BSWHC) will not support two slim shelves installed end to end.

Slim Shelves

Slim shelves provide a panel-supported surface that attaches to Answer, Kick, and Montage with panel-specific brackets.

► Specifying, page 623

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Answer, Kick, and Montage with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Answer will not support two shelves installed end to end.

Wall channels (TS7BSWHC) will not support two slim shelves installed end to end.

Surface Materials

Slim shelves

- Paint

Attachment brackets

- Painted to match shelf

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Actual Dimensions

Depth 6³/₈"

Width 24", 30", 36", 42", 48", 60", 72", 96"

Bracket Application Rules for Bins and Shelves

Bracket Application Matrix

Panels	TS Series Bins, Universal Bins, and Universal Shelves—On-Module	Universal Bins—Single Side Vertical Off-Module	Universal Bins—Two Sided Vertical Off-Module	Universal Bins—Horizontal Off-Module (for use with and Montage only)	Universal Bins—Upmount
Answer	•	•	•		•
Kick	•	•	•		•
Montage	•	•	•	•	•

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability. *Tip: See Stability Guidelines in each corresponding specification guide.*

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage Panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" larger than the panel, allowing them to overhang the panel seam.

Off-Module Brackets

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, and Montage with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel 5/8" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Omit Brackets

Omit brackets option must be specified when bin is used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately. Hutch kit supports bin at 66" height.

Upmount brackets, optional, can be used with Universal sliding door, Universal over the case, and Universal in the case bins. Brackets attach bins near the top of 54"H panels. TS Series bins and Universal shelves cannot be attached to upmount brackets.

Upmount bin width must match the width of the panel or panels that it attaches to. Upmounted bins and shelves cannot be supported off-module.

Upmount brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Application Rules for Overhead Storage on Answer and Kick Panels

Tip: For complete panel specific stability guidelines, see the corresponding panel specification guide.

Answer Panel

Guidelines for Universal Bins. Applies to universal sliding door bin or universal in the case bin on Answer and Kick panels.

The following application restrictions must be complied with when hanging universal overhead bins on Answer and Kick panels. Otherwise, standard Answer and Kick application guidelines apply.

- If bins or shelves are applied at an elevation higher than 66", a perpendicular panel of same height (or up to 24" lesser height) is required.
- The maximum panel run length when using a universal overhead bin on Answer or Kick panels is 12'.
- Top of bins and shelves are not designed to support the weight of a seated person. Bins and shelves may be mounted at 38"H or lower only if another panel-mounted component prevents it from being seated upon.
- When ganging binder bins, the use of a tie plate is required.

WARNING

Failure to comply to these guidelines may result in personal injury.

Kick Panel

Universal One-High, 1.5-High, and Two Drawer Lateral Files

One-High and Two Drawer lateral files serve a dual purpose as high-density storage and as an inviting space for guests.
▶ Specifying, page 624

1.5-high lateral files provide multi-zone storage for binders, hanging folders, and piling surfaces at a height which allows for comfortable guest seating in collaborative environments.
▶ Specifying, page 624

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Finished back is standard.

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height.

Lock is standard on lateral files and is located at top left corner of drawer. Locks are standard factory-installed, keyed random.
▶ Lock and Keying, page 690

Pulls on flush-front lateral files are full width and integral.

Pulls on proud-front lateral files are available in a variety of shapes.

Top is standard 1"H steel on units with steel fronts and standard 1³/₁₆"H wood veneer on units with wood fronts. Other top options are available.

Drawer fronts are available in steel, laminate, or wood veneer.

Leveling glides adjust up to ³/₄" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawers are standard 12"H and open full depth for total access to the contents.

Actual Dimensions

Depth with flush steel or open front 18" and 23¹/₈"

Depth with proud steel, laminate, or wood front 18⁷/₈" and 24"

Width 30", 36", and 42"

Height 16", 22", and 28"

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

Tip: All base options have same overall height.

Tip: Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne foot base, or c:scape glide.

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel only.

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options.

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately.
▶ Page 659

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.

▶ For interior dimensions, see *Storage Capacities and Dimensions* in the *Storage Specification Guide*.

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers per drawer, 12"H file drawers also include one hanging folder bar per drawer. Additional dividers are available and must be specified separately.
▶ Page 660

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 690

Individual drawer locks are available as an option for an application that would limit access to each drawer. Lateral files include a security shield between drawers to prevent unauthorized access. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying are available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 690

No-top lateral files are available for use with cushion top or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Steel top
1"H

Veneer top
1³/₁₆"H

Laminate top
1³/₁₆"H

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ³/₁₆" taller than steel tops and will add that dimension to the overall height of the lateral file.

Universal One-High, 1.5-High, and Two Drawer Lateral Files, continued

Security top is available as an option for installations where the file will be installed beneath a worksurface, but not physically attached. Thin steel top prevents unauthorized access to the contents of the cabinet. Security top is not structural and can be specified on 28"H files only. Security top reduces overall height of file to approximately 27"H.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Intermediate support is used with Universal One-High or 1.5-High storage as a worksurface support allowing for nesting of low storage.

Cushion top is ordered separately for use on One-High, 1.5-High, and Two Drawer lateral files without top.

Basic cushion enhanced is ordered separately for use on Universal One-High, 1.5-High, and Two Drawer laterals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener. *Tip: Basic cushion enhanced is available on Universal lateral files with a top only.*

When applying the basic cushion enhanced on 30"W or 36"W Universal laterals with an open configuration, a support brace must also be specified.

