

Elective Elements Specification Guide

Availability

Electronic price list updated with release 202.D (U.S.) and 157.D (Canada), dated December 15, 2025.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a . Products that are scheduled to be culled are indicated with an , followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

► For a list of all trademarks, refer to the last page of this specification guide. © 2025 Steelcase Inc.

For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing/. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:

- Product Drawing
- Standard Includes
- Required to Specify
- Options
- Related Products
- Specification Information
- Dimensions
- Style Number
- Price

Standard Includes
(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify
(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information
(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing shows you what the product looks like.

Product Drawing

Standard Includes

Standard Includes	Options	U.S. Price	Required to Specify
Standard light grey finish (RAL 9006) standard wall	Standard light grey finish (RAL 9006) standard wall	No cost	Specify with top edge
Base trim with no brackets (on 1/2" x 1/2" panel price)	Base trim with no brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Base trim with brackets (on 1/2" x 1/2" panel price)	Base trim with brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Standard 1/2" x 1/2" panel price	Standard 1/2" x 1/2" panel price	No cost	Specify with standard wall

Required to Specify

Required to Specify	Options	U.S. Price	Required to Specify
Standard light grey finish (RAL 9006) standard wall	Standard light grey finish (RAL 9006) standard wall	No cost	Specify with top edge
Base trim with no brackets (on 1/2" x 1/2" panel price)	Base trim with no brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Base trim with brackets (on 1/2" x 1/2" panel price)	Base trim with brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Standard 1/2" x 1/2" panel price	Standard 1/2" x 1/2" panel price	No cost	Specify with standard wall

Specification Information

Specification Information	Options	U.S. Price	Required to Specify
Standard light grey finish (RAL 9006) standard wall	Standard light grey finish (RAL 9006) standard wall	No cost	Specify with top edge
Base trim with no brackets (on 1/2" x 1/2" panel price)	Base trim with no brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Base trim with brackets (on 1/2" x 1/2" panel price)	Base trim with brackets (on 1/2" x 1/2" panel price)	No cost	Specify with standard wall
Standard 1/2" x 1/2" panel price	Standard 1/2" x 1/2" panel price	No cost	Specify with standard wall

Options
(under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products
provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify with Customiz Stain

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.

Additional Resources

Elective Elements

products are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

FSC CoC Certification

Steelcase Wood harvesting practices are just one of the steps in achieving Forest Stewardship Council Chain of Custody (FSC CoC) certification. FSC certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

Product brochures and planning tools

can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Planning Ideas is your resource to help inspire, envision, and plan Steelcase wood solutions.

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools — Steelcase’s design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix ProjectSymbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance,

please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/ProductEnvironmentalProfiles>, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

General Overview of Elective Elements

Elective Elements components are built on a 6" module. Each component is ordered separately and assembled in the field. These buildups allow users to create configurations that are specific to their functional needs. They also provide an opportunity to mix surface materials.

Quick Spec pages conveniently provide all of the style numbers needed to quickly specify some of the most commonly ordered buildups.

► Page 262

Wall-mounted tackboards provide a display surface.

► Page 212

Square grommet is available for cord and cable routing. A power and data box with multiple outlets can be installed just under the grommet cover for access at worksurface level.

► Page 58

Organizer shelves help to provide order to office supplies and stacks of papers. They can attach to a wall or panel, suspend between towers, or be supported by hutches.

► Page 202

Overhead cabinet provides storage above a worksurface. It is available in a variety of enclosed and open storage area configurations. Hinged or sliding doors are available in wood or glass.

65 $\frac{5}{8}$ "H side support frame supports overhead storage when used with a high pedestal.

► Page 204

Filler panel closes the space that results when a modesty panel isn't used on the back of a storage unit or end panel.

Single-high overhead cabinets can attach to a wall or panel, suspend between towers, be supported by a hutch kit, or supported by a single side support frame when the other end is attached to a stacking bookcase or tower. Double-high models are also available.

► Page 198

Tower provides storage, can support overhead storage, and can be used to provide privacy and define boundaries. Various file drawer, shelf, and cabinet configurations are available to meet storage needs.

► Page 190

Round grommet can be specified to assist with cable and cord routing.

► Page 58

Adjustable-height legs provide support in desk and run-off peninsula applications. They adjust in $\frac{1}{2}$ " increments in the field.

► Page 98

Back panel finishes pedestal back when it is exposed.

► Page 69

Cushion top is optional on lateral files or mobile pedestals to provide comfortable seating. Cushion top ships separately.

One-high pedestal provides another option for filing papers and expandable files.

► Page 148

High pedestal is 35 $\frac{7}{8}$ "H and can support overhead storage. Open and hinged-door models are available.

► Page 162

2/3-height modesty panel conceals the kneespace area. Full-height and 12"H modesty panels are also available. Modesty panel can be positioned flush, inset, or floating depending on the application. The 2/3-height and 12"H modesty panels are available in back painted glass.

► Page 70

Blade accessory shelf

fits discreetly beneath an overhead cabinet, and accommodates paper and small objects. Also works on plinth base settings.

► Page 202

Credenzas offer up to three storage components in a single piece.

► Page 170

Gate leg offers light scale aesthetic while supporting 24"D and 30"D worksurfaces. Works in both leg base and plinth base settings.

► Page 98

Hutch kits are intended to support an overhead storage unit. Hutch kits are available in single supports or paired with tackboards.

► Page 204

Glass modesty panels with back painted glass provide visual privacy for a seated position. Wood versions also exist.

► Page 70

Storage legs raise the storage 8¾" off of the ground to give a lighter aesthetic. Storage legs can be shared with adjacent elements of the same depth.

► Page 170

Coped worksurface edge is standard with blade edge profile in a return, desk return, bridge, or run-off peninsula application to provide a smooth transition between the adjoining worksurfaces. Coping is not required on worksurfaces with a square edge.

Cable tray is field installed under a worksurface to keep cords and cables out of the way.

Thought Starters and Applications

Plinth Base Freestanding Desk and Credenza

Square grommet is available for cord and cable routing. A power unit with cord pass-through can be installed just under the grommet for access at worksurface level.

Single-high overhead cabinets can attach to a wall or panel, suspend between towers or stacking bookcases, be supported by a hutch kit, or supported by a single side support frame when the other side is attached to a stacking bookcase or tower. Double-high models are also available.

Wall-mounted tackboards come in widths to match overhead cabinets. They feature a one-piece design.

Modesty panels are not required for structural support.

2/3-Height wood modesty panel attaches to a storage component or adjustable-height leg. They cannot attach to an end panel. The glass 2/3-height modesty panel attaches underneath the worksurface.

Round grommet can be specified to assist with cable and cord routing.

Finished back panel conceals unfinished back of pedestal.

Tower provides storage, can support overhead storage, and can be used to provide privacy and define boundaries. Various file drawer, shelf, and cabinet configurations are available to meet storage needs.

Overhanging desk worksurface is required when floating wood modesty panels are used. Glass modesty panels can sit either flush to the edge or inset.

Adjustable-height legs provide support in desk and run-off peninsula applications. In this application, they are adjusted to the same height as the pedestal.

Plinth Base Freestanding Desk and Credenza

Recommended Components

	Quantity	Style Number	Description
1	1	E6WD3672	36"D x 72"W Straight Desk Worksurface with EGRHC Overhang Grommet
2	1	E6PD291527B	29¼"D x 15"W Pedestal, Two Box and One File Drawer
3	1	E6NB1527P	15"W x 27½"H Pedestal Back Panel
4	1	E6NM6618	66"W x 18"H ¾-Height Modesty Panel
5	2	E6QL27	Adjustable-Height Legs
6	1	E6WS2490	24"D x 90"W Straight Worksurface with one EGSC Grommet and Scallop
7	2	E6PD231827B	23¼"D x 18"W Pedestal, Two Box and One File Drawer
8	1	E6OS159015H	90"W x 15"H Single-High Overhead Cabinet with Hinged Doors
9	1	E6TW242465D	24"W x 65⅝"H Tower with Doors Hinged Right, Cabinet Right
10	1	E6TW242465C	24"W x 65⅝"H Tower with Doors Hinged Left, Cabinet Left
11	1	EEAWST	90"W x 21½"H Wall-Mounted Tackboard
12	1	AWAA	Cable Tray
13	1	E6VPC	Power Unit with Cord Pass-Through
14	2	AWAK	Cabinet-to-Cabinet Attachment Kit

Specification includes all wood surfaces with square edge profile and contemporary pulls.

Leg Base Private Office with Wall Mount Overhead and Desk Return

Leg Base Private Office with Wall Mount Overhead and Desk Return

Recommended Components

	Quantity	Style Number	Description
1	1	E6C2472IJ	24"D x 72"W x 27½"H Leg Base 27½"H Credenza - 36"W Box/File, 36"W Open
2	1	E6GL30127	30"W Gate Leg
3	1	E6BA14723O	14½"D x 71¾"W x 3¾"H Blade Accessory Shelf
4	1	E6TWL242465C	24"D x 24"W x 65⅝"H Leg Base Tower with Cabinet Left
5	1	E6PS238	2"D x 3"W x 8¾"H Power Shroud
	2	AWQE51	51"W Worksurface Brace
	1	AWQF	Flush-mount Bracket
	1	AWAH	Hardware Kit - Suspension/Ganging
8	1	E6WD3072	30"D x 72"W Desk Worksurface
9	1	E6WS2472	24"D x 72"W Straight Worksurface
10	1	E6OS157215H	15⅞"D x 72"W x 15"H Single High Overhead - Hinged Doors
11	1	E6NMG7218S	72"W x 18⅜"H Glass Modesty Panel
	1	AWAK	Cabinet to Cabinet Attachment Kit

Specification includes all wood worksurfaces with square edge and inset pulls.

Leg Base Open Office

Leg Base Open Office

Recommended Components

	Quantity	Style Number	Description
①	2	E6C1860CF	18"D x 60"W x 27½"H Leg Base 27½"H Credenza, 30"W Box/File, 30"W Open
	2	E6C1860FC	18"D x 60"W x 27½"H Leg Base 27½"H Credenza, 30"W Open, 30"W Box/File
②	2	E6TWL181555L	18"D x 15½"W x 55¼"H Leg Base Tower, Door Hinged Left
	2	E6TWL181555R	18"D x 15½"W x 55¼"H Leg Base Tower, Door Hinged Right
③	4	E6WS3072	30"D x 72"W Straight Worksurface
④	4	E6WS1860	18"D x 60"W Straight Worksurface
⑤	4	E6NMG7218S	72"W x 18¼"H Glass Modesty Panel, for Use with End Panels
⑥	4	E60017607	17¼"D x 60"W x 7½"H Organizer Shelf
⑦	4	E6AB1714	17¼"D x ¾"W x 14½"H Side Support Frame
⑧	4	E6GL30127	30"W Gate Leg
⑨	4	AWAH	Hardware Kit – Suspension/Ganging
	4	AWQF	Flush-Mount Brackets

Specification includes all wood surfaces with square edge profile and inset pulls.

Tip: The exploded view shows one workstation of the 4-pack.

Height Matrix—Plinth Base

Tip: One-high pedestal with a worksurface top is 17"H. 1.5 high storage with a worksurface top is 23"H. Pedestal (two high) with a worksurface top is 29"H. Stacking storage elements come in various heights to create solutions which match panel or freestanding storage heights of 38", 45", 55¹/₄", 65⁵/₈", and 77¹/₂".

Tip: Heights of components—freestanding and stacked—align and work with Montage panel systems.

Tip: Use of adjustable-height supports may make the height of stacked components to misalign.

Plinth Base Bookcases and Towers

Service Modules

Hutch Kits, Shelves, and Side Supports

Tip: Leg base 21 $\frac{1}{2}$ "H storage with a worksurface is 23"H. Box/file leg base 27 $\frac{1}{2}$ "H storage with a worksurface is 29"H. Stacking storage elements come in various heights to create solutions which match panel or freestanding heights of 45", 55 $\frac{1}{4}$ ", 65 $\frac{5}{8}$ ", 72 $\frac{1}{2}$ ", and 77 $\frac{1}{2}$ ".

Tip: Heights of components—freestanding and stacked—align and work with Montage panel systems.

Tip: Use of adjustable-height supports may cause the height of stacked components to misalign.

Leg Base Bookcases and Towers

Service Modules

Hutch Kits, Shelves, and Side Supports

Understanding Storage Options

Elective Elements offers three different storage platforms to accommodate a wide range of aesthetic and storage options:

- **Plinth base storage components** are full to the floor, providing a conservative, architectural aesthetic with maximum storage.
- **Leg base modular storage components** feature an 8³/₄"H leg for a light, residential aesthetic with maximum planning and reconfiguration flexibility.
- **Leg base credenzas** also feature the 8³/₄"H storage leg, but come in factory assembled configurations to minimize storage leg locations and provide the cleanest aesthetic.

	Plinth Base	Leg Base	Leg Base
1. Select storage and support components <i>Tip: Underworksurface plinth base and leg base storage components align at 21¹/₂" and 27¹/₂" heights.</i>			
2. Select worksurface <i>Tip: Worksurfaces are common across all storage platforms.</i>			
3. Select above work-surface storage components <i>Tip: Storage for use above the worksurface is common across plinth base and leg base platforms.</i>			
4. Select freestanding storage <i>Tip: Plinth base and leg base storage platforms align on common height modules at 45", 55¹/₄", 65⁵/₈", 72¹/₂", and 77¹/₂" height.</i>			
Key Differentiators			
Back panel	Single proud back panel across credenza storage	Multiple inset back panels across credenza storage	Single inset back panel across credenza storage
Seams	One on each end	Multiple along back	One on each side of back
Recommended use	• High storage demands • Conservative, architectural aesthetic	• Light, residential aesthetic • Flexibility in planning and reconfiguration	• Light, residential aesthetic • Simplest specification and install, cleanest visual

Plinth base

Plinth base pedestals with a proud back panel will show the seams of back panel and pedestal connection on the outer sides of the unit.

Note: A proud back panel is standard on plinth base pedestals.

Scallop

Power shroud

When routing power through a leg base credenza, a technology trough allows power to be strung through the unit and a scallop on the bottom panel near the back of the unit allows power to exit the unit and reach the floor. A power shroud can be used to conceal the cords exiting the unit.

A plinth base freestanding desk can be created by using two plinth base free support end panels.

Two leg base free support end panels are not an applicable application to create a freestanding desk.

An L-shape end panel varies from plinth base to leg base. A plinth base L-shape end panel requires the use of a filler panel, while a leg base L-shape end panel spans the full depth.

15"W and 18"W drawers can have soft close drawer slides. Soft close drawer slides are not available on 30"W or 36"W drawers.

Storage Differences—Plinth Base versus Leg Base

	Plinth Base	Leg Base
Height	Low storage in a plinth base application with worksurfaces equal an overall height of 17"H, 23"H, and 29"H.	Low storage in a leg base application with worksurfaces equal an overall height of 23"H and 29"H. The storage leg is 8 ³ / ₄ "H.
Underworksurface Storage Options	File/File Pedestals Box/Box/File Pedestals Two-High Bookcases Pedestals Single Door Pedestals Hinged Door Pedestals One-High Pedestals 1.5 High Pedestals Adjustable Height Pedestals Mobile Pedestal*	File Pedestals/Credenzas Box/File Storage/Credenzas Open Bookcase Pedestals/Credenzas Hinged Door Storage/Credenzas 21 ¹ / ₂ "H Credenzas 27 ¹ / ₂ "H Credenzas
Underworksurface Storage Height (without worksurface)	Box/Box/File Pedestals = 27 ¹ / ₂ "H One-High Storage = 15 ¹ / ₂ "H 1.5 High Storage = 21 ¹ / ₂ "H	Box/File = 27 ¹ / ₂ "H 21 ¹ / ₂ "H File Credenza = 21 ¹ / ₂ "H 27 ¹ / ₂ "H Box/File Credenza = 27 ¹ / ₂ "H

36"D	●	●	●	●	●	●	●

Planned widths shown

Tip: 90"W and 96"W are not available on the full-width top desk.

Height-Adjustable Desks

Height-adjustable desks support single users. They allow users to quickly and effortlessly raise and lower their desks between seated and standing positions.

► Specifying, page 266

Desk surface has a wood core with a wood veneer or High-Pressure Laminate surface and is 1½" thick. Available in partial-width and full-width sizes dependent on application. The edge of a laminate desk surface is available with a 3 mm plastic square edge or wood square edge profile. Veneer desk surface is available only with wood square edge.

Three pre-set programmable controller is standard and mounted under the desk. Controller adjusts height at a rate of 17/10" per second.

Tip: The speed slows to half when going down and is full speed when going up.

Lifting column is activated by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Height-adjustable base adjusts from 27⁷/₁₀"H to 47²/₅"H in any increment.

Base supports a maximum distributed weight capacity of 295 pounds (2-leg base).

► For further information on weight limits, see page 28 for the *Weight Limit Chart*.

Shroud conceals a major portion of the height-adjustable column and the entire foot.

**Hanging modesty panel**

may be used with full-width or inset floor modesty, or with no floor modesty. The hanging modesty panel can be specified to be inset between shrouds, a shroud and a pedestal, or two pedestals. It can also be specified to match the width of the desk. The full-width modesty version is only available on the 36"D desks.

**Floor modesty panel**

is available for use with shrouds or pedestals. It covers the entire footprint expanse on the visitor side of the height-adjustable desk, from the floor to the top of the shroud or pedestal. The full-width floor modesty panel must be specified with an inset or full-width hanging modesty panel.

► For all available dimensions and options, see the sizing matrix on page 26.

Pedestal conceals a major portion of the height-adjustable column and the entire base. It also provides 15"W box/file storage within a single unit. The pedestal can be specified for both the left- and right-hand side, together or separately.

Product Details

Wood Veneer or High-Pressure Laminate Desks

When laminate is specified for top surface, the edge may either be 3 mm plastic square edge or wood square edge.

Wood Square Profile 3 mm edge profile

See surface material listing in this book for specific PVC-free availability.

Edge profile finishes are specified separately from laminate color.

Height-adjustable desks adjust 27 1/10"H–47 1/2"H in any increment.

Hanging modesty height differs depending on the floor modesty selection, to ensure proper clearance.

When a hanging modesty is paired with a full width or inset floor modesty, it is 24 5/16"H–47 1/2"H in any increment.

When a hanging modesty is paired with no floor modesty, it is 21 5/8"H–47 1/2"H in any increment.

Three pre-set programmable controller is available as an option and easily adjusts the desk by simply pushing the up and down arrows. Three pre-set programmable buttons allow user to set the seated and standing height positions or pre-set heights for multiple users.

Tip: If a floor modesty is selected, then a hanging modesty is required.

Tip: Please order a cable riser (DAVC) to manage the cable that controls the height adjustment underneath the desk.

► See Height-Adjustable Desks Specification Guide.

Contemporary

Jazz

Bar

Nile

Integral

Beam

Inset

Pulls are available in seven different styles to provide design options that range from conventional to progressive when pedestal is selected.

Tip: Integral pull is not available on laminate or composite fronts.

Locks are available factory- or field-installed on lateral files. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Wiring and Cabling

Low surge electric motor with whisper quiet operation adjusts at 1 7/10" per second. Motor is 110V and includes a 10' power cord. Motor also has 0.1W standby power.

Tip: The speed slows to half when going down and is full speed when going up.

Soft stop DC motor eliminates abrupt stops and starts and is housed inside the lifting column.

Built-in limiter switch is standard.

Trough is provided to manage excess base controller wires.

The power cord and other wires are not able to be routed through the interior of the shroud or pedestal. Hence, the power access cannot be hidden under the shroud or pedestal.

Tip: Consider ordering wire management products to manage the power and lock-out wires in addition to the trough.

► See page 557

Grain Direction

If veneer is selected for the case of the shroud and/or pedestal, then the veneer on the front must match. When selecting a veneer on the shroud and/or pedestal, grain direction will default to vertical. Horizontal grain direction can be specified if desired.

If any laminate is selected for the case of the shroud and/or pedestal, the front may either be laminate or veneer. When selecting a woodgrain laminate on the shroud and/or pedestal, grain direction will default to vertical. Horizontal grain direction can be specified if desired. If selecting a non-directional laminate, no grain direction selection is needed.

Tip: If any height-adjustable desk component (shroud, pedestal, hanging or floor modesty) uses Open Line laminate (OLL), then refer to the Surface Materials Reference Manual for more details and availability.

If a floor modesty panel is selected, then the grain direction on the storage and modesty panel must match. In the case of a laminate modesty panel greater than 60"W, then the grain direction on all pieces will be horizontal.

If a hanging modesty is selected, it may match or differ from the floor modesty panel and storage selection. In the case of a laminate modesty panel greater than 60"W the grain direction of the modesty will be horizontal.

Tip: If any height-adjustable desk component (shroud, pedestal, hanging or floor modesty) uses Open Line laminate (OLL), then refer to the Surface Materials Reference Manual for more details and availability.

Surface Materials

Desk top surface

- Wood veneer with wood edge profile
 - Laminate with 3 mm plastic edge profile
 - Laminate with wood edge profile
 - Open Line laminate (option)
 - A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

Application Topics

Any storage higher than 23" will impede height range of desk.

Tip: Do not place storage underneath controller.

All assemblies meet or exceed ANSI/BIFMA standards.

Installation

Height-adjustable base requires attachment to the desk top surface and encasement in shroud or pedestal.

Personal Table Tops

Straight, Desk, Return, Desk Return, and Bridge Worksurfaces

For Use with Plinth Base and Leg Base

Straight, desk, return, desk return, and bridge worksurfaces are used to build freestanding caseworks or they can be used in panel-supported applications.
 ▶ Specifying, pages 278–290

Worksurface has a wood core with a wood veneer or laminate surface.

Straight Worksurface

Bow-Front Desk Worksurface

Wood worksurface is available with two different wood edge profiles—square and blade. Front edge of a laminate worksurface is available with a plastic square edge, wood square edge, or laminate blade edge profile.
 ▶ Page 51

Back and side edge finishes vary depending on the worksurface type.
 ▶ Page 52

Supports must be ordered separately.

Tip: For bridge worksurfaces with a blade edge, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions.

*18"D units are only available in widths 90" or less.

Product Details

Square

Blade

Worksurface edge aligns with the face of the pedestal drawer if square edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the pedestal drawer front. Worksurfaces specified with a blade edge are 2 1/8" larger per profiled edge.

► Page 51

Short grain wood veneer is available on many worksurfaces and ensures that the wood grain in an installation all runs in the same direction.

► Page 56

Tip: Short grain is not available on laminates.

Desk workspace overhang

can be created by ordering a workspace that is 6" maximum deeper than the pedestal or end panel.

Tip: 23 1/4"D and 29 1/4"D pedestals must be used for overhang desks. End panels less than 23 1/4"D should not be used in overhang configurations.

Desk workspace

should be specified when the selected profile edge is desired on both the user's and visitor's side. This workspace is to be used in a freestanding application. It cannot be panel supported.

Tip: 36"/42"D bow-front desk workspaces must be supported by 30"D pedestals or end panels.

Tip: A desk workspace with a 6" overhang cannot accept an L-shape end panel. As an alternative, use a straight end panel with a full modesty, or a J-shape end panel instead.

Connections

Coped workspace edge on return, desk return, or bridge workspace is standard with blade edge profile to provide a smooth transition between the adjoining workspaces. When a square edge profile is specified, the edge which would typically be coped features a 3 mm wood (on wood workspaces) or 1 mm plastic (on laminate workspaces) edge profile.

For bridge workspaces with a blade edge, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions.

Tip: This same rule applies to a bullet or P-top in a U-shape setting.

The nominal width of a bridge coped with blade edge workspace is approximately 4 1/4" less than a square edge.

Blade edge profile cannot be used in conjunction with either a height adjustable leg or a gate leg.

When mounting storage on workspaces with blade edge profile, subtract the 2 1/8" extension caused by the shape of the blade edge.

Supports for these workspaces must be ordered separately and vary with selected workspace. To support the workspace, you can use:

- End panel (10 3/8"H, 15 1/2"H, 21 1/2"H, and 27 1/2"H), page 88
 - Center support panel (for unsupported span greater than 60"W), page 96
 - Adjustable-height legs, page 98
 - Columns, disk columns, gate leg, rectangular column leg, freestanding table base, page 98
 - Pedestals, page 144
 - Supports for use with 6" module panels. Please refer to the selected panel systems specification guide
 - Currency square leg (grommets cannot be used above this leg), see *Currency Specification Guide*
- Tip: When used in a single pedestal desk configuration, specify pedestal and end panel 6" less than the depth of the desk workspace. This will create an overhang condition.*

Tip: For panel environments, follow workspace support rules for either line-specific or Universal Workspaces. If universal cantilevers are used, the tabs need to be pushed down. This is not required for line-specific (i.e. Montage) cantilevers.

Full-height plinth base modesty panel, ordered separately, is stationary and is not required for support. The positioning opportunities vary depending on the application.

► Page 70

10 3/8"H T-shape end panel and 10 3/8"H L-shape end panels can support a workspace on a plinth base one-high lateral file or bookcase.

► Page 92

4 5/8"H T-shape end panel can support a workspace on a plinth base 1.5 high storage or a leg base 21 1/2"H storage unit.

► Page 92

Perpendicular tether supports support a desk workspace on a plinth base 1.5 high storage or a leg base 21 1/2"H storage unit.

Tip: Perpendicular tether supports are inset 2" from the back and side of the workspace.

Straight, Desk, Return, Desk Return, and Bridge Worksurfaces, For Use with Plinth Base and Leg Base, continued

Panel-supported applications can be achieved by attaching worksurfaces to Montage, Answer, and Privacy Wall.

► Refer to appropriate panel specification guide.

Center support panel or worksurface brace must be used when a worksurface has an unsupported span that is greater than 60"W in a plinth base setting.

Tip: The center support panel brace cannot be used in leg base settings. In leg base settings, a worksurface brace must be used when a worksurface has an unsupported span that is greater than 54"W.

Attachment hardware is included with return, desk return, and bridge worksurfaces.

Wiring & Cabling

Round or square grommets are available factory installed to allow power cords and cables to pass through the worksurface. Grommet location options vary depending on the type of worksurface and type of support used.

► Page 58

2½" round grommet is available.

► Page 256

Scallop is available centered on the back edge of a worksurface to route cords and cables. It may be used in conjunction with a round or square grommet.

Tip: Worksurface scallops and modesty panel pass-throughs must be in the same location to allow a cord plug to pass through.

► Page 59

Cable tray is available to field install under a worksurface to keep cords and cables out of the way.

- 8044 Black Anodized Aluminum door and frame

Edge profile samples

can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

Common Top

For Use with Elective Elements

Common tops are used as a singular storage unit top or as a top that spans over multiple storage units to create a seamless look. It is available parametrically and can flex by 1/16" increments to allow flexibility in planning.

- Specifying, page 292
- Please see *SmartTools* for complete specification and pricing.

Available in laminate or veneer.

Storage units must be ordered separately.
► See *Elective Elements Storage* page 375

Actual Dimensions

Common Top

Depth	15"–60"
Width	15"–120"
Thickness	1 1/2"

Product Details

Common tops allow for each edge profile to be specified - profile A, profile B, profile C, and profile D. Choose from 3 mm wood square edge or .5 mm veneer edge on wood veneer worksurfaces. Laminate worksurfaces can have a 3 mm plastic square edge, 1 mm plastic edge, or a 3 mm wood square edge.

If a 3 mm wood square edge is specified on a laminate common top, all remaining sides will be a 1 mm plastic square edge.
► See *edge profile application guidelines* page 51

.5 mm or 1 mm square edge

3 mm square edge

Common top edges that are a 1 mm plastic or .5 mm wood veneer square edge will align with the face of the storage unit. A 3 mm plastic or wood veneer square edge band will overhang the face of the storage unit by 3 mm. To ensure a tight fit and connection with the wall or adjacent storage, a 1 mm plastic or .5 mm wood square edge band is recommended for back, left, and right sides.

Storage units must be placed under the common top with no open spaces. Use the common top as a singular storage unit top or for a top that spans across multiple units. Elective Elements storage units pair with the common top but must be ordered separately. ▶ See *Elective Elements Storage* page 375

Grain direction is optional in short and long grain direction on wood veneer and laminate. Short grain direction on laminate is only available on widths of 60"W or less.

Common tops should only be specified through SmartTools to ensure correct fit and function of the product. SmartTools will easily calculate the correct size of the common top based on the Elective Elements storage used beneath it.

Tip: There may be up to a 1/16" gap between the storage units used with the common top.

Connections

Attachment hardware is included with the storage unit and not the common top.

Surface Materials

Common Top

- Wood veneer with wood edge
- Laminate with plastic edge
- Laminate with wood edge

Single Tapered, Tapered, Bullet, P-Top, Meeting, and Extended Bullet Worksurfaces

For Use with Plinth Base and Leg Base

Single tapered, tapered, bullet, P-top, meeting, and extended bullet worksurfaces provide an extended range of workstation layouts and offer special support for meetings.

► Specifying, pages 296–306

Worksurface has a wood core with a wood veneer or laminate surface.

