## Overview

**Designed for movement with dynamic seating**, adjustable worktools and Height-Adjustable Desks are important for today's office workers. To determine the best height-adjustable solution, consider these four criteria:

1. **Adjustability Needed:**  
What is the height range requirement? (seated or sit-to-stand)
2. **Worksurface Size Needed:**  
What does the physical space look like? (work-surface configuration)
3. **Equipment/Tools Used:**  
What type of computer equipment and other worktools are being used on the worksurface? (load capacity)
4. **Use:**  
What is the Height-Adjustable Desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

## WARNING

Risk of Serious Injury. If not used as intended, moving work-surfaces can pinch or injure people, or damage property.

Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

## Tips

### Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of Height-Adjustable Desks.

### Weight

The maximum allowable load (varies by height-adjustable desk) should be evenly distributed and must not be exceeded.

### Width

Specify a minimum 1" gap to adjacent furniture. This eliminates any pinch points between a Height-Adjustable Desk and a fixed object.

### Depth

When placing a Height-Adjustable Desk against a panel or wall specify the worksurface depth shorter to provide a minimum 1" gap. This eliminates pinch points and adds clearances for cable access.

### Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the Height-Adjustable Desk is not impeded because of cables. Consider the addition of a cable riser or cable basket to help harness these wires and cables.

### Power

Plan easy and unobstructed access to electrical outlets for computer equipment and Height-Adjustable Desks (when applicable).

## WARNING

Risk of serious injury.

**Bases-only warranty limitations and potential for injury:** The use of worksurfaces that do not comply with the Steelcase defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all Steelcase Warranties, expressed or implied.

The use of worksurfaces that do not comply with Steelcase criteria voids any Steelcase claims of compliance with ANSI/ BIFMA, UL, LEED, or other applicable requirements. The use of non-Steelcase worksurfaces on Steelcase adjustable-height bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. Steelcase is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-Steelcase worksurface, and assumes no liability for their compliance with standards when height adjustable bases are used without a Steelcase worksurface as intended.

### Worksurface Criteria and Limitations

The use of non-Steelcase worksurfaces is not recommended. Any use of a non-Steelcase worksurface requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected worksurface construction and attachment means. The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen worksurface.

## Tips

**Height-adjustable bases** include fasteners intended for use with Steelcase worksurfaces. These fasteners may be suitable for worksurfaces meeting the following criteria:

- Medium-density or higher particleboard or fiberboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater (Ology and Migration SE)
- Thickness of 1 $\frac{3}{8}$ " or greater (Series 5 bases)
- Fasteners located a minimum distance of 1" from any edge

# Bivi Tables: Basic Overview

Basic Bivi table components consist of a Trough, Leg(s), and Full Top(s).

**The 26½" clearance underneath Bivi tables** accounts for the 2" reinforcing channel located at the front edge underneath the Bivi Top.

**The Bivi Full Top** is designed to work on all Bivi tables, Table for One, Table plus One, Table for Two, Table plus Two, and at seated or standing heights.

**Cable scallop** is 2¾"D x 18"W.

**The Trough** acts as the center spine to Bivi tables; it attaches to the Legs and Full Tops and provides access to power and data.

**The Bivi Leg** has two T-slots on either side that are the connection point for everything from Full Tops, Rumble Seat, Arch accessories, etc. with different brackets.

**The Bivi Leg** is designed to support all of the Bivi tables.

**Bivi Table for One** is assembled with the Trough at one end of the legs and one Full Top installed.

**Bivi Table for Two** is assembled with the Trough centered between two Legs and two Full Tops placed on either side.

#### How to create larger settings:

+

=

**A Bivi Table plus One** can be added to a Bivi Table for One by sharing the inside Leg.

+

=

**A Bivi Table plus Two** can be added to a Bivi Table for Two by sharing the inside Leg.

How to create dual height settings:

How to create standing height settings:

How to reconfigure settings:

Bivi can be ordered as individual components (Full Top, Trough, and Legs) to create new configurations.

Bivi Table for One and a Full Top create a Table for Two.

Bivi Half-Round Top (**TS8RW**)

**Bivi Table for Two and two Half-Round Tops** create a conference table for six.

# Application Guidelines

**Bivi Table for One and a Table plus One** can be attached with users sitting next to or across from each other.

**When an architectural obstruction such as a column occurs,** one Full Top can be left off.

**The maximum number of Tables for Two and Tables plus Two, or Tables for One and Tables plus One, that can be connected is unlimited.**

*Note: Power is not unlimited. Additional power infeeds may be needed depending on the number of tables connected together.*

**When four dual height tops are grouped in the middle of a setting, it creates a standing meeting spot for functional teams.**

**When dual height tops are planned on the end of a setting with a Mini Transaction Top,** it creates an impromptu or small meeting spot.