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet. *Note: Local seismic requirements vary.*

Compliance with local code requirements is the responsibility of the customer or their authorized agent.

For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.

▶ Page 664

Storage to panel bracket connects One-High, 1.5-High, 2-High, 3-High laterals and cabinets to panel to provide added stability to panels and eliminate the need for return panels.

▶ See page 652

Wood veneer with square edge profile Laminate with square edge profile

Field-installed tops are available in two choices — wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.

▶ Page 654

Field-installed accessories are available, including drawer accessories and counterweight packages.

▶ Page 658

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.

Counterweight Requirements for Storage Products

▶ Pages 273–280

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

Universal Towers

Towers provide storage of a variety of work and personal items for an individual, including paper, binders, books, and coats.

► Specifying, page 632

Finished back is standard.

Interior of tower is available in a variety of configurations combining coat storage, fixed and adjustable shelves, and file drawers.

Pull on flush-front tower is integral and full height on doors and full width on drawers.

Locks are standard on door and drawers. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike.

► *Lock and Keying*, page 690

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height. All other universal towers are available with the universal 3" base only.

Leveling glides adjust up to 3/4" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install tower on uneven floors.

Drawers open their full depth for total access to the contents.

Top is standard 1"H steel. Other top options are available.

Door is available in steel, laminate, or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior. Door is available hinged on left or right.

Locker space is 9" wide and standard with a coat rod.

Pull on proud-front tower is available in a variety of shapes.

Drawer fronts are available in steel, laminate, or wood veneer.

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

All base options have same overall height. FrameOne foot base and c:scape glide base are only available on 18"D and 24"D openside towers.

Tip: Power infeed sits proud of the panel approximately 3" and will interfere with Universal storage with the Universal 3" base, FrameOne foot base, or c:scape glide.

Actual Dimensions

Depth with Flush Steel Front 18", 23 1/8", and 29 1/8"

Depth with Proud Steel, Laminate, or Wood Front 18 7/8", 24", and 30"

Width 24"

Height 47 1/2", 52", and 65 1/2"

Interior of tower combines coat storage, box and file drawers, fixed and adjustable shelves.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Door pull is 192 mm and drawer pulls are 128 mm. Proud-front pulls are available on steel, laminate, or wood veneer doors and drawers. c:scape pulls (200mm) are available on steel only.

Adjustable shelves on 52"H and 65½"H open side towers are recessed from the front and side of the tower. Shelves adjust in 2½" vertical increments. Opening on 47½"H tower is 13½"H and does not come with an adjustable shelf.

Post on open side towers supports adjustable shelves and is painted to match the case.

Adjustable shelves in dual door can be positioned in the interior of the tower in ¾" vertical increments using a reversible bracket. The first shelf above a file drawer is a fixed shelf.

Drawer accessories include one divider and one pencil tray in each box drawer. File drawers can accommodate front-to-back filing of letter-size hanging folders without the use of additional accessories.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawer locks are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 690

Drawer lock in open side tower is located in the top file drawer.

Drawer lock in dual door tower is located approximately 36" from the floor and also secures the lift-up door on 65½"H units.

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ¾" taller than steel tops and will add that dimension to the overall height of the tower.

Top will default to steel on towers with proud wood fronts since the door overlaps and partially conceals the top. Wood top is available as an option.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

High strength to panel connector provides added stability to panels and eliminates the need for return panels.

► See page 652

Worksurface to tower connector eliminates the need for other worksurface supports such as legs or end supports next to the tower.

► See page 652

Worksurface to tower alignment. Proud front towers align with 23½"D, 24"D, 29½"D, and 30"D worksurfaces. Flush front towers extend 7/8" beyond 24"D and 30"D worksurfaces, and 1/8" beyond 23½"D and 29½"D worksurfaces.

Field-installed accessories are available, including drawer accessories and shelf bookends.

► Page 658

Universal Towers, continued

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet. *Note: Local seismic requirements vary. Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials.* *Tip: Anchor bracket cannot be used with pedestals.*

Storage-to-Panel Connectors

► Specifying page 652

Tip: For use with universal steel storage only.

Product Details

Low storage-to-panel connector connects One-High laterals and cabinets to panel to provide added stability to panels and eliminate the need for return panels.

Overhead storage or panels over 48"H can not be used in conjunction with low storage-to-panel connector.

Medium storage-to-panel connector connects 1.5-High, 2-High, 3-High laterals and cabinets to panels to provide added stability to panels and eliminate the need for return panels.

Tall storage-to-panel connector connects towers to panels to provide added stability to panels and eliminate the need for return panels. Tall storage-to-panel connector can be used with 48"H, 4-high, and 5-high towers.

Tall storage-to-panel connectors can only be used on 48"H or taller panels.

Note: Medium storage-to-panel connectors can be used on towers connected to panels shorter than 48"H, but must follow application guidelines for medium connectors.

Application Topics

Storage-to-panel connector can be positioned on the back or side of the cabinet. Connector must be located only on the ends of the back or side of the cabinet. It cannot be positioned anywhere else on the case side or back.

Storage-to-panel connectors can only be used with select storage products:
 –Universal lateral files and towers manufactured on or after November 2005
 –TS Series Tower Too manufactured on or after January 2009.

High-Density Storage

High-density storage is a personal storage product that provides ample organizational space with the added benefit of extendable privacy. Two configurations are available, shelf and bag drop. Resident workers are supported with room for their piles, files, and supplies to support their work flow in the high-density storage with shelf versions. Mobile workers have temporary storage and ease of access for all their belongings in the high-density storage with bag drop versions.