Wood worksurface is available with two different wood edge profiles—square and blade edge. Exposed edge of a laminate worksurface is available with a plastic square edge, wood square edge, or laminate blade edge profile.

► Page 52

Supports must be ordered separately.

Actual Dimensions

Single Tapered Worksurfaces

Depth	24"-30"
Width	72"
Thickness	1 1/2"

Single Tapered Run-Off Worksurfaces

Depth	24"-30"
Width	36" or 60"
Thickness	1 1/2"

Double Tapered Run-Off Worksurfaces

Depth	30"-36" or 36"-42"
Width	48", 60", or 72"
Thickness	1 1/2"

Bullet Run-Off Worksurfaces

Depth	30"
Width	42", 48", 54", 60", 66", or 72"
Thickness	1 1/2"

Bullet Freestanding Worksurfaces

Depth	30" or 36"
Width	60", 66", 72", 78", 84", or 90"
Thickness	1 1/2"

P-Top Run-Off Worksurfaces

Depth	30"
Width	66" or 72"
Thickness	1 1/2"

P-Top Freestanding Worksurfaces

Depth	30" or 36"
Width	66" or 72"
Thickness	1 1/2"

Meeting Worksurfaces

Depth	36"
Width	60" or 78"
Thickness	1 1/2"
Depth of adjacent worksurface	60"W-18"D, 78"W-24"D

Extended Bullet Worksurfaces

Depth	42"
Width	72"
Thickness	1 1/2"

Single Tapered, Tapered, Bullet, P-Top, Meeting, and Extended Bullet Worksurfaces, For Use with Plinth Base and Leg Base, continued

Product Details

Short grain wood veneer is available on worksurfaces to ensure that the wood grain in an installation all runs in the same direction.

Exception: Short grain option is not available on any laminate worksurfaces.

► Page 56

Connections

Worksurface can attach anywhere along the front of the adjacent 24"D or 30"D worksurface. Attachment hardware is included. When run-off worksurfaces are attached to a straight worksurface in a T-configuration, the straight worksurface must be supported by storage or end panels that are the same depth as the worksurface. *Exception: 78"W, 84"W, and 90"W bullet worksurfaces cannot be used in run-off applications.*

Coped worksurface edge is standard with blade edge profile in a run-off application to provide a smooth transition between the adjoining worksurfaces. When a square edge profile is specified, the edge which would typically be coped features a 3 mm wood (on wood worksurfaces) or 1 mm plastic (on laminate worksurfaces) edge profile.

Supports for the run-off end of these worksurfaces must be ordered separately and vary with selected worksurface. To support the worksurface, you can use:

- End panel (10 $\frac{3}{8}$ "H and 27 $\frac{1}{2}$ "H), page 88
- Free support end panel, page 92
- Extended T-shape end panel, page 92
- Rectangular column leg, column, disk column, gate leg, adjustable-height legs, and freestanding table base, page 98
- Plinth base or leg base storage, page 144 or 156
- Supports for use with 6" module panels. Please refer to the selected panel systems specification guide

► Currency square leg (grommets cannot be used above this leg), see *Currency Specification Guide*
Tip: Recommended column and leg supports vary based on worksurface length and support conditions on the other end. Refer to Worksurface Support Guidelines, page 101.

Tip: For panel environments, follow worksurface support rules for either line-specific or Universal Worksurfaces. If universal cantilevers are used, the tabs need to be pushed down. This is not required for line-specific (i.e. Montage) cantilevers.

Gate leg or height adjustable leg cannot be used with a blade edge profile.

Tip: The column leg rules apply to the gate leg support. T or L configurations are recommended.

Gate leg must have at least 30" wide plinth base storage under the opposite end of the worksurface being supported.

Gate leg must have at least two leg base components equaling at least 45" wide when used to support a worksurface.

Tip: Gate leg cannot be used to support above worksurface storage.

Modesty panel and free support end panel with modesty panel are ordered separately.

► Pages 70 and 92

Tip: Meeting and extended bullet worksurface use a floating modesty panel. Specify a 12"H or $\frac{2}{3}$ -height modesty panel and support brackets separately.

► Pages 304 and 306

Tip: Meeting and extended bullet worksurfaces are never freestanding in either a plinth or leg base setting.

A free support end panel cannot be used to support above worksurface storage.

Tip: If the free support end panel is used with above worksurface storage (overheads or service modules), then the free support end panel must be attached to either a tower or a building wall for stability.

10 $\frac{3}{8}$ "H T-shape end panel can support a worksurface on a plinth base one-high lateral file or bookcase.
► Page 92

4 $\frac{1}{2}$ "H T-shape end panel can support a worksurface on plinth base 1.5 high storage or leg base 21 $\frac{1}{2}$ "H storage units.
► Page 92

Perpendicular tether supports can support a desk worksurface on a plinth base 1.5 high storage or leg base 21 $\frac{1}{2}$ "H storage units.
Tip: Perpendicular tether supports are inset 2" from the back and side of the worksurface.

Panel-supported applications can be achieved by attaching worksurfaces to Montage, Answer, and Privacy Wall.
► Refer to appropriate panel specification guide.

The 36"W end of the meeting worksurface can be supported by a 29 $\frac{1}{4}$ "D plinth base L-shaped end panel or by a 36"D plinth base or leg base free support end panel.

Meeting worksurfaces can be supported in one of the following ways on the outer edge: a pedestal with or without a slip fit bracket, a rectangular column leg with or without base, adjustable height legs, disk column or column leg, gate leg, free support end panel, L-shape end panel, or J-shape end panel.

The 42"W end of the extended bullet worksurface can be supported by a 23 $\frac{1}{4}$ "D or 29 $\frac{1}{4}$ "D plinth or leg base L-shaped end panel, or by a 36"D plinth base or leg base free support end panel.

Wiring & Cabling

Round or square grommets are available factory installed to allow power cords and cables to pass through the worksurface. Grommet location options vary depending on the type of worksurface and type of support used.

2½" round grommet is available.
► Page 256

Scallop is available centered on the back edge of a single tapered worksurface to route cords and cables. It may be used in conjunction with a round or square grommet.
► Page 59

Cable tray is available to field install under a worksurface to keep cords and cables out of the way.

Surface Materials

Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickel

Square grommet

- 8043 Clear Anodized Aluminum door and frame
- 8044 Black Anodized Aluminum door and frame

Edge profile samples

can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

Corner and Extended Corner Worksurfaces

For Use with Plinth Base and Leg Base

Corner and extended corner worksurfaces

create an angled transition between two right-angle worksurfaces of the same depth.

They fit into the 90° angle formed by panels or structural walls, or they can be used in a freestanding open plan or private office setting.

Tip: Straight and curved-front worksurfaces have 45° grain.

► Specifying, pages 308–310

Wood worksurface is available with two different wood edge profiles—square and blade. Front edge of a laminate worksurface is available with a plastic square edge, wood square edge, or laminate blade edge profile.

► Page 52

Worksurface has a wood core with a wood veneer or laminate surface.

Back and side edges

are wood veneer on wood worksurfaces and plastic on laminate worksurfaces.

Supports must be ordered separately.

Straight-Front Corner Worksurface

Curved-Front Corner Worksurface

Extended Corner Worksurface

Product Details

Short grain wood veneer is available on extended corner worksurfaces only to ensure that the wood grain in an installation all runs in the same direction.

► Page 56

Connections

Supports for corner and extended corner worksurfaces must be ordered separately. To support the worksurface, you can use:

► Gate leg, page 98
► Corner support kit, page 94

► Rear L-shape corner support, page 82

► L-shape end panel, page 88

► Plinth base or leg base storage can be used to support the long end of an extended corner worksurface, pages 144 and 156

► Supports for use with 6" module panels, please refer to the selected panel systems specification guide

Tip: For panel environments, follow worksurface support rules for either line-specific or Universal Worksurfaces. If universal cantilevers are used, the tabs need to be pushed down. This is not required for line-specific (i.e., Montage) cantilevers.

Actual Dimensions

Thickness 1½"

Tip: User's edge dimension is smaller when blade edge is specified.

Modesty panel, ordered separately, is full height (for plinth base settings only) in wood only and flush mounted. It is stationary and is not required for support. It attaches to the end panel supports and rear corner support.

► Page 70

Tip: Full height modesty panels are not available in glass.

As an alternative, the following can be ordered:

- Modesty panels, available in wood, laminate, or glass (that are 12" shorter than the length of the worksurface), page 70
- Straight end panels, page 88
- Rear corner support, page 94

Wiring & Cabling

Round or square grommets are available factory installed to allow power cords and cables to pass through the worksurface.

► Page 58

2½" round grommet is available.

► Page 256

Scallop is available centered on both back edges of corner and extended corner worksurfaces to route cords and cables. It may be used in conjunction with a round or square grommet.

Tip: Worksurface scallops and modesty panel pass-throughs do not line up when used on corner and extended corner worksurfaces.

► Page 59

Cable tray is available to field install under a worksurface to keep cords and cables out of the way.

Surface Materials

Worksurface

- Wood veneer with wood edge profile
- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

Transaction Worksurfaces

For Use with Plinth Base and Leg Base

Transaction worksur-
faces provide a surface
that can be used by standing
visitors or serve as a shelf.
► Specifying, page 312

Worksurface has a wood
core with a wood veneer or
laminate surface.

**Side edges that abut
adjacent worksurfaces**
are wood veneer or plastic.

**Front and back edges
on a wood worksurface**
are available with two dif-
ferent wood edge profiles—
square and blade. Front and
back edges of a laminate
worksurface are available
with a plastic square edge,
wood square edge, or lami-
nate blade edge profile.
► Page 51

Actual Dimensions	
Depth	15 ³ / ₄ "
Width	30", 36", 42", 48", 54", or 60"
Thickness	1 ¹ / ₂ "

Connections

For Montage

Transaction worksurfaces attach to cantilevers that are inserted in the slotted channels of Montage panels and replace the panel's top cap. Attachment hardware is included.

Transaction worksurface can be centered over the Montage panel.

Recommended height (approximately 40"H) is achieved by attaching the transaction worksurface to 38"H (standard special) Montage panels. All panel heights can accept transaction worksurfaces.

Taller panels cannot be used adjacent to transaction worksurfaces. Adjacent panels must be the same height.

Multiple Montage panels can be spanned with transaction worksurfaces.
► See *Montage Specification Guide* for more details.

For Answer

Transaction worksurfaces support brackets connect to the top of a horizontal connecting bar. Horizontal bar must be connected to junctions in the top position. Attachment hardware is included.

Transaction worksurfaces cannot be used when a transparent window, pass-thru window, or consolidation point cabinet is assembled at the top of a panel.

Spanning two panels is possible.

Exception: 54"W transaction worksurface cannot span multiple panels.

Actual width of Answer transaction worksurface is 6" shorter than the nominal planning dimension to accommodate change-of-height panel applications. Shortened top caps are included with the transaction worksurface. Oval and square tops are available. Transaction worksurface must be centered on the panel.
► See *Answer Solutions Specification Guide* for more details.

Wiring & Cabling

Cables can still be routed in the space at the top of a Montage panel when a transaction worksurface is attached in place of a panel top cap.

- Laminate with plastic edge
- Laminate with wood edge profile
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Edge profile samples

can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

Personal Table Tops

For Use with Plinth Base and Leg Base

Personal table tops are available in two shapes—square and round. They provide an auxiliary work surface and offer a conferencing area.
 ▶ Specifying, page 314

Worksurface has a wood core with a wood veneer or laminate surface.

Wood worksurface is available with two different wood edge profiles—square and blade. Edge of a laminate worksurface is available with a plastic square edge, wood square edge, and laminate blade edge profile.
 ▶ Page 51

Supports must be ordered separately.

Connections

Supports for personal table tops must be ordered separately. To support the work surface, you can use:

- ▶ Adjustable-height legs, page 98
- ▶ Freestanding table base, page 98
- ▶ Convene disk base, see *Conference and Collaborative Tables Specification Guide*
- ▶ Groupwork table base, see *Conference and Collaborative Tables Specification Guide*

Tip: Refer to application guidelines in the specification guide from which you are selecting.

Tip: The disk column will not support a freestanding table.

Round

Diameter	30" or 36"
Thickness	1½"

Edge Profile Application Guidelines

Edge Profile
Application Guidelines

3 mm Wood Square Edge

2 1/8" Wood Blade Edge

Wood worksurface is available with two different wood profiles—a 3 mm square edge or 2 1/8" blade edge with 1.5 mm edge band.

Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.

3 mm Plastic Square Edge

3 mm Wood Square Edge

2 1/8" Laminate Blade Edge

Laminate worksurface is available with three profiles—a 3 mm plastic square edge, 3 mm wood square edge, or 2 1/8" blade edge with 1 mm edge.

3 mm wood edges and 3 mm plastic have a slight ergonomically rounded profile for user comfort.

Wood edge profile (square) on laminate worksurface or (square or blade) on wood worksurface is achieved by adding a specially shaped solid wood edge to the worksurface core. The 0.5 mm edge is wood banded. The 3 mm square and blade edges are made of wood solids. Wood solids run the length of straight edges. The 3 mm and 1.5 mm edge can wrap around curved edges.

Plastic square edge profile on a laminate worksurface is achieved by adding plastic surfaces to the worksurface core. This technique can be applied to worksurfaces that are straight or curved.

Grain direction of solid wood edge profile is always parallel to the edge, regardless of grain direction of wood worksurface.

Coped worksurface edge is standard with blade edge profile in a return, desk return, bridge, or run-off application to provide a smooth transition between the adjoining worksurfaces. When a 3 mm square edge profile is specified, the edge which typically would be coped features a 3 mm profile. Coped worksurfaces can be used in freestanding and system applications.

Tip: A worksurface with a blade edge is not recommended next to a tower, the edge extends 2 1/8" beyond. A square edge profile offers a more consistent appearance.

Square

Blade

Worksurface edge aligns with drawer face if square edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the pedestal drawer front.

Tip: Beam pulls are not recommended with blade edge because they are difficult to access under the blade edge.

Blade edge adds 2 1/8" to the size of the worksurface wherever the profile is added. *Example: Straight worksurface would have 2 1/8" added to the depth measurement. However, a desk worksurface would add 4 1/4" to the depth because the blade edge profile is located on the front and back of the worksurface.* *Tip: Do not pair blade edge worksurface with beam pull; access is compromised.*

Blade edge profile cannot be used with either a height adjustable leg or a gate leg.

Surface Materials

On wood worksurface, specify the wood color. The wood worksurface and wood edge will be the same color. Worksurface and edge cannot have different stain colors.

On a laminate worksurface with plastic edge, specify the 3 mm plastic edge color. The 1 mm plastic edge defaults to match the specified 3 mm finish.

On a laminate worksurface with wood edge, specify the wood edge color. The 1 mm plastic edge is a color default to match the laminate.

Edge profile samples can be ordered to meet your specifications. These 18"D x 20"W worksurfaces can be ordered with any Elective Elements edge profile and worksurface option.

Personal table tops  	• 3 mm wood square profile on all sides • No coping	• 1.5 mm wood blade profile on all sides • No coping	• 3 mm plastic on all sides • No coping	• 3 mm wood square profile on all sides • No coping	• 2 1/8" laminate blade edge with 1 mm plastic on all sides • No coping

Worksurface Wood Veneer Grain Directions

Wood is a natural, unique, and always changing material. No two pieces are the same. The appearance of each surface will vary based on a piece's individual grain pattern, underlying color, and characteristics (like gum pockets and pin knots). While the finishing process is identical for all pieces, each finished piece celebrates wood's individual beauty. Because wood contains standing fibers, similar to suede, the orientation of the grain pattern to a light source will cause it to reflect light differently and look a slightly different color. Two surfaces with grain directions that are at different angles to each other will look different. This natural phenomenon is called flash or polarization. This can happen within a piece as alternating veneer leaves are placed side by side or from piece to piece. Polarization is often noticed on worksurfaces installed at a 90° angle with each other.

Wood veneer short grain direction is available on many worksurfaces so that the wood grain in an installation all runs in the same direction.

Make a sketch of the grain direction for adjacent worksurfaces to ensure they are suitable for your installation.

Please refer to the illustrations at right for an understanding of grain direction on your installation.

Worksurface Wiring and Cabling

Round Grommet

Actual Dimensions

Diameter 2½"

Product Details

Round grommets provide a way for cords and cables to pass through the worksurface.

Tip: For installation purposes, the actual hole size for the round grommet is 2¼" in diameter.

Accommodates a three-prong plug through the opening.

Cords and cables can be routed behind pedestals and into the distribution channel on plinth base 1.5 high. There is a ¾" clearance behind 17¼"D, 23¼"D, and 29¼"D* pedestals, and 17¼"D lateral files. There is a 6" clearance behind 23¼"D lateral files and a 12" clearance behind 29¼"D lateral files. For leg base storage, there is a cutout in the bottom panel to allow cord passage.

**29¼"D pedestals are not available in a leg base application.*

Connections

Location of grommet varies depending on the worksurface shape and type of support used.
▶ See *Grommet and Scallop Locations*, page 60

Inset grommet location

is available for desk worksurfaces with an overhang. It is located approximately 8½" from the back edge of the worksurface.

Tip: Grommets located on the back edge should not be used on worksurfaces with an overhang.

Hutch kits and service modules that extend to the middle of a worksurface may interfere with the center grommet.

Scallops may be used in conjunction with grommets.

Tip: Round grommets cannot be used adjacent to a gate leg due to bracket interference.

Hutch kits and service modules, when used on bridge worksurfaces, must sit squarely on the worksurface not including the blade edge. Blade edge profiles extend 2⅛" and cannot support the weight.

Surface Materials

Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 9201 Polished Chrome
- 9211 Nickel

Square Grommet

Actual Dimensions

Depth 4½"

Width 6⅜"

Size of pass through hole 3¾"

Product Details

Square grommets are equipped with a door that swings up to provide a way for cords and cables to pass through the worksurface.

**29¼"D pedestals are not available in a leg base application.*

Power unit with cord pass-through can be installed below the square grommet for effortless access.

Tip: Depending on layout, power unit may be visible on freestanding furniture if it is not equipped with a modesty panel.

Tip: Power units cannot be used over 15"W or 18"W pedestals but can be used over 30"W or 36"W lateral files that are 30"D.

Tip: Square grommets cannot be placed over a lateral file or pedestal that are the same depth as the worksurface, due to interference.

Tip: A square grommet with power unit cannot be placed over any worksurface with credenza storage.

Tip: Unlike a round grommet which can be easily cut in the field, a technology zone or square grommet requires very precise measurements as the lip protrudes only ⅛\"/>

Cords and cables can be routed behind plinth base and leg base storage and into the distribution channel on plinth base 1.5 high. There is a ¾" clearance behind 17¼"D, 23¼"D, and 29¼"D* pedestals, and 17¼"D lateral files. There is a 6" clearance behind 23¼"D lateral files and a 12" clearance behind 29¼"D lateral files. For leg base storage, there is a cutout in the bottom panel to allow cord passage.

Tip: A square grommet cannot be used with a technology zone on a plinth base one-high pedestal, or a leg base 21½"H pedestal due to interference.

Connections

Location of grommet varies depending on the worksurface shape and type of support used.
▶ See *Grommet and Scallop Locations*, page 60

Inset grommet location

is available for desk worksurfaces with an overhang. It is located approximately 8½" from the back edge of the worksurface.

Tip: Grommets located on the back edge should not be used on worksurfaces with an overhang.

Square grommets can be rotated 180° in the field.

Hutch kits and service modules that extend to the middle of a worksurface may interfere with the center grommet.

Scallops may be used in conjunction with grommets.
Tip: Square grommets cannot be used adjacent to a gate leg due to bracket interference.

Surface Materials

Square grommet door

- 8043 Clear Anodized Aluminum door and frame
- 8044 Black Anodized Aluminum door and frame

Scallop

Actual Dimensions

Depth	1 3/8"
Width	6 1/8"
Height	1 1/2"

Product Details

Scallops provide an orderly way for cords and cables to pass over the back edge of the worksurface.

Connections

Scallop availability varies depending on the worksurface shape. When available, scallop is centered on the back edge of the worksurface.

► See *Grommet and Scallop Locations*, page 60

Hutch kits and service modules that extend to the middle of a worksurface may interfere with cords or cables routed through the scallop.

Wall-mounted tackboard will cover the worksurface scallop. Cords or cables should be routed before the tackboard or wood panel with slatwall is installed.

Modesty panel pass-through must be in the same location as the worksurface scallop to allow a cord plug to route through.

Grommets may be used in conjunction with scallops.

Surface Materials

Scallop on worksurface

- Wood banded, if wood worksurface is selected
- Plastic, if laminate worksurface is selected

Grommet and Scallop Locations

Corner grommets (both always $3\frac{5}{16}$ " from the edge of the worksurface. In a desk application, they can be either $3\frac{5}{16}$ " or $8\frac{1}{2}$ " from the visitor's side.

Tip: If blade edge profile is specified, grommets are located $5\frac{7}{16}$ " or $10\frac{5}{8}$ " from the visitor's side of a desk.

Tip: Grommets on desks with inset modesty panels should only be ordered in right or left position.

Center grommets (both round and square) are always $3\frac{5}{16}$ " from the visitor's side.

Exception: Center grommets on overhanging desk worksurfaces can also be positioned to accommodate a 6" recessed modesty panel.

Tip: If blade edge profile is specified, grommets are located $5\frac{7}{16}$ " or $10\frac{5}{8}$ " from the visitor's side.

Tip: Grommets on desks with inset modesty panels should only be ordered in right or left position because the modesty interferes with the center placement.

Tip: Worksurfaces 54"W and less can only have a grommet in the center location.

Square grommet door flips to the left on left and center grommet locations and it flips to the right on the right grommet location. The square grommet can be rotated 180° in the field.

Tip: For installation purposes, the actual hole size for the round grommet is 2 1/4" in diameter.

Tip: When using a pedestal under one side of the worksurface, select the opposite side for the grommet to ensure easy access.

Back Panels

For Use with Plinth Base Pedestals

Back Panels

Back panel finishes the back of a storage unit if it is in an exposed application.
 ▶ Specifying, page 322

Product Details

Exposed side and edges of the back panel are finished.

Connections

Back panel attaches to the unfinished back of a pedestal, high pedestal, or one-high lateral file or bookcase. It should be used in situations when the back of the storage unit is exposed either because there is no modesty panel or because a modesty panel is used in an inset or floating application on a freestanding desk. If the back of the pedestal is not exposed, a back panel is not required. The back may be left unfinished or a filler panel may be used.

Full-height modesty panel should be used to finish the back of 27½"H exposed 30"W or 36"W pedestal.
 ▶ Page 70

Attachment hardware is included.

Surface Materials

Back panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Actual Dimensions

Plinth Base Pedestal Back Panels

Depth	¾"
Width	15" or 18"
Height	27½"

Plinth Base High Pedestal Back Panels

Depth	¾"
Width	15"
Height	35⅞"

Plinth Base One-High Lateral File and Bookcase Back Panels

Depth	¾"
Width	30" or 36"
Height	15½"

Plinth Base 1.5 High Pedestal Back Panels

Depth	¾"
Width	15" or 18"
Height	21½"

Refer to modesty panels if a 30"W or 36"W pedestal requires a finished back, page 70.

Modesty Panels

For Use with Plinth Base and Leg Base

Modesty panel is fixed and available in four heights. All four heights available in wood or laminate, two heights available in glass.

► Specifying, page 340

2/3-height modesty panel can be used with a run-off worksurface. It extends under both the run-off and adjacent worksurface. Available in wood, laminate, or glass.

*Tip: The following bases are designed to pair with the 2/3-height modesty panel for run-off or adjacent worksurfaces, **AWQP4** and **AWQD422**.*

2/3-height modesty panel is used with an overhanging desk worksurface. It does not connect to an end panel. Available in wood, laminate, or glass.

Tip: If a 2/3-height modesty panel is used with a pedestal, a back panel must be specified for the storage component.

Full-height modesty panel can be used with a flush or desk overhanging desk worksurface. It is used with an end panel or pedestal.

Tip: Desks with full-depth pedestals need a full-height modesty panel.

Tip: Full-height modesty panel is available in wood or laminate and is for use with plinth base storage.

12"H modesty panel is used when the primary worksurface is supported by 1.5 high storage. It can also be used on desk, meeting, and extended bullet worksurfaces by selecting the hanging brackets. This application will always need the hanging bracket option. Available in either wood, laminate, or glass.

Actual Dimensions**Desks, Meeting, and Extended Bullet Worksurfaces—For Plinth Base Applications Only**

Depth	1⅞"
Width	42", 45", 48", 54", 60", 66", 72", or 75"
Height	18"

Glass Modesty Panels*—For Plinth and Leg Base Applications

Width	42", 48", 54", 60", 66", or 72"
Height	12" or 18 ¹³ / ₁₆ "

*Use the 48"W modesty panel with a 42"W bridge and the 54"W modesty panel with a 48"W bridge.

Tip: Glass modesty panels are only available up to 72"W.

Modesty Panels, For Use with Plinth Base and Leg Base, continued

Product Details

All edges and both sides of a modesty panel are finished.

Tip: When woodgrain laminates are specified, the grain direction runs vertically for modesty panels up to 60"W, and horizontally for modesty panels from 66"W to 120"W. Wood modesty panels support both vertical and horizontal grain direction for all size modesty panels.

Full-height modesty panel sits proud of the storage unit back or support back. Available in wood and laminate only.

2/3-height modesty panel sits proud of the underwork-surface storage back panels. Pedestal back panels must be ordered separately for plinth base. For leg base storage, pedestals ship with back panel. Finished back panel option must be selected. Available in either wood and laminate or glass.

Tip: In this application, a desk worksurface must be used to allow for proper attachment.

Tip: Glass modesty panels are available up to 72"W.

Tip: A cable shroud cannot be used with a glass modesty panel and a technology zone due to bracket interference. A cable shroud and technology zone or a glass modesty panel and technology zone are allowed.

Tip: The glass modesty is available in end panel application.

2/3-height modesty panels are used with extended bullet and meeting worksurfaces. Specify optional hanging brackets to suspend the modesty panels. Available in wood, laminate, or glass. *Refer to Modesty Panel Selection Guide, page 106.*

21 1/2"H wood modesty panels are designed to be used with plinth base 1.5 high storage units and 21 1/2"H end panels. Multiple storage units can be covered by a single modesty panel.

12"H modesty panels are used on desks supported by 21 1/2"H storage units. 12"H modesty panels can also be suspended on any worksurface using optional hanging brackets. Available in wood, laminate, or glass. *Refer to Modesty Panel Selection Guide, page 106.*

12"H or 18"H glass modesty panels follow these rules:

- Style numbers ending in "E" are best used when a worksurface has one of the following column supports: rectangular column leg with or without base, column, or disk column.
- Can attach inset or flush with visitor edge anywhere under a worksurface as long as there is no interference with power, storage, or supports.
- Should attach flush to both sides of the following worksurfaces: desk, desk return, bullet, or P-top.

Connections

Quick-lock assembly hardware is used to assemble the components in the field. The hardware features pins in the back of the supports and underside of the worksurface that are captured by rotating connector locks in the modesty panel.

Exception: If adjustable-height legs are used, the modesty panel connects to the legs so that the modesty panel remains stationary when the worksurface is adjusted.

Flush modesty panel width equals the worksurface width in a desk, return, or credenza application for plinth base applications. Available in wood and laminate only. *Tip: No back panel is used on pedestals with a full modesty panel.*

Inset modesty panel width, in a desk application, does not equal the desk worksurface width. To select the correct modesty panel width, deduct the width of the pedestals from the desk worksurface width. Example: 66"W (worksurface) – 30" (two pedestals) = 36"W (modesty panel) *Tip: Inset modesty panels are used with J-shape end panels to make single-pedestal desks.*

Tip: Inset modesty panels should not be used with adjustable-height storage.

Tip: An inset modesty panel on a 24"D or narrower desk application will cause limited knee space.

Tip: When the J-shape end panel is used without a modesty panel, there will be exposed holes.

2/3-height floating modesty panel width, in a desk application, does not equal the desk worksurface width. To select the correct modesty panel width, deduct 6" from the worksurface width if the desk has a pedestal. If the desk has two pedestals, then deduct 12". Available in wood, laminate, or glass. Example: 66"W (worksurface) – 6" (one pedestal and legs) = 60"W (modesty panel) Example: 66"W (worksurface) – 12" (two pedestals) = 54"W (modesty panel) *Tip: Only floating modesty panels can be used with an overhanging desk worksurface when plinth base or leg based pedestals are used.*

Back panel can be ordered to cover the unfinished back of an exposed pedestal when there is no modesty panel. If an inset or floating modesty panel is specified, a back panel must be ordered for the pedestal for plinth base. For leg base storage, pedestals ship with back panel. Finished back panel option must be selected. Available in wood and laminate only. *Page 69*

Modesty panel on a plinth base return is full height and is equal to the worksurface width. It is attached to the adjacent desk end panel with an end panel to modesty panel attachment bracket. Available in wood and laminate only.

Plinth and leg base desk return with an overhanging worksurface and a modesty panel requires a 6" filler panel to fill the gap between the modesty panel and adjacent worksurface end panel in both plinth and leg base settings.