# Grain Direction

The appearance of laminate may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustration for an understanding of grain direction on your installation.

**Arches** ship standard with screw covers, which are a modified version of the screw covers that ship with Bivi Legs. When installing Arches, the arch screw covers replace the leg screw covers.

*Tip: Save leg screw covers for future configurations.*

*Both leg screw covers and arch leg screw covers are supported as service parts.*

**Side Storage** installs onto a Short Arch and is shared between adjacent users. Each end of the Side Storage has open cubbies that can be left open or filled in with Bivi Organizers. Side storage can be mounted on a table for two without additional support.

**Side Storage** should not be installed next to a Rumble Seat because it overhangs into the user sitting area.

**Organizers** can be installed into each end of the Side Storage or be used freestanding on a Full Top.

**Bike Hooks** can be mounted onto a wall.

**Two Bike Hooks** can be installed on one Tall Arch as long as the two bikes do not exceed 100 pounds and the front tires and rear tires are alternated to avoid both sets of pedals in the same location.

*Tip: When ordering Bike Hooks, there are separate style numbers depending on the desired application: TS2ARCHBH for arch mounted, and TS2WALLBH for wall mounted.*

**Monitor Mounts** can be located at the top or bottom location of a Tall Arch and on a Short Arch.

**Monitor Mounts** hold one monitor each up to 37" with a maximum of 50 pounds.

**Markerboards** are available in two sizes and have magnetic backs that work with steel surfaces such as Bivi Metal Screens and the center of the Bivi Side Storage.

**Metal Screen, style number TS2SCREEN**, works with any 48"W or 60"W Trough. It does not work with 72"W Troughs due to a trough stiffener that is factory installed in the center of 72"W Troughs. Metal Screens with style number TS8SCREENM work with any size Trough.

**Two canopies** cannot be used side-by-side on the 48"W Bivi Tables.

**Organizer** can be placed by itself on a table or tucked inside Bivi Side Storage.

**Planter** is a waterproof insert that fits inside Holder to hold live plants.

**Holder or Holder with Planter** can be attached opposite of other Bivi accessories.

**Board Racks** can be attached at the bottom location of Tall Arch or a Short Arch.

**Board Rack** can not be attached at the top location of a Tall Arch.

**Side Storage** attaches over a Short Arch and creates storage space and a boundary between workers.

**Board Rack** can be attached to a wall.

**Board Rack** can be attached opposite of a monitor mount.

## Connections

**Metal Screens** ship with Trough mounting brackets that assemble by screwing two halves together and snapping into the Bivi Cable Trough.

**High Sit Bracket with Modesty Panel** attaches to Arches and supports Full Tops at standing height applications. At seated height applications, the High Sit Bracket with Modesty Panel provides privacy.

**Arch Infills** are tackable with painted brackets to attach to the upper section of the Tall Arch and the lower section of the Tall Arch and/or Short Arch.

**Upper Arch Infill** is also available with non-tackable markerboard surface.

**Mini Hook** assembles onto High Sit Bracket with Modesty Panels that are manufactured after 11/6/2017. There can be two Mini Hooks per side if other components are not in use. Assembly holes were added for the Upper Dual Top.

**Tackable Screens** are available as freestanding or Bivi Trough-mounted. Screens are not a tackboard, but they are tackable.

**Modesty Panel** is tackable and has two sides for cable management. Each side has an access pocket for cords to route into.

**When an Upper Dual Top is installed**, there is room for one Mini Hook.

**Freestanding, Tackable Screen** standchions and base come standard in three plastic color choices with a paint option upcharge.

**Trough-mounted, Tackable Screen** standchions come standard in three plastic color choices with a paint option upcharge. The base is always painted and replaces the Bivi Trough End Attachment Cover.

**Tall and Short Arches** can be mounted on either ends of a Bivi Table or in between two tables. They provide slots for mounting other Bivi accessories.

**Upper Footshelf** is painted steel, available in 48", 60", and 72" widths. Upper Footshelf can be paired with the Lower Footshelf at standing height to create a footshelf from standing and sitting posture.

**Leg Covers** come in a quantity of one. They are used for aesthetic purposes to cover up strength ribs in Bivi Legs and are not structural. Leg Covers come in half size, when used on a leg that has a Bivi Footshelf, and full size, when no Footshelf is present.