► Specifying, page 644

Front is available in laminate or veneer.

Contrasting front is available as an option.

Coat closet, available as an option, is 7"W on 24"D units and 8"W on 30"D units and standard with two coat hooks.

Leveling glides adjust to install case on uneven floors and have a 1/2" adjustable range.

Shelf liners provide a soft landing pad for personal objects and are standard in the bag drop configuration.

Locks are standard on door. Locks are standard factory-installed, keyed random.
► Lock and Keying, page 690

Case is available in laminate or veneer.

Product Details

Two configurations are available on the 15"W version, the shelf configuration or the bag drop configuration. Only the shelf configuration is available on the 12"W version.

Coat closet is available as an option.

Left-hand configuration

Right-hand configuration

Left-hand and right-hand configurations are available.

Mirrors are standard in all cases.

Light is available as an option on the bag drop configuration only.

Actual Dimensions

Depth 24" and 30"

Width 12" and 15"

Height 42" and 48"

Nile pull

Bar pull

Contemporary pull

Jazz pull

Pull on high-density storage defaults with a Nile pull. Bar, contemporary, and jazz pull are available as an option.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 690

Contrasting fronts and horizontal grain direction are available options for laminate front/laminate case, veneer front/laminate case, or laminate front/veneer case.

Application Topics

Magnetic boards, available as an option, are fabric-wrapped steel providing a place for visual display. The size of the magnetic board is determined by high-density case height and depth. Magnetic boards are field installed.
Tip: Magnetic board is not available on 12"W unit.

Panel connector bracket is available to connect to an Answer panel. Connector bracket provides added stability to panels and eliminates the need for return panels.

Worksurface support bracket can be used to mount a worksurface off one side of the high-density storage eliminating the need for other worksurface supports such as legs or end supports next to the case.

Worksurface support bracket can be used to support one side of a worksurface only.

●

Duo Tall Storage

Duo tall storage can be used to attach to Answer in-line, L,T, and end-of-run junctions.

Panel stabilizer

Panel bracket connects box into panel junction slots.

Duo tall storage can be used to attach to the top of Answer panels with thin trim. Attachment brackets and trims are sold separately.

Wood core construction with laminate surface.

Ledge provides support for office supplies.

Magnets can be used to display items on painted steel divider cover.

Product Details

Two interior configurations of Tall Storage are available. Individual box has a ledge on one side and space for binder storage on the opposite side. Shared box is divided down the center with half ledge and half binder storage on each side.

66"W and 78"W individual boxes have a center divider on the binder storage side for additional support.

Column height at shortest level is 29⁷/₈"H. Column will then adjust upward 3" for leveling.

Height from floor to top of box is approximately 45".

Actual Dimensions

Tall Storage

Box exterior height	15"
Box exterior depth	18"
Box exterior width	54", 66", and 78"
Box interior height	13 ³ / ₈ "
Box interior depth	13 ⁵ / ₈ " (binder storage area)
Box interior depth (ledge)	3 ¹ / ₂ "
Box interior width	52 ³ / ₈ ", 64 ³ / ₈ ", and 76 ³ / ₈ "
Leg height	29 ⁷ / ₈ "

Connections

Attaches perpendicular (90°) to Answer panel at in-line, end-of-run, L or T junction. Works with 42"H or taller panels only. Attaches on-module only.

Panel-mounted work-surfaces are required when connecting Duo Tall Storage to Answer panels at an in-line, L, T, or end-of-run junction. Worksurface brackets are included to attach to Duo Tall Storage worksurfaces to improve stability.

In seismic zones 3 and 4, consult with local building code officials for specific code requirements applicable to your installation.

Duo Tall cannot be installed with case in front of slatwall skin.

When mounting Duo Tall Storage on top of an Answer panel, top cap mounting brackets and additional panel top caps will need to be specified separately.

▶ Page 382

For right-handed Duo end-of-run configurations, the panel bracket will be visible.

Stability Guidelines

Stability Guidelines for Answer and Duo Tall Storage

Duo Tall Storage cannot be mounted off-module.

A minimum 30"W Answer panel return at 90° or 36"W at 120° must be used with Duo Tall Storage.

If Duo Tall Storage is mounted in an end-of-run application, a 30"W minimum panel return must be used on the other end of the run.

Duo Tall Storage cannot be mounted off-module.

A minimum 30"W Answer panel return at 90° or 120° must be used with Duo Tall Storage.

A 30"W minimum panel return is required when Duo Tall Storage is used on a panel that is supporting additional components.

Stability Guidelines for Duo Tall Storage-to-Answer Panel Application in Seismic Zones

- Follow traditional planning guidelines.
- Tall Storage leg base must be bolted to the floor per local building code.
- Worksurface brackets included must be installed.

L Change-of-Height Junctions—Thin Trim

Tip: Junction includes:

- L change-of-height junction
- Inside corner light seal
- L vertical trim
- End-of-run change-of-height trim
- Change-of-height junction cap
- Aligners

Tip: Omit trim option omits all vertical and change-of-height trim. This option is used when stacking on base junctions.

Vertical and change-of-height trim should be specified separately to span the full height of the base junction plus the stacking junction.

Tip: Remember to specify necessary junction cap and aligners if the omit trim option is selected.

Tip: Change-of-height junction ships right-handed. For a left-handed junction a post will need to be moved during installation.