Modesty panel on a plinth base bridge is full-height and is 6" longer than the worksurface width. It is inset 1 1/2" because it attaches to the inside of the end panels on the adjacent worksurfaces. For leg base, a 2/3 height modesty is available for this application.

Modesty panel on run-off worksurfaces can be full or 2/3 height depending on the application. Available in wood, laminate, or glass.

Single-tapered run-off worksurfaces may use a full-height plinth base modesty panel. The modesty panel width is equal to the worksurface width. A 15"D end panel must be used to support the end of the modesty panel that attaches to the adjacent worksurface. An end panel, pedestal, or leg must support the other end of the modesty panel. Available in wood and laminate only.

Tip: Full-height modesty panels cannot be used with disk column or column support.

Tip: Also works in leg base applications.

Bullet, P-top, and double-tapered run-off worksurfaces use a 2/3-height modesty panel. The width of the modesty panel varies depending on the width of the run-off worksurface and the depth of the connecting worksurface. It attaches to the underside of both the run-off and adjacent worksurfaces. Available in wood, laminate, or glass.

Tip: Also works in leg base applications.

► Refer to *Modesty Panel Selection Guide* for run-off worksurfaces, page 106.

Modesty panel on plinth base corner and extended corner worksurfaces is full height and needs to be 12" shorter than the worksurface width because it connects to the corner support. To select the correct modesty panel width, deduct 12" from the worksurface width.

Example: 42"W (worksurface) – 12" (rear corner support) = 30"W (modesty panel).

Filler panel is optional and can be ordered to fill the 3/4" space on the back of an L-shape end panel or pedestal instead of a modesty panel. A 1 1/2"D filler panel can be ordered to fill the space that is created when worksurfaces with plinth base L-shape end panels or pedestals are used in a back-to-back application without modesty panels. Filler panels should not be used with desk worksurfaces.

► Page 86

Wiring & Cabling

Pass-through is available centered on the top edge of the full-height modesty panel. It aligns with the worksurface scallop to allow a three-prong plug to pass through.

Exception: Scallop on free-standing corner worksurface will not align with modesty panel pass-through.

► Page 59

Tip: Pass-through is unfinished.

Surface Materials

Modesty panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)
- Back painted glass on steel

Steel back on glass modesty panel

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Modesty hanging brackets

- 0835 Black
- 4799 Platinum Metallic

Attachment hardware

- Black paint only

Application Topics

If adjustable-height legs are used, the modesty panel does not connect to the underside of the worksurface. First, the modesty panel is flipped 180° so that a finished edge is exposed. Then, it connects to the adjustable-height legs so that the modesty panel remains stationary when the worksurface is adjusted. Attachment hardware is included with the modesty panel.

Tip: Available in plinth base only.

Universal Privacy/Modesty Screens

Universal privacy/modesty screen provides a boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration, Series worksurfaces, Elective Elements, Universal tables, and Universal panel-mount worksurfaces.

► Specifying, page 344

Universal privacy/modesty screens are available in one height, 25⁷/₁₀", with two mount location options to provide either privacy or privacy/modesty.

Universal privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Actual Dimensions

Width	42", 48", 54", 60", or 66"
Height	25 ⁷ / ₁₀ "
Weight	9.79 lb, 10.315 lb, 10.84 lb, 11.365 lb, 11.89 lb
Thickness	3/4"

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on 3/4"–1 1/2" thick worksurface.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Surface Materials

Screen

- Fabric
- See *Surface Materials*, page 566.

Edge (upper segment)

- 7360 Merle

Edge (lower segment)

- P630 Medium Heather Grey PET
- P631 Dark Heather Grey PET

Brackets

- 7360 Merle

Application Topics

Universal privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned 3 $\frac{3}{4}$ " inches in from each side of the screen.

Screen height attachment locations are determined when specifying privacy (top of screen will be at 48") or privacy/modesty (top of screen will be at 42"). The location cannot be changed in the field.

Privacy configuration provides 19 $\frac{1}{5}$ " of screen above the worksurface and 5 $\frac{1}{2}$ " of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 48"H Answer panel.

Screen can be mounted with a 1 $\frac{1}{8}$ " cord drop or flush with no cord drop.

Privacy/modesty configuration provides 13" of screen above the worksurface and 11 $\frac{7}{10}$ " of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 42"H Answer panel.

Both the privacy and privacy/modesty configurations allow the height-adjustable desks to be lowered to the lowest position (22") while preserving pinch point gap. Privacy version will not interfere with integrated storage.

Universal privacy/modesty screens can be used on Elective Elements worksurfaces and peninsulas where the straight surface dimensions are equal to or larger than screen width. Screen bracket positions are 3 $\frac{3}{4}$ " in from edge of screen and may not be located over surface supports, cut outs for technology trays, or leg bracket attachment locations.

Example 1: Privacy/modesty screens used on Elective Elements surfaces with gate leg or the adjustable-height leg must be 6" less in width to avoid interference between screen bracket and leg attachment plate.

Example 2: Privacy/modesty screens are for mounting on flat edge profiles known as straight worksurfaces. Desk surfaces where a blade profile may be used cannot accept a privacy/modesty screen.

Privacy/modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools Planning aid be used to ensure proper application of screen to worksurface or tables.

Maximum Rear Screen Sizes Based on Worksurface Edge Types on Migration Intro, Migration Pro, and Pro with Boost High-Speed

Screen Type	Square or Square with Knife Edge or 2" Radius	5" Radius	2" Radius with Knife Edge or 5" Radius with Knife Edge
Universal Privacy Screen (UFPS)	Max Screen Width = Width of Desk	Max Screen Width = Width of Desk Minus 3"	Max Screen Width = Width of Desk Minus 5"
Universal Privacy/Modesty Screen (UFPM)	Max Screen Width = Width of Desk	Max Screen Width = Width of Desk Minus 3"	Max Screen Width = Width of Desk Minus 5"
Sarto Privacy Screen (PSPS)	Max Screen Width = Width of Desk	Max Screen Width = Width of Desk Minus 3"	Max Screen Width = Width of Desk Minus 5"
Sarto Privacy/Modesty Screen (PSPM)	Max Screen Width = Width of Desk	Max Screen Width = Width of Desk Minus 2 1/2"	Max Screen Width = Width of Desk Minus 5"

Tip: Measurements provided do not include cutouts and overhang rules.

Tip: Rear screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Maximum Side Screen Sizes Based on Worksurface Edge Types on Migration Intro, Migration Pro, and Pro with Boost High-Speed

Screen Type	Square or 2" Radius without Knife Edge	Square or 2" Radius with Knife Edge	5" Radius without Knife Edge	5" Radius with Knife Edge
Universal Privacy Screen (UFPS)	Max Screen Width = Depth of Desk	N/A	Max Screen Width = Depth of Desk Minus 3"	N/A
Sarto Privacy Screen (PSPS) with Option SIDESCN Selected	Max Screen Width = Depth of Desk	Max Screen Width = Depth of Desk	Max Screen Width = Depth of Desk Minus 4"	Max Screen Width = Depth of Desk Minus 4"
Sarto Privacy/Modesty Screen (PSPM) with Option SIDESCN Selected	Max Screen Width = Depth of Desk	Max Screen Width = Depth of Desk	N/A	N/A

Tip: Measurements provided do not include cutouts and overhang rules.

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Universal Privacy Screens

Universal privacy screens provide a boundary and privacy element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration, Elective Elements, panel supported Universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 346

Actual Dimensions

Height	12½" or 18½"
Overall Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Product Details

Universal privacy screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on ¾"–1½" thick worksurface.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Brackets are included with screens. Two brackets are used on all screens.

Universal privacy screen slides onto brackets.

Sarto Privacy/Modesty Screen (PSPM) with Option SIDESCEN Selected	Max Screen Width = Depth of Desk	Max Screen Width = Depth of Desk	N/A	N/A

Tip: Measurements provided do not include cutouts and overhang rules.

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Sarto Privacy/Modesty Screens

Sarto privacy/modesty screen provides a light scale boundary element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, universal tables, and universal panel-mount worksurfaces.

► Specifying, page 348

Sarto privacy/modesty screens are available in overall heights from 24" to 30", with a privacy height option to provide varying levels of privacy and modesty.

Sarto privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Actual Dimensions

Width	23"-70"
Height	24"-30"
Thickness	9/16"

Product Details

The screen may be used on 3/4"–1 1/2" thick worksurfaces.

Screens are available in modular or parametric sizes.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Weight of screens

are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 0.2 lb per bracket.

Application Topics

Sarto privacy/modesty screen mounts to work-surfaces using simple L-brackets and screws. The brackets are positioned 3 3/4" in from each side of the screen. Two L-brackets are included with screens narrower than 60"W. Three or four L-brackets are included on screens 60"W and wider.

Worksurface type is available for screens 60" wide or wider, and allows the Sarto privacy/modesty screen to mount to a scalloped worksurface (for example Bivi Height-Adjustable Desk).

Screen can be mounted to the back edge of the worksurface with a 1 1/8" cord drop or flush with no cord drop.

Screens 36"W and narrower can be mounted as side screens, and are always mounted flush to the edge of the worksurface. This application grows the footprint of the workstation by 9/16" per screen.

Screens are specified with a privacy height above the worksurface. A 1" thick worksurface is assumed. This privacy height sets the position of the brackets and cannot be changed in the field.

Screens are specified by first selecting an overall screen height (24"–30"), then specifying a privacy height. Privacy height is measured from the top of the screen to the top of the worksurface. Allowable privacy height selection changes based on the specified overall height.

All privacy heights allow a height adjustable desk to be lowered to the lowest position (22") while preserving pinch point gap.

To match screens

ordered on or before June 20, 2021, please consult the following information to determine proper privacy height.

- 24"H Screen, Privacy/Modesty Configuration – Privacy Height = 13 1/2"
- 24"H Screen, Privacy Configuration – Privacy Height = 16 1/2"
- 30"H Screen, Privacy Configuration – Privacy Height = 22 1/2"

Sarto privacy/modesty screens can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

- Example 1—Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2—Tables with cabby leg or double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Sarto privacy/modesty screens cannot be used with Ology or Migration Pro and Intro modesty panels.

Privacy/modesty screens can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy/modesty screens must never be wider than the surface to which they are attached.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Sarto privacy/modesty screens can be installed with the Migration metal cable tray. When specifying a Sarto screen equal to or greater than 60"W to use with the cable tray, select the "with tray application" option. The metal tray is an option with the desk or can be ordered separately.
Tip: Screen width must be 10 1/2" wider than the metal cable tray.

Sarto Privacy Screens

Sarto privacy screens provide a light scale boundary and privacy element for height-adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 350

Actual Dimensions

Screen Height	12½"–34½"
Overall Height	13½"–25½"
Width	24"–96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

Sarto privacy screens are tackable. They are available in four modular heights, 13½"H, 19½"H, 23½"H, and 35½"H, and have widths ranging from 24"W to 96"W. Screens can also be specified parametrically.

The screen may be used on ¾"–1½" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Brackets and hard stops are included with screens. Screens narrower than 60"W use two brackets, while screens 60"W and larger utilize three brackets. The third bracket is centered on the width of the screen.

Offset brackets are included with 29"W screens, to help maintain appropriate pinch points between the screen and adjacent objects. Side screen option is available for screens 36"W and narrower.

Sarto privacy screen slides onto brackets.

Alignment brackets are available to help eliminate gapping and misalignment between back and side screens. Alignment brackets are available as their own style (**PSCB**).

Weight of screens are calculated as follows:
Screen: 0.0044 lb per inch²
Bracket: 1.2 lb per bracket.

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Filler Panels

For Use with Plinth and Leg Base Storage

Filler panel is optional and is used to close the space that may result from various applications.

► Specifying, pages 324 and 336

Actual Dimensions			
Filler Panels for Use with Plinth Base		Filler Panels for Use with Leg Base	
Depth	3/4", 1 1/8", or 1 1/2"	Depth	1 1/8"
Width	5 3/8" or 6 3/4"	Width	5 3/4"
Height	10 3/8", 15 1/2", 18 13/16", 21 1/2", or 27 1/2"	Height	18 13/16"

Product Details

End panels and plinth base pedestals are $\frac{3}{4}$ " shorter in depth than the worksurface so that the modesty panel can sit proud on the end panel or storage component back. If a modesty panel isn't used, a $\frac{3}{4}$ " space results. If desired, the filler panel is used to close that gap between the unfinished back of an end panel or storage component and the wall, panel, or other furniture component.

$\frac{3}{4}$ " D filler panel is used to fill the space on the back of a plinth base unit that doesn't have a modesty panel. It is also used to close the space that results from the use of an L-shape end panel to support a worksurface over a plinth base 1.5 high or one-high storage unit.

A leg base filler panel exists for this purpose.

$1\frac{1}{2}$ " D filler panel is used to fill the space that is created when units are used in a back-to-back plinth base application without modesty panels.

All exposed edges of the filler panel are finished.

Filler for use in plinth L- or U-shape configuration is required for a return, bridge, or run-off worksurface with an overhang and a modesty panel. It fills the space between the modesty panel and adjacent worksurface end panel.

All exposed surfaces of the filler panel for use in an L- or U-shape configuration are finished.

Connections

$\frac{3}{4}$ " D or $1\frac{1}{2}$ " D filler panel attaches to the unfinished back of a plinth base storage component or plinth base L-shape end panel.

$5\frac{3}{4}$ " W filler panel for use in an L- or U-shape configuration attaches to the modesty panel on one worksurface and to the end panel of the adjacent worksurface.

Attachment hardware is included with the filler panel.

Surface Materials

Filler panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Grain Direction

Filler panels have vertical grain direction that matches the adjacent storage and panels.

End Panels

Straight, L-Shape, and J-Shape for Use with Plinth Base Storage
L-Shape For Use with Leg Base Storage

End panel is available in three configurations—straight, L-shape, and J-shape.

► Specifying, pages 326 and 337

Product Details

Right- and left-hand versions of straight and L-shape end panels are available.

All exposed edges and sides of the end panel are finished.

15"D straight or L-shape end panel can be used to support a work-surface that is next to and attached to the tower. The tower and end panel will be defaced when installed. Use a full-depth end panel if attachment to the tower is not desired.

21¹/₂"H straight end panel is used in a freestanding application to support a worksurface at the height of 1.5 high storage units. A modesty panel must be used with a straight end panel.

27¹/₂"H straight end panel for use with Montage panels is used to attach a worksurface to the panel on module. Worksurfaces supported by these end panels are not meant to be freestanding.

27¹/₂"H straight end panel for use with Answer and Privacy Wall is used to attach a worksurface to the panel on-module only.

Actual Dimensions

Plinth Base Straight End Panel

Depth	15", 17 ¹ / ₄ ", 23 ¹ / ₄ ", or 29 ¹ / ₄ "
Width (thickness)	1 ⁷ / ₁₆ "
Height	21 ¹ / ₂ " or 27 ¹ / ₂ "

Plinth Base Straight End Panel for Use with Answer Panels, Montage Panels, and Privacy Wall

Depth	24" or 30"
Width (thickness)	1 ⁷ / ₁₆ "
Height	27 ¹ / ₂ "

Plinth Base L-Shape End Panels

Depth	15", 17 ¹ / ₄ ", 23 ¹ / ₄ ", or 29 ¹ / ₄ "
Width	15"
Height	10 ³ / ₈ ", 21 ¹ / ₂ ", or 27 ¹ / ₂ "

Leg Base L-Shape End Panels

Depth	15", 18", or 24"
Width	15"
Height	27 ¹ / ₂ "

Plinth Base J-Shape End Panels

Depth	24" or 30"
Width	15"
Height	27 ¹ / ₂ "

27½"H straight end panel is used in a free-standing application on worksurfaces that have a fixed modesty panel.

27½"H J-shape end panel is used to create single plinth base pedestal desks.

Tip: J-shape end panel and worksurface can allow no more than a 6" worksurface overhang.

Tip: A 24"D J-shape end panel with an inset modesty panel does not meet BIFMA kneespace requirements.

Any bow-front desk worksurface with an overhang must use a J-shape end panel and plinth base pedestal combination only.

When a return worksurface is attached to a straight or bow-front desk worksurface, then an overhang of no greater than 12" is allowed.

27½"H L-shape end panel is used on worksurfaces with no modesty panel for plinth base. It can also be used to support the end of a meeting or extended bullet worksurface in plinth or leg base.

Tip: A desk worksurface with a 6" overhang cannot accept an L-shape end panel. As an alternative, use a straight end panel with a full modesty, or a J-shape end panel instead.

27½"H L-shape end panels are used to support worksurfaces used in conjunction with plinth base pedestals and leg base 27½"H storage.

21½"H L-shape end panels are used to support worksurfaces used in conjunction with plinth base 1.5 high or 21½"H leg base storage units.

103⁄8"H L-shape end panel is used to support a worksurface on a plinth base one-high lateral file or bookcase.

Tip: Recommended column and leg supports vary based on worksurface length and support conditions on the other end. Refer to Worksurface Support Guidelines, page 101.

All 103⁄8"H L-shape end panels on a one-high lateral file or bookcase and 27½"H end panels support a worksurface at 29"H, allowing it to meet ANSI (American National Standards Institute) standards.

Tip: End panels on legs cannot share storage legs with other adjacent units.

Tip: Leg base L-shape end panel does not require a filler panel as they are full depth.

Tip: An L-shape end panel on legs will not be in alignment with adjacent leg base storage. The leg base L-shape end panel sits ¾" forward on the storage unit.

Connections

Quick-lock assembly hardware is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel.

Attachment hardware for straight end panel used with Answer panels, Montage panels, or Privacy Wall is provided to connect the end panel to the panel and worksurface.

Note: All plinth and leg base end panels are now 1³⁄₈" thick. They work seamlessly with any Elective Elements worksurface.

Surface Materials

End panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Perpendicular Tether Support

For Use with Plinth Base and Leg Base Storage

Perpendicular tether supports are used to support desk worksurfaces at 29"H when used with plinth base 1.5 high storage or leg base 21 1/2"H storage units. ▶ Specifying, page 354

Perpendicular tether supports allow a desk worksurface to be positioned anywhere along a run of plinth base 1.5 high storage or leg base 21 1/2"H storage units.

Perpendicular tether supports are non-handed.

Product Details

Perpendicular tether supports are used to support desk worksurfaces at 29"H when used with plinth base 1.5 high storage or leg base 21 1/2"H storage units.

Perpendicular tether supports are positioned 2" in from the side and back edge.

Depth of the perpendicular tether support is determined by the depth of the worksurface supported. Use a 19 5/8"D support for a 24"D worksurface. Use a 25 5/8"D support for a 30"D worksurface. Use a 31 5/8"D support for a 36"D worksurface in plinth base setting.

Width of the perpendicular tether support is determined by the depth of the worksurface above the plinth base 1.5 high storage or leg base 21 1/2"H storage units. Use a 13 5/8"W support when the worksurface is 18"D. Use a 19 5/8"W support when the worksurface is 24"D. *Tip: Holes are pre-drilled for attachment.*

Connections

Attachment hardware is included with perpendicular tether to secure them to worksurfaces in the field. Attachment is required to both the worksurface above and the worksurface on which the support rests.

Surface Materials

Perpendicular tether supports

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Actual Dimensions

Perpendicular Tether Support

Height	4 5/8"

Free Support End Panels, T-Shape, and Extended T-Shape End Panels

Plinth Base and Leg Base

Free support end panel

is available in plinth base and leg base and in two widths—30"W or 36"W—and one height—27½"H. The free support provides support for worksurfaces up to 60"W.

► Specifying, pages 329 and 338

Plinth base

Leg base

Adjustable glides on 27½"H end panels

adjust for installations on uneven floors. Adjustability range is 1¼".

Plinth-base T-shape end panel

is available in two heights—4½"H or 10⅜"H for use with 1.5 high or one-high storage.

Plinth base

Plinth base

Extended T-shape end panel has a 27½"H end panel with a ⅔-height modesty panel.

► Specifying, page 332

► *Extended T-Shape End Panel Selection Guide*, page 108

Leg base T-shape end panel

is 4½"H for use with leg base 21½"H storage.

► Specifying, pages 330 and 339

Leg base

Actual Dimensions

Plinth Base and Leg Base Free Support End Panel

Width	6½"
Height	27½"

Plinth Base Extended T-Shape End Panel for Use with Freestanding Bullet Worksurfaces

Depth	30" or 36"
Width	39", 42", 45", 48", 51", 54", 57", 60", 63", 66", 69", or 72"
Modesty panel height	18"
End panel height	27½"

T-Shape End Panel (for use with Plinth Base and Leg Base)

Depth	24", 30", or 36"
Width	12"
Height	4½" or 10⅜"

Plinth Base Extended T-Shape End Panel for Use with Freestanding P-Top Worksurfaces (Left-Hand and Right Hand)

Depth	30" or 36"
Width	44", 50", or 51"
Modesty panel height	18"
End panel height	27½"

Product Details

All exposed edges and sides of the T-shape, free support, and extended T-shape end panels are finished.

Leg base

Plinth base

27 1/2"H free support end panel has a 6 1/2"W metal support triangle that extends from the end panel to provide proper worksurface support for worksurfaces up to 60"W.

Leg base

Gate leg

Plinth base

Gate leg

For proper stability, worksurfaces supported on one end by free support end panel must be connected to a perpendicular worksurface forming an L- or U-shaped configuration. Two plinth base free support end panels can support a stand-alone worksurface, however, two leg base free supports cannot support a stand-alone worksurface.

A free support end panel cannot be used to support above worksurface storage.

Tip: If the free support end panel is used with above worksurface storage (overheads or service modules), then the free support end panel must be attached to either a tower or a building wall for stability.

10 3/8"H T-shape end panel supports a 30"D or 36"D worksurface with a square end in a non-run-off application. 4 1/2"H T-shape end panel supports 24", 30", and 36"D worksurfaces. It is not designed for use with a coped worksurface edge.

4 1/2"H T-shape end panel is used to support a worksurface on a plinth base 1.5 high or leg base 21 1/2"H storage unit. It has an 11"W leg that extends from the end panel to provide proper worksurface support.

Tip: Use a T-shape end panel to support a worksurface over plinth base 1.5 high storage when a service module is above. This will avoid interference with a technology trough in the storage.

Tip: Extended T-shape end panel cannot support a worksurface in a freestanding application.

10 3/8"H T-shape end panel is used to support a worksurface on a one-high plinth base lateral file or bookcase. It has an 11"W leg that extends from the end panel to provide proper worksurface support.

Tip: Recommended column and leg supports vary based on worksurface length and support conditions on the other end. Refer to Worksurface Support Guidelines, page 101.

Extended T-shape end panel supports a bullet or P-top worksurface in a non-run-off application in a plinth base setting only. Either a column or disk column supports the other end of the worksurface. The 2/3-height modesty panel is notched at the top to allow installation next to the column or disk column; however, it does not attach to the column or disk column. The width of the modesty panel on the extended T-shape end panel varies depending on the width and type of worksurface.

► To select the correct extended T-shape end panel width, refer to *Plinth Base Extended T-Shape End Panel Selection Guide*, page 108. *Tip: Extended T-shape end panels are handed for P-top worksurfaces. The modesty panel is located 10" in from the visitor side.*

For proper stability, worksurfaces supported by T-shaped end panel must be connected to a perpendicular worksurface forming an L- or U-shaped configuration.

All supports are designed to support worksurfaces at 29"H.

Connections

Quick-lock assembly hardware is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the end panel or modesty panel.

Surface Materials

Free support, T-shape, and extended T-shape end panels

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Legs on leg base components

- 4799 Platinum Metallic
- 4803 Near Black Metallic

Corner Support Kit and Rear L-Shape Corner Support

For Use with Plinth Base and Leg Base Applications

Corner support kit comes with three L-shape supports to hold the corner or extended corner work-surface at 29"H, allowing it to meet ANSI (American National Standards Institute) standards.
► Specifying, page 334

Rear L-shape corner support attaches to the back corner of the worksurface.

Rear L-shape corner support can be specified separately for an extended corner worksurface that is supported by a 27½"H storage component at one end and an L-shape end panel at the other end.

L-shape end panels support the front corners of the worksurface.

Adjustable glides adjust for installations on uneven floors. Adjustability range is 1¼".

Product Details

Corner support kit includes two L-shape end panels and one rear L-shape corner support. Corner support kits are ordered separately and support a corner or extended corner worksurface in a freestanding application.

Tip: If an extended corner worksurface is supported by a pedestal or lateral file on one end, then specify a rear L-shape corner support and an L-shape end panel separately to support the back and other end.

Two 15" x 15"
L-shape end panels

All exposed edges and sides of the supports are finished.

Tip: The corner support kit is not available in leg base, but can be created by combining the leg base L-shape and panel with the rear L-shape corner support.

Actual Dimensions

Rear L-shape corner support 12" x 12"

L-shape end panel 15" x 15"

Height 27½"

Tip: Rear L-shape corner support kit can be used with leg base storage, although it is not available with storage legs.

Connections

Quick-lock assembly hardware is used to assemble the components in the field. The hardware features pins in the underside of the worksurface that are captured by rotating connector locks in the support.

Full-height modesty panel, if selected, attaches to the plinth base rear L-shape corner support, the L-shape end panel, and the worksurface.

Tip: Select a modesty panel that is 12" shorter than the worksurface.

Surface Materials

Plinth base or leg base L-shape end panel and rear L-shape corner support

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Storage legs

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Attachment hardware

- Black paint only

Plinth Base Center Support Panels

Center support panel is used when a worksurface has an unsupported span that is greater than 60"W.

► Specifying, page 335

Actual Dimensions	
Depth	8" or 11"
Width (thickness)	1½"
Height	27½"

Product Details

All exposed edges and both sides of the center support panel are finished.

Connections

Center support panel attaches under the work-surface in the center of the span.

8"D center support panels are used with 18"D worksurfaces.

24"D and 30"D work-surfaces must use 11"D center support panel.
Tip: Center support panel is for use only with plinth base storage.

Attachment hardware is included with the center support panel.

Surface Materials

Center support panel

- Wood veneer
- Laminate
- Customiz stain (option on wood)

Attachment hardware

- Black paint only

Worksurface Braces

For Use with Plinth Base and Leg Base

Worksurface Braces

Worksurface brace is used when a worksurface has an unsupported span that is greater than 60"W. It provides unobstructed support under the worksurface.

► Specifying, page 358

Product Details

Worksurface, other than blade edge, supported by pedestals or end panels that have unsupported spans from 60"W to 90"W, use one worksurface brace or a center support panel. Select the worksurface brace length closest to the unsupported span. For spans greater than 90"W in a plinth base setting, a center support panel must be used.

Tip: The use of wood or laminate modesty panels will provide increased rigidity in spans greater than 60"W in conjunction with a worksurface brace.

► Page 96

Tip: When calculating unsupported spans, the 15" portion of an L-shaped end panel that runs along the back edge should not be considered. Measure from the portion of the end panel that runs front-to-back.

Worksurface supported by legs or tethered brackets that have unsupported spans less than or equal to 84"W, use one worksurface brace. For unsupported spans greater than 84"W two worksurface braces are required for support.

Worksurface brace attaches under the worksurface in the center of the span.

Blade edge profile worksurfaces have slightly more stringent rules due to their construction:

- For unsupported spans 54"W to less than 72"W, use one worksurface brace.
- For unsupported blade edge spans from 72"W to less than 90"W, use two worksurface braces.
- For unsupported spans greater than 90"W in plinth base settings, use an intermediate support.
- Unsupported spans greater than 90"W in a leg base setting are not allowed. A center support to the ground is an option.

Note: A center support panel changes the leg base aesthetic.

Connections

Worksurface brace attaches under the worksurface in the center of the span.

Surface Materials

Worksurface brace

- Black paint only

Actual Dimensions

Width	45", 51", 57", or 69"
Height	1"

Rectangular Column Leg, Rectangular Column Leg with Base, Column, Disk Column, Gate Leg, Adjustable-Height Legs, and Freestanding Table Base

For Use with Plinth Base and Leg Base

Rectangular column leg, rectangular column leg with base, column disk column, and gate leg support the end of worksurfaces.

► Specifying, page 356

Adjustable-height legs

provide support for an open, clean look in desk and square-end run-off applications.

► Specifying, page 356

Freestanding table base

supports the end of run-off, meeting, and extended bullet worksurfaces. It also supports personal table tops.

Rectangular Column Leg,
Rectangular Column
Leg with Base, Column,
Disk Column, Gate Leg,
Adjustable-Height Legs, and
Freestanding Table Base

Product Details

Column and disk column are adjustable within a range of 4" and support a worksurface at heights from 28"H to 32"H.

Adjustable-height legs adjust up to 3" in 1/2" increments and support a worksurface at heights from 25 1/2"H to 29 1/2"H or 29"H to 32"H.

The interior cover of an adjustable height leg is always 6527 Merle.

Freestanding table bases have non-adjustable glides. Use a 22" diameter base for 30" personal table tops. Specify a 28" diameter base for 36" personal table tops.

Rectangular column leg and rectangular column leg with base support a worksurface at 29"H. Rectangular columns have 2 1/4" of adjustment at the top of the leg. Adjustment is in 1/4" increments. The base does not have glides.

Gate leg supports a worksurface at 29"H. Glides adjust 1 1/4" in height.