**Lower Footshelf** is painted steel, available in 48", 60", and 72" widths. Footshelf is used for foot support when in a standing posture.

**Lower Footshelf** is not recommended to be used with 21"D standing height tops due to possible leg interference.

**Footshelf bracket** covers the lower half of the Bivi Leg. The footshelf bracket can be shared between two Footshelves. The first Footshelf should be specified with the two bracket option and the adjacent footshelves should be specified with the one bracket option.

**To install Footshelf brackets onto legs manufactured on or before July 17, 2016**, order adaptor package, TS8FRETROSR.

**Side Storage** cannot be installed where a High Sit Bracket with Modesty Panel is present, as they interfere with each other.

**Monitor Mounts** will support the following VESA\* patterns:

- 75 mm x 75 mm
- 100 mm x 100 mm
- 200 mm x 200 mm
- 200 mm x 100 mm

Screws for mounting the monitor to the Bivi Monitor Mount are not included. They should be included with the TV or monitor.

► Specifying, pages 117-132

**Bivi Power Strips and Modular and Chicago Hardwired Powerways** have spill-proof technology to prevent electrical shorts.

**Hardwired-to-Modular**

**Modular Powerways**, TS8P260 and TS8P2CHI, have two sections with four receptacles each for a total of eight receptacles.

**Steelcase products** are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and installation instructions. However, the building owner or designated agent is responsible for verifying that the installation is in compliance with local codes and regulations.

**Plug and Play**

**Plug and Play Power Strip package of two**, TS8PS2PKREV, has two sections with four receptacles each for a total of eight receptacles.

**Plug and Play Power Strip package of four**, TS8PS4PKREV, has four sections with four receptacles each for a total of 16 receptacles.

**Trough-Mounted Data Access, TS8DATA**, snaps into a 48"W, 60"W, or 72"W Trough and provides an opening to fit standard sized communication modules.

**Trough-Mounted Data Access**

**Plug and Play Power Strips** have a 15-amp 10' cord that plugs into a building receptacle.

## Product Details

**Two-Pack and Four-Pack Power Strips** do not connect together as this would cause a potential power failure and hazard. Power Strips must plug into an individual power source.

**Power Strips** have the first and last receptacle rotated out to accommodate larger power units.

**Power Strips** have four simplex plugs. The fourth position can have two USB ports optioned in place of the simplex plug.

**For the standard Bivi Modular Hardwire Base Power**, when using a 60"W table there is 22" of conduit with 6" of wire length once the power hits the floor for the electrician to work with and connect to the building power source. When using a 48"W table, there are 12" of additional conduit.

**Bivi San Francisco Hardwired Modular Power** can be used outside of San Francisco. If more conduit length is desired, it has 72" length of conduit from the point of coming straight out of the table.

**The San Francisco Hardwired Base Power** can be used in other areas of the country where local codes allow liquid tight conduit if additional conduit length is desired. Check with local electrical inspectors.

**Modular Harnesses** are used when connecting power between two Bivi tables or when two hard-wired Powerways are used in one Bivi table.

**One circuit plug and play power strips, two circuit modular powerway, and Chicago two circuit hardwired powerway** are compatible to install in the top half of the cable trough.

## Power Specifications

- Single circuit power
- 12-amp system rating
- 15-amp power cord with 15-amp over-current protection
- UL recognized Powered Table System component per UL962

## Surface Materials

### Power Strips

- Paint

**Bivi Plug and Play Corded, One Circuit**

**Plug and Play Power** have 6' of conduit between receptacle strips, that gives room to share power between multiple tables in some applications. Plug and Play Power Strips are color coded and connect into each other.

**2-Pack Plug and Play Power Strips** have maximum of one connection point. 4-Pack Plug and Play Power Strips have maximum of three connection points.

**Bivi tables** do not have maximum table limit. An unlimited amount of tables can be connected together. Plug and Play Power will need to be plugged into a building outlet in the middle of runs when multiple tables are connected and power is used.

**Openings** can be skipped to stretch out the power to more users. There is 6' of cord length between Power Strips which allows this.  
*Tip: Skipping openings will reduce cost.*

**Six Person Example**  
Provides two (2) plugs per person at the Table for Two at each end and four (4) plugs per person at the Table for Two in the middle of the setting. Requires quantity of one (1) package of four (TS8PS4PKREV) and one (1) building outlet to power up table.

**Eight Person Example**  
Provides two (2) plugs per person. Requires quantity of one (1) package of four (TS8PS4PKREV) and one (1) building outlet to power up table.