X Change-of-Height Junctions—Thin Trim

Standard Includes		Required to Specify
<ul style="list-style-type: none"> ▶ Need help? Product details, page 24 	<ul style="list-style-type: none"> • Junction • Inside corner light seals • Trim/junction cap: paint price group 1 or wood group 1 • Aligners 	<ol style="list-style-type: none"> 1 Style number 2 Paint or wood color number for junction cap 3 Options, if selected (see below) <ul style="list-style-type: none"> ▶ See <i>Surface Materials</i>, page 672.

Options	U.S. Price	Required to Specify
Surface Materials Trim <ul style="list-style-type: none"> • Paint price group 1 • Paint price group 2 • Paint price group 3 	No cost +\$17 +\$37	Specify paint color number. Specify paint color number. Specify paint color number.
<ul style="list-style-type: none"> • Customiz stain on wood • Omit trim 	No cost Prices below and at right	Specify with <i>Customiz stain</i> . Specify with <i>omit trim</i> .

Tip: Omit trim option omits all change-of-height trim. This option is used when stacking on base junctions. Change-of-height trim should be specified separately to span the full height of the base junction plus stacking junction.

Tip: Remember to specify necessary junction cap and aligners if the omit trim option is selected.

Tip: Junction includes:

- X change-of-height junction
- Two T change-of-height trims
- 90° junction cap
- Aligners

V Change-of-Height Junctions—Thin Trim

- Tip: Junction includes:**
- V change-of-height junction
 - V vertical trim
 - 120° change-of-height trim
 - 120° junction cap
 - Aligner

Tip: Omit trim option omits all vertical and change-of-height trim. This option is used when stacking on base junctions. Vertical and change-of-height trim should be specified separately to span the full height of the base junction plus stacking junction.

Tip: Remember to specify necessary junction caps and aligners if the omit trim option is selected.

Tip: Change-of-height junction ships right-handed. For a left-handed junction, a post will need to be moved during installation.

Standard Includes	Required to Specify

Utility Pole – L, T, and X—Thin Trim

Utility Pole – L, T, and X—Thin Trim

Tip: Works with L, T, or X base junctions of any height and T or X change-of-height junctions as long as at least two panels are at the tallest height.

Tip: For end-of-run utility pole application, the square trim junction utility pole may be used.

Note: this will add 3" of dimension to the application.
 ▶ Page 428

Tip: Cannot be used with L change-of-height junctions.

Tip: Can only be used with junctions manufactured on or after October 10, 2011.

Tip: Does not include junction. Junction is ordered separately.

Tip: Order multipurpose power infeed separately.

Base Horizontal Frame Packages— Thin Trim and Big Open Base Trim Package

For Panel Buildups

Tip: You must order vertical junctions separately to complete your frame.

▶ See page 332.

Tip: Specify omit top cap when adding a frameless glass screen to a panel or when ordering spanning top caps.

Tip: Change-of-height top caps are only required in an in-line change-of-height application.

Tip: Remember to omit base trim(s) when using skins to the floor.

Tip: Omit base trim and separately specify hardware base trims when accessing hardware power in the base.

Tip: When open base trim or big open base option is selected, both base trims are omitted.

Tip: Base cable tray cannot be used if open base or big open base is selected, or if omit base trim is selected for one or both sides of panel.

Tip: Remember to order skins to complete the panel.
▶ See page 446.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

▶ See page 1 for details.

Recessed Frameless Glass Top Cap Connector and Junction Grommets for Frameless Glass—Thin Trim

Recessed Frameless Glass
Top Cap Connector and
Junction Grommets for
Frameless Glass—Thin Trim

Recessed Frameless Glass Top Connector—Thin Trim

Tip: Recessed frameless glass top cap connector needs to be ordered in the following situations:

- when using a wall start junction and putting frameless glass with recessed attachment on the panel directly adjacent to the wall
- when using frameless glass with recessed attachment on an off-module fin panel
- when recessed frameless glass is adjacent to a corner junction and the recessed frameless glass top caps are located at a lower height than the junction cap
- when recessed frameless glass is coming into an in-line change-of-height condition and the recessed frameless glass top caps are located on the lower panel height
- when recessed, frameless glass is adjacent to a utility pole
- when frameless glass or top cap mounted storage is used on a panel that is adjacent to a boundary screen

Top Cap Mounted Storage—Top Caps and Aligner Packages

Top Cap Mounted Storage
– Top Caps and Aligner Packages

Tip: Top caps should be specified to match the width of the storage unit that is being top cap mounted. They do not necessarily match the width of the panel.

Tip: When top cap mounted storage units are on module with the panel, standard top caps from the horizontal frame package can be omitted. If the top cap mounted storage is being mounted off-module, standard top caps should NOT be omitted from the horizontal frame package.

Tip: Mounting brackets and storage to complete the solution are specified separately.

Panel Packages—Thin Trim

For Panel Buildups

Side 1 Side 2

Tip: You must order junctions separately to connect adjacent panels.

▶ See page 332.

Tip: Remember to order receptacles and faceplates.

▶ See page 494.

Tip: For further information about fabric direction, see page 678.

Tip: 72"W panels accommodate fabric in the horizontal application only.

Tip: Specify omit top cap when adding a frameless glass screen to a panel or when ordering spanning top caps.

Tip: Change-of-height top cap option should be specified only when using an in-line change-of-height application.

Tip: When open base trim option is selected, both base trims are omitted.

Tip: Base cable tray cannot be used if open base trim is selected.