Gate leg allows up to a 6" overhang when used with a desk worksurface.

Tip: The column leg rules apply to the gate leg support. T or L configurations are recommended.

Gate leg when used with an L-shape end panel must have a perpendicular worksurface with at least 30"W total storage.

Tip: A gate leg cannot be used in conjunction with slip-fit brackets on storage at the other end of a worksurface.

Tip: A gate leg cannot be used to support overhead storage.

Tip: A slip-fit bracket is not allowed with a bullet top or a P-top, due to stability issues.

Tip: A slip-fit bracket with either plinth or leg base storage is not an allowable option to support overhead storage.

Tip: The column leg rules apply to the gate leg support. T or L configurations are recommended.

Connections

Modesty panel connects to adjustable-height legs so that the modesty panel remains fixed when the worksurface is adjusted.

Modesty panel is installed next to the column or disk column; however, it does not actually attach to the column or disk column.

Tip: Disk column cannot be used to support a free-standing table.

The maximum a work-surface can cantilever over a plinth base 1.5 high 30" or 36"W storage unit or 21 1/2"H leg base credenza when a slip-fit bracket is used is 21".

Tip: Slip-fit supports cannot be used on 15" or 18"W plinth base or leg base storage.

Tip: The maximum worksurface overhang front or back allowed on a worksurface with a slip-fit support is 6".

The maximum a work-surface can cantilever from the front or back edge of a 17 1/4"D plinth base 1.5 high storage or leg base 21 1/2"H storage unit below is 6".

The maximum work-surface cantilever on a 23 1/4"D unit is 12". This can be 6" on the front and back.

Rectangular column legs, rectangular column legs with bases, columns, disk columns, and gate legs should not be used to support free-standing tables. They are used to support the end of run-off worksurfaces.

Tip: Power units cannot be used with gate leg, adjustable height leg, or glass modesty panel due to bracket interference.

Wiring & Cabling

Cord cover on adjustable-height legs is removable to reveal a space to manage and conceal cords and cables that are routed from the worksurface.

Power units with cord pass-through cannot be installed in the left or right position when using adjustable-height legs.

Application Topics

Two adjustable-height legs can be used to support a run-off worksurface application. Four adjustable-height legs can support a freestanding table.

Tip: Worksurfaces supported by legs or tethered brackets that have unsupported spans less than 84"W, use one worksurface brace. For unsupported spans greater than 84"W two worksurface braces are required for support.

Tip: The column leg rules apply to the gate leg support. T or L configurations are recommended.

In table applications, worksurfaces up to 90"W can be supported by four legs and will allow a hutch kit with a single-high overhead or single-high service module to be attached above the worksurface, provided a worksurface brace or center support panel is used. 96"W worksurfaces can support overhead cabinets and service modules in this application only if a center support panel is used. If a center support panel is used, adjustable-height legs cannot be adjusted.

Tip: When hutch kits with single-high overheads or single-high service modules are installed on worksurfaces supported by adjustable-height legs, units must be positioned back-to-back or placed up against a wall. If a bridge or return is attached to the worksurface with the height-adjustable legs, the units can be freestanding.

Height adjustable legs and gate legs cannot be used with blade edge profile.

Table applications greater than 96"W are not allowed using four legs.

In the table application using four legs,

the hutch kit or service module must be located within 6" of the edge of the worksurface on both ends. Anything greater than 6" is not an approved application.

Tip: Do not place both power and data cables through the height adjustable leg cavity, as the power can interfere with the data signal as both are typically unshielded.

Worksurface Support Guidelines

For Use with Plinth Base and Leg Base

Worksurface Support
Guidelines

	Gate, Column, or Rectangular Column Leg	Disk Column or Rectangular Column Leg with Base	Freestanding Table Base	Adjustable- Height Legs
	When one end is supported by a 10 3/8"H T-shape or L-shape end panel on plinth base one-high pedestals	up to and including 72"W	all sizes approved	all sizes approved
	When one end is supported by a 4 1/2"H perpendicular tether or T-shape end panel on plinth base 1.5 high storage	up to and including 84"W	90"W and greater	all sizes approved
	When run-off worksurface is attached using flush mount brackets	all sizes approved	all sizes approved	all sizes approved
	When used to support a worksurface supported by a full-height free support or L-shape end panel attached to a bridge or return worksurface	all sizes approved	all sizes approved	all sizes approved
	When one end is supported by a 4 1/2"H perpendicular tether or T-shape end panel on leg base 21 1/2"H storage.	up to and including 84"W	90"W and greater	all sizes approved
	When run-off worksurface is attached using flush mount brackets	all sizes approved	all sizes approved	all sizes approved

Slim Leg HAD

Freestanding

Slim Leg HAD

Height-adjustable desks support single users. They allow users to quickly and effortlessly raise and lower their desks between seated and standing positions.

Lifting column is activated by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Tip: The control box power cord is not to be installed inside the shroud.

Desk surface is 1 1/8" thick and is available only with a square profile. The user and guest edge have a 3 mm edge band.

There is a 2" gap between the floor and the bottom of the end panel waterfall. As well as a 5/8" gap between the floor and bottom of the shroud.

The cable tray is metal. The width is driven from the worksurface plan width. There is a 1/2" gap between the bottom of the surface and the top of the cable tray.
▶ See page 117

A modesty panel is available as an option or as a separate style. The modesty width is driven by the worksurface width and is available in 1" parametric heights from 9" to 18".

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Active touch controller is standard.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Base supports a maximum distributed weight capacity of 295 pounds. For further information on weight limits, see Weight Limit Chart on page 120.

Height-adjustable base adjusts from 28 1/8"H to 47 13/16"H in any increment.

Shrouds include glides and conceal columns. Two glides per shroud are provided and have varying adjustment ranges per product. **SLHAD1S** adjusts 1/2" whereas **SLHAD2S** adjusts 1".

Slim Leg HAD

Vertical Cable Manager

Actual Dimensions	
Depth	2 ³ / ₄ "
Width	1 ¹ / ₈ "
Height	24 ¹ / ₈ "
Flange	13/ ₁₆ "

Product Details

The Slim Leg HAD magnetic vertical cable manager may be specified as an option of **SLHAD2S** or as a separate style number.

Four magnets secure the vertical cable manager to the metal shroud.

Refrain from sliding the vertical cable manager against the shroud. Sliding the vertical cable manager may cause scuffing to the metal shroud.

Surface Materials

Cable Cover
• Paint

Tip: It is recommended to match the vertical cable manager to the shroud finish color.

Slim Leg HAD

Integrated Storage

Height-adjustable desks support single users. They allow users to quickly and effortlessly raise and lower their desks between seated and standing positions.

Lifting column is activated by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Tip: The control box power cord is not to be installed inside the shroud.

There is a 2" gap between the floor and the bottom of the end panel waterfall. As well as a $\frac{5}{8}$ " gap between the floor and bottom of the shroud.

Desk surface is $1\frac{1}{8}$ " thick and is available only with a square profile. The user and guest edge have a 3 mm edge band.

Integrated Slim Leg HAD provides a standard 1" pinch point on the storage side of the surface. A 2" pinch point may be specified when nesting the application against a wall with a tackboard or other panel.

See Currency Enhanced specification pages for integrated storage style numbers. Styles shown: **CRHAD15H** and **CRHADCT**.

For integration with Elective Elements, please submit a special quote using styles shown: **E6PDHAD** and **E6WSHAD**.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Active touch controller is standard.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Base supports a maximum distributed weight capacity of 295 pounds. For further information on weight limits, see Weight Limit Chart on page 120.

Height-adjustable base adjusts from $28\frac{1}{8}$ "H to $47\frac{13}{16}$ "H in any increment.

A modesty panel is available as an option or as a separate style. The modesty width is driven by the worksurface width and is available in 1" parametric heights from 9" to 18".

The cable tray is metal. The width is driven from the worksurface plan width. There is a $\frac{1}{2}$ " gap between the bottom of the surface and the top of the cable tray.
▶ See page 117

Product Details

Wood Veneer, Low-Pressure Laminate, or High-Pressure Laminate Desks

Height-adjustable desks adjust 28 1/8\"H to 47 13/16\"H in any increment.

End panels connect to the outside of the metal shrouds. To remove the end panel(s), lift up and slide to the right.

► See assembly directions for further information.

End panels provide a gap of 50 mm (2\") between the bottom of the end panel and the floor.

Wiring and Cabling

Low surge electric motor with whisper quiet operation adjusts at 1 1/2\" per second. Motor is 120 VAC +/- 10% and includes a 10' power cord (9 foot for Illinois). Motor also has 0.1W standby power. The motor is rated for 300 watts (2.5 amps at 120V).

Tip: Travel speed does not slow. Collision detection is included as standard.

Soft stop DC motor eliminates abrupt stops and starts and is housed inside the lifting column. Max decibels: 55dB.

Built-in limiter switch is standard.

The control box power cord and other wires are not able to be routed through the interior of the shroud. The only power cable permitted to pass through the shroud is the cord from the Slim Leg HAD power distribution unit. The shroud cannot be placed directly over a power outlet.

Cable tray side view

A cable tray is provided to manage excess base controller wires and cables from surface electronics. Please see dimension page for cable tray measurements.

The cable tray has two molded attachment knobs that allow the installer to lower the cable tray so cables may be secured inside. Once cables are secure, the cable tray can be lifted and secured back into place by a quarter turn of the knobs.

Grain Direction

Worksurface grain directions default to long grain. Short grain laminate is only available on max 60\"W surfaces. End panel grain direction defaults to vertical. Horizontal grain direction is available as an option.

Controllers

Both active touch and simple touch controllers are available on Slim Leg HAD. Active touch is the default.

Active touch controller is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Steelcase rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Simple touch controller is available as an option and easily adjusts height of desk at a rate of 1 1/2\" per second, by lifting or pressing down on the controller.

Integrated Storage

Slim Leg HAD with integrated storage blends with Currency Enhanced One-High and 1.5-High storage elements.

Blending Slim Leg HAD with Elective Elements storage elements must be specified through a special quote request.

The integrated storage

Slim Leg HAD provides a 1\" pinch point on the top surface side closest to the storage. If specifying the storage and HAD next to a tackboard, dry erase board, or other panel, a 2\" pinch point may be specified as standard.

Surface Materials

Desk top surface

- Low-Pressure Laminate, High-Pressure Laminate, and veneer are available.
- Laminate with 3 mm edge profile on guest and user side. 1 mm plastic edge band for the sides.
- Veneer with 3 mm veneer profile on guest and user side. 0.5 mm veneer edge band for the sides.
- Open Line laminate (option)
A program including non-Steelcase laminates which are suitable for use on Steelcase products.

Power and Cable Management

Product Details

Slim Leg HAD offers an option to conceal the power cord through the shroud. The only power cord permitted to pass through the shroud is the cord from the Slim Leg HAD power distribution unit (PDU) that is specified with **SLHAD2S** or **SLHAD1S**. The power distribution cord may be routed through the left or right shroud, and then either the user or visitor side.

Requirements to conceal the power cord through a shroud include:

- The Slim Leg HAD power option must be selected. A four-outlet or six-outlet configuration is available. Convenience power is also available.
- The Slim Leg HAD PDU cord is the only cable permitted to pass through a shroud. No other power strip cord or HAD power cord is permitted to pass through the shroud.
- The metal shrouds must be grounded to the PDU.
- A data cable is permitted to pass through a shroud and should be secured to the power cord to ensure proper routing through the shroud.

On style number, SLHAD1S, the power cord may be routed through the shroud or the plastic vertebrae that feeds into the storage element.

Under Worksurface Power Distribution Unit (PDU)

The under worksurface power distribution unit installs underneath Slim Leg HAD, and is a black steel box with optional four or six outlets.

Jumper cable connecting the under worksurface power distribution unit and the clamp-on accessory power unit is 42" long.

Clamp-on Power Configuration

2 10W USB A+C,
2 power

Under worksurface PDU and clamp-on accessory installs below and above the worksurface and has the following optional power configurations:

- 3 power
- 2 power, 1 USB-C (18W), 1 USB-A
- 2 power, 1 USB-C (60W)

C-clamp is designed to accommodate worksurfaces up to 1 1/2" thick.

Routing the Slim Leg HAD Power Strip Cord

The following images and statements depict the general process of grounding and routing the PDU power cord. For detailed information, please reference the Slim Leg HAD assembly directions.

Ground wire that flows from the power strip to the shroud.

A **primary ground wire** connects and earths the upper shroud to the Slim Leg HAD PDU. A secondary ground wire connects and earths the lower shroud back to the Slim Leg HAD PDU. These ground wires run through the leg that routes power and is on the opposite side of the power cord.

Plinth Base Pedestals

Plinth base pedestals can support a worksurface in a desk, return, credenza, or panel-supported worksurface application. Laminate and wood models are available.
► Specifying, pages 376 and 386

Top on plinth base pedestal is open to attach under the worksurface.

Top on adjustable-height plinth base pedestals is finished and inset.

Back is unfinished. It can be finished with a back panel or modesty panel.

Sides are finished so they can be used in right- or left-hand positions.

Face lock allows individual plinth base pedestals, lateral files, and cabinets to be locked independently. Locks are standard keyed random. *Exception: Locks are not available on single- or double-door plinth base pedestals with integral or beam pulls.*
► Lock and Keying, page 578

Leveling glides adjust for installations on uneven floors. Adjustability range is 1¼".

Height adjustable brackets are available in polished chrome only.

Pulls are available in eight styles.

Height	27½"	Height	27½"

Product Details

All 27½"H plinth base pedestals, lateral files, bookcases, and single- or double-door pedestals support a worksurface at 29"H, allowing it to meet ANSI (American National Standards Institute) standards.

Adjustable-height plinth base pedestals adjust up to 3" increment and support a worksurface at heights from 29"H to 32"H.

Worksurface edge aligns with the face of the drawer or door if square worksurface edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the drawer or door front.
Tip: This alignment causes the blade edge profile to protrude 2⅛" beyond an adjacent tower or vertical cabinet.

Heavy duty steel, telescoping slides are standard on all drawers. Slides are full extension on both box and file drawers. At full extension, entire space within the drawer is accessible.

Soft close slides are available as an option for 15"W and 18"W box and file drawers.

Standard drawers have five-ply maple construction with sanded dovetail joinery.

Optional drawers feature miter fold polypropylene drawers.

Tip: 17¼"D pedestals do not have a miter fold drawer option.

Box drawers include one divider per drawer and one plastic pencil tray per pedestal. In 15"W pedestals, the tray sits on the drawer sides. In 18"W pedestals, the pencil tray sits on the bottom of the drawer.

Wood pencil trays are available separately and sit on the sides of both 15"W and 18"W pedestals. The wood pencil trays will only fit in standard dovetail drawers.
► Page 390

File drawers are equipped with a fastened metal filing system. File capacities vary.
► Page 216

One adjustable shelf is standard in 27½"H single- or double-door pedestals and bookcases. Shelf is finished on both sides.

Tip: It is recommended to flip the wood bookcase shelf annually.

Tip: The adjustable shelf is available in wood or metal.

Tip: Only one shelf will be able to support standard size binders of 11½"H.

Contemporary

Jazz

Bar

Nile

Integral

Beam

Inset

Pulls are available in seven different styles to provide design options that range from conventional to progressive.

Tip: Integral pull is not available on laminate or composite fronts.

► Page 238

One pull per door or drawer is standard.

Exception: Double-door pedestals are equipped with only one integral or beam pull that is located on the right door.

Tip: Do not pair beam pull with blade edge worksurface; file access is compromised.

Locks are available factory- or field-installed on plinth base pedestals, lateral files, and plinth base pedestals with doors. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Exception: Pedestals with doors are not available with locks when integral or beam pulls are specified.

► Lock and Keying, page 578

Wood veneer grain direction runs vertically on plinth base pedestals.

Exception: Wood veneer grain direction runs horizontally on the mitered base of bookcases.

► Page 247

Counterweights are shipped with all plinth base pedestals for field installation to insure stability.

Tip: In certain applications, counterweights may not be needed and can be optioned out at specification.

Exception: Counterweights are always needed in 17¼"D pedestals.

Tip: Counterweights are not required in storage units with doors.

Worksurface overhang can be created by ordering a worksurface that is 6" deeper than the storage component.

Wood modesty panel can be used with plinth base pedestals. It sits proud on the back of the plinth base pedestals. Full-height, full-width wood modesty panels cover the back of the plinth base pedestal. The 2/3-height wood modesty panel must be used in conjunction with a pedestal back panel to cover the exposed unfinished back of the plinth base pedestal. The 2/3-height desk modesty panels are only used with overhanging worksurfaces.

► Page 70

Back panel needs to be ordered to cover the unfinished back of an exposed pedestal on a desk when there is no full-height wood modesty panel or if inset or floating wood modesty panels are specified. Back panel sits proud on the back of the plinth base pedestal.

Tip: Full-height wood modesty panel should be used to finish the back of an exposed two-high lateral file, double-door plinth base pedestal, or underworksurface bookcase.

► Page 69

Tip: An additive back panel can be ordered to finish the back and provide additional security.

Filler panel may be ordered to close the 3/4" space on the exposed back edge of a plinth base credenza if a wood modesty panel isn't used. A 1 1/2"D filler panel can be used to fill the space that is created when worksurfaces with pedestals are used in a back-to-back application without modesty panels. Filler panel attaches to the unfinished back of a plinth base pedestal.

► Page 82

Cushion top is optional on a two-high lateral file or a plinth base 1.5 high pedestal. It replaces a wood or laminate top. In these applications, a finished back panel must be used. Cushion has topstitching with no welting. Cushion top ships separately.

► Page 316

End panel is not necessary for support on the end of a worksurface that is supported by a plinth base pedestal. If desired, use an L-shape end panel to create a single-plinth base pedestal desk, right- or left-hand credenza, or shell. A panel-supported end panel can be used in system applications.

Pedestal fronts are available with toe kick or full front.

Wiring & Cabling

Grommet can be installed above underworksurface storage components or in kneespace area.

► Page 58

Cords and cables can be routed behind plinth base pedestals. There is a 3/4" clearance behind 17 1/4"D, 23 1/4"D and 29 1/4"D plinth base pedestals, and 17 1/4"D lateral files, a 6" clearance behind 23 1/4"D lateral files, and a 12" clearance behind 29 1/4"D lateral files.

Back of plinth base pedestals allow for electrical access in the wall or panel. If a modesty panel is used, a hole can be cut in the field to accommodate cable or cord pass through.

Tip: There is 3 3/4"H open space to feed cords.

Bottom of plinth base pedestals are open for electrical access in the floor.

Surface Materials

Plinth base pedestals

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Shelves

- Wood, if wood case is specified
- Laminate, if laminate case is specified

- Wood if wood front is specified

Tip: Not available on laminate or composite fronts.

Beam pulls

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum

Inset pulls

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Face lock

- 9201 Polished Chrome
- 9250 Ember Chrome

Tip: When an integral pull is specified with a 9250 Ember Chrome lock, the lock housing is black, and when a 9201 Polished Chrome lock is specified, the lock housing is nickel.

Cushion top

- Fabric
- Leather

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent: Connect
- Elmosoft Leather
- Foundation
- Gaja
- Leather
- Stand In
- Select Surfaces leather
- Vinyl

Cushion top will be manufactured in a two seam pattern on all standard upholstery not listed under the four seam pattern. All COMs including pattern or textured leather and vinyl, will be manufactured in a two seam pattern.

Application Topics

Storage Capacities

► Page 216

Counterweights are always required in 17¹/₄"D plinth base pedestals.

Counterweights are always needed on a free-standing plinth base credenza when storage mounted on the worksurface is less than the width of the worksurface.

Counterweights are always needed when overhead storage is mounted on 18"D freestanding plinth base credenza with closed lower storage below.

Counterweights are not needed when plinth base pedestals are installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are not needed in plinth base pedestals installed under an overhanging desk worksurface.

Counterweights are not needed when a service module, hutch kit with overhead cabinet or shelf, or stacking bookcase is installed on the worksurface above.

Counterweights are available as a service part package for use when furniture is reconfigured into applications which require their use.

Plinth Base One-High Pedestals (15¹/₂"H)

Plinth base one-high pedestals, including plinth base one-high lateral file or bookcase, can stand alone or support a worksurface when used with a 10³/₈"H end panel. Wood and laminate models are available.

► Specifying, page 390

Back is unfinished. It can be finished with a back panel or filler panel.

Top is open to attach a worksurface or cushion top.

Pulls are available in eight styles. One pull per drawer is standard.

Face lock allows individual plinth base one-high lateral files to be locked independently. Locks are standard keyed randomly.

► Lock and Keying, page 578

Sides are finished so they can be used in right- or left-hand positions.

Product Details

Plinth base one-high lateral file or plinth base one-high bookcase produce a layered look and provide a piling surface when used with an 10³/₈"H end panel to support a worksurface at 29"H.

Two or more plinth base one-high storage components can be ganged together under a single worksurface.

Plinth base one-high bookcases help to organize stacks of papers, expandable files, and case boxes.

Worksurface edge aligns with the face of the lateral file drawer if square worksurface edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the drawer front.

Tip: This alignment causes the blade edge profile to protrude 2¹/₈" beyond an adjacent tower.

Lateral file drawers are equipped with a fastened metal filing system for legal- and letter-size filing. Filing capacities vary.

► Page 216

Standard drawers have five-ply maple construction with sanded dovetail joinery.

Optional drawers feature miter fold polypropylene drawers available on plinth base storage.

Actual Dimensions

Plinth Base Lateral File

Depth	17 ¹ / ₄ " or 23 ¹ / ₄ "
Width	30" or 36"
Height	15 ¹ / ₂ "

Plinth Base Bookcase

Depth	16 ¹ / ₂ " or 22 ¹ / ₂ "

Beam

Inset

Pulls are available in seven different styles to provide design options that range from conventional to progressive.

Tip: Integral pull is not available on laminate or composite fronts.

► Page 238

Locks are available factory- or field-installed on one-high lateral files. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► *Lock and Keying*, page 578

Wood veneer grain direction runs vertically on plinth base one-high pedestals. *Exception: Wood veneer grain direction runs horizontally on the mitered base of bookcases.*

► Page 247

Pedestal fronts are available with toe kick or full front.

Connections

Finished back panel may be ordered to cover the unfinished back of an exposed plinth base one-high unit. Finished back panel sits proud on the back of the plinth base pedestal.

► Page 69

Filler panel may be ordered to close the ¾" space on the exposed back edge of a plinth base pedestal if a back panel isn't used. A 1½"D filler panel can be used to fill the space that is created when worksurfaces with pedestals are used in a back-to-back application without back panels. Filler panel attaches to the unfinished back of a pedestal.

► Page 86

Cushion top is optional and ordered and shipped separately on a plinth base one-high or two-high lateral file. It replaces a wood or laminate top. Cushion has topstitching with no welting. When used with a two-high lateral file, or an open/file combination on a plinth base 1.5 high storage, a finished back panel must be used.

Tip: Cushion top is not designed to be used on open plinth base one-high bookcase units. If that application is desired, specify a worksurface to be mounted on the bookcase and attach the cushion top to the worksurface. This will raise the overall height of the unit by an additional 1½".

Wiring & Cabling

Grommet can be installed in a worksurface above a plinth base one-high lateral file.

► Page 58

Cords and cables can be routed behind the one-high lateral files. There is a 6" clearance behind 23¼"D plinth base lateral files. A hole can be field cut in the back panel to accommodate cable or cord pass through. Bottom of plinth base one-high lateral file is open for electrical access in the floor.

Surface Materials

Plinth base one-high lateral file or bookcase

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Plinth Base 1.5 High Storage Units (21½"H)

Plinth base 1.5 high storage units provide an optional technology trough to accommodate technology zones and distribute power and data.

► Specifying, Page 394

Top on plinth base pedestal is open to attach under the worksurface.

Leveling glides adjust for installations on uneven floors. Adjustability range is 1¼".

Back is unfinished. It can be finished with a modesty panel.

Sides are finished so they can be used in right- or left-hand positions.

Optional technology trough accommodates power and data cables and houses optional technology zones. The space in the back of the unit accommodates wires.

Face lock allows individual units to be locked independently. Locks are standard keyed random. ► Lock and Keying, page 578

Cut-outs in the plinth base 1.5 high storage units allow power and data to be distributed from unit to unit. This eliminates the need for panels in open plan applications.

Tip: Cut-outs are unfinished.

Tip: Side panels can be specified with cut-outs right, left, right and left, or with no cut-outs for end of run conditions. An optional cable access cover is also available.

Pulls are available in eight styles.

Actual Dimensions

Plinth Base Open Bookcase

Depth	16½" or 22½"
Width	30", 36", or 42"
Height	21½"

Plinth Base Open/File

Depth	17¼" or 23¼"
Width	30" or 36"
Height	21½"

Plinth Base Box/File

Depth	23¼"
Width	15", 18", 30", or 36"
Height	21½"

Tip: Hinged door cabinet configuration is not available in plinth base storage.

Product Details

Square

Blade

Worksurface edge

aligns with the face of the drawer if square work surface edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the drawer front.

Tip: This alignment causes the blade edge profile to protrude 2⅛" beyond an adjacent tower or vertical cabinet.

Heavy duty steel, telescoping slides are standard on all pull out trays and drawers. Slides are full extension on pull out trays, box and file drawers. At full extension, entire space within the drawer or tray is accessible.

Drawers have five-ply maple construction with sanded dovetail joinery. These drawers include two drawer dividers in box drawers.

File drawers are equipped with a fastened metal filing system. File capacities vary. File drawers are designed to hold hanging file folders.

Tip: Plinth base storage units with a depth of 16½" or 17¼" will not accommodate legal redweld folders. For this use order the 23¼"D units.

One pull per drawer is standard.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 578

Wood veneer grain direction runs vertically on plinth base storage.

Exception: Wood veneer grain direction runs horizontally on the mitered base of bookcases.

► Page 247

Counterweights are shipped with all plinth base storage for field installation to insure stability.

Tip: In certain applications, counterweights may not be needed and can be optioned out at specification.

► Page 152

Exception: Counterweights are always needed in 17¼"D pedestals.

Modesty panel can be used with plinth base 1.5 high storage units. It sits proud on the back of the storage.

Additive back panel

can be ordered to finish the back and provide additional security.

► Page 69

Filler panel may be ordered to close the ¾" space on the exposed back edge if a modesty panel isn't used. A 1½"D filler panel can be used to fill the space that is created when work surfaces with plinth base 1.5 high storage are used in a back-to-back application without modesty panels. Filler panel attaches to the unfinished back of the storage.

► Page 86

Cushion top is optional on plinth base 1.5 high storage. It replaces a wood or laminate top. Cushion top ships separately.

► Page 316

Tip: Cushion tops are not available for 42"W open units.

Tip: Cushion tops must be used with a back panel to align with the depth of closed units. If used with an open unit, such as shown, the cushion will overhang the front by ¾".

End panel is not necessary for support on the end of a worksurface that is supported by plinth base 1.5 high storage. If desired, use an L-shape end panel or straight end panel with modesty panel to support the end of a worksurface not supported by 1.5 high storage.

The upper shelf in an open, and open with lateral file unit is removable to facilitate attachment to the worksurface.

Perpendicular tether supports and 4½" T-shape end panels

when used with plinth base 1.5 high storage support worksurfaces at 29"H.

Tip: The perpendicular tether support is no longer handed.

1.5 high storage units are available with toe kick or full front.

Wiring & Cabling

Technology zone can span between two plinth base 1.5 high storage units when cut-outs are specified.

Technology trough houses technology zones and route power and data. Refer to understanding electrical.

Tip: Power units with cord pass-through cannot be used over plinth base 1.5 high storage units.

Cut-outs available in right, left, and both right and left positions. Also available with no cut-outs if not needed for power routing.

Optional cable access cover is available to cover cut-out if desired. Cover is clear anodized aluminum or dark bronze.

Power can feed into channel from a Montage panel by field-cutting a hole in the Montage skin.

Tip: Specify Montage panels with modified open base to facilitate vertical routing of power when not at junction.

Technology trough has 3 cut-outs to facilitate cable routing. (Top view shown)

Cables can route directly into the technology trough from the lower portion of an open unit.

Surface Materials

Tip: In certain applications, counterweights may not be needed and can be optioned out at specification.

Exception: Counterweights are always needed in 17¹/₄"D pedestals.

Inset back panel is standard on leg base storage and credenzas and ships assembled.

Filler panel may be ordered to close the 3/4" space on the exposed back edge if a modesty panel isn't used. In an overhang application, a 1¹/₈"D filler panel can be used to fill the space that is created when worksurfaces with leg base 27¹/₂"H storage are used in a back-to-back application without modesty panels. Filler panel attaches to the unfinished back of the storage.

► Page 86

Cushion top is optional on leg base 27¹/₂"H storage. It replaces a wood or laminate top. Cushion top ships separately.

► Page 316

Tip: If used with an open unit, the cushion will overhang the front by 3/4".

End panel is not necessary for support on the end of a worksurface that is supported by leg base 27¹/₂"H storage. If desired, use an L-shape end panel to support the end of a worksurface not supported by 27¹/₂"H storage.

The upper shelf in an open and open with lateral file unit is removable to facilitate attachment to the worksurface.