### Bivi Modular-Hardwire Power, Two Circuit

**Modular Powerways**, TS8P260, have two Power Strips for a total of eight simplex receptacles (power outlets).

**Bivi tables** can fit one powerway per Trough, located at the top of the Trough.

**When additional Bivi plus One or plus Two tables** are added a Two Circuit Modular Harness will be required, TS8P2H.

**Bivi Modular-Hardwire Power, Two Circuit, continued**

**Modular Hardwire Power** can support a maximum of six (6) Powerways, TS8P260, per Power Infeed, Two Circuit, TS8PBT2. After six (6) Powerways, a new power infeed will be required.

# Wiring Schematics

Details for the Electrician

Wiring Schematics

## Bivi Four-Circuit Modular-Hardware

**Power** offers three different wiring schematics to allow you to match your specific wiring strategy to any typical building wiring plan.

*Tip: All the components in an electrical system must use the same wiring schematic. The components are keyed and color coded to make it impossible to connect mismatched parts.*

Black = Four-circuit, 3+1

Brown = Four-circuit, 2+2

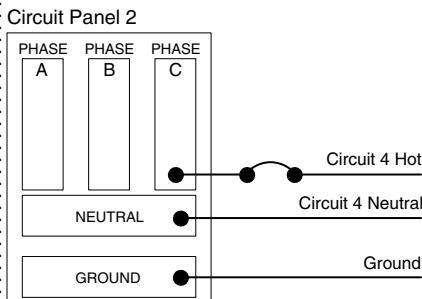

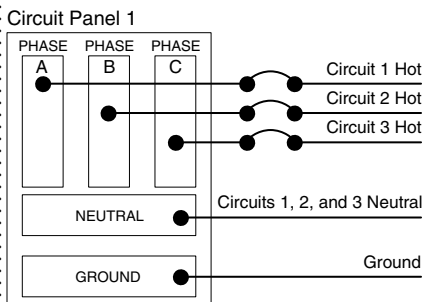

Rust = Three-circuit, separate neutral (3SN)

Shared neutral = 10 gauge

Non-shared neutral = 12 gauge

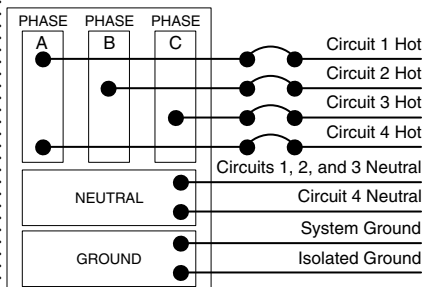

Hot wires = 12 gauge

### Four-Circuit, 3+1

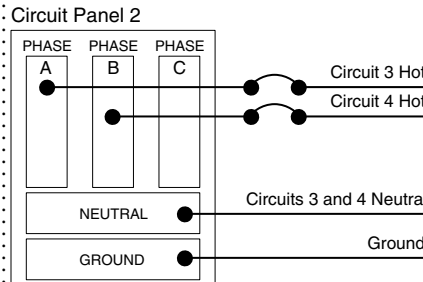

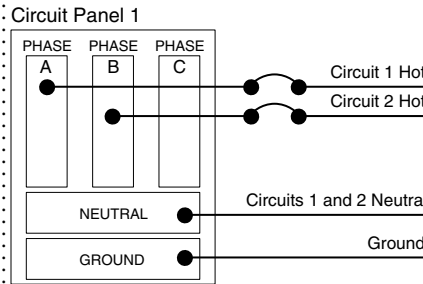

**In the four-circuit 3+1 schematic,** circuits 1, 2, and 3 are distributed from the first circuit panel and are supported with one shared neutral and one shared ground. Circuit 4 is distributed from a second circuit panel and is supported with a separate neutral and ground.

### Single 3-Phase Circuit Panel

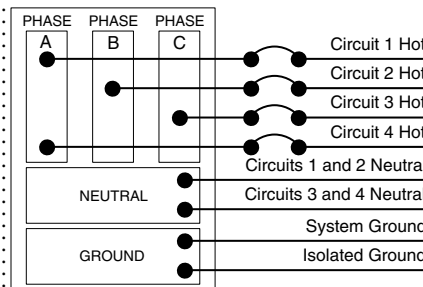

**On a single 3-phase circuit panel,** all four circuits are distributed as shown.

### Four-Circuit, 2+2

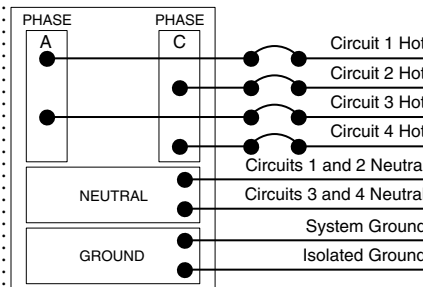

**In the four-circuit 2+2 schematic,** circuits 1 and 2 are distributed from two different phases from the first circuit panel and are supported with one shared neutral and one shared ground. Circuits 3 and 4 are distributed from a second circuit panel and supported by their own shared neutral and ground.