Tip: 18"W panels can accommodate pass-through power only.

Answer Boundary Screens

Straight, Single-Connect For Use with Thin Trim Panels

Tip: Additional hardware upcharge is applied only when single-connect straight split style number is specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split boundary screen, two screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Tip: When specifying a split boundary screen, two screen widths need to be specified. The final price will include the price of both individual screen segments.

 **For Canadian Pricing**
Multiply U.S. Price by the Canadian price factor.
► See page 1 for details.

Answer Boundary Screens

Straight, Dual-Connect For Use with Thin Trim Panels

Tip: Additional hardware upcharge is applied only when single-connect straight split style number is specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that compliments the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split boundary screen, two screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Answer Boundary Screens

L Return, Dual-Connect For Use with Thin Trim Panels

Tip: Additional hardware upcharges are applied only when dual-connect single-sided L return, or dual-connect split L return style numbers are specified.

Tip: When specifying a boundary screen equal to or taller than an Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option.

Tip: When attaching boundary screen to Answer panel with stacking segment, order a boundary screen, end-of-run junction, omit trim, add a change-of-height trim, and stacking junction.

Tip: When specifying a boundary screen shorter than Answer panel, order a same height end-of-run junction for height of Answer panel with the omit trim option, and order a change-of-height trim.

Tip: When specifying the paint finish for the bracket cover, select a finish that complements the selected laminate or veneer finish.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When specifying a split L return boundary screen, four screen widths will need to be specified.

Tip: Full-fill finish codes can be used to simplify specification of veneer boundary screens being used in settings with full-fill veneer products. The screen will not have the final fill coat applied, but the finish color will be consistent with the full-fill products.

Fabric Covered Panel Skins To The Floor

For Panel Buildups

Tip: Remember to omit base trim(s) on a horizontal frame package when using a skin to the floor.

Tip: 48"H fabric covered panel skins to the floor accommodate select fabrics in the vertical direction only.

Tip: 48"H and 60"H fabric covered panel skins accommodate fabric in the vertical direction only.

Tip: 72"W fabric covered panel skins accommodate fabric in the horizontal direction only.

Tip: For further information about fabric direction, see page 678.

Tip: 30"H and 42"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

▶ See Panel Buildups, page 18, for more information.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

▶ See page 1 for details.

Steel Panel Skins

For Panel Buildups

Tip: Steel skins cannot accommodate power receptacles or communication outlets. Use the base or fabric skin for power access.

Tip: Horizontal beam and the back of the opposite skin is visible through a perforated skin.

Tip: 18"H and 30"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: Data and modular receptacle cutouts are available on 24"H steel skins only.

Tip: Data cutout can be placed on the left or the right side of a steel beam skin. Data cutouts cannot be placed on both left and right side of steel beam skins.

Tip: Data cutout is an option under receptacle location. Specify data cutout location under the appropriate receptacle selection. Data cutout price is added to the receptacle cutout price.

Tip: On 24"W and 30"W steel skins, hardwire receptacle cutout option will always be with a centered hardwire cutout.

Tip: On 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and a right hardwire cutout.

Tip: No data or modular receptacle cutouts are available on 18"W steel skins.

Tip: Data or modular receptacle cutouts are NOT available on perforated or ribbed steel skins.

Steel To The Floor Skins

For Panel Buildups

Tip: Remember to omit base trim(s) on horizontal frame package when using a skin to the floor.

Tip: Steel skins cannot accommodate power receptacles or communication outlets. Use a fabric skin for power access.

Tip: 30"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.

▶ See *Panel Buildups*, page 18, for more information.

Tip: Data and modular receptacle cutouts are available on 24"H steel skins only.

Tip: Data cutouts can be placed on the left or the right side of a steel beam skin. Data cutouts cannot be placed on both left and right side of steel beam skins.

Tip: Data cutout is an option under receptacle location. Specify data cutout location under the appropriate receptacle selection. Data cutout price is added to the receptacle cutout price.

Tip: On 24"W and 30"W steel skins, hardwire receptacle cutout option will always be with a centered hardwire cutout.

Tip: On 36"W and wider steel skins, hardwire receptacle cutout option will always come with a left and a right hardwire cutout.

Standard Includes		Required to Specify
▶ Need help? Product details, page 120	• Steel panel skin: paint price group 1	1 Style number 2 Paint color number for skin surface 3 Options, if selected (see below) ▶ See <i>Surface Materials</i> , page 672.

