The Great Indoors

Campfires draw us together.  
They create closeness in open space.  
They are the center of attention.

The Campfire Collection from Turnstone transforms open space the same way. Inviting, social, and comforting, it warms up work and pleases people. Create rooms without walls, sites for teams, or nooks for focus. Redefine the great indoors.

Landscape  
Architecture

Modular and adaptable, the Campfire Collection relocates and shape-shifts with the needs of the enterprise. Lounges turn inward or outward. Tables are big, slim, or tall. Accessories cleverly punctuate the workplace with striking shapes and colors. With Campfire, you design places within spaces.

## Open Invitation

Whatever the setting—for gathering, focus, or escape—the Campfire Collection is an open invitation. To designers who want options. To users who want comfort. To enterprises that want practicality with personality. With Campfire, open gets cozy, work gets warmer, and people get happy.

## Gear That Makes Open Friendlier

Today's youthful workforce wants inventive gear. With Campfire, the foundational pieces are personalized and extended with clever accessories. Individual tables for private work. Screens to segment space while preserving flow. The Big Lamp for wayfinding. The Wedge for support. The Footrest for happy feet. Campfire is a collection of complements.

Campfire Lounge System:  
All the Right Curves

The Campfire Lounge System is designed to work big rooms. To create collaboration zones. To be a focal point. In-facing or out-facing. Linear or solo. With deep seats and waterfall upholstery. Campfire Lounge System is base camp in a big room.