### Single 3-Phase Circuit Panel

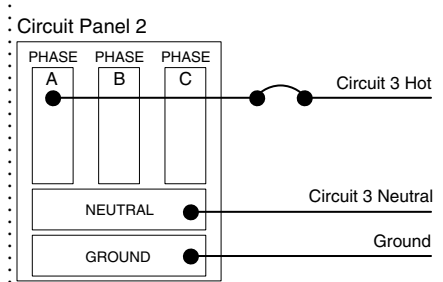

**On a single 3-phase circuit panel,** all four circuits are distributed as shown.

### Split-Phase Circuit Panel

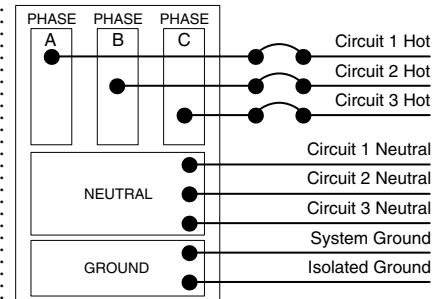

**On a split-phase circuit panel,** all four circuits are distributed as shown.

### Three-Circuit, Separate neutral

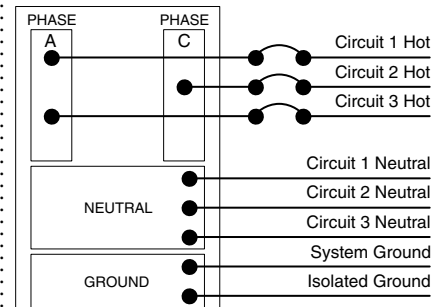

**In the three-circuit, separate neutral schematic,** circuits 1 and 2 are distributed from two different phases from the first circuit panel. Each circuit is supported with its own neutral and a common ground. Circuit 3 is distributed from the second circuit panel and is supported by its own neutral and ground.

### Single 3-Phase Circuit Panel

**On a single 3-phase circuit panel,** three circuits are distributed as shown.

### Split-Phase Circuit Panel

**On a split-phase circuit panel,** three circuits are distributed as shown.

# How to Calculate Power Needs

## Use This to Determine How Many Power-Ins You'll Need

**When planning a power network,** you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

**If your usage is not known in advance:**  
The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

**If your usage is known in advance:**  
Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.  
▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

# Distribution and Access

## Four Circuit

**Power Blocks** are placed in the bottom half of the Bivi Trough, are dual-sided, and are accessible on both sides of the Trough. Modular Harnesses are used to distribute power through the bench.

**Standard-Capacity Power** includes one Power Block, provides back-to-back power, and accepts two receptacles per side. The Standard-Capacity Power Block allows access to power in the sides of the Bivi Trough.

**Accessory Power Strips** can be placed at seated or standing height tables for easy user access. Power and data, power and USB, or power only are available.

**Modular Harness** is used to connect power blocks and distribute power through the bench.

**Four-Circuit Powerway** connects to a Four-Circuit Modular Power Block or Connector Power Block and is available in three wiring schematics with multiple line options. As with the Plug and Play Powerways and Modular-Hardwire Two-Circuit Powerways, the Four-Circuit Powerway mounts into the floor of the Trough.

## Wiring and Cabling

### Modular Power Block Standard-Capacity Power

includes one power block, provides back-to-back power, and accepts two receptacles per side.

### Power Block Connector, Four-Circuit (TS8PHBC)

may be used with a Four-Circuit Modular Powerway (TS8P4QUAD) in place of the Standard-Capacity Power Block to keep the sides of the Bivi Trough covered for a clean aesthetic.

### Four-Circuit Modular Powerway (TS8P4QUAD)

is available in three wiring schematics with multiple line options.

### Chicago Hardwire Box

is available. It accommodates two receptacles per side.

### Duplex Receptacles

are available in 15-amp, isolated, or system ground and are available in three wiring schematics with multiple line options. Receptacles have two outlets and are ordered separately.

### Duplex Receptacles

are available in nine plastic colors:

- 6000 Black

### Modular Harnesses

are used to connect power blocks.