Options	U.S. Price			Required to Specify
Surface Materials	24"H-30"H	36"H		
• Paint price group 1	No cost	No cost		Specify paint color number.
• Paint price group 2	+\$38	+\$ 75		Specify paint color number.
• Paint price group 3	+\$63	+\$123		Specify paint color number.
Data Cutout Only (24"H only)	24"W-30"W	36"W	42"W-72"W	
• Left modular furniture data cutout or left NEMA data cutout	N.A.	N.A.	+\$13	Specify with left modular furniture data cutout or left NEMA data cutout.
• Right modular furniture data cutout or right NEMA data cutout	+\$13	+\$ 13	+\$13	Specify with right modular furniture data cutout or right NEMA data cutout.
Modular Receptacle Cutout (24"H only)				
• Center receptacle cutout	+\$13	N.A.	N.A.	Specify with center receptacle cutout.
• Center receptacle cutout with right modular furniture data cutout or right NEMA data cutout	+\$26	N.A.	N.A.	Specify with center receptacle cutout and right modular furniture data cutout or right NEMA data cutout.
• Left receptacle cutout	N.A.	+\$ 13	+\$13	Specify with left receptacle cutout.
• Left receptacle cutout with left modular furniture data cutout or left NEMA data cutout	N.A.	N.A.	+\$26	Specify with left receptacle cutout and left modular furniture data cutout or left NEMA data cutout.
• Right receptacle cutout	N.A.	+\$ 13	+\$13	Specify with right receptacle cutout.
• Right receptacle cutout with right modular furniture data cutout or right NEMA data cutout	N.A.	+\$ 26	+\$26	Specify with right receptacle cutout and right modular furniture data cutout or right NEMA data cutout.
• Left and right receptacle cutout	N.A.	+\$ 26	+\$26	Specify with left and right receptacle cutout.
• Left and right receptacle cutout with left modular furniture data cutout or left NEMA data cutout	N.A.	N.A.	+\$39	Specify with left and right receptacle cutout and left modular furniture data cutout or left NEMA data cutout.
• Left and right receptacle cutout with right modular furniture data cutout or right NEMA data cutout	N.A.	+\$ 39	+\$39	Specify with left and right receptacle cutout and right modular furniture data cutout or right NEMA data cutout.
Hardwire Power/Data Cutouts (24"H only)				
• Hardwired with receptacle cutout	+\$13	+\$ 13	+\$13	Specify with receptacle cutout.
• Hardwired with left receptacle cutout and left modular furniture data cutout or left NEMA data cutout	N.A.	N.A.	+\$26	Specify with left receptacle cutout and left modular furniture data cutout or left NEMA data cutout.
• Hardwired with right receptacle cutout and right modular furniture data cutout or right NEMA data cutout	+\$26	+\$ 26	+\$26	Specify with right receptacle cutout and right modular furniture data cutout or right NEMA data cutout.

Tip: No data or modular receptacle cutouts are available on 18"W steel skins.

Tip: Data or modular receptacle cutouts are NOT available on perforated or ribbed steel skins.

Laminate To The Floor Skins

Standard Includes	Required to Specify
<ul style="list-style-type: none"> ▶ Need help? Product details, page 128 • Skin: laminate price group 1 • Vertical grain direction for woodgrain and directional laminates • Trim: paint • Attachment hardware 	<ol style="list-style-type: none"> 1 Style number 2 Laminate color for skin surface 3 Paint color number for trim 4 Options, if selected (see below) <ul style="list-style-type: none"> ▶ See <i>Surface Materials</i>, page 672.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Remember to omit base trim(s) on horizontal frame package when using a skin to the floor.

Tip: 30"H and 42"H skins only work on junctions manufactured on or after October 10, 2011.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area.
▶ See *Panel Buildups*, page 18, for more information.

Tip: All 60"H skins are only available in vertical direction for woodgrain and directional laminates.

Options	U.S. Price	Required to Specify

Wood To The Floor Skin Sets

Tip: Wood skin sets should be selected when grain pattern alignment of all segmented skins on a frame is desired.

Tip: Remember to omit base trim(s) on horizontal frame package when using a skin to the floor.

Tip: When specifying skins, the total skin height will be 6" less than the panel height. Skins to the floor are indicated by an F suffix. Plan 6" shorter than panel height, but skins to the floor are taller in actual height to cover the base trim area. See Panel Buildups, page 18, for more information.

Sliding Panel Doors

Tip: The sliding door is located outside of the panel system when installed in the standard position.

Tip: Door infill is standard in ribbed translucent plastic.

Tip: The standard door is handed and non-locking. When a lock option is specified, the lock will be on the trail end of the door. The illustration above shows a left-handed sliding door. If a lock option is specified, the lock will be on the right (trail) side of the door.

Tip: Width of host panel should always be equal to the width of sliding door.

Tip: Height of host and receiving panels must match height of door.

Tip: Remember to specify lock cylinder and key.
▶ Lock Cylinders, page 690.

Tip: When attaching the sliding door to an Answer panel, a junction stabilizer bracket is available for added rigidity to the host panel. If a host and/or receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host and/or receiving panel run. On long runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Universal Systems Worksurfaces

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 548

► See page 214 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with 1/2" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

 **For Canadian Pricing**

Parametric Straight Worksurfaces with Soft Edge Profile

High-Pressure Laminate or Composite Veneer

▶ Need help?
Product details,
page 211

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 or composite veneer price group 1
- Laminate worksurface:
 - Plastic soft edge profile centered on worksurface
 - Plastic 3 mm edge profile on front edge
 - Plastic default flat profile on side and back edges
- Composite veneer worksurface:
 - Plastic soft edge centered on worksurface
 - Composite veneer square edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Depth: 18"D – 36"D
- Width: 18"W – 120"W

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Selections)
 - 5 User edge profile (see below)
 - 6 High-Pressure Laminate or composite veneer color number for worksurface
 - 7 Plastic color number for front edge on laminate worksurface, if selected
 - 8 Options, if selected (see below)
- ▶ See *Surface Materials*, page 672

Tip: Long worksurface spans require additional support.
▶ See understanding section for details, page 213.

Universal Systems Worksurfaces

Tip: When selecting with cord drop, subtract 1/2" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.

► Page 548

► See page 214 for worksurface size availability matrix.