Connections

Sharing Storage Legs Shared storage legs

are optional:

- When a credenza and another leg base storage unit are the same depth.
- Storage legs can be shared side-to-side between units of the same depth when facing the same or opposite directions.

Storage legs must attach on the ends of a unit, and on the interior unit that is not supported by an under storage brace.

Storage leg ship unattached. If desired, storage legs may replace the under-storage brace under a three component credenza.

Tip: The unit will ship with the standard understorage brace and the additional storage legs must be ordered separately. In this case, the brace may be recycled.

Suspension/ganging kits link the credenza and tower.

► Specifying, Page 536

Wiring & Cabling

Technology zone can span between two leg base 27¹/₂"H storage units when cut-outs are specified.

Technology trough houses technology zones and routes power and data. Refer to understanding electrical.

Tip: A leg base 27¹/₂"H hinged door cabinet cannot accept power due to regulation constraints.

Cut-outs available in right, left, and both right and left positions. Also available with no cut-outs if not needed for power routing.

Optional cable access cover is available to cover cut-out if desired. Cover is clear anodized aluminum or dark bronze.

Power can feed into channel from a Montage panel by field-cutting a hole in the Montage skin.

Tip: Specify Montage panels with modified open base to facilitate vertical routing of power when not at junction.

Technology trough has 3 cut-outs to facilitate cable routing. (Top view shown)

Cables can route directly into the technology trough from the lower portion of an open unit.

Tip: Power units cannot be installed over leg base 27¹/₂"H storage due to inadequate space.

For 27¹/₂"H closed storage units, there is a cut-out on the bottom panel to allow cables to exit.

Surface Materials

Leg base 27¹/₂"H storage

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and the front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Storage legs

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Storage leg with reveal

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Shelves

- Wood, if wood case is specified
- Laminate, if laminate case is specified

Metal shelves

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Contemporary or bar pulls

- 0835 Black
- 9201 Polished Chrome
- 9211 Nickel
- 9212 Silver

Jazz pulls

- 0835 Black
- 4799 Platinum Metallic
- 9201 Polished Chrome
- 9211 Nickel
- 9212 Silver

Nile pulls

- 0835 Black
- 4799 Platinum Metallic
- 7280 Smooth Bronze
- 9201 Polished Chrome
- 9211 Nickel

Integral pulls

- Wood, if wood front is specified

Tip: Not available on laminate or composite fronts.

Beam pulls

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum

Inset pulls

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Face lock

- 9201 Polished Chrome
- 9250 Ember Chrome

Tip: When an integral pull is specified with a 9250 Ember Chrome lock, the lock housing is black, and when a 9201 Polished Chrome lock is specified, the lock housing is nickel.

Cushion top

- Fabric
- Leather

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent: Connect
- Elmosoft Leather
- Foundation
- Gaja
- Leather
- Stand In
- Select Surfaces leather
- Vinyl

Cushion top will be manufactured in a two seam pattern on all standard upholstery not listed under the four seam pattern. All COMs including pattern or textured leather and vinyl, will be manufactured in a two seam pattern.

Individual leg base 27¹/₂"H storage units

may share storage legs.

Tip: The external sides of the storage case will be defaced by the suspension/ ganging hardware. A brace is needed to ensure proper stability of storage units that are ganged with no shared leg. Braces for use under storage credenzas in place of a storage leg in spans smaller than 72" wide are available in customer service parts.

Application Topics

Storage Capacities

► Page 216

Counterweights are always needed on a free-standing leg base credenza when storage mounted on the worksurface is less than the width of the worksurface.

Counterweights are always needed when overhead storage is mounted on 18"D freestanding leg base credenza with closed lower storage below.

Counterweights are not needed when leg base 27 1/2"H storage is installed in an L-shape, U-shape, or T-shape configuration.

Counterweights are not needed when a service module, hutch kit with overhead cabinet or shelf, or stacking bookcase is installed on the worksurface above.

Counterweights are available as a service part package for use when furniture is reconfigured into applications which require their use.

Plinth Base Mobile Pedestal

Plinth base mobile pedestal can be positioned anywhere storage is needed. Wood and laminate models are available.
Tip: The mobile pedestal is not available in leg base storage.
► Specifying, page 400

Square edge is 1 mm plastic on a laminate case or 0.5 mm veneer on a wood case. There are no other edge profile options.

Top is wood on a wood case or laminate on a laminate case. Cushion top is available as an option.

Sides and back are finished with wood or laminate.

Casters are hidden. They are non-locking, dual-wheel, swivel 360 degrees, and allow the plinth base pedestal to move easily.

Face lock allows mobile pedestals to be locked. Locks are standard keyed random.
► Lock and Keying, page 578

Pulls are available in eight styles.

Product Details

Plinth base mobile pedestal fits under a 29"H worksurface.

Top edge aligns with the face of the drawer.

Drawers on mobile pedestals align with drawers on underworksurface plinth base pedestal and 1.5 high storage.

Standard drawers have five-ply maple construction with sanded dovetail joinery.

Optional drawers feature miter fold polypropylene drawers.

Box drawers include one divider per drawer and one plastic pencil tray.

Tip: There is no mobile pedestal in leg base storage.

Actual Dimensions

Depth 22³/₄"*

Width 15¹/₂"

Height 23"

*Pedestal cushion is 22³/₄"D.

File drawers are equipped with a fastened metal filing system for legal- and letter-size filing.

One-High Open Plinth Base Pedestals and Common Tops for Ology Application

One-High open plinth base pedestal and common top for Ology application

seamlessly integrate the Ology desk into Elective Elements. They provide a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with this open storage configuration.

► Specifying, pages 383 and 384

Tip: Use Elective Elements worksurface with Ology base to have a complete Elective Elements aesthetic.

Tip: In applications with two back-to-back Open Ped for Ology are found, the filler panel may be used when no proud back is desired.

Product Details

Pedestal Base

3" Base

Removable interior cover provides access to power outlets that can be located in the panel behind storage unit.

Base widths and Ology foot:

- 24"W Ology base units can house Ology legs 24" in length.
- 30"W Ology base units can house Ology legs of 24" or 30" in length.
- 36"W and 42"W units can house Ology legs of 24", 30", or 36" in length.

Integrated leg options apply to One-High units only and are meant for use with Ology height-adjustable desks only.

Ology desk with integrated storage must be specified with modular widths only. When optioned for parametric widths, integrated storage is not available.

Actual Dimensions

One-High Open Plinth Base Pedestal

Laminate top on pedestal and common top

- Laminate
- Open Line laminate (option)

Edges on pedestal and common top

- Wood veneer
- Plastic

Wood veneer top on pedestal and common top

- Wood veneer—open pore finishes
- Full-fill (option) is available on wood veneer tops only.

Application Topics

Application: Ology left

Application: Ology right

Application is determined by which leg of the Ology base is located inside the pedestal.

Modesty panels and Universal privacy/modesty screens must be undersized and justified to the outside of the common top when used with pedestal.

Common top for Ology applications, ordered separately, is available in laminate or veneer. Cut-out for Ology leg is available on the left side or the right side of the common top. Ology desk cannot be placed in the middle of the common top.

To help avoid pinch points, the pedestal for Ology application extends 1" past the back of the common top.

When specifying One-High storage that matches the worksurface depth, only One-High storage should be placed adjacent to the desk.

Pinch point clearances are not maintained when 1.5-High or taller storage is used adjacent to One-High integrated storage that matches the worksurface depth.

When used with One-High integrated storage, screens used in the modesty position must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

Soft edge and power and data access door can be positioned left or right on Ology desks that are 64"W or wider for use with One-High integrated storage.

Worksurface overhang can be positioned left or right on desks that are 70" wide or wider.

Ology 90° corners that are 70" wide and wider can be used with One-High storage unit.

Ology 120° corners that are 52" wide and wider can be used with One-High storage unit.

Leg Base Lateral Files

Freestanding

Leg base lateral files are freestanding and provide additional storage in an office. Wood and laminate models are available.

Leg Base Storage—Leg Logic

Rules

The style number can include up to two components, including closed and open storage.

1. The first two characters will always be an abbreviation of the product line: E6 (Elective Elements).
2. The third character will always be an abbreviation of the product class: C (leg base storage credenza).
3. The following set of numerical characters follow depth width sequence:
Depth: 18 or 24
Width: 15 to 72 (in 6" increments)
4. Remaining spaces are used to indicate the suffix used to support storage components.
(See chart below for a list of suffixes.)

Credenza Storage Components

Suffix	Depth	Width	Height	Suffix Description
M	18"	30"	21½"	File Pedestal
N	24"	30"	21½"	File Pedestal
O	24"	30"	21½"	Open Pedestal
P	18"	36"	21½"	File Pedestal
Q	24"	36"	21½"	File Pedestal
R	24"	36"	21½"	Open Pedestal
C	18"	30"	27½"	Box/Lateral File
U	18"	30"	27½"	Open/Lateral File
F	18"	30"	27½"	Open Pedestal
H	18"	30"	27½"	Hinged Door Cabinet
K	18"	36"	27½"	Box/File Pedestal

Suffix	Depth	Width	Height	Suffix Description
V	18"	36"	27½"	Open/Lateral File
S	18"	36"	27½"	Open Pedestal
T	18"	36"	27½"	Hinged Door Cabinet
A	24"	15"	27½"	Box/File Pedestal
B	24"	18"	27½"	Box/File Pedestal
D	24"	30"	27½"	Box/Lateral File
E	24"	30"	27½"	Open Pedestal
G	24"	30"	27½"	Hinged Door Cabinet
I	24"	36"	27½"	Box/Lateral File
J	24"	36"	27½"	Open Pedestal
L	24"	36"	27½"	Hinged Door Cabinet

Leg base credenzas are made up of two storage components.

Tip: Leg base credenzas are specified with unique suffixes representing storage components.

Full storage leg base credenzas ship assembled from the factory up to 72"W without tops. A credenza with more than one worksurface or cushion top must have an extra set of storage legs at the seam. The worksurface must be ordered separately. The worksurface must be at least as long as the credenza, unless a cushion top is used.

Tip: Storage legs are attached in the field to prevent damage.

Tip: If desired, storage legs may replace the understorage brace under a three component credenza.

Tip: The unit will ship with the standard understorage brace and the additional storage legs must be ordered separately. In this case, the brace may be recycled.

Leg base credenzas offer a matching veneer face across all storage components within the credenza.

Leg base credenzas of equal depth can be joined to other leg base units in the field with the use of suspension/ganging hardware kit (ordered separately), and shared storage legs.

Leg base credenzas are best used when:

- Dense storage is the not the driving force for the user or setting. Leg base storage offers onefewer box drawer than comparable height plinth base storage.
- A lighter scale aesthetic is preferred, especially in an open plan.
- A single back panel is preferred, or when it is preferable for seams to not be visible on the side of the unit. An inset back panel allows seams to be seen on the back-side of the credenza versus the side.

Individual Credenzas

Individual credenzas are made up of two storage components, available in varying widths and heights. The smallest credenza available is 30"W, and the widest is 72"W.

This drawing shows three individual units side by side and not ganged.

Tip: Each unit has four storage legs.

Leg base storage are single storage units available in depths of 18"D and 24"D and widths sizes of 15"W, 18"W, 30"W, and 36"W. Pedestals are available for leg base applications, when a larger assembled credenza is not a feasible option, or not needed.

Tip: When ordering single 21½"H or 27½"H storage units through SmartTools, see leg base credenzas.

Tip: These individual units can share a leg at each seam if ganged later in the field. Remember to order a suspension/ganging hardware kit.

To create larger width credenzas, multiple single units can be ganged together with a shared leg at each seam.

Back-to-back 18"D credenzas may share a 36"D worksurface.

Tip: If individual units are ganged later, the exteriors of the units will be defaced.

Leg base credenzas 72"W and smaller have four storage legs that attach at the corners of the unit. Exceptions include certain combinations, such as a 72"W credenza with two 18"W box/file components and a 36"W box/file with a cushion top. Any time a cushion top is added, a storage leg must be added at the seam.

If a full worksurface spans the entire credenza, a cushion may be added to the top of the worksurface without adding additional legs at the storage seam.

Tip: If a cushion is placed over two 15"W or two 18"W components without a worksurface, then storage legs are required at the seam of the components.

Storage legs may be shared at the seam of a cushion between two units.

Sharing Storage Legs within a Leg Base Credenza

Leg base storage or credenza build ups larger than 72"W must share a storage leg at the seam of one of the interior storage components. The largest segment of the credenza will be supported by an under-storage brace, while the smaller unit will be supported by an extra set of storage legs.

Tip: The brace and storage legs can be moved to accommodate floor vents or aesthetic views. If the storage leg moves to support a component that is already braced, the brace must move to maintain the stability of the unsupported structure.

An under-storage brace is required any time a storage leg is not used at the storage component seam within a leg base credenza.

A support to the floor must always be within 6" from the end of the worksurface.

Ganging Different Height Leg Base Storage Products

Ganging of leg base storage products is allowed when:

- All storage units are of the same depth.
- A storage leg is shared when storage components change heights.

Tip: The two units sharing storage legs must be the same depth although heights are different.

Tip: The default position of the shared storage leg plate is attached under low storage if heights vary.

- A storage leg is used to support the seam where a break in the top or back occurs.
- All storage units sharing storage legs are facing the same or opposite direction.

Tip: It is not allowed to share legs in back-to-back condition because the storage legs are for side-to-side use only. Additionally, in a back-to-back setting, the reveals will not fit, and would collide with the side-to-side under storage brace.

- A shared leg is used at the point of ganging. For example, a leg base credenza and a leg base tower are able to share a leg at the point of connection. In addition, the suspension/ganging hardware kit must be used to connect the two units.

Ganging Different Height Leg Base Storage Products

Ganging of leg base storage products is allowed when:

- All storage units are of the same depth.
- A storage leg is shared when storage components change heights.

Tip: The two units sharing storage legs must be the same depth although heights are different.

Tip: The default position of the shared storage leg plate is attached under low storage if heights vary.

- A storage leg is used to support the seam where a break in the top or back occurs.
- All storage units sharing storage legs are facing the same or opposite direction.

Tip: It is not allowed to share legs in back-to-back condition because the storage legs are for side-to-side use only. Additionally, in a back-to-back setting, the reveals will not fit, and would collide with the side-to-side under storage brace.

- A shared leg is used at the point of ganging. For example, a leg base credenza and a leg base tower are able to share a leg at the point of connection. In addition, the suspension/ganging hardware kit must be used to connect the two units.

Routing Power in Credenzas

Specifying the Technology Trough in Various Credenza Situations:

LH option applied

RH option applied

Both option applied

Storage components with full storage

- Cut-out option applies to the outermost ends/sides of a storage component. Inside panels of a storage have a cut-out as standard.

Tip: Hinged door cabinets cannot accept technology cut-outs or technology zone due to regulation concern.

Leg Base 21½"H Credenzas

21½"H credenzas feature two specifiable storage positions.
► Specifying, pages 472–474

Assembled credenzas do not include a top. Straight worksurfaces are ordered separately and installed in the field. The worksurface must be at least as wide as the credenza it covers.
Tip: Technology troughs are not available in 21½"H storage credenzas.

Wood veneer is matched across storage fronts in assembled credenzas.

Storage leg is 8¾"H and is used to support and elevate the entire unit.

Storage legs ship unattached.

Back panel is inset and spans the entire width of the unit. Seams are visible from the back of the unit. An optional finished inset back panel provides a clean aesthetic.

Product Details

Square

Blade

Worksurface edge aligns with the face of the drawer if square worksurface edge profile is selected. If the blade edge profile is selected, the bottom corner of the blade edge aligns with the drawer front.
Tip: This alignment causes the blade edge profile to protrude 2¹⁄₈" beyond an adjacent tower or vertical cabinet.

Heavy duty steel, telescoping slides are standard on all drawers. Slides are full extension on both box and file drawers. At full extension, entire space within the drawer is accessible.

Drawers have five-ply maple construction with sanded dovetail joinery.
Tip: Miter fold drawer option is not available on leg base storage.

Actual Dimensions

Depth	18" or 24"
Width	30", 36", 60", or 72"
Height	21½"

File drawers are equipped with a fastened metal filing system. File capacities vary. ▶ Page 216

Integral

Beam

Inset

Pulls are available in seven different styles to provide design options that range from conventional to progressive.

Tip: Integral pull is not available on laminate or composite fronts.

▶ Page 238

One pull per drawer is standard.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

▶ *Lock and Keying*, page 578

Wood veneer grain direction runs vertically on leg base storage. *Exception: Wood veneer grain direction runs horizontally on the mitered base of bookcases.*

▶ Page 247

Counterweights are shipped with all leg base storage for field installation to insure stability. *Tip: In certain applications, counterweights may not be needed and can be optioned out at specification. Exception: Counterweights are always needed in 18"D pedestals.*

Cushion top is optional on leg base 21½"H storage. It replaces a wood or laminate top. Cushion top ships separately.

▶ Page 316

Tip: If used with an open unit, the cushion will overhang the front by ¾".

Cushion top is only available in 30"W or 36"W. Multiple cushion tops can be attached to a credenza. A set of storage legs is required at each seam or break in the top (additional storage legs ordered separately).

Tip: When a cushion top is selected on an open unit, a worksurface must be specified along with the cushion top. If a file unit is selected, a cushion top is specifiable without an extra worksurface.

If a full worksurface spans the entire credenza, a cushion may be added to the top of the worksurface without adding additional legs at the storage seam.

Tip: If a cushion is placed over two 15"W or two 18"W components without a worksurface, then storage legs are required at the seam of the components.

Connections

Full Storage

Credenzas are available in widths from 30"W to 72"W.

Storage credenzas offer multiple selections of storage in different widths, including:

- 30"W or 36"W Lateral File
- 30"W or 36"W Open Unit

Top on credenza is open to attach under a worksurface. Order worksurface separately. Elective Elements straight worksurfaces are recommended.

Inset back panels are standard on assembled leg base storage credenzas, but a finished wood option is available for veneer credenzas. Finished laminate back panels are standard on laminate credenzas.

Inset back panels span the entire width of the credenza. Seams are visible on the back side of the unit.

Sharing Storage Legs

Shared storage legs are optional:

- When a credenza and another leg base storage unit are the same depth.
- If the units sharing the storage leg are facing the same direction.

Tip: Multiple singular leg base storage units can be ganged together in the field and share a leg to reach larger widths.

Default position of shared storage legs is under the taller leg base storage unit, with the storage leg plate supporting the smaller unit.

An extra set of storage legs is supplied when:

- A credenza is ganged to another leg base storage unit of the same depth. The default position is the storage leg under the taller unit, and the storage leg plate under the credenza.
- A change in height occurs in two ganged leg base storage units.

Storage legs ship unattached.

Suspension/ganging kits link the credenza and tower.

▶ Page 536

When routing power cables through a leg base 27½"H credenza, use the scallop in the bottom panel and a power shroud to hide cords exiting the unit.

Surface Materials

Leg base 21½"H credenzas

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Tip: Wood veneer is matched across storage fronts in assembled leg base credenzas.

Tip: When an integral pull is specified with a 9250 Ember Chrome lock, the lock housing is black, and when a 9201 Polished Chrome lock is specified, the lock housing is nickel.

Cushion top

- Fabric
- Leather

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent: Connect
- Elmosoft Leather
- Foundation
- Gaja
- Leather
- Stand In
- Select Surfaces leather
- Vinyl

Cushion top will be manufactured in a two seam pattern on all standard upholstery not listed under the four seam pattern. All COMs including pattern or textured leather and vinyl, will be manufactured in a two seam pattern.

Tip: When more than one worksurface or cushion top is used on a credenza, an extra set of storage leg is needed at the seam where the worksurfaces meet.

If a full worksurface spans the entire credenza, a cushion may be added to the top of the worksurface without adding additional legs at the storage seam.

Tip: If a cushion is placed over two 15"W or two 18"W components without a worksurface, then storage legs are required at the seam of the components.

Shipping

Leg base credenzas

ship from the factory with the components assembled: back panel, under-storage brace, and storage components. Storage legs are included to be attached in the field.

Leg Base 27½"H Credenzas

27½"H credenzas feature two specifiable storage positions, selected from left to right.

► Specifying, pages 476–482

Wood veneer is matched across storage fronts in assembled credenzas.

Optional technology trough routes power and data through 27½"H credenza storage.

Tip: A power shroud is recommended to route power from a leg base 27½"H credenza to the floor.

Storage leg is 8¾"H and is used to support and elevate the entire unit.

Storage legs ship unattached.

Back panel is inset and spans the entire width of the unit. Seams are visible from the back of the unit. An optional finished inset back panel provides a clean aesthetic.

Power shroud manages wires and cables exiting the bottom of each leg base component to the floor. It accommodates two standard whips.

Actual Dimensions

Beam

Inset

Pulls are available in seven different styles to provide design options that range from conventional to progressive.

Tip: Integral pull is not available on laminate or composite fronts.

► Page 238

One pull per drawer is standard.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

► Lock and Keying, page 578

Wood veneer grain direction

runs vertically on leg base storage. *Exception: Wood veneer grain direction runs horizontally on the mitered base of bookcases.*

► Page 247

Counterweights are shipped with all leg base storage for field installation to insure stability.

Tip: In certain applications, counterweights may not be needed and can be optioned out at specification.

Exception: Counterweights are always needed in 18 1/4"D pedestals.

Cushion top is optional on leg base 27 1/2"H storage. It replaces a wood or laminate top. Cushion top ships separately.

► Page 316

Tip: If used with an open unit, the cushion will overhang the front by 3/4".

Cushion top is only available in 30"W or 36"W. Multiple cushion tops can be attached to a credenza. A set of storage legs is required at each seam or break in the top (additional storage legs ordered separately).

If a full worksurface spans the entire credenza,

a cushion may be added to the top of the worksurface without adding additional legs at the storage seam.

Tip: If a cushion is placed over two 15"W or two 18"W components without a worksurface, then storage legs are required at the seam of the components.

Connections

Full Storage

Credenzas are available in widths from 15"W to 72"W. *Tip: Credenzas can be built up to widths larger than 72" by ordering multiple units to the desired width and using a shared leg.*

Storage credenzas

offer multiple selections of storage in different widths, including:

- 30"W or 36"W Box/Lateral File
- 30"W or 36"W Open/Lateral File
- Tip: Only available in 18"D.*
- 30"W or 36"W Open Unit
- 30"W or 36"W Hinged Door Cabinet

Top on credenza is open to attach under a worksurface. Order worksurface separately. Elective Elements straight worksurfaces are recommended.

Technology trough is optional.

Tip: Hinged door cabinets are not allowed to accept technology. Fire code restrictions require continual access to a locked unit.

Unfinished inset back panels are standard on assembled leg base storage credenzas, but a finished option, in laminate or wood, is available.

Inset back panels span the entire width of the credenza. Seams are visible on the back side of the unit.

Storage legs support credenzas in a set of four up to 72"W.

Under storage brace spans the largest set of storage components. If storage is all equal widths the brace will be placed on the left hand side of the credenza.

Sharing Storage Legs

Shared storage legs are optional:

- When a credenza and another leg base storage unit are the same depth.
- If the units sharing the storage leg are facing the same direction.

Default position of shared storage legs is under the taller leg base storage unit, with the storage leg plate supporting the smaller unit.

An extra set of storage legs is supplied when:

- A credenza is ganged to another leg base storage unit of the same depth. The default position is the storage leg under the taller unit, and the storage leg plate under the credenza.
- A change in height occurs in two ganged leg base storage units.

Storage legs must attach on the ends of a unit, and on the interior unit that is not supported by an under storage brace.

Storage legs ship unattached.

Suspension/ganging kits link the credenza and tower.

► Page 536

Wiring & Cabling

Technology zone can span between two leg base 27¹/₂"H storage units when cut-outs are specified.

Technology trough houses technology zones and route power and data. Refer to understanding electrical.

Tip: A leg base 27¹/₂"H hinged door cabinet cannot accept power due to regulation constraints.

Cut-outs available in right, left, and both right and left positions. Also available with no cut-outs if not needed for power routing.

Metal shelves extend completely to rear of unit (leg base) to provide support. *Tip: Cable routing must be field cut in these units.*

Optional cable access cover is available to cover cut-out if desired. Cover is 8043 Clear Anodized Aluminum. ► Page 399

Power can feed into channel from a Montage panel by field-cutting a hole in the Montage skin.

Tip: Specify Montage panels with modified open base to facilitate vertical routing of power when not at junction.

Technology trough has 3 cut-outs to facilitate cable routing. (Top view shown)

Cables can route directly into the technology trough from the lower portion of an open unit.

Power shroud is used to conceal the wires from a technology trough as they exit the unit and reach the floor of leg base storage unit.

Tip: Technology troughs are available in all 24"D storage or open/file 18"D storage, only in 27¹/₂"H credenzas.

Power shroud holds up to two standard power and data whips.

Power shroud is available in three paint colors to blend into the surroundings rather than draw attention to power exiting the leg base credenza.

Surface Materials

Tip: When an integral pull is specified with a 9250 Ember Chrome lock, the lock housing is black, and when a 9201 Polished Chrome lock is specified, the lock housing is nickel.

Cushion top

- Fabric
- Leather

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:

- Brisa
- Buzz2
- Cogent: Connect
- Elmosoft Leather
- Foundation
- Gaja
- Leather
- Stand In
- Select Surfaces leather
- Vinyl

Cushion top will be manufactured in a two seam pattern on all standard upholstery not listed under the four seam pattern. All COMs including pattern or textured leather and vinyl, will be manufactured in a two seam pattern.

Tip: When more than one worksurface or cushion top is used on a credenza, an extra set of storage legs is needed at the seam where the worksurfaces meet.

If a full worksurface spans the entire credenza, a cushion

may be added to the top of the worksurface without adding additional legs at the storage seam.

Tip: If a cushion is placed over two 15"W or two 18"W components without a worksurface, then storage legs are required at the seam of the components.

Shipping

Leg base credenzas

ship from the factory with the components assembled: back panel, under-storage brace, and storage components. Storage legs are included to be attached and units ganged in the field.

File Surround

For Use with Universal Storage

File surrounds are used to encase storage units to provide a seamless, finished look in laminate or veneer. A top, back panel, and end panels come together to wrap the storage units. They are available in a variety of configurations and parametric sizes that surround Universal Storage.

► Specifying, page 414

► Please see SmartTools for complete specification and pricing.

Available in laminate or veneer.

Storage units must be ordered separately.

► See *Storage Specification Guide*.

Tops, end panels, and back panels are 1½" thick.

Open spaces are allowed in a variety of configurations.

Product Details

SmartTools must be used to order the file surround to ensure correct configuration, fit, and alignment.

Multiple configurations

are available with the file surround. This includes surrounding a single row or back-to-back storage units with or without open spaces. Open spaces are allowed between storage units or on the ends of storage units.

Storage units

must be placed under the file surround and are ordered separately. Universal storage units pair with the file surround.

► See *Storage Specification Guide*.

File surrounds allow for each edge profile on the top to be specified- profile A, profile B, profile C, and profile D. Wood veneer worksurfaces can have a 3 mm wood square edge or .5 mm veneer edge. Laminate worksurfaces can have a 3 mm, 1 mm plastic square edge or a 3 mm wood square edge.

If a 3 mm wood square edge is specified on a laminate file surround top, all remaining sides will be a 1 mm plastic square edge.

► See edge matrix page 52

Actual Dimensions

File Surround

	Outside Dimensions	Inside Dimensions
Depth	15.3125"–59.9375"	15"–58¼"
Width	16.5490"–361.4105"	15"–358⅝"
Height	17.4310"–67.2900"	16"–65⅝"
Thickness	1½"	1½"

Tip: Maximum height dimension is 67.2900" without a back panel applied. With a back panel, maximum planned height must be no greater than 60½".

.5 mm or 1 mm square edge

3 mm square edge

File surround top edges that are a 1 mm plastic or .5 mm wood veneer square edge will align with the face of the storage unit. A 3 mm plastic or wood veneer square edge band will overhang the face of the storage unit by 3 mm. To ensure a tight fit and connection with the wall or adjacent storage, a 1 mm plastic or .5 mm wood square edge is recommended for all sides or sides B, C, and D.

Sectioned tops are optional based on the width of the top. One section top is allowed between 15"W–120"W, two sections are allowed between 96 1/16"W–240"W, three sections are allowed between 192 1/16"W–360"W, and four sections are allowed between 288 1/16"W–360"W.
Tip: A singular top is considered one section.

Tip: When two, three, or four sections are specified, the top will be split into sections equal in width.

End panels are specifiable on the left side, right side, or both.

One end panel is only allowed when storage is placed on the end of the file surround that does not have the end panel.

Inset at 0"

Proud

-4" Inset

Back panel inset distance is based off the depth of the file surround. The max distance a back panel can be inset is equal to the depth of the file surround less four inches. The inset distance starts at the back of the file surround. An inset distance of 0" will create a file surround where the seams of the top, back panel and end panels are visible from the back of the unit.

Unsupported open spaces are allowed in the middle or ends of the file surround. Open spaces in the middle or end of the file surround can be up to 60"W without a worksurface brace, and up to 90"W with a worksurface brace. Open spaces on the ends of the file surround must be supported with a back panel and end panel.