► See *Power Routing Harness Chart*, page 68, to determine lengths needed.

### Power Infeed Cover

can be used to conceal conduit and cables along the floor.

**Two Power Strips** are available: rectangular and pyramid. Each have options of power, data, and USB ports. The Rectangular Power Strip has an option for clamp-on mount that works well in the Bivi table scallop at both seated and standing heights.

**Rectangular Power Strip with clamp-on mount** works on worksurfaces that range from 1/2" to 2 1/2" thick.

### Trough-Mounted Data Access, TS8DATA

snaps into a 48"W, 60"W, or 72"W Trough and provides an opening to fit standard sized communication modules.

### Three wiring schematics

are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

**All electrical components** are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

### Local electrical codes

**vary**, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

# Building Interface

## Four Circuit

**Building power and data**

can interface with Bivi tables from the floor, wall, column, or ceiling. Both modular and hard-wire infeeds are available.

**Infeeds** can enter Bivi tables at either end or anywhere along the Trough.

**Infeed Cover**

**An Infeed Cover** is available to conceal the power and data.  
► Specifying, page 131

**Wiring and Cabling**

**Hardwire-to-Modular Power Infeed** is available in 6, 12, and 24 foot lengths. If a shorter harness is needed, it can be cut by the electrician. The hardwired end is connected by an electrician to a junction box wherever it is located in the building. The harness is routed into the Trough and connected to a power block. Non-PVC is standard. PVC version can be optioned.

Straight/  
Flush

90°

**Modular Junction Box Faceplate** can be ordered separately and used with any modular harness length when 12 and 24 foot lengths are not appropriate. Straight/flush and 90° faceplates are available. A 90° Junction Box Faceplate is recommended for use at a wall or column. Non-PVC is standard. PVC version can be optioned.

**New York Power Infeeds** are available. The junction box is mounted to the underside of the Trough. A 50" harness is included to reach the first power block in the Trough. If a shorter harness is needed, it can be cut by the electrician. Non-PVC is standard. PVC version can be optioned. Hardwire-to-Modular Infeeds can also be used.

**Hardwired/Chicago Power Infeeds** are supplied by the electrician.

**San Francisco** can use hardwire or modular infeeds. When infeed is coming from floor or wall, liquid tight metallic conduit may be required. In this case, order infeed specific to San Francisco.

**Base Power Infeeds** are not available.

**Power and data** can enter the Trough through the end or in the middle of a run. ▶ See *Cable Capacities*, page 65.

**Three wiring schematics** are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

**Utility Pole** connects to the T-slot in the Bivi Leg.

**Non-PVC modular electrical components** are the standard offering with the option to order PVC on some components. For those trying to gain the LEED Innovation and Design credit, non-PVC should be selected.

**All electrical components** are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

**Local electrical codes vary**, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult a qualified electrical contractor or engineer for the proper installation of all electrical components.

## Product Details

**CF Plus** can be mounted to Bivi with the Bivi Table-Mounted Monitor Arm Brace. Specify Adaptor Block (CF) when ordering Brace. Specify Bivi Bracket when ordering **CFPLUS**.

**Half-Round Top** will not work with a stand alone 48"W or 60"W Bivi Table for Two, due to stability test guidelines. Half-Round Top is approved to work with 72"W Bivi Table for Two.

**Half-Round Top** is not recommended to be used on a standing height Bivi Table for Two. The overall width is 4" wider than the span of two Full Top depths and the depth of a Bivi Trough. At standing height, the Half-Round Top will overhang the footprint of two Full Tops by 2" on either side.

**Half-Round Top** will work with 48"W, 60"W, or 72"W Bivi with additional product added to the other end. For example, add a Bivi table or Trunk to a 48" Bivi Table for Two.

**Transaction Top** attaches at the end of a 60"W Bivi Table for Two at standing height to create a team table or easy collaboration spot.

**Mini Transaction Top** attaches at the end of either two Upper Dual Tops or two 21"D Tops at standing height.

**Transaction Top** is not recommended to be used on a Bivi Table for One. It overhangs the Table for One footprint and creates unwelcome edges.

**Transaction Top** is not recommended to be used at a seated height Bivi Table for Two. The overall width is 56" to match the two Full Tops in a Bivi Table for Two at standing height. This is 4" narrower than a Half-Round Top due to no Trough in the center of a Bivi Table for Two at standing height.

**Mini Transaction Top** attaches at the end of two Upper Dual Tops to create a small collaboration spot.

**End Hanging Top** is a 60"W x 18"D top that attaches to the end of a seated height Bivi table run. It is designed to provide extra workstations in a smaller foot print, and to keep the square aesthetic of Bivi.