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with 1/2" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

Bullet Peninsula Worksurfaces

High-Pressure Laminate or Composite Veneer

Bullet Peninsula Worksurfaces

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long work surface spans require additional support.
▶ See understanding section for details, page 211

For composite veneer, wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Bullet peninsula worksurfaces are recommended for use with other curved-front shapes such as corner, curved-front worksurfaces.
▶ Page 528

Tip: The same bullet peninsula worksurfaces can be used with either worksurfaces with 1/2" cord drop or with full depth worksurfaces.

Standard Includes Required to Specify

▶ Need help? Product details, page 210

- Worksurface: High-Pressure Laminate price group 1 or composite veneer price group 1
- Laminate worksurface:
 - Plastic 3 mm edge profile front edge
 - Plastic default flat profile on side and back edges
- Composite veneer worksurface:
 - Composite veneer 3 mm edge profile on front edge
 - Matching veneer flat profile on side and back edges
- Cable scallop on back edge

- 1 Style number with appropriate edge profile suffix
SW Composite veneer or wood with square edge
▶ See edge profiles below.
- 2 High-Pressure Laminate or composite veneer color number for worksurface
- 3 Plastic color number for front edge on laminate worksurface, if selected
- 4 Options, if selected (see below)
▶ See *Surface Materials*, page 672.

Specifying Worksurface Screens

Universal Privacy/Modesty Screens	564
Universal Privacy Screens and Aligners	566
Sarto Privacy/Modesty Screens	568
Sarto Privacy Screens	570
Sarto Alignment Bracket	572
Worksurface Screens	573

Universal Privacy/Modesty Screens

Tip: Universal privacy/modesty screens can be attached to 3/4"–1 1/2" thick worksurface, including height adjustable work-surfaces, universal work-surfaces, and Elective Elements work-surfaces.

Tip: The screens weigh between 9.79 lb and 11.89 lb. Take this into consideration when planning for use on height-adjustable work-surfaces.

Tip: The universal privacy/modesty screen is intended for use on the back of a worksurface.

Tip: Fabric is applied horizontally on the screen.

Tip: Screen allows for 1 1/8" cord drop or no cord drop. See understanding pages for product specific application guidelines.

Sarto Privacy/Modesty Screens

Tip: Sarto privacy/modesty screens can be attached to 3/4"-1 1/2" thick worksurface, including Ology, Migration, Elective Elements, universal tables, and universal panel-mount worksurfaces.

Tip: The screens weigh between 3.51 and 11.64 lb. Take this into consideration when planning for use on height-adjustable worksurfaces. See understanding pages to calculate screen weight.

Tip: Worksurface type option adds a fourth worksurface bracket and repositions brackets to avoid worksurface scallops.

Tip: Side screen option changes brackets to smaller L-brackets, mounting the screen mount flush to the side of the worksurface. Side screen option is only available on screens 36"W and narrower.

Worksurface Screens

Divisio Side Screen

Tip: The Divisio side screen can be used on any 3/4"- to 1 1/2"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14 1/2 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

Universal Tables

Rectangle Tables

High-Pressure Laminate or Composite Veneer

For composite veneer, wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table will be supported by T- or X-bases.

Tip: Bases and legs to support Universal Tables must be specified separately.

Tip: For leg and support guidelines, see Table and Base Combinations, Page 262 Table and Leg Combinations, Page 263

*Tip: To specify 3 mm edge profile, no suffix is required. For other edge profiles, add suffix to the style number. (For example, **BFRR3672** becomes **BFRR3672SW** for composite veneer or wood square edge profile.)*

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

► Options, continued on next pages

Tip: 6"H box drawers come standard with a divider package.

For composite veneer, laminate and wood group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: 6"H box drawers come standard with a divider package.

Tip: The c:scape pull option will be culled October 18, 2026.

Tip: Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

► See Counterweight Requirements for Storage Products, pages 273–280.

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, **RLF18301** becomes **RLF18301F** for flush steel front).

Universal Dual Door Towers

with Flush Steel, Proud Steel, Proud Laminate, or Proud Wood Fronts

► Need help?
Product details,
page 312

Standard Includes

- Tower: paint price group 1
- 1"H top: paint to match tower
- Door and drawer fronts on units with proud laminate fronts: laminate price group 1
- Door and drawer fronts on units with proud wood fronts: composite veneer price group 1
- Lock, keyed random: 9201 Polished Chrome
- Base (see below under Required Selections)
- Pulls: metal
- Integral pulls on units with flush steel fronts
- Drawer body: black only
- Adjustable shelves on 52"H and 65½"H:
paint to match tower
- Brackets for adjustable shelves: black
- Post to support adjustable shelf: paint to match tower
- One box drawer divider and one pencil tray: black only
- Coat rod: black
- Four adjustable leveling glides
- Ganging hardware
- Counterweight package, if selected

Required to Specify

- 1 Style number with appropriate front style suffix in the space provided
 - F** Flush steel front
 - P** Proud steel front
 - L** Proud laminate front
 - W** Proud composite veneer or wood front
 - 2 Paint color number for tower
 - 3 Laminate color number for door and drawer fronts, if proud laminate front selected
 - 4 Wood color number for door and drawer fronts, if proud wood front selected
 - 5 Base (see below under Required Selections)
 - 6 Pull (see below under Required Selections)
 - 7 Metal color number for pulls, if proud steel, proud laminate, or proud wood front selected
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 672.

For composite veneer, laminate and wood group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: If wood veneer top option is selected, wood veneer top color will default to match wood front.

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: The c:scape pull option will be culled October 18, 2026.

Tip: Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required. ► See Counterweight Requirements for Storage Products, pages 273–280.

*Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, **RDD182448LA** becomes **RDD182448LAF** for flush steel front).*

 **For Canadian Pricing**
Multiply U.S. Price by the Canadian price factor.

High-Density Storage—Value Package

Drawing shows left-hand application, right-hand application is also available.

Tip: The high-density value package is a simplified version of high-density storage that includes two fixed shelves to solve organizational needs at a lower price point.

Tip: Nile pull will default as the standard pull, you must confirm this selection or specify an optional pull.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/ EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials under the Select Surface section.

Surface Materials Binders

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

Tip: All products may not be available in all colors listed below.

► See page 680 for an overview of the paint colors available on each component.

Smooth Metallic Paint

- 4799 Platinum Metallic

Price Group 3

Accent paint

Accent paints allow you to choose from a pre-matched color palette of trend driven colors. Refer to the *Surface Materials Reference Manual* for more information.

Coatings

- 1ATT Cast Shadow

Lux Coatings

- 4B20 Obsidian
- 4B22 Matte Brass
- 4B23 Burnished Bronze
- 4B24 Night Bronze
- 4B25 Matte Copper
- 4B26 Smoked Mica
- 4B29 Cast Iron

Tip: Lux Coatings is not offered on Answer panels with a square or an oval trim.

Custom Surfaces

Price Group 3

PerfectMatch

PerfectMatch is a service that allows you to create your own paint color. Refer to the *Surface Materials Reference Manual* for more information about this program.

Laminate

Steelcase Surfaces

Applies to:

- Duo storage boxes

Solid Laminate

- 2722 Cream **E**
- 2730 Arctic White
- 2746 Black
- 2759 Warm White
- 2811 Mist **E**
- 2883 Seagull
- 2884 Milk
- 2885 Dune

Applies to:

- Answer laminate skins
- High-Density storage
- Universal worksurfaces and tables—High-Pressure Laminate
- Universal storage tops
- Infills for FrameOne legs

High-Pressure Laminate

Price Group 1

Fiber Laminate

- 2850 Vanadium Fiber
- 2854 Vellum Fiber **E**
- 2860 Granite Fiber
- 2862 Stucco Fiber **E**

Micro Laminate

- 2920 Marl Micro
- 2921 Gypsum Micro
- 2922 Clay Micro

Patina Laminate

- 2870 Blonde Bronze Patina
- 2873 Instant Iron Patina

Solid Laminate

- 2722 Cream **E**
- 2730 Arctic White
- 2746 Black
- 2759 Warm White
- 2811 Mist **E**
- 2883 Seagull
- 2884 Milk
- 2885 Dune
- 2HAA Persian Salt
- 2HAB Rose
- 2HAC Indigo
- 2HAD Green Citrine **E**
- 2HAE Dark Olivine

24H2	Satin Black
24H3	Satin Stone
24H4	Satin Mocha

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$111 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Universal worksurfaces and tables—wood veneer
- Answer pedestal tops and fronts
- High-Density storage
- Universal storage tops and fronts
- Wood skins and trims
- Infills for FrameOne legs

Tip: Wood is not offered as a finish on the value package for High-Density storage cases.

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Tip: Answer panel wood trims are only available with quarter-cut finishes with the exception of maple finishes. Maple on wood trims is only available with flat-cut finishes. For ordering simplicity, both flat-cut and quarter-cut finishes can be specified on panel trims. However, for all finishes except maple, if a flat-cut finish is selected, the trims will have the coordinating quarter-cut finish. For maple finishes, if quarter-cut is selected, the trims will have the coordinating flat-cut finish. Blending panel trims with other wood products that have flat-cut finishes may be visually acceptable for most applications. If a more exact match is desired for non-maple finishes, please specify quarter-cut finishes for the entire project. If a more exact match is desired for maple finishes, please specify flat-cut finishes for the entire project.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Wood Group 1**Open-Pore Planked Veneer**

3P41	OP Planked Cherry
3P51	OP Planked Maple
3P61	OP Planked Oak
3P71	OP Planked Walnut
3VFX	OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

E = Excluded

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut **E**

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as part of our Select Surfaces program, with Wood Group 1 pricing.

Composite veneers are not available on Answer trims.

Composite Veneer Group 1

Composite Flat-Cut Open-Pore

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite
- 3LAX FC/OP Graphite on Oak Composite

Composite Quarter-Cut Open-Pore

- 3LEX QC/OP Desert Oak on Oak Composite
- 3LGX QC/OP Chai on Walnut Composite
- 3LJX QC/OP Ebony on Walnut Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Specification Guidelines for Directional Fabrics

The standard application direction of fabric on Answer panels, skins, and Hutch kit tackboard is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

The optional application direction of fabrics on Answer panels, skins, and Hutch kit tackboard is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual*.

Wood Veneer Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Lock and Keying for Universal Steel Storage Products and High-Density Storage	690
Style Number Index	692

Lock and Keying for Universal Steel Storage Products and High-Density Storage

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options. *Exception: Individual locking drawers are only available with field-installed locks.*

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR999 (Master keying numbers: XF1001 to XF3000). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

▶ See below.

Key Random

Required to Specify

Master key random	+\$39	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices

are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR999 (Master keying numbers: XF1001 to XF3000).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR999 (Master keying numbers: XF1001 to XF3000). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR999 (Master keying numbers: XF1001 to XF3000).

Example of a typical lock cylinder specification is shown below:

10	LOCKFR FR320
5	LOCKFR FR350
15	LOCKXF XF1100

30	Total