Grain direction on the top is available in long or short grain on wood veneer tops and only available in long grain direction on laminate tops. If the width is greater than 120", long grain direction is not available on wood veneer tops.

Grain direction on end panels is available in horizontal or vertical grain.
Tip: Laminate grain direction must be vertical if the height greater than 60".

Grain direction on back panels will always have horizontal grain direction.

Woodgrain laminate sectioned tops will not be grain matched over 120"W. Please refer to specials if grain matching is desired on woodgrain laminate sectioned tops greater than 120"W.

The recommended grain direction on the file surround includes long grain direction on the top and vertical grain direction on the end panels. This creates the waterfall look.

Connections

Worksurface braces are required for unsupported open spaces greater than 60"W and up to 90"W.

Attachment hardware is included with the file surround. To attach to storage, the attachment hardware is included with the storage units.

Plinth Base Freestanding Bookcases

Freestanding bookcases provide shelf storage within a workstation, private office, or common area. They are available with or without doors.
► Specifying, page 418

Case has a wood core with a wood or laminate surface.
Back panel is standard inset and finished on 45"H and 65⁵/₈"H veneer bookcases. 72¹/₂"H and 77¹/₂"H veneer bookcases are standard with an unfinished back. All size laminate bookcases have a finished back.

Sides are finished.

Leveling glides adjust for installations on uneven floors. Adjustability range is 1¹/₄".

Inset top is finished.

Adjustable shelves are finished on both sides and can be positioned in increments of 1¹/₄" to meet needs. Shelves are available in wood, laminate, or metal.
Tip: It is recommended to flip the wood or laminate shelf annually in the open bookcase.

Fixed shelf provides structural stability. Shelves are available in wood, laminate, or metal.

Interior is finished.

Base is mitered on the front edge.

F= Fixed Shelf

Product Details

Freestanding bookcase heights will align with tower, vertical cabinet, and panel heights.
► See *Height Matrix*, page 14, for alignment with other components.

Shelves are standard 3³/₄" thick. Thicker 1¹/₈" shelves are available for heavy load conditions as an option.
Tip: Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load or metal shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

Tip: Metal shelves can be used in place of heavy load shelves.

Doors, when selected, sit proud on the bookcase. Wood and laminate doors feature soft-close hinges.

Actual Dimensions

Open Freestanding Bookcases

Depth	15"
Width	24", 30", or 36"
Height	45", 65 ⁵ / ₈ ", 72 ¹ / ₂ ", or 77 ¹ / ₂ "

Freestanding Bookcases with Doors

Depth	15 ⁷ / ₈ "
Width	24", 30", or 36"
Height	45", 65 ⁵ / ₈ ", 72 ¹ / ₂ ", or 77 ¹ / ₂ "

Double-doors on all freestanding bookcases open from the center out. One door has a right hinge and the other door has a left hinge.

Glass doors are available. They are equipped with a magnetic touch latch and do not have pulls. Dry erase markers can be used on glass doors with the exception of mirrored glass. The textured surface of the mirrored glass does not promote full erasure.

Tip: When cleaning the glass, for best results, pour alcohol on a Magic Eraser, not directly on the glass.

Wipe with dry towel. Take care that the frame and inside backer do not come into contact with the alcohol or the appearance could be compromised.

Bookcases are available with toe kick or full front.

Contemporary

Storage Capacities

► Page 216

Tip: It is recommended that 72"H and 77"H freestanding bookcases be placed against a wall.

Leg Base Freestanding Bookcases

Leg base freestanding bookcases provide shelf storage within a workstation, private office, or common area. They are available with or without doors.

► Specifying, page 484

Tip: Ganging units together requires defacing the exterior of each unit.

Tip: A leg base bookcase and a leg base high pedestal may be ganged together with a suspension/ganging kit and share storage legs, if placed against a wall.

Case has a wood core with a wood or laminate surface.

Back panel is standard inset and finished on 45"H veneer bookcases. 65 $\frac{5}{8}$ " and 72 $\frac{1}{2}$ "H veneer bookcases are standard with an unfinished back. All size laminate bookcases have a finished back.

Sides are finished.

Leveling glides adjust for installations on uneven floors. Adjustability range is 1 $\frac{1}{4}$ ".

Fixed shelf provides structural stability. Shelves are available in wood, laminate, or metal.

Interior is finished.

Reveals finish the bottom sides of a leg base case and are installed from front to back between the storage legs.

Storage legs are 8 $\frac{3}{4}$ " high.

Tip: Leg base bookcases can share storage legs side to side with a suspension/ganging hardware kit.

Inset top is finished.

Adjustable shelves are finished on both sides and can be positioned in increments of 1 $\frac{1}{4}$ " to meet needs. Shelves are available in wood, laminate, or metal.
Tip: It is recommended to flip the wood or laminate shelf annually in the open bookcase.

Freestanding Bookcase

Freestanding Bookcase without Doors

F = Fixed Shelf

Product Details

Freestanding bookcase heights will align with tower, vertical cabinet, and panel heights.
► See *Height Matrix*, page 15, for alignment with other components.

Shelves are standard $\frac{3}{4}$ " thick. Thicker 1 $\frac{1}{8}$ " shelves are available for heavy load conditions as an option. Metal shelves are $\frac{3}{4}$ " thick and are available as an alternative for the 1 $\frac{1}{8}$ " heavy load shelf.
Tip: Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load or metal shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

Doors, when selected, sit proud on the bookcase. Wood and laminate doors feature soft-close hinges. Glass door option also available.

Actual Dimensions

Leg Base Open Freestanding Bookcases

Depth	15"
Width	30" or 36"
Height	45", 65 $\frac{5}{8}$ ", or 72 $\frac{1}{2}$ "

Leg Base Freestanding Bookcases with Doors

Depth	15 $\frac{7}{8}$ "
Width	30" or 36"
Height	45", 65 $\frac{5}{8}$ ", or 72 $\frac{1}{2}$ "

Double-doors on all freestanding bookcases open from the center out. One door has a right hinge and the other door has a left hinge.

Glass doors are available. They are equipped with a magnetic touch latch and do not have pulls. Dry erase markers can be used on glass doors with the exception of mirrored glass. The textured surface of the mirrored glass does not promote full erasure.

Leg base freestanding bookcases may share storage legs if ganged together with the suspension/ganging hardware kit.

Ganging units together requires defacing the exterior of each unit.

Tip: A leg base bookcase and a leg base high pedestal maybe ganged together and share storage legs, if placed against a wall.

Plinth Base Towers, Vertical Cabinets, and Cabinets

Towers and vertical cabinets are available with a variety of sizes and configuration options to provide file, shelf, or cabinet space. Full cabinet units are also available. They can stand alone or support overhead storage.
► Specifying, page 432

Back panel is standard inset and finished on 45"H, 55¼"H, 65⅝"H, and 72½"H veneer towers, vertical cabinets, and cabinets. The 77½"H veneer towers, vertical cabinets, and cabinet are standard with an unfinished back. All size laminate towers, vertical cabinets, and cabinets have a finished back.

Adjustable wood or laminate shelf is finished on both sides and can be reconfigured to meet needs. All units have at least one adjustable shelf.

Case has a wood core with a wood or laminate surface.

Towers, vertical cabinets, and cabinets with box drawers have no dividers.

Top and sides are finished for use in any office application.

Doors sit proud on the case and are handed for left- or right-hand applications.

Pulls must be specified and are available in eight styles.

Rails are standard in file drawers. File capacities vary.
► Page 216

Leveling glides adjust for installations on uneven floors. Adjustability range is 1¼".

Tip: Shelves will not sit flush to the side panel.

Actual Dimensions

Glass doors are available.

They are equipped with a magnetic touch latch and do not lock or have door pulls.

Dry erase markers can be used on glass doors with the exception of mirrored glass. The textured surface of the mirrored glass does not promote full erasure.

Tip: On 24"W towers specified with glass door, only the 15"W door will be glass. The cabinet door will be wood or laminate.

Cabinet is available on 24"W towers only. The door is always 8 1/2"W and it is not available with glass. It is equipped with two coat hooks.

12"W personal cabinets have two interior hooks on each side of the interior of the cabinet.

Tip: 12"W personal cabinets must be attached to an adjacent pedestal or end panel for stability.

One pull per wood or laminate door or drawer is standard. Glass doors are equipped with magnetic touch latches and do not have pulls.

Hinged glass doors open 110°. *Exception: 30"W vertical cabinets with two doors are equipped with only one integral or beam pull that is located on the right door.*

Tip: If hangers are desired for use with 18"D towers or cabinets, petite hangers should be purchased.

Tip: Pencil trays do not come with towers.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options.

Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Exception: Door is not available with a lock when the glass option or an integral pull is specified. However, drawers with integral pulls will lock.

► Lock and Keying, page 578

On 24"W towers, only the cabinets door and drawers will lock. The 15"W door does not lock.

Exception: Door with the glass option or an integral pull does not lock. Drawers with integral pulls will lock.

Wood veneer grain direction runs vertically on towers and vertical cabinets.

► Page 247

Towers, vertical cabinets, and cabinets are available with toe kick or full front.

Towers, vertical cabinets, and cabinets feature side over top construction for all heights.

Connections

Overhead storage can span between two towers (or vertical cabinets) or it can be attached to the side of one tower (or vertical cabinet) and be supported with a one-sided hutch kit on the other end. Specify a suspension/ganging hardware kit separately.

A single-high overhead or shelf can be supported by a tower, cabinet, or vertical cabinet and be supported with a single side support frame on the other end.

Organizer and open shelves can span between two towers or vertical cabinets.
Tip: Open shelves are not recommended for use as bookshelves.

A single side support can be used to suspend an organizer shelf with a 45"H or 55"H tower in an open plan setting.

15\"D straight or L-shape end panel can be used to support a worksurface that is next to and attached to the tower, vertical cabinet, or cabinets. The storage unit and end panel will be defaced when installed. Use a full-depth end panel if attachment to the storage unit is not desired.

Application Topics

Storage Capacities

► Page 216

Counterweights are required on select towers when used in a freestanding application. Tower configurations with a counterweight option include 55 $\frac{1}{4}$ "H towers with a cabinet, door, and drawers; 65 $\frac{5}{8}$ "H and 72 $\frac{1}{2}$ "H towers with two file drawers and door; 65 $\frac{5}{8}$ "H tower with one box and two file drawers.

Counterweights are not required when towers are tethered to the wall or ganged to adjacent storage.

Cabinets 15\"W and 65 $\frac{5}{8}$ \"H and taller must be attached to adjacent storage to ensure stability and prevent tipping over. If attaching to other cabinets:

- 65 $\frac{5}{8}$ \"H cabinets must be attached to two other cabinets, totaling a run of three cabinets.
- 72 $\frac{1}{2}$ \"H or 77 $\frac{1}{2}$ \"H cabinets must be attached to three other cabinets, totaling a run of four cabinets.

Leg Base Towers and Cabinets

Towers are available with a variety of sizes and configuration options to provide file, shelf, or cabinet space. Full cabinet units are also available. They can stand alone or support overhead storage.
 ▶ Specifying, pages 498–506

Back panel is standard inset and finished on 65⁵/₈"H and 72¹/₂"H towers and cabinet.

Adjustable wood or laminate shelf is finished on both sides and can be reconfigured to meet needs. All units have at least one adjustable shelf.
Tip: Shelves will not sit flush to the side panel.

Case has a wood core with a wood or laminate surface.

Leveling glides adjust for installations on uneven floors. Adjustability range is 1¹/₄".
Tip: Two towers may share storage legs side-to-side, if the same depth. A suspension/ganging kit is required for these towers to share storage legs.

Top and sides are finished for use in any office application.

Doors sit proud on the case and are handed for left- or right-hand applications.

Pulls must be specified and are available in eight styles.

Face lock allows doors and drawers to be locked. Locks are standard keyed random.
Tip: Wood doors with integral pulls and glass doors are not available with locks. However, drawers with integral pulls have locks.
 ▶ Lock and Keying, page 578

Cabinets are only available in 12"W personal size.
 ▶ Page 506
Tip: 12"W cabinet must be attached to building wall or adjacent furniture.

Storage legs are 8³/₄"H.

Height	15" or 22"

Single-High Overhead Cabinet with Sliding Door

Depth	15 ⁷ / ₈ "
Width	36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"
Height	15"

Single-High Overhead Cabinet with Open Storage Area

Depth	15"
Width	30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"
Height	15" or 22"

Double-High Overhead Cabinet

Depth	15" on open unit, 15 ⁷ / ₈ " on door unit
Width	60", 66", 72", 78", 84", 90", or 96"
Height	30"

*18"D only available on 15"H.

Product Details

Hinged doors, when selected, are all equal in width on the overhead cabinet.

30"W

36"W

42"W

48"W

54"W

60"W

66"W

72"W

78"W

84"W

90"W

96"W

One fixed divider on sliding door and open units is standard on 36"W, 42"W, 48"W, 54"W, 60"W, and 66"W overhead cabinets. The 84"W, 90"W, and 96"W overhead cabinets have three fixed dividers. The 72"W and 78"W sliding door units have one fixed divider and the open units have three fixed dividers. *Exception: The 30"W overhead cabinet does not have a divider.*

Hinged doors are available on single- and double-high overhead cabinets. Wood and laminate doors are equipped with soft-close hinges and are available with ADA open/close hinges. Glass doors feature self-close hinges and are available with ADA open/close hinges. They do not have pulls. Glass doors are available on double-high cabinets and single-high cabinets that are 60"W, 72"W, 90"W, and 96"W. Glass doors do not lock. Dry erase markers can be used on glass doors. The texture of mirrored glass does not promote full erasure.

Tip: Select the ADA opening/closing option when required. This option features a magnetic touch latch and neutral hinge.

Tip: When stacking single-high overhead cabinets with hinged doors, the ADA option should be selected.

Sliding door is available only on 15"H single-high overhead cabinets. It does not have a pull. Safety stops are positioned on both ends of the cabinet. The door covers half of the cabinet width. Dry erase markers can be used on glass doors. The texture of mirrored glass does not promote full erasure.

Single-high cabinets can be finished on the back by using a proud back panel. Insert back panels are also available on 15"H cabinets. When an insert is used, there will be a 3 mm reveal around all edges of the insert. Inserts are available in wood, laminate, or tackable fabric.

Locks are available factory- or field-installed on hinged doors. Factory-installed locks are keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Tip: Sliding doors and glass doors are not available with locks.

Tip: When specifying locks for double-high combination cabinets, only the tall door(s) will lock.

► **Lock and Keying**, page 578

Wood veneer grain direction runs vertically on overhead cabinets. Door faces have coordinating veneer grain.

► **Page 247**

Optional light valance is available to conceal task lighting if desired. A three-sided version is used for wall-mounted overhead cabinets. A single-sided version is used for cabinets mounted on hutch kits.

Optional light housing is available when the LED shelf light is used. The metal shield covers the light and can be specified with one, two, or three lights based on the width of the overhead cabinet.

Connections

Single-high overhead cabinets can be attached to a structural wall, supported by a hutch kit, suspended between towers or stacking bookcases, or supported by a hutch kit and a tower or stacking bookcase. Single-high cabinets can be stacked on each other using hutch kits or high pedestals with side support frames. *Tip: When specifying a single-high overhead cabinet supported by a hutch kit adjacent to a stacking bookcase, use a one support hutch kit and suspend the other end of the overhead from the bookcase. This will allow for precise alignment.*

Tip: 22"H overheads follow the same suspension rules as single-high (15"H) overheads.

A single side support frame can be used to support a single-high cabinet when the other end of the cabinet is attached to a stacking bookcase, tower, vertical cabinet, or cabinet.

15"H single-high cabinets up to 72"W can attach on-module to Privacy Wall solid wall panels. Cabinets larger than 72" cannot be accommodated.

15"H single-high cabinets up to 72"W can attach to Montage panels on-module with the back of the cabinet up against the panel using back-mount brackets. Cabinets greater than 72"W cannot be accommodated. Follow the Montage panel stability rules.

► See *Montage specification guide*.

Tip: Overhead cabinets cannot be attached using back-mount brackets to 45"H and 55"H Montage panels.

Tip: When mounting two or more cabinets side by side on Montage, Answer or Privacy Wall, ganging straps or cabinet-to-cabinet attachment kits are recommended.

15"H single-high overhead cabinets up to 48"W can attach on-module to Answer panels. Cabinets greater than 48"W cannot be accommodated. Elective Elements cabinets cannot be used on Answer stacking frames. Follow the Answer panel stability rules.

► See *Answer Solutions Specification Guide*.

Tip: End-mount brackets are not available for use with Answer panels.

When mounting two or more cabinets side by side to Answer panels, ganging brackets are required. If a worksurface seam is directly below where two cabinets come together, use suspension/ganging brackets on the worksurface as well. If additional rigidity is desired, use the Elective Elements cabinet-to-cabinet attachment kit.

Tip: 22"H single-high cabinets can not attach to Answer panels.

Double-high overhead cabinets can be attached to a structural wall, suspended between towers, or stacking bookcases supported by a hutch kit, or supported by a one-sided hutch kit and a tower.

Attachment hardware is available as an option to secure an overhead cabinet in a structural wall-mount or panel-mount application. Only 15"H single-high cabinets can be panel mounted. Hutch kits and suspension/ganging hardware kits are specified separately. Overhead cabinet is attached in the field.

Overhead storage cabinets are secured onto the attachment bracket to prevent accidental disengagement.

Overhead cabinets can attach so they align with tower, vertical cabinet, and panel heights.

► Page 14

Cabinet-to-cabinet attachment kits are used to provide alignment between overhead cabinets mounted side by side in a panel or wall-mounted application

Wiring & Cabling

Because the bottom of the cabinet is flush, a low-profile task light should be specified.

► See *Storage Specification Guide*.

Tip: Specify an optional valance to conceal task light if desired.

Tip: The LED shelf light can be used with the blade accessory shelf with or without overheads.

Surface Materials

Overhead cabinet

- Wood case with wood front
- Laminate case with same or contrasting laminate front
- Laminate case with wood front
- Customiz stain (option on wood)

Tip: When specifying all wood storage units, the case and front must be the same wood finish. When specifying all laminate storage units, the case and the front can be the same or contrasting finishes.

Door option on select models

- Glass

Glass door frame option

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum

Lock on hinged doors only

- 9201 Polished Chrome
- 9250 Ember Chrome

Attachment hardware

- Black paint only

Attachment end bracket for Montage panels

- 4798 Sterling Metallic
- 4799 Platinum Metallic
- 4710 Low Gloss Black

Application Topics

Storage Capacities

► Page 216

When used above a worksurface with adjustable-height legs, overhead cabinets should be suspended between towers or attached to a panel or wall. Misalignment with other free-standing components may result if overhead cabinets are used with a hutch kit on a worksurface with adjustable-height legs.

Anytime a hutch kit supports an overhead cabinet on a worksurface, an end panel or side panel of underworksurface storage unit must be used under the worksurface within 6" of where the side support frame is located.

When overhead cabinets are stacked in-line, the total length of the two overhead cabinets must exceed the worksurface length by at least 6" in order to overlap properly.
Tip: Overhead storage cannot be mounted on worksurfaces supported by slip-fit support(s).

When overhead cabinets are stacked perpendicular to each other, the lower overhead cabinet will be off-set 1 1/2" and pushed off of the 6" module. In this application, a longer worksurface must be used to support the lower overhead cabinet. Hutch kits used are the same width as the cabinets they support.

When overhead cabinets are used in a parallel stacking application, a one-sided hutch kit should support the overhead cabinet that is located on top. The hutch kit is the same width as the opening. The overhead cabinet located on the bottom should use a two-sided hutch kit of the same width.

Anytime a service module or hutch kit with cabinet or shelf is mounted on a worksurface with less than 30" of storage below or without attachment to other worksurfaces (freestanding shell), units must be positioned back-to-back or placed up against a wall. If a bridge or return is attached to the worksurface with the storage, the unit can be freestanding.

Overhead storage attached to an 18"D worksurface in a freestanding condition with no perpendicular worksurface must be used back-to-back or up against a wall.

Spanning two worksurfaces is possible when a hutch kit is used.

Tip: Do not attach hutch kit or side support frame to a worksurface edge with a profile.

Overhead storage cabinet can be shorter than the supporting worksurface as long as an end panel or underwork surface storage unit is used under the worksurface within 6" of where the side support frame or hutch kit is located.

When stacking multiple cabinets, organizer shelves and open shelves vertically using wall-mount brackets, plan for space between the units. A tight fit is difficult to achieve due to tolerances and variations in wall conditions.

Organizer, Open, Blade Accessory Shelf, Desktop Organizer, and Stacking Paper Organizer

For Use with Plinth Base and Leg Base Storage

Organizer, open, blade accessory shelf, desktop organizers, and stacking paper organizer

accommodate small-scale work tools and allow users to effectively arrange paper piles in their workspace.

► Specifying, page 529

Top is finished.

Interior is finished.

Case has a wood core with a wood or laminate surface.

Miter-folded back is featured on an open shelf.

Open shelf provides storage above or below the worksurface. Open shelf is not intended for heavy, bulk storage such as books.

Blade accessory shelf is available in multiple finishes.

Blade accessory shelf is available in 6" increments, spanning from 48" to 96" wide.

Product Details

Wood veneer grain direction runs lengthwise on the top and bottom of the shelves and runs vertically on the sides.

► Page 247

Optional light valance or metal light housing are available to conceal task lighting if desired. A three-sided valance version is used for wall-mounted shelves. A single-sided valance version is used for shelves mounted on hutch kits. A metal light housing conceals an energy saving LED shelf light.

Desktop organizer sits on a worksurface. The horizontal paper shelves are standard in metal.

Tip: When a vertical desktop organizer is used, there is not enough depth for both a tackboard and a standard light valance. Consider an LED shelf light with or without a metal light housing.

Tip: The vertical desktop organizer must be used under a shelf, service module, or overhead, even though it does not attach, to limit the weight placed on its shelves.

Actual Dimensions

Organizer Shelf

Depth	15"
Width	30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"
Height	7½"

Open Shelf

Depth	15"
Width	30", 36", 42", 48", 54", or 60"
Height	7½"

Stacking Paper Organizer

Depth	15"
Width	15"
Height	17¼"

Blade Accessory Shelf

Depth	14⅛"
Width	48", 54", 60", 66", 72", 78", 90", 96"
Height	3⅜"

Desktop Organizer—Vertical

Depth	12⅜"
Width	14⅜"
Height	18⅞"

Stacking Paper Organizer

Stacking paper organizer is used to support a single-high cabinet or shelf. The organizer must be attached to the cabinet or shelf and to the worksurface.

Tip: When used with a single-high cabinet over plinth base 1.5 high storage or leg base 21½"H storage, the height aligns with 55¼"H towers.

Tip: Two stacking paper organizers can be used to support a single-high overhead cabinet or shelf or one end can be supported by a 17¼" H side support frame.

Connections

Organizer and open shelves can be attached to a structural wall, supported by a hutch kit, suspended between towers or stacking bookcases, or supported by a hutch kit and a tower or stacking bookcase.

Tip: Open shelves are not rated for use as bookshelves.

A single side support frame can be used to support an organizer or open shelf when the other end of the shelf is attached to a stacking bookcase, tower, vertical cabinet, or cabinet.

Organizer and open shelves up to 72"W can attach on-module to Privacy Wall solid wall panels. Shelves larger than 72" cannot be accommodated.

Organizer and open shelves 72"W can attach to Montage panels on-module with the back of the cabinet up against the panel using back-mount brackets. Shelves greater than 72"W cannot be accommodated. Follow the Montage panel stability rules.

► See *Montage specification guide*.

Tip: Shelves cannot be attached using back-mount brackets to 45"H and 55"H Montage panels.

Organizer and open shelves up to 48"W can attach on-module to Answer panels. Shelves greater than 48"W cannot be accommodated. Elective Elements shelves cannot be used on Answer stacking frames. Follow the Answer panel stability rules.

► See *Answer Specification Guide*.

Tip: End-mount brackets are not available for use with Answer panels.

Blade accessory shelf can attach to the bottom of an overhead cabinet or open shelf. It accommodates stacks of papers or other small items. Attachment hardware is included.

► Page 528

Tip: Blade accessory shelves are dimensionally designed so that the end of the shelf lines up with the end of an overhead or sit inside a single support or two support hutch kit or side support. The blade accessory shelf is available for use with a 48"W, 60"W, 72"W, 84"W, or 96"W overhead cabinet.

Blade accessory shelf accommodates small-scale work tools and allows users to effectively arrange paper piles in their workspace.

Blade accessory shelves cannot be wall mounted unless under an overhead.

Tip: The blade accessory shelf width cannot exceed the length of the supporting product.

Tip: Select the LED shelf light with the metal light housing for a light under any blade accessory shelf.

Tip: Blade accessory shelf cannot be used with open hutch kit.

Tip: Two blade accessory shelves may be used next to one another under a wider overhead. However, due to construction, there may be some misalignment of the front edges of each shelf.

Organizer shelves can be finished on the back by using a proud back panel or by using an insert. When an insert is used, there will be a 3 mm reveal around all edges of the insert. Inserts are available in wood or laminate.

A single side support can be used to suspend an organizer shelf with a 45"H or 55"H tower in an open plan setting.

Wiring & Cabling

Because the bottom of the shelf is flush, a low-profile task light should be specified.

► See *Storage Specification Guide*.

LED shelf light can be field installed to the bottom of an overhead, a service module, an organizer, an open shelf, or a blade accessory shelf.

► See *LED shelf light*, page 563.

Blade accessory shelf wire management can fall behind a tackboard when used in conjunction with one another.

Surface Materials

Organizer shelf and open shelf

- Wood case
- Laminate case
- Customiz stain (option on wood)

Blade accessory shelf

- 4799 Platinum Metallic
- 4803 Near Black Metallic
- 7241 Arctic White

Attachment hardware for Montage panels

- 4798 Sterling Metallic
- 4799 Platinum Metallic
- 4710 Low Gloss Black

Application Topics

Storage Capacities

► Page 216

When stacking multiple cabinets, organizer shelves and open shelves vertically using wall-mount brackets, plan for space between the units. A tight fit is difficult to achieve due to tolerances and variations in wall conditions.

Tip: Open shelves are not recommended for use as bookshelves.

Hutch Kits, Open Hutch Kits, and Side Support Frames

For Use with Plinth Base and Leg Base Storage

Hutch kit includes side support frames and a tackboard.

► Specifying, page 532

Open hutch kits include two L-shaped side support frames.

► Specifying, page 534

Tackboard provides a fabric-covered tackable surface above the worksurface.

Hutch kit supports an overhead storage unit. Depending on the application, either one or two side support frames are included with each kit.

Open hutch kits do not require a back panel.

Backs of hutch kit tackboards are unfinished.

Actual Dimensions

Double-High Hutch Kits with Tackboard and Side Support Frame(s)

Depth	15"
Width	30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"
Height	15 ⁷ / ₁₆ "

Open Hutch Kits

Depth	15"
Width	7"
Height	7", 14 ¹ / ₂ ", 17 ¹ / ₄ ", or 21 ⁵ / ₈ "

Side Support Frames

Depth	15"
Width	7"
Height	6 ⁵ / ₈ ", 8 ¹ / ₂ ", or 21 ⁵ / ₈ "

Product Details

Side support provides an open support structure that works in front of a window or in other office situations where an open environment is desired. Applicable in plinth base or leg base settings.

18⁹/₁₆"H hutch kits are designed to be used with double-high overhead cabinets.
► See *Height Matrix*, page 14, for alignment with other components.

21⁵/₈"H hutch kits are designed to be used with single-high overhead cabinets.
► See *Height Matrix*, page 14, for alignment with other components.

Open hutch kits support single-high overheads and shelves.
► See *Height Matrix*, page 14, for alignment with other components.
Tip: Open hutch kits do not support double-high overhead cabinets.

A single side support can be used to suspend an organizer shelf with a 45"H or 55"H tower in an open plan setting.

Connections

Attachment hardware is standard with a hutch kit to secure the side support frames to the overhead storage unit and a worksurface in the field.

When a one-sided hutch kit is used with an overhead storage unit, the side support frame supports one side of the unit and a tower or wall must support the other side.
Tip: When specifying a single-high overhead cabinet supported by a hutch kit adjacent to a stacking bookcase, use a one support hutch kit and suspend the other end of the overhead from the bookcase. This will allow for precise alignment.

A single side support frame can be used to support a single-high cabinet or shelf when the other end is attached to a stacking bookcase, tower, vertical cabinet, or cabinet.

Tackboard on 18⁹/₁₆"H and 21⁵/₈"H hutch kits attach using brackets to the overhead cabinet or shelf and worksurface.

Square edge

Profile edge

Side support frame must rest squarely on the worksurface. It cannot be placed on a profile edge within 3" of the edge.

Hutch kits must match the depth of the cabinet they support.

Wiring & Cabling

48"W or Less

60"W or Wider

Scallop on tackboards or wood panel is either centered (on 54"W or less) or left and right (on 60"W or wider) on the top edge. This allows a light cord to be routed to the cavity behind.

Center grommet on a worksurface may be covered if an overhead storage unit that is supported by a hutch kit extends to the middle of a worksurface.