**End Hanging Top** is not recommended to be installed on a Bivi Standing Height Table for Two. Brackets are designed to attach into the leg and not the Short or Tall Arch.

**End Hanging Top** will not work with stand alone 48"W or 60"W Bivi Table for Two due to stabilizing guidelines. End Hanging Top is approved to work with 72"W Bivi Table for Two.

**Mid Transaction Top** attaches at the end of a 48"W Bivi Table for Two at standing height.

**End Hanging Top** cannot be installed on a Bivi Table For One. End Hanging Top overhangs past the Table for One and creates unwelcome edges.

**Back and side edges of End Hanging Top** have an edge band that is defaulted to match the laminate surface.

**Grain direction of End Hanging Top** is always side to side.

**End Hanging Top** works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

**Gallery Panel** is a panel that attaches to the Bivi Leg at the end of a run to conceal the understructure of the Bivi frame when a closed visual is desired.

**Gallery Panel** works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

**Gallery Panel** is not recommended to be installed on a Bivi Standing Height Table for Two. Gallery Panel is only 28½"H which would lead to a gap from the panel to the top at standing height.

**Gallery Panel** cannot be installed on a Bivi Table For One. The Gallery Panel overhangs past the Table for One and creates unwelcome edges.

**Back and side edges of Gallery Panel** have an edge band that is defaulted to match the laminate surface.

**Grain direction** is always specified up and down (waterfall) to work with the grain direction of the Bivi Full Tops.

*Tip: Specify Adapter Block (CF) when ordering Bivi Monitor Arm Brace and specify Bivi Bracket when ordering **CFPLUS**.*

## Product Details

**Half-Round Top** will not work with a stand alone 48"W or 60"W Bivi Table for Two, due to stability test guidelines. Half-Round Top is approved to work with 72"W Bivi Table for Two.

**Half-Round Top** is not recommended to be used on a standing height Bivi Table for Two. The overall width is 4" wider than the span of two Full Top depths and the depth of a Bivi Trough. At standing height, the Half-Round Top will overhang the footprint of two Full Tops by 2" on either side.

**Half-Round Top** will work with 48"W, 60"W, or 72"W Bivi with additional product added to the other end. For example, add a Bivi table or Trunk to a 48" Bivi Table for Two.

**Transaction Top** attaches at the end of a 60"W Bivi Table for Two at standing height to create a team table or easy collaboration spot.

**Mini Transaction Top** attaches at the end of either two Upper Dual Tops or two 21"D Tops at standing height.

**Transaction Top** is not recommended to be used on a Bivi Table for One. It overhangs the Table for One footprint and creates unwelcome edges.

**Transaction Top** is not recommended to be used at a seated height Bivi Table for Two. The overall width is 56" to match the two Full Tops in a Bivi Table for Two at standing height. This is 4" narrower than a Half-Round Top due to no Trough in the center of a Bivi Table for Two at standing height.

**Mini Transaction Top** attaches at the end of two Upper Dual Tops to create a small collaboration spot.

**End Hanging Top** is a 60"W x 18"D top that attaches to the end of a seated height Bivi table run. It is designed to provide extra workstations in a smaller foot print, and to keep the square aesthetic of Bivi.

**End Hanging Top** is not recommended to be installed on a Bivi Standing Height Table for Two. Brackets are designed to attach into the leg and not the Short or Tall Arch.

**End Hanging Top** will not work with stand alone 48"W or 60"W Bivi Table for Two due to stabilizing guidelines. End Hanging Top is approved to work with 72"W Bivi Table for Two.

**Mid Transaction Top** attaches at the end of a 48"W Bivi Table for Two at standing height.

**End Hanging Top** cannot be installed on a Bivi Table For One. End Hanging Top overhangs past the Table for One and creates unwelcomed edges.

**Back and side edges of End Hanging Top** have an edge band that is defaulted to match the laminate surface.

**Grain direction of End Hanging Top** is always side to side.

**End Hanging Top** works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

**Gallery Panel** is a panel that attaches to the Bivi Leg at the end of a run to conceal the understructure of the Bivi frame when a closed visual is desired.

**Gallery Panel** works with 60"W Bivi Table for Two. It does not line up with 48"W Bivi Table for Two.

## Components and Accessories, Half-Round Top, Transaction Top, End Hanging Top, Gallery Panel, Top Shelf, Bottom Shelf, Hook, and Media Support System, continued

**Gallery Panel** is not recommended to be installed on a Bivi Standing Height Table for Two. Gallery Panel is only 28½"H which would lead to a gap from the panel to the top at standing height.

