**L. Confidante™**Distributed audio system for speech privacy.

# Our Environmental Commitment

### Life-Cycle Approach

We're working with the University of Michigan's Center for Sustainable Systems to complete life-cycle assessments for all of our major products to better understand the environmental impact of every stage of a product's life.

### **Materials Chemistry**

Together with McDonough Braungart Design Chemistry (MBDC), one of the world's leading sustainable design firms, we're assessing all of the chemicals and materials used in our products – evaluating them against 19 human and environmental health criteria. As a result, we're forming a cradle-to-cradle strategy for all of our products.

### Recyclability

We select materials that can be recycled at the end of a product's use and then design in such a way that they can be easily disassembled and separated. To simplify recycling, we minimize co-mingled components, consider the number and type of fasteners and make disassembly easy with common hand tools. Adhesives are eliminated if possible. Recyclable parts are clearly marked.

Environmental leadership is an ongoing commitment. To learn more visit www.steelcase.com/environment.

# Dealers and Services

### Global Dealer Network

We speak your language. Over 400 Steelcase dealers in North America, plus more than 500 Steelcase dealers internationally, help you create inspiring workspaces just about anywhere. Whether your project is across town, across the country or across the ocean, our dealer network will coordinate the logistics so you don't have to. It's local expertise with a global reach.

### Steelcase and Dealer Services

More than a product, it's a partnership. Our service offering includes workspace evaluations, space planning, project coordination, installation, maintenance, asset management and much more. Tailored web-based solutions make it easy to purchase what you need and manage what you have. And financing options provide flexible leasing alternatives.