Worksurface scallop will be covered by the tackboard or wood panel with slatwall. Cords or cables should be routed before the tackboard or wood panel is installed. No additional cables will be able to be routed once the panel is in place. Applicable in plinth base or leg base settings.

Hutch Kits, Open Hutch Kits, and Side Support Frames, For Use with Plinth Base and Leg Base Storage, continued

Surface Materials

Hutch kit

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum

Side support frame

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum only

Tackboard

- Vertical surface fabric
- Tip: Because tackboard is one-piece design, fabric will be railroaded for consistent application.*

Wood panel

- Wood
- Customiz stain (option on wood)

Slatwall section on wood panels

- 0835 Black paint
- 8043 Clear Anodized Aluminum

Attachment hardware

- Black paint only

Application Topics

Anytime a hutch kit supports an overhead storage unit on a work surface, an end panel or side panel of a plinth base pedestal must be used under the worksurface within 6" of where the side support frame is located.

When double-high cabinets are mounted on hutch kits, physical attachment to the wall behind the cabinet is required. If used in a back-to-back application, the cabinets must be attached to each other.

When overhead cabinets are stacked perpendicular to each other, the lower overhead cabinet will be off-set 1 1/2" and pushed off of the 6" module. In this application, a longer worksurface must be used to support the lower overhead cabinet. Hutch kits used are the same width as the cabinets they support. Applicable in plinth base or leg base settings.

When overhead cabinets are used in a parallel stacking application, a one-sided hutch kit should support the overhead cabinet that is located on top. The hutch kit is the same width as the opening. The overhead cabinet located on the bottom should use a two-sided hutch kit of the same width.

Tip: This application requires the 15"H single overhead; the 22"H overhead will not work in the lower position.

Anytime a service module or hutch kit with cabinet or shelf is mounted on a worksurface with less than 30" of storage below or without attachment to other worksurfaces (freestanding shell), units must be positioned back-to-back or placed up against a wall. If a bridge or return is attached to the worksurface with the storage, the unit can be freestanding.

Service Modules

For Use with Plinth Base and Leg Base Storage

Service modules provide storage above a work-surface and are available in single- and double-high models. They are available open, with doors, or with a combination of doors and open storage areas.

► Specifying, page 540

Case has a wood core with a wood or laminate surface.

Sides are finished.

Bottom is finished and flush.

Top is finished.

Hinged doors sit proud on the service module case.

Interior of back is finished.

Optional light valance or metal light housing is available.
► Page 556

Optional finished back panel that sits proud of the case is available for use on 36⁵/₈", 43¹/₂" and 48⁹/₁₆"H service modules in an exposed application.

► Page 531

Optional inset finished back panel is available for 32¹/₄"H service modules.

Exterior back is unfinished on veneer service modules. Back is finished on laminate service modules.

Face locks are optional. On double-high combination cabinets, only the tall door(s) will lock.

► Lock and Keying, page 578

Tackboards are available for use between the service module and work-surface.

► Elective Elements Parametric Specification Guide.

Interior of storage area and dividers is finished.

Actual Dimensions**Single-High Service Module - 36⁵/₈"H**

Depth	15 ³ / ₄ "
Width	60", 66", 72", 78", 84", 90", or 96"
Height	36 ⁵ / ₈ "

Single-High Service Module - 43¹/₂"H

Depth	15" on open unit, 15 ³ / ₄ " on door unit
Width	60", 66", 72", 78", 84", 90", or 96"
Height	43 ¹ / ₂ "

Double-High Service Module

Depth	15" on open unit, 15 ³ / ₄ " on door unit
Width	60", 66", 72", 78", 84", 90", or 96"
Height	48 ⁹ / ₁₆ "

Product Details

Equal widths

Doors are all equal in width on the service module. They are equipped with soft-close hinges when wood or laminate doors are specified. Glass doors feature a self-close hinge.

Tip: Specify the ADA opening/closing option when required. This option features a magnetic touch latch and neutral hinge.

Glass doors are available on select service modules only. They do not lock. Glass doors feature a self-closing hinge. Dry erase markers can be used on glass doors. The texture of mirrored glass does not promote full erasure.

Locks are available factory- or field-installed. Factory-installed locks are available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Tip: Glass doors are not available with locks.

► *Lock and Keying*, page 578

36⁵/₈"H service modules align with 65⁵/₈"H freestanding storage when mounted on 29"H work-surfaces. 43¹/₂"H service module align with 72¹/₂"H freestanding storage when mounted on 29"H work-surfaces. 48⁹/₁₆"H service modules align with 77¹/₂"H freestanding storage when mounted on 29"H work-surfaces.

► See *Height Matrix*, page 14, for alignment with other components.

Wood veneer grain direction runs vertically on service module doors, sides, and back panel. The grain on the top and underside runs lengthwise. Door faces have coordinating veneer grain.

► Page 247

Clearance between the worksurface and underside of the 36⁵/₈"H single-high service module is 21⁵/₈". There is 18⁹/₁₆" of clearance between the worksurface and the underside of a double-high service module.

All service modules feature 3/4" side panels.

Optional light valance is available to conceal task lighting if desired on 22¹/₄", 36⁵/₈", 43¹/₂", and 48⁹/₁₆"H service modules. A single-sided version is used for service modules.

Metal light housing is available for use with the LED shelf light for an application of one, two, or three lights. If an LED shelf light is used with a blade accessory shelf, the metal light housing is required.

Connections

Attachment hardware is standard with service module to secure it to a desk, desk return, or return worksurface in the field. The service module should not be connected to an edge with a blade profile.

Tackboards can be removed and replaced without disturbing the service module. They are ordered separately.

► See *Elective Elements Parametric Specification Guide*.

Tackboards when used with a service module fit inside of the end panels.

Service module heights will align with tower, vertical cabinet, and panel heights. Actual height of the service module is determined by the worksurface height.

► Page 14

Wiring & Cabling

LED shelf lighting can be field installed to the bottom of the service module. Because the bottom of the cabinet is flush, a low-profile task light should be specified.

Tip: Use a metal light housing with a LED shelf light.

► Page 563

Service module pass-through is centered on the bottom edge of the back of 36 $\frac{5}{8}$ ", 43 $\frac{1}{2}$ ", and 48 $\frac{9}{16}$ " service modules and lines up with the optional worksurface scallop.

Tip: Specify an optional tackboards cover unfinished cable pass-through if desired.

Tip: For cable and cord routing that extends from the service module to below the worksurface, be sure to specify a scallop in the connecting worksurface and a pass-through in the modesty panel.

► Page 59

Tackboards for use with service module has two scallops located on the top to allow light cords to be routed to the cavity behind. The cords are then routed down through the service module, worksurface scallops, and modesty panel pass-through to below the worksurface.

Once the cords are in place, the tackboard will cover the service module and worksurface scallops.

► *Elective Elements Parametric Specification Guide*.

Application Topics

Storage Capacities

► Page 216

When using a worksurface with adjustable-height legs, use overhead cabinets that are suspended between towers or attached to a panel or wall.

Service module can be shorter than the supporting worksurface

as long as a worksurface support or side panel of a storage unit is used under the worksurface within 6" of where the side of the service module is located.

Service module can span multiple worksurfaces.

It should connect to desk, desk return, or return worksurfaces that have a square edge and not a profile edge.

Tackboards or tackboards with slatwall for use in conjunction with the blade accessory shelf will be 3" shorter to accommodate the shelf.

Anytime a service module or hutch kit with cabinet or shelf

is mounted on a worksurface with less than 30" of storage or support below without attachment to other worksurfaces (freestanding shell), units must be positioned back-to-back or placed up against a wall. If a bridge or return is attached to the worksurface with the storage, the unit can be freestanding.

Tip: Service modules cannot be mounted to worksurfaces supported by slip-fit support.

Tip: Applies to plinth and leg base.

Wall-Mounted Tackboards

For Use with Service Modules, Blade Accessory Shelves, and Wall-Mounted

Wall-mounted tackboards finish the space between a service module or overhead storage unit and a worksurface. It is a fabric-covered tackable surface that is available parametrically by 1/16" increments in depth and an unlimited increment within a range for height.

► See *Elective Elements Parametric Specification Guide*.

Actual Dimensions

Tackboard	
Parametric Width Range	24"–114"
Parametric Height Range	12.0000"–47.5000"
Thickness	1"

Tip: Tackboard thickness does not include thickness with attachment brackets.

Tip: Elective Elements Parametric wall-mounted tackboards have a design allowance to account for variations within fabric choices and alignment with adjacent solutions; such as, overhead storage. The width design allowance is .1090" less than the nominal width specified. The height design allowance is .1040" less than the nominal height specified.

Product Details

When aligning, tackboards and/or glass, please take note of panel thickness and utilize the appropriate sets of spacers.

Example Style	Style Description	Thickness		
		1"	3/4"	1/2"
E6AWST	Tackboard	X	N.A.	N.A.
E6GBP	Glass	N.A.	N.A.	X

Tip: When aligning 1/2" thick glass with 3/4" thick floating back panels, one set of spacers is required to be installed with the glass to ensure a flush mount.

Tip: When aligning 1/2" thick glass with 1" thick tackboards, two sets of spacers are required to be installed with the glass to ensure a flush mount.

Wall-mounted tackboards provide a fabric covered tackable surface above the worksurface.

The ends of the wall-mounted tackboards are finished.

The top and bottom of wall-mounted tackboard include a routing for attachment hardware. This is visible when overhead storage is not paired with tackboards.
Tip: The ends of the tackboard are finished.

Connections

When used with a service module, the wall-mounted tackboard attaches with hook and loop. The attachment hardware is standard with the tackboard for field installation.
▶ See service module understanding, page 208.

▶ See *Elective Elements Parametric Specification Guide* tackboards specifying.

When used with a structural wall, wall-mounted tackboards attach with fasteners, spacers, and velcro strips.

When used with an overhead and blade accessory shelves, specify the following tackboard heights:

Single-high overhead = 15.3451"

Double-high overhead = 18.5222"

Wiring & Cabling

Scallop option on wall-mounted tackboards is either centered on the left or right of the top edge. This allows a light cord to be routed to the cavity behind. Daisy chain option is not recommended on T2 fluorescent light. Daisy chaining may be used on LED lights.

One scallop is centered on wall-mounted tackboards 54"W and smaller.

Two scallops are located on the left and right on wall-mounted tackboards 54 1/16"W and wider

Worksurface scallop will be covered by the tackboard on 36 5/8"H, 43 1/2"H, and 48 9/16"H service modules. Cords or cables should be routed before the tackboard is installed. No additional cables will be able to be routed once the tackboard is in place.

Surface Materials

Wall-mounted tackboards

- Vertical surface fabric
- Tip: Because wall-mounted tackboard is a one-piece design, fabric will be railroaded for consistent application.*

Attachment hardware

- Black paint only

Magnetic Back Painted Glass

For Use with Service Modules, Blade Accessory Shelves, Organizers, Single- and Double-High Overheads

Magnetic back painted glass finishes the space between a service module or overhead storage unit and a work-surface. They can also be attached to a wall without any Elective Elements storage when installation instructions are followed.

► Specifying, pages 552–555

Tip: Use only rare earth magnets with this product to allow items to adhere through glass.

Tip: Magnetic back painted glass cannot be used with a hutch kit.

Tip: Unlike tackboards, no end cover is required.

Actual Dimensions

Magnetic Back Painted Glass for Use with Single-High Overhead

Width	58 1/2", 70 1/2", 82 1/2", 94 1/2"
Height	13 5/8"

Product Details

Magnetic back painted glass provides an upscale alternative to fabric tackboards for displaying data or personal effects.

Tip: Only rare earth magnets may be used with magnetic back painted glass. Such items can be purchased at most office supply outlets online or in-store.

When aligning, tackboards and/or glass, please take note of panel thickness and utilize the appropriate sets of spacers.

Example Style	Style Description	Thickness		
		1"	3/4"	1/2"
EEAWST	Tackboard	X	N.A.	N.A.
E6GBP	Glass	N.A.	N.A.	X

Tip: When aligning 1/2" thick glass with 3/4" thick floating back panels, one set of spacers is required to be installed with the glass to ensure a flush mount.

Tip: When aligning 1/2" thick glass with 1" tackboards, two sets of spacers are required to be installed with the glass to ensure a flush mount.

Surface Materials

Frame

- Paint

Glass

- Back painted glass
- ▶ See *Surface Materials*, page 566

Attachment hardware

- Black paint only

Connections

When used with a service module or a structural wall, magnetic back painted glass is mounted with a Z-bracket. All hardware required for attachment is included as standard.

Tip: Check with local building code official for proper application.

Tip: For installation of the magnetic back painted glass beneath an overhead or other like product, 1/2" space is required to insert the glass, and have it engage with the bracket.

Wiring & Cabling

Only low-voltage wiring can be used to run behind magnetic back painted glass to meet safety requirements. When specified with cable management, there is a 1/2" space behind the glass where low-voltage wires can fit. Additionally, there is a 3/8" gap at the top of the glass to accommodate low-voltage wires. Daisy chain option is not recommended on T2 fluorescent light. Daisy chaining may be used on LED lights. For complete information, please consult the *Worktools Specification Guide*.

Tip: Spacers are provided to allow low-voltage cords to pass behind the glass.

Tip: Spacers for cord management can also be used to align depth of magnetic back painted glass with depth of fabric tackboard. Spacers are always included with the mounting hardware.

Worksurface scallop will be covered by the magnetic back painted glass on 32 1/4"H, 36 5/8"H, and 43 1/2"H service modules. Cords or cables should be routed before the magnetic back painted glass is installed. No additional cables will be able to be routed once the magnetic back painted glass is in place.

Storage Wood Grain Directions

Storage Wood Grain
Directions

Wood grain direction will alter the color and appearance of any surface. Two surfaces with grain directions that are at different angles to each other may look different even when they are identical. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer.

Tip: Wood integral pulls are not available with composite veneer.

Please refer to the illustrations at right for an understanding of grain direction on your installation.

Technology Zone

For Use with Plinth Base and Leg Base Storage

Product Details

Technology zone has 6 simplex outlets and is PVC free.

Technology zone has a 180° hinged lid with a slot that allows cords to pass through when the lid is closed. Technology zone has space to conceal chargers, adapters, and excess cords.

Technology zone has a pass through that allows standard size grounded plug to pass through from the technology trough in storage.

Technology zone utilizes Extron Electronics' Architectural Adapter Plates (AAPs) to provide access to data, audio, video, telephone, and other technologies inside the technology zone.

Technology zone can accommodate up to two customer provided single space AAPs. Technology zones ship with blank cover plates.

AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at www.extron.com.

Corded technology zone has a 9 foot power cord with a grounded plug.
Tip: Multiple corded technology zones cannot be daisy chained together.

24" corded technology zone cord can extend 8' to the right or 7' to the left.

Field Installation is required for use. Worksurfaces will need a 24"L x 4⁹/₁₆"W cutout to be field-cut in order to accommodate a flush integrated technology zone.

Actual Dimensions

Depth	4 ³ / ₄ "
Width	24"
Height	5 ¹ / ₂ "

Connections

Building power can be accessed from the floor, or a wall or column.

A straight/flush modular junction box faceplate cover is standard and is wired to a 4¹/₁₆" square junction box located in the building.

A 90 degree junction box faceplate can be optioned and is recommended for use at a wall or column.

Power can be brought in through the cut-out in 1.5 plinth base 1.5 high storage or leg base 27¹/₂"H storage from a panel by field cutting the panel skin.

Tip: Consultation with a building inspector is recommended to ensure these applications are acceptable.

Wiring and Cabling

Three wiring schematics are available—3+1, 2+2, and three circuits with separate neutrals (3SN). All the components in an electrical distribution system must use the same wiring schematic. For safety, the components are keyed, labeled, and color-coded to make it impossible to connect mismatched parts.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

Hardwire power is also available for cities where codes require.

LH option applied

RH option applied

Both option applied

Technology cut-out options in a full storage credenza come standard with the inside panels cut-out when a technology trough is selected. The art above shows the cut-out when a technology trough is present.

Surface Materials

- 4803 Near Black Metallic
- 7241 Arctic White
- 8043 Clear Anodized Aluminum

Electrical and Cable Management

Power Units with Cord Pass-Through

► Specifying, page 558

Product Details

Power unit with cord pass-through provides two or four electrical outlets. Faceplates are provided for two simplex customer supplied voice/data jacks or two customer provided single space Extron Electronics Architectural Adapter Plates (AAPs) when the two electrical outlets are selected. Extron AAPs provide access to data, video, audio, telephone, and other technologies.

Power units with cord pass-throughs have a 6' power cord with grounded plug or a 6' conduit for hardwire applications.

Installs below a square grommet location. When installed, the power unit will hang below the worksurface.

Power units cannot be used over 15"W and 18"W underworksurface storage, but can be used over 30"W and 36"W lateral files that are 30"D.

Wiring & Cabling

Power units have an opening for data that can be filled. The first method is two simplex voice/data jacks (customer supplied).

The second method is two single space Extron Electronics Architectural Adapter Plates (AAPs) for data solutions. These are supplied by the customer and can be used in any combination.

Surface Materials

Power units

- Black textured paint only

Power cord with grounded plug

- Black plastic only
- Tip: Power unit cannot be used with gate leg, adjustable height leg, or glass modesty panel due to bracket interference.*

Tip: Power units cannot be installed over 1.5 high storage.

Actual Dimensions

Depth	6 ⁵⁷ / ₆₄ "
Width	6 ³ / ₃₂ "
Height	4 ¹ / ₄ "
Power cord length 6'	

Flip Up Power Unit

► Specifying, page 559

Product Details

Flip up power unit provides two electrical outlets at worksurface height. Power unit is flush with worksurface when not in use. It has a 6' power cord with grounded plug.

Flip up power unit is field-installed.

Tip: For installation purposes, actual hole size is 3³/₄" x 5".

Surface Materials

Power unit

- 0835 Black paint
- 4799 Platinum Metallic paint

Outlet

- Black plastic only

Power Cord

- Black plastic only

Actual Dimensions

Depth	4 ¹ / ₄ "
Width	5 ¹ / ₂ "
Height	2"
Power cord length 6'	

Power/Power Box

► Specifying, page 560

Product Details

Power/power box, ordered separately, provide additional electrical outlets. Boxes are field-installed and can be mounted to the underside of worksurface anywhere access to power is needed.

Surface Materials

Box

- 0835 Black paint only

Actual Dimensions

Depth	3"
Width	3"
Height	1"

Cable Tray

► Specifying, page 559

Product Details

Cable storage trays, field installed under the worksurface, hold cables out of the way.

Surface Materials

Cable tray

- Black paint only

Actual Dimensions

Depth	3"
Width	32"
Height	5 ⁵ / ₁₆ "

2½" Round Grommet

► Specifying, page 560

Product Details

2½" round grommet, ordered separately, provides wire and cable management for worksurfaces.

Surface Materials

Round grommet

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 7360 Merle
- 9201 Polished Chrome
- 9211 Nickel

Actual Dimensions

Depth	2½"
Width	2½"

Wire Clips

► Specifying, page 560

Product Details

Wire clips have an adhesive back to allow them to stick under a worksurface for routing and managing cords.

Double clip can be screwed to the underside of a worksurface.

Surface Materials

Wire clips

- Black plastic only

Wire Manager

► Specifying, page 560

Product Details

Wire manager, ordered separately, organizes cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.

Surface Materials

Wire manager

- Black plastic only

Actual Dimensions

Depth	1"
Width	¾"
Height	25"

Cord Reels

► Specifying, page 561

Product Details

Cord reels, field installed under the worksurface, take up excess cord or cable.

Surface Materials

Cord reels

- Black paint only

Cable and Fiber Reels

Cable and fiber reels are available to store excess fiber-optic cable lengths. They are also suitable for storing power cables.
► Specifying, page 561

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the kneespace of free-standing desks or panel-supported worksurfaces.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Reels
• Black plastic only

Actual Dimensions

Depth	1¼"
Width	8"
Height	8 ⁵ / ₁₆ "

Termination Plate

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.
► Specifying, page 561

Bracket allows termination plate to be connected to worksurface.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Opening provides access to a termination device.

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Termination plate
• Black paint only

Actual Dimensions

Depth	¾"
Width	7 ¹ / ₈ "
Height	7 ¹ / ₈ "
Center opening	2¾" dia.

Power Shroud

For Use with Leg Base Storage Only

Power Shroud

Power shroud attaches with screws to the underside of a 27¹/₂"H leg base credenza. ► Specifying, page 562

Power shroud is made of painted steel.

Power shroud conceals two standard power whips underneath an 27¹/₂"H leg base storage unit.

Product Details

Power shroud is for use under a leg base storage unit.

Power shroud conceals two standard power whips.

Attachment hardware is included.

Wiring and Cabling

Power shroud is intended for wire and cable management. Its height is designed to work under a leg base storage unit with a technology zone or other worksurface height power.

Surface Materials

Shroud

- 4799 Platinum Metallic
- 7243 Seagull
- 7360 Merle

Actual Dimensions

Depth	2"
Width	3"
Height	8 ³ / ₄ "

Metal Light Housing

Metal light housing is available in three lengths to accommodate 1, 2, or 3 LED shelf lights. The housing is painted steel.

Metal light housing attaches to the bottom of a blade accessory shelf, overhead cabinet, organizer shelf, or service module.

Tip: LED shelf light ordered separately.

Actual Dimensions	
Depth	3¾"
Width	19", 43" or 68"
Height	¾"

Product Details

Metal light housing is designed specifically for the LED shelf light. It is available in three lengths to accommodate 1, 2, or 3 lights.

Attachment hardware is included with the light housing.

Connections

Overheads can support a metal light housing up to 68" wide.

Blade accessory shelf attaches to the underside of an overhead cabinet and is able to support the metal light housing. The housing attaches using VHB tape. Screw mounting is also possible.

Tip: Consultation with a building inspector is recommended to ensure these applications are acceptable.

LED shelf lights

► Specifying, page 563

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply is used on the LED standard light; it is 9' long with a two prong driver plug. *Tip: Energy saving mini-LEDs greatly reduce power use.*

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Actual Dimensions

Depth 2⁵/₈"

Width 18¹/₈"

Height 1/2"

Power Supply 18 Watt Cord
– 9' with two prong driver plug
Power Supply 60 Watt Cord Set (11')
– Line voltage cord: 6'
– Low voltage cord: 5'

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting

allows shelf light to be installed without tools under most metal overhead storage bins. Use with metal light housing to conceal lights under a blade accessory shelf or overhead cabinet with VHB tape.

Tip: If the blade accessory shelf is used, the metal light housing is required to mount the LED shelf light.

Optional fastener kit

allows shelf light to be mounted to wood shelves.

Tip: The LED shelf light mounting kit will not work with the blade accessory shelf. The metal light housing is required.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard, Utility2, and Bottomline 24" wide lights do not fit under 24" wide bins.

Wiring and Cabling

LED shelf light is hardwired.

LED shelf light can have up to 3 lights daisy chained together, not exceeding 68" wide.

Cords for the LED shelf light can be routed behind a tackboard in an overhead application.

Tip: More information regarding the LED shelf light can be found in the Steelcase Worktools Specification Guide.

Tip: Daisy chain starter light comes with a 60 watt power supply to support up to three lights. Daisy chain secondary lights do not come with a power supply, but instead come with a daisy chain cord set.

► Specification Information, on next page

Tip: Composite veneer 1 and wood group 1 is in addition to composite veneer 2 and wood group 2

Tip: All modesty panels, with the exception of full-width hanging, are available on both 30"D and 36"D worksurfaces.

Tip: If a floor modesty panel is selected, then the grain direction of the storage and modesty panel must match. In the case of a laminate modesty panel greater than 60"W, then the grain direction on all pieces will be horizontal.

► For all available modesty panel configurations, see page 30.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Height-Adjustable Desks

Partial-Width Top

► Need help?
Product details,
page 22

Standard Includes

- Top: composite veneer group 1
- Base: paint
- Pedestal/pedestal or shroud/pedestal: wood group 1 veneer
- Edge: 3 mm composite veneer square edge to match top
- Three-preset controller
- Standard close drawer slides
- Lock, keyed random, if pedestal storage selected

Required to Specify

- 1 Style number
 - 2 Depth (see below under Required Selections)
 - 3 Width (see below under Required Selections)
 - 4 Composite veneer color number for top
 - 5 Paint color number for base
 - 6 Composite veneer color number for pedestal/pedestal or shroud/pedestal
 - 7 Pull shape (see below under Required Selections)
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 566.

Tip: 96" width is only available with pedestal/pedestal configuration. 60", 66", and 72" widths are only available with shroud/pedestal configuration.

Tip: With pedestal/pedestal configuration, 24" would be subtracted from the top width. With shroud/pedestal configuration, 15⁷/₁₆" would be subtracted from the top width.

Tip: For ease of specification, full-fill finish codes can be selected on other veneer components being used in settings with full-fill veneer top surfaces. The other components will not have the final fill coat applied, but the finish color will be consistent with the full-fill top surfaces.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Desk Worksurfaces—Straight and Bow Fronts

Composite Veneer, Wood Veneer, or Laminate

Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.

Tip: Grommets on desks with inset modesty panels should only be ordered in right or left position.

Tip: Refer to page 60 for grommet locations.

Tip: Recommended column and leg supports vary based on work surface length and support conditions on the other end. Refer to Worksurface Support Guidelines, page 101.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Any bow-front desk work surface with an overhang must use a plinth base J-shape end panel and plinth base pedestal combination. The exception is when a return work surface is attached to a straight or bow-front desk work surface, then an overhang of no greater than 12" is allowed.

36"/42" 84"	E6WW364284	\$2352	\$2688	\$2421	\$2757	\$1705	\$1944	\$2103	+\$183	+\$201	+\$706	+\$267

Tip: 36"/42" bow-front desk worksurfaces must be supported by 30"D pedestals or end panels.

Tip: When used in a single pedestal desk configuration, specify pedestal and end panel 6" less than the depth of the desk worksurface. This will create an overhang condition.

Return Worksurfaces

Composite Veneer, Wood Veneer, or Laminate

Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Refer to page 60 for grommet and scallop locations.

Tip: Specify a scallop when a service module or hutch kit is used with a task light.

Tip: Refer to the selected panel Specification Guide to order supports for panel applications.

Tip: Only the side meeting the main work surface is coped on returns.

Tip: Desk returns always have a 6" overhang when modesty panels are specified. Order 24"D end panels or pedestals for 30"D desk returns, and 30"D components for 36"D desk returns.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Bridge Worksurfaces

Composite Veneer, Wood Veneer, or Laminate

Tip: For bridge worksurfaces with a blade edge, subtract 2 1/8" from each side (4 1/4" total) for precise dimensions. This same rule applies to a bullet or P-top in a U-shape setting.

Tip: The nominal width of a bridge coped with blade edge worksurface is approximately 4 1/4" less than a square edge.

Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.

Tip: Short grain direction is not available on laminate.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Refer to page 60 for grommet and scallop locations.

Tip: Specify a scallop when a service module or hutch kit is used with a task light.

Meeting Worksurfaces

Composite Veneer, Wood Veneer, or Laminate

Right-hand shown

Tip: For wood and plastic blade edge profiles, the sloping underside of the edge is not finished.

Tip: 60"W top will attach to an 18"D worksurface and 78"W top will attach to a 24"W worksurface.

Tip: Meeting worksurfaces can only attach to a return worksurface if a square edge is used.

Tip: Meeting worksurfaces can be supported in one of the following ways on the outer edge: a pedestal with or without a slip fit bracket, a rectangular column leg with or without base, adjustable height legs, disk column or column leg, gate leg, free support end panel, L-shape end panel, or T-shape end panel.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Meeting worksurfaces must be attached to another worksurface. They are never freestanding.

Tip: Specify a 12"H or 2/3-height modesty panel with optional hanging brackets, if desired. Refer to Modesty Panel Selection Guide, page 106.

Cushion Tops

Tip: Cushion top is not designed to be used on open one-high bookcase units. If that application is desired, specify a worksurface to be mounted on the bookcase and attach the cushion top to the worksurface. This will raise the overall height of the unit by an additional 1½".

Tip: Cushion top ships separately from storage.

Tip: Cushion top attaches to one high plinth base pedestals, two-high lateral files, and plinth base 1.5 high storage units. 42"W cushion tops are not available.

Tip: A back panel is required when using a cushion top. Note: Leg base credenzas and pedestals come with an unfinished back panel. Order separately in plinth base storage.

Tip: Seam pattern is determined by upholstery selected.

► See page 149.

Tip: In leg base applications, storage legs are required at the seam of a cushion top and storage.

Standard Includes	Required to Specify

Tip: Recommended column and leg supports vary based on worksurface length and support conditions on the other end. Refer to Worksurface Support Guidelines, page 101.

For Canadian Pricing
Multiply U.S. Price by the
Canadian price factor.
► See page 1 for details.

Plinth Base Free Support End Panels

Plinth Base
Free Support
End Panels

Tip: Free support end panels are replacements for the former full-height T-shape end panel style numbers.