**Gallery Panel** cannot be installed on a Bivi Table For One. The Gallery Panel overhangs past the Table for One and creates unwelcome edges.

**Back and side edges of Gallery Panel** have an edge band that is defaulted to match the laminate surface.

**Grain direction** is always specified up and down (waterfall) to work with the grain direction of the Bivi Full Tops.

**Monitor arms and laptop supports with C-clamp brackets** are not recommended on Bivi tables. Use the table-mounted monitor arm brace to attach monitor mounts such as CF to Bivi. This brace is compatible with seated-, standing-, and dual-height applications of Bivi tables.

**Table-Mounted Monitor Arm Brace** is installed in the scallop of the top and does not interfere with the trough. This allows the brace to be used at seated height and standing height.

**Table-Mounted Monitor Arm Brace** can be used with a screen or a modesty panel installed.

**Due to interference with the Bivi Upper Dual Tops**, only the following monitor arms can be installed in applications with Upper Dual Top:

CF	Style Number
Single arm, no pole	<b>CFPLUS</b>

**On a Bivi Table for One**, the monitors cannot be rotated to where they are hanging over the other side due to possible tipping.

**Triple wide monitor arms** are available on Bivi Full Tops. The CF triple wide monitor arms can be specified on Bivi standing and seated height 60" and 72" applications. Triple wide monitor arms can not be used on dual-height applications due to interference.

**Style numbers FPAEC1BIVI, FPAEC2BIVI, and FPAELC2BIVI** can only be used at seated height without a modesty panel installed.

**Media Support System** consists of three parts — Monitor Mount, Shroud, and Shelf — that can have matching or contrasting paint colors. Each item can be ordered separately or as a full kit (package).

**Attachment:** Media Support System can only be attached to a Bivi Tall Arch. It cannot attach to a Bivi Short Arch or to the lower T-slot in a Bivi Tall Arch.

### Monitor Dimensions and VESA Patterns:

Media Support System can accommodate monitors ranging from 32" to 43", and less than 50 pounds. System accommodates monitors with the following VESA Patterns:

- 75 mm x 75 mm
- 100 mm x 75 mm
- 100 mm x 100 mm
- 200 mm x 100 mm
- 200 mm x 200 mm
- 300 mm x 200 mm
- 300 mm x 300 mm
- 400 mm x 200 mm
- 400 mm x 400 mm

**A grommet opening** comes standard in the Media Support Shelf, and an additional grommet can be installed in the Bivi Full Top to manage cables and gain easier access to power.

**Media Support Shelf** can be used as a way to manage cords and hold small devices such as remotes, display devices, and electronics.

## Bivi Trough Accessory Install Guide

### 48" Bivi Tables

48" Bivi Table Trough has eight (8) predrilled hole patterns in the Trough floor to accept accessories.

*Tip: End locations are not recommended dual monitors in the 48" or 60" Bivi Tables.*

*Tip: End locations are not recommended single monitor arms if power is installed.*

Possible Top Shelf locations.

Example of mixing monitor arms and Top Shelf accessories.

### 60" and 72" Bivi Tables

Shelves take up two (2) of the holes side by side.

60" and 72" Bivi Tables Trough has twelve (12) predrilled hole patterns in the Trough floor to accept accessories.

*Tip: End locations are not recommended for dual monitors in the 48" or 60" Bivi Tables.*

*Tip: End locations are not recommended for single monitor arms if power is installed.*

Possible top shelf locations. Up to six (6) shelves can be installed in one 60" and 72" Bivi Trough.

Example of mixing monitor arms and Top Shelf accessories.

## Application Topics

**Conference setting** can be created by a Bivi 4-pack with an End Hanging Top on both ends to make it into a 6-pack.

**Collaboration setting** can be created by a Bivi 2-pack with End Hanging Top on one end and with a Media Support Mount and Media Support Shroud on the other side to provide a meeting space.

**Gallery Panels** are used on each side of a setting when a closed finished visual is desired.

**Tech seated setting** can include a Bivi 6-pack at seated height with dual monitors on each top and with modesty panels attached.

**Tech standing setting** can include a Bivi 6-pack at standing height with dual monitors on each top and with modesty panels attached.

**Focus zone setting** can include a 4-pack of 72\"/>

**Media Support System** can support two full systems with monitors on a single Bivi Tall Arch. If mounted on a standing height table for two, Media Support System requires a transaction top as a counterweight, for stability.

**Media Support System** cannot be installed on a seated height Bivi For Table Two.