Tip: For proper stability, worksurfaces supported on one end by free-support end panel must be connected to a perpendicular worksurface forming and L- or U-shaped configuration. Two plinth based free support end panels can support a stand-alone worksurface.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Standard Includes	Required to Specify

★ To determine the width of the extended T-shape end panel needed, refer to *Extended T-Shape End Panel Selection Guide*, page 108.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Plinth Base Corner Support Kit and Rear L-Shape

Tip: When specifying modesty panels for use with corner support kits, order modesty panels that are 12" shorter than the worksurface width where the modesty panel will be located.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Corner support kits are not available in leg base applications. Plinth base corner support kits are still a feasible option to be used within a leg base application, if needed.

Standard Includes		Required to Specify
► Need help? Product details, page 94	- Corner support kit, including one rear L-shape corner support and two L-shape end panels: composite veneer group 1, wood group 1 veneer, or laminate price group 1 - Rear L-shape corner support: composite veneer group 1, wood group 1 veneer, or laminate price group 1 - Attachment hardware: black paint only	1 Style number 2 Composite veneer, wood veneer, or laminate color number for corner support kit or rear L-shape corner support 3 Options, if selected (see below) ► See <i>Surface Materials</i> , page 566.
Options	U.S. Price	Required to Specify
Surface Materials		
Composite veneer corner support kit or rear L-shape corner support		
• Composite veneer group 1	Prices below	Specify composite veneer color number.
• Composite veneer group 2	Prices below	Specify composite veneer color number.
Wood veneer corner support kit or rear L-shape corner support

:	:	:	:	:	:	:	:

Tip: If an extended corner worksurface is supported by a pedestal or lateral file on one end, then specify a rear L-shape corner support and an L-shape end panel separately to support the back and other end.

Plinth Base Center Support Panels

Plinth Base
Center Support Panels

Tip: When calculating unsupported spans, the 15" portion of an L-shaped end panel that runs along the back edge should not be considered. Measure from the portion of the end panel that runs front-to-back.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: For unsupported spans from 60"W to 90"W, use one worksurface brace or a center support panel. For spans greater than 90"W, a center support panel must be used.

Tip: 8"D center support panels are used with 18"D work-surfaces. 24"D and 30"D work-surfaces must use the 11"D center support panel.

Standard Includes

- ▶ Need help? Product details, page 96
- Center support panel: composite veneer group 1, wood group 1 veneer, or laminate price group 1
- Attachment hardware: black paint only

Required to Specify

Universal Privacy/Modesty Screens

Tip: Universal privacy/modesty screens can be attached to 3/4"-1 1/2" thick worksurface, including height adjustable work-surfaces, universal work-surfaces, and Elective Elements worksurfaces.

Tip: The screens weigh between 9.79 lb and 11.89 lb. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The universal privacy/modesty screen is intended for use on the back of a worksurface.

Tip: Fabric is applied horizontally on the screen.

Tip: Screen allows for 1 1/8" cord drop or no cord drop. See understanding pages for product specific application guidelines.

Tip: Sarto privacy/modesty screens can be attached to 3/4"–1 1/2" thick worksurface, including Ology, Migration, Elective Elements, universal tables, and universal panel-mount worksurfaces.

Tip: The screens weigh between 3.51 and 11.64 lb. Take this into consideration when planning for use on height-adjustable worksurfaces. See understanding pages to calculate screen weight.

Tip: Worksurface type option adds a fourth worksurface bracket and repositions brackets to avoid worksurface scallops.

Tip: Side screen option changes brackets to smaller L-brackets, mounting the screen mount flush to the side of the worksurface. Side screen option is only available on screens 36"W and narrower.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

► See page 1 for details.

Tip: Glass modesty panels offer no structural support.

Tip: Glass modesty panel cannot mount in front of a power unit with cord pass-through due to bracket interference.

Tip: The glass modesty is available in end panel application.

Tip: Use the glass modesty panels ending in "E" for any application with an end panel on both ends, end panel and storage on either end, or storage on both ends for tightest flush fit. This applies to both plinth and leg base applications.

Tip: When using the column leg application, specify separately rectangular column, column, or disk column leg for spacer.

Tip: Glass modesty panel cannot attach flush to same end of worksurface that has a pedestal as a support.

Standard Includes	Required to Specify

Worksurface
Supports

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
▶ See page 1 for details.

Perpendicular Tether Support

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Depth of the perpendicular tether support is determined by the depth of the worksurface supported. Use a 19 $\frac{5}{8}$ "D support for a 24"D worksurface. Use a 25 $\frac{5}{8}$ "D support for a 30"D worksurface. Use a 31 $\frac{5}{8}$ "D support for a 36"D worksurface.

Tip: Width of the perpendicular tether support is determined by the depth of the worksurface above the 1.5 high storage units. Use a 13 $\frac{5}{8}$ "W support when the worksurface is 18"D. Use a 19 $\frac{5}{8}$ "W support when the worksurface is 24"D.

Tip: Perpendicular tether supports are designed to work with desk worksurfaces. Any other worksurface will require holes to be drilled by installers.

Tip: The perpendicular support is not handed.

Standard Includes	Required to Specify

Worksurface Braces

► See page 97 for worksurface brace rules.

Tip: When calculating unsupported spans, the 15" portion of an L-shaped end panel that runs along the back edge should not be considered. Measure from the portion of the end panel that runs front-to-back.

Tip: When using a blade edge profile on a worksurface, the rules are slightly more stringent, due to the construction of the top. See Understanding, page 97.

Legs and Supports

Tip: Worksurfaces other than blade edge supported by legs or tethered brackets that have unsupported spans less than or equal to 24"D x 84"W, use one worksurface brace. For unsupported spans greater than 24"D x 84"W two worksurface braces are required for support.

Tip: When specifying a rectangular column leg for use with a worksurface 78"W or larger, the rectangular column leg with base must be used.

Tip: Rectangular column legs with bases, columns, disk columns, and gate leg should not be used to support freestanding tables. They are used to support the end of run-off worksurfaces.

Tip: The gate leg cannot be used with the Universal top or blade edge profile.

Tip: When using a blade edge profile, rules are slightly more stringent due to construction.

► Specification Information, on next page

Tip: Locks are not available on pedestals with a single-door specified with integral or beam pulls. Units with double doors and an integral or beam pull do lock.

Tip: Metal shelves only available on hinged door and open units.

Tip: File capacities vary.
► Page 216

Tip: For counterweight rules see application topics on page 146.

Tip: Order finished back panels or modesty panels when units will be exposed.

Tip: When applying a cushion top to a freestanding 27½"H two-high lateral file or an open/file 1.5 high, a finished back panel must be used.

One-High Open Plinth Base Pedestals for Ology Application

One-High Open Plinth
Base Pedestals for Ology
Application

Tip: Ships without top. Picture shows fully assembled product. To specify a top option, see style number **E6WSHAD** ▶ page 384.

Tip: Leveling glides adjust up to 3/4".

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: If back panel eliminated, use Elective Elements' filler panel when against wall or back-to-back, if desired.

Tip: Modesty panels and screens must be undersized and justified to the outside of the straight worksurface when used.

Tip: Select a common top to create a one-high credenza.

Tip: To help avoid pinch point, the pedestal for Ology application extends 1" past the back of the Elective Elements common top.

Tip: Ology desk with integrated storage must be specified with modular widths only. When optioned for parametric widths, integrated storage is not available.

Common Top for Ology Application

► Need help?
Product details,
page 166

Standard Includes

- Common top: composite veneer group 1, wood group 1 veneer, or laminate price group 1
- Composite veneer common top with composite veneer edge:
 - 3 mm wood square profile on user side
 - .5 mm veneer on other sides
- Laminate common top with plastic edge:
 - 3 mm plastic edge on user's side
 - 1 mm plastic edge on other sides, plastic default to match user's side
- Laminate common top with wood edge:
 - Solid wood edge on user's side
 - 1 mm plastic edge on other sides, color default to match worksurface

Required to Specify

- 1 Style number
 - 2 Width (see below under Required Selections)
 - 3 Composite veneer, wood, or laminate color number
 - 4 Wood edge color number for all sides on wood worksurface, if selected
 - 5 Plastic edge color number for all sides on laminate worksurface, if selected
 - 6 Common top profile (see below under Required Selections)
 - 7 Application (see below under Required Selections)

File Surround

For Use with Universal Storage

Without back panel

With back panel

Tip: Dimensions of the file surround represent the internal cavity dimensions based on the storage being surrounded. Depth, width, and height are available parametrically.

Tip: Refer to SmartTools for full parametric pricing upcharges and sizes.

Tip: Depth and width are available parametrically by 1/16" increments. Height is specifiable to the fourth decimal place.

Tip: A single top is one section.

Tip: SmartTools will automatically generate the section top option, when available, based on the size specified.

Tip: Back panel is only specifiable when end panel left and right is selected.

For laminate price group 2 and 3 pricing, please refer to SmartTools.

Tip: The Open Line laminate (OLL) upcharge applies once per file surround unit.

Tip: Short grain direction on laminate is not allowed on the top.

Tip: Long grain direction on veneer is not allowed on tops larger than 120"W.

Tip: Woodgrain laminated sectioned tops with long grain direction over 120"W will not be grain matched. Please refer to specials if grain matching is desired on woodgrain laminate sectioned tops greater than 120"W.

Tip: End panel grain direction on laminate must be vertical when the height is greater than 60".

Tip: Back panel grain direction is always horizontal.

Tip: The file surround is currently only able to surround Universal storage.

Plinth Base Freestanding Bookcases—Open

Composite Veneer, Wood Veneer, or Laminate

Tip: Freestanding bookcases that are 72½" or 77½"H have an unfinished back and must be placed up against a wall or back-to-back.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Specify optional 1⅛" thick heavy load shelves for heavy load conditions. Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects. Metal shelves also support heavy loads.

Tip: Glide hole covers are black and are visible in bookcases.

Stacking Bookcases—Open

Composite Veneer, Wood Veneer, or Laminate

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Laminate stacking bookcases come standard with a laminate back with pilot holes to accept an additive, proud back panel. If no pilot holes are desired, specify "laminate finished inset back".

Tip: Specify optional 1 1/8" thick heavy load shelves for heavy load conditions. Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects. Metal shelves also support heavy loads.

Tip: 7 1/2"H shelves and single-high overhead cabinets can be suspended between stacking bookcases. Specify suspension hardware kit separately.

Tip: 36 5/8"H stacking bookcases align with 65 5/8"H freestanding storage when mounted at standard worksurfaces height of 29". 43 1/2"H stacking bookcases align with 72 1/2"H freestanding storage when mounted at standard worksurfaces height of 29". 48 9/16" aligns with 77 1/2"H.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

Plinth Base Towers with Full-Height Doors

Composite Veneer, Wood Veneer, or Laminate

Left-Hand Unit

► Need help?
Product details,
page 190

Standard Includes

- Tower:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Single door on 15½"W units
- Two doors on 24"W units:
 - Right-hand units: cabinet on right, doors hinged right
 - Left-hand units: cabinet on left, doors hinged left
- Finished inset back on all laminate towers
- Finished inset back on 45"H, 65⅝"H, and 72½" veneer towers
- Unfinished inset back on 77½"H veneer towers
- Shelves: composite veneer, wood, or laminate to match case
- Brackets for adjustable shelves: black only
- Two coat hooks, only in units with cabinet, in brushed nickel finish only
- Lock, keyed random

Required to Specify

- 1 Style number
 - 2 Composite veneer, wood, or laminate color number for tower
 - 3 Laminate color number for laminate fronts on laminate case, if selected
 - 4 Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - 5 Pull shape (see below under Required Selections)
 - 6 Finish color number for pull
 - 7 Finish color number for lock
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 566.

Plinth Base Towers with Doors and Drawers

Composite Veneer, Wood Veneer, or Laminate

Tip: Organizer and open shelves and overhead cabinets can be suspended between 65 $\frac{5}{8}$ "H, 72 $\frac{1}{2}$ "H, and 77 $\frac{1}{2}$ "H towers. Specify suspension/ganging hardware kit separately.

Tip: Open/shelves are not recommended as bookshelves.

Tip: When specifying glass doors and beam pulls, the frame finish must match the pull.

Tip: Locks are not available on doors with integral pulls. Drawers with integral pulls always lock.

Plinth Base Vertical Cabinets

Composite Veneer, Wood Veneer, or Laminate

F=Fixed shelf

► Need help?
Product details,
page 190

Standard Includes

- Vertical cabinet:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Shelves: composite veneer, wood, or laminate to match case
- Finished inset back on all laminate vertical cabinets
- Finished inset back on 45"H, 65½"H, and 72½"H, veneer vertical cabinets
- Unfinished inset back on 77½"H veneer vertical cabinets
- Dovetail drawer construction
- Brackets for adjustable shelves: black only
- One fastened metal filing system per file drawer: black only
- Lock, keyed random
- Standard close drawers

Required to Specify

- 1 Style number
 - 2 Composite veneer, wood, or laminate color number for vertical cabinet
 - 3 Laminate color number for laminate fronts on laminate case, if selected
 - 4 Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - 5 Pull shape (see below under Required Selections)
 - 6 Finish color number for pull
 - 7 Finish color number for lock
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 566.

Tip: When specifying glass doors and beam pulls, the frame finish must match the pull.

Tip: Locks are not available on doors with integral pulls. Hinged doors over four drawers are an exception to this rule.

Leg Base Freestanding Bookcases—Open

Composite Veneer, Wood Veneer, or Laminate

Tip: Freestanding bookcases that are 65⁵/₈" or 72¹/₂"H must be placed up against a wall or back-to-back.

Tip: Leg base freestanding bookcases may be ganged when a suspension/ganging hardware kit is used, and share legs at the seam. Note: The exteriors of each will be defaced.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When storage legs are shared between two units, the extra legs should be saved for later use, such as reconfiguration.

Tip: Shelves with less than 12" of clearance height will not hold some binders in the vertical orientation.

Tip: Specify optional 1¹/₈" thick heavy load shelves for heavy load conditions. Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects. Metal shelves also support heavy loads.

Standard Includes	Required to Specify

Leg Base Freestanding Bookcases with Doors

Composite Veneer, Wood Veneer, or Laminate

Tip: Freestanding bookcases that are 65 $\frac{5}{8}$ " or 72 $\frac{1}{2}$ "H must be placed up against a wall or back-to-back.

Tip: Hinged-door units with integral or beam pulls will have a single pull on the right-hand door.

Tip: When storage legs are shared between two units, be sure to keep the extras for later use, such as reconfiguration.

Standard Includes	Required to Specify
► Need help? Product details, page 186 - Bookcase with hinged doors: –Composite veneer group 1 case with composite veneer front –Wood group 1 case with wood front –Laminate price group 1 case with same or contrasting laminate front –Laminate case with composite veneer or wood price group 1 front - Storage leg: paint or metal - Shelves: wood, laminate, or metal	- Style number - Composite veneer, wood, or laminate color number for bookcase - Laminate color number for laminate fronts on laminate case, if selected - Composite veneer or wood color number for wood fronts on laminate cases, if selected - Pull shape (see below under Required Selections) - Finish color number for pull - Paint or metal color number for storage leg - Options, if selected (see below) ► See <i>Surface Materials</i>, page 566.

Required Selections						
Pull Shape						
Contemporary	Jazz	Nile	Bar	Inset	Integral*	Beam
No cost	+\$27 each	+\$37 each	+\$39 each	+\$41 each	+\$41 each	+\$57 each

*Not available on laminate or composite fronts.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Glass doors have a magnetic touch latch. They do not have pulls. Glass doors are not available with locks.

Tip: Specify optional 1 $\frac{1}{8}$ " thick heavy load shelves for heavy load conditions. Heavy load conditions are defined as loads of 100 lbs or greater. Heavy load shelves should be specified on wider units (30"W or 36"W) loaded with books or other heavy objects. Metal shelves also support heavy loads.

► Specification Information, on next page

Tip: Cabinet-to-cabinet attachment kits are used to provide rigidity between cabinets mounted side by side in a panel- or wall-mounted application.

Tip: Suspension/ganging hardware to suspend overhead cabinets between towers and stacking bookcases is ordered separately.

► Page 536

Tip: Single-high overhead cabinets cannot be mounted on drywall, Montage, Answer, Privacy Walls, or V.I.A. walls lower than 38"H. They are not designed to function as a seat.

Tip: Wood and laminate hinged doors feature soft-close hinges and are also available in ADA open/close hinges. Glass doors feature self-close hinges and are also available in ADA open/close hinges.

Tip: ADA opening/closing option features a magnetic touch latch and neutral hinge.

Tip: When mounted on V.I.A., a single cabinet cannot span more than one skin.

Tip: When stacking single-high overhead cabinets with hinged doors, the ADA option should be selected.

Tip: Finished proud back panels or inserts can be specified separately if the back of the cabinet is visible.

► Page 531

Tip: Suspension/ganging hardware to attach overhead cabinets to hutch is included with the hutch kit.

Double-High Overhead Cabinets

Composite Veneer, Wood Veneer, or Laminate

Left-Hand Unit

► Need help?
Product details,
page 198

Standard Includes

- Overhead cabinet:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Unfinished back on veneer units
- Finished back on laminate units
- Wood and laminate hinged doors have soft-close hinges
- Glass hinged doors have self-close hinges
- ADA opening/closing option, if selected

Required to Specify

- Style number
 - Composite veneer, wood, or laminate color number for overhead cabinet
 - Laminate color number for laminate fronts on laminate case, if selected
 - Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - Bracket selection (see below)
 - Options, if selected (see below)
- See *Surface Materials*, page 566.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Glass doors are not available with locks.

Tip: Double-high units cannot be mounted on panels or suspended between freestanding bookcases or supported by open hutch kits.

Tip: Wood and laminate hinged doors feature soft-close hinges and are also available in ADA open/close hinges. Glass doors feature self-close hinges and are also available in ADA open/close hinges.

Tip: ADA opening/closing option features a magnetic touch latch and neutral hinge.

Tip: The interior shelf behind the tall (large) door is fixed.

Tip: Only the tall (large) door(s) will lock if locking is specified on the combination units.

Organizer and Open Shelves

Composite Veneer, Wood Veneer, or Laminate

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: When back mounting 7½"H shelves on Montage panels, approximately 4" of the mounting bracket will be visible above the shelf.

Tip: Open and organizer shelves can attach to Enhanced Montage off-mod panels using end-mount brackets.

Tip: Open shelves and organizer shelves should not be wall-mounted on drywall, Montage, Answer, Privacy Walls, or V.I.A.—mounted below 38". They are not designed to function as a seat, or for heavy, bulk storage such as books.

Tip: Open shelves are not recommended for use as bookshelves.

Tip: When mounted on V.I.A., a single cabinet cannot span more than one skin.

Desktop Organizer

Composite Veneer, Wood Veneer, or Laminate

Desktop Organizer

Caution: Vertical organizer must be used against a wall with a service module or a hutch kit with a full back. A hutch kit with a partial back can be used if the vertical organizer is placed in the corner of the hutch kit.

Tip: If there is a need to support an overhead, use a stacking paper organizer rather than a vertical organizer. The vertical organizer fits under an overhead but does not attach.

► See *Stacking Paper Organizer*, page 536.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or *SmartTools*.

Tip: When a vertical desktop organizer is used, there is not enough depth for both a tackboard and a standard light valance. Consider an LED shelf light with or without a metal light housing.

Tip: The vertical desktop organizer must be used under a shelf, service module, or overhead, even though it does not attach, to limit the weight placed on its shelves.

Standard Includes		Required to Specify
► Need help? Hutch Kits with Tackboard

Tip: Because tackboard is one-piece design, fabric will be railroaded for consistent application.

Tip: Overhead cabinets mounted on one-sided hutch kits attach to a tower or stacking bookcase on the other side. Specify suspension/ganging hardware kit separately.

Tip: Backs of hutch kit tackboards are unfinished.

Tip: When specifying a single-high overhead cabinet supported by a hutch kit adjacent to a stacking bookcase, use a one support hutch kit and suspend the other end of the overhead from the bookcase. This will allow for precise alignment.

Standard Includes		Required to Specify

36⁵/₈"H Single-High Service Modules

Composite Veneer, Wood Veneer, or Laminate

► Need help?
Product details,
page 208

Standard Includes

- Service module:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Unfinished back on veneer units
- Finished back on laminate units
- Hinged doors have soft-close hinges
- Cable pass-through on bottom edge of back panel
- Attachment hardware: black paint only

Required to Specify

- 1 Style number
 - 2 Composite veneer, wood, or laminate color number for service module
 - 3 Laminate color number for laminate fronts on laminate case, if selected
 - 4 Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 566.

For laminate price group 2 and 3 pricing,
please refer to the electronic
catalog or SmartTools.

*Tip: 36⁵/₈"H single-high
service modules align with
the top of 65⁵/₈"H towers and
bookcases when mounted
at 29"H.*

*Tip: Glass doors feature
self-close hinges and are
not available with soft-close
hinges. Glass doors are not
available with locks.*

*Tip: ADA opening/closing
option features a magnetic
touch latch and neutral hinge.*

*Tip: If using a modesty panel
on a worksurface below a
service module, order a cable
pass-through in the modesty
panel to facilitate cable
routing.*

43½"H Single-High Service Modules

Composite Veneer, Wood Veneer, or Laminate

► Need help?
Product details,
page 208

Standard Includes

- Service module:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Unfinished back on veneer units
- Finished back on laminate units
- Hinged doors have soft-close hinges
- Cable pass-through on bottom edge of back panel
- Attachment hardware: black paint only

Required to Specify

- 1 Style number
 - 2 Composite veneer, wood, or laminate color number for service module
 - 3 Laminate color number for laminate fronts on laminate case, if selected
 - 4 Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 566.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: 43½"H single-high service modules align with the top of 72½"H towers and bookcases when mounted at 29"H.

Tip: Glass doors feature self-close hinges and are not available with soft-close hinges. Glass doors are not available with locks.

Tip: ADA opening/closing option features a magnetic touch latch and neutral hinge.

Tip: If using a modesty panel on a worksurface below a service module, order a cable pass-through in the modesty panel to facilitate cable routing.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Double-High Service Modules

Composite Veneer, Wood Veneer, or Laminate

Left-Hand Unit

► Need help?
Product details,
page 208

Standard Includes

- Service Module:
 - Composite veneer group 1 case with composite veneer front
 - Wood group 1 case with wood front
 - Laminate price group 1 case with same or contrasting laminate front
 - Laminate price group 1 case with composite veneer or wood price group 1 front
- Unfinished back on veneer units
- Finished back on laminate units
- Hinged doors have soft-close hinges
- Cable pass-through on bottom edge of back panel
- Attachment hardware: black paint only

Required to Specify

- 1 Style number
 - 2 Composite veneer, wood, or laminate color number for service module
 - 3 Laminate color number for laminate fronts on laminate case, if selected
 - 4 Composite veneer or wood color number for wood fronts on laminate cases, if selected
 - 5 Options, if selected (see below)
- See *Surface Materials*, page 566.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Double-high service modules align with the top of 77½"H towers and bookcases when mounted at 29" high.

Tip: Shelves are not adjustable.

Tip: Glass doors feature self-close hinges and are not available with soft-close hinges. Glass doors are not available with locks.

Tip: ADA opening/closing option features a magnetic touch latch and neutral hinge.

Tip: Only the tall door will lock if locking is specified on the combination units.

Tip: If using a modesty panel on worksurface below a service module, order a cable pass-through in the modesty panel to facilitate cable routing.

Magnetic Back Painted Glass

► Need help?
Product details,
page 214

- Standard Includes**
- Frame: paint price groups 1 and 2
 - Glass: back painted glass
 - Attachment hardware: black paint

- Required to Specify**
- 1 Style number
 - 2 Paint color number for frame
 - 3 Back painted glass color number for glass
 - 4 Size option (see below under Required Selections)
 - 5 Application, if modular size selected (see below under Required Selections)
 - 6 Service module, if service module application selected (see below under Required Selections)
 - 7 Overhead, if overhead application selected (see below under Required Selections)
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 566.

Tip: Modular selections account for the height needed to install, and offer a way to run low-voltage wires along the top.

Tip: Application only applies when modular size option is selected.

Tip: Only rare earth magnets may be used with magnetic back painted glass. Such items can be purchased at most office supply outlets online or in-store.

Tip: Spacers for cord management can also be used to align depth of magnetic back painted glass with depth of fabric tackboard. Spacers are always included with the mounting hardware.

Tip: Mirrored bronze is not offered in magnetic back painted glass, due to the extreme difficulty in completely erasing any writing.

Tip: Specifying with cord management makes the glass panel $\frac{3}{8}$ " shorter to allow room for cords. Cord management may only be selected when an overhead application is specified and may be chosen with all overhead options.

	Required Selections	U.S. Price	Required to Specify
Size Option	• Modular • Parametric	Prices at right Prices at right	Specify with modular. Specify with parametric.

Tip: The minimum parametric size is 14"W X 6"H. The maximum parametric size is 102"W X 48"H.

Tip: If using parametric sizing with an overhead, subtract ³/₈" from the height for cord management.

Electrical and Cable Management

Technology Zone

Tip: When using modular technology zones, it is mandatory to confirm the exact circuit configuration for the six outlets to meet customer requirements. The standard configuration may not meet the customer needs.

Tip: Field Installation is required for use. Worksurfaces will need a 24"L x 4 9/16"W cutout to be field-cut in order to accommodate a flush integrated technology zone.

Standard Includes	Required to Specify
- Need help? Product details, page 252 - Technology zone: paint	1 Style number 2 Paint color number for technology zone - See <i>Surface Materials</i>, page 566.

Specification Information

Width	Style Number	U.S. Price

Corded (9' Power Cord)

24"	E6VZ24C	\$1139

Power Units with Cord Pass-Through

Tip: Power units are installed in locations below square grommets and extend below the worksurface.

Tip: Power units cannot be used over 15"W or 18"W underworksurface storage, but can be used over 30"W and 36"W 2-high lateral files that are 30"D.

Tip: Power units cannot be used over 1.5 high storage.

Tip: Power unit with cord pass through cannot be used next to glass modesty panel, adjustable height leg, or gate leg.

Standard Includes	Required to Specify
- Need help? Product details, page 254 - Power unit: black textured paint only - Attachment hardware 6' power cord with three-prong plug, when applicable: black plastic only	Style number

Surface Materials

This listing includes all the surface material choices that are available for the Elective Elements products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials.

Surface Materials Binders include:

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or top only.

Tip: For ease of specification, full-fill finish codes can be selected on other veneer components being used in settings with full-fill veneer work-surfaces. The other components will not have the final fill coat applied and will be open pore, but the finish color will be consistent with the full-fill work-surface. Therefore, the cost for full-fill finishes will not be applied to non-worksurface components.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as a part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are part of our Select Surfaces program as Wood Group 1 pricing.

Composite Veneer Group 1

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Low sheen wood finish topcoat, approximately 15 gloss level instead of standard 35 gloss level, is available through Customiz stain at no additional cost.

2HWD	Resolute Walnut
2HWE	Natural Recon
2HWF	Smoked Walnut E

Tip: When specifying a blade edge worksurface with a laminate, the underside of the blade edge will have an unstained surface. This is predominantly noticeable with darker laminates. In this case, a square worksurface is recommended. When specifying with a veneer, the underside is stained the same color as the worksurface.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$105 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

How to Order

Once you have confirmed that the laminate you've selected has been tested and approved, you are ready to place your order.

To order an Open Line laminate:

- Mark the purchase order with the laminate manufacturer, laminate number, and laminate description.
- Use the appropriate Open Line laminate number, 2900.
- Use the appropriate "2K" number to indicate the edge color requirements.

Tip: Refer to the OLL coordination matrix on page 572 to determine the correct finish.

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Paint

Tip: Not every paint color is available on every painted component.

Veneer Cut Guidelines

Veneer Cut Guidelines

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Specification Guidelines for Vertical Fabric Applications

Warp horizontal means the height dimension of the tackboard is perpendicular to the warp of the fabric.

Application Topics

Tip: Fabric warp direction cannot be altered from standard on tackboards.

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

Surface Materials Representatives

are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

For further information regarding COM fabrics, refer to the *Steelcase Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR999 (Master keying numbers: XF1001 to XF3000). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
► See below.

Key Random

Required to Specify

Master key random	+\$37	Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR999 (Master keying numbers: XF1001 to XF3000).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR999 (Master keying numbers: XF1001 to XF3000). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

► See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR999 (Master keying numbers: XF1001 to XF3000).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCKFR FR320
5	LOCKFR FR350
15	LOCKXF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

For Canadian Pricing
 Multiply U.S. Price by the Canadian price factor.
► See page 1 for details.

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
- Lock cylinder for use on Elective Elements products - Two keys		1 Style number 2 Lock finish 9201 Polished Chrome 9250 Ember Chrome 3 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR999.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR999.
Master key random	+\$37 each	Specify <i>master key random</i> .
Master key specific	+\$37 each	Specify key number from XF1001–XF3000.
Master key consecutive	+\$37 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF3000.

Specification Information

Style Number	U.S. Base Price

FR Series (Standard Keying System)—Lock Cylinder

LOCKFR	No cost

Standard Lock Tool

877102003SR	\$37

XF Series (Master Keying System)—Lock Cylinder

LOCKXF	No additional cost. Price included in price of furniture with master-keyed locks.

Master Lock Tool

877102002SR	\$37

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

 **For Canadian Pricing**
 Multiply U.S. Price by the Canadian price factor.
