# Designing Solutions That Work Better

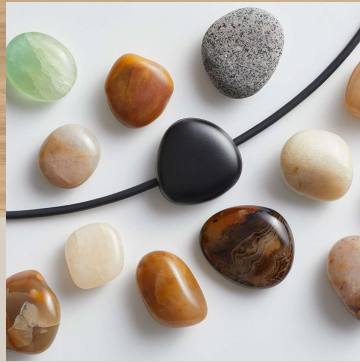

---

# Ocular<sup>TM</sup> Collection

Successful hybrid collaboration relies on meeting experiences that build connection — enhancing each participant's sense of ease, equity and engagement on both sides of the camera. Prompted by the new realities of hybrid work, we studied these effects and learned that traditional rectangular tables were hindering rather than helping people maintain contact with each other, the camera and their technology.

The entire Ocular Collection was designed to help create a better solution by making tables with organic, curved forms, enabling more connected, inclusive sightlines for everyone.

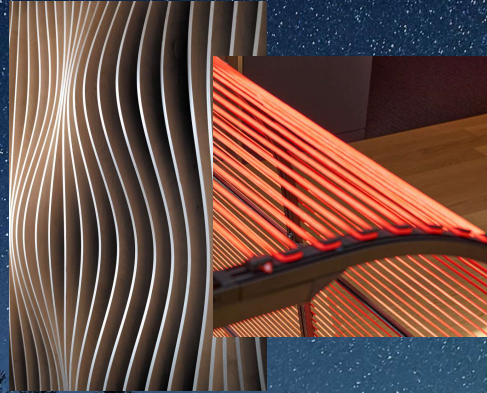

# Campers & Dens

Inspired by the layered privacy and shared joy of campgrounds, Steelcase's brand Orangebox created a playful range of architectural elements — camper vans, awnings, cabins — designed to bring community and flexibility to the workplace.

Each setup is unique, sustainable, and easy to move or refresh, evolving with the needs of modern work.

# Migration™ Desking Collection

Height-adjustable desks may be the peak of utility, but they're not known for their aesthetic appeal. That reality had room for improvement, where applying the warmer aesthetics and finishes of home could create a more inviting desk experience.

We brought beautiful wood veneers and laminates to Migration's work surface, with refined, rounded corners and the option of softer profiles to bases and legs, in every paint shade possible. The result is more color, more materiality, more design choice.

# Steelcase Flex Privacy Wrap

In the modern hybrid workspace, there's a premium on restoring places for privacy and focus. We wanted to find a solution that could provide a protected feeling of shelter — a space apart from visual and even sonic distraction.

Drawing inspiration from the curvature and quiet of natural coves and bays, we created Flex Privacy Wraps as a gently hooded screen system that can wrap around a desk for enhanced seclusion. A unique, tufted knit fabric stretches over large frames, providing a variety of ways to make a cove of one's own.

# Steelcase Karman<sup>®</sup>

Karman was born of the challenge to create a beautifully minimalist, ultra high-performance chair that used fewer materials. Sophisticated engineering and years of research led to our first mesh, LiveBack<sup>®</sup> chair featuring Intermix, a proprietary, responsive textile that moves with the body. The unique weave creates layered colorwaves, adding dimension as the mesh wraps an ergonomic frame made of very few pieces.

All this weighs in at only 29 pounds, for one of the lightest and leanest chairs in the industry.

# WorkValet™

In the hybrid era, gains in flexible work space have come at the expense of personal space. But our belongings still need a place to belong.

We studied people's physical and psychological needs around storage to reimagine what a locker solution could be. The resulting WorkValet system creates a welcoming home base for people and their daily possessions that can double as useful space for teams, while letting everyone keep their things secure and accessible to them at any time.

# Coalesse Ensemble

Sometimes a familiar product can be dramatically improved by a single feature. For the Coalesse Ensemble Lounge System, the invention of a new, intuitive performance back allows people to shift from informal reclining to upright work, while making both postures more comfortable.

Inspired by the fluid folds of rolling hills, the rounded back of the lounge changes position in one smooth motion by way of an easy-to-use pull — simplicity that delivers mighty adaptability.

# Perxa Chair

In Valencia, Spain, there is a large freshwater lagoon where rice is grown for the famed native dish, paella. Sailors have always navigated these waters with a humble wooden oar called a Perxa.

Viccarbe's Perxa chair, by Italian designer Piero Lissoni, finds its form in this unlikely object. Made in solid ash and echoing the oar's simple, curved lines, this namesake chair unites one time-honored tradition of craftsmanship with another, in the creation of fine artisan furniture.

# High- Performance Seating Portfolio

Steelcase brings over 90 years of leadership in research, innovation, quality and sustainability to each high-performance chair we create. Our work begins in human-centered design — seeking a deeper understanding of how people work, sit and move in order to improve their wellbeing.

Better design means we can create more beautiful, responsive, higher-performing and longer-lasting chairs — upholding what's best and boldly reimagining the rest.

---

# Workstations that *Work Better*

---

# Workstations that Work Better

Whether assigned or shared, workstations provide a flexible destination for focused work, creating a sense of privacy, place and belonging. Panel systems, task seating, and height-adjustable desks each play a role, but it's how they come together that defines a great workstation and supports focus, comfort, and daily productivity.

---

More Solutions  
to *Work Better*

---

# Verlay<sup>®</sup> Tables

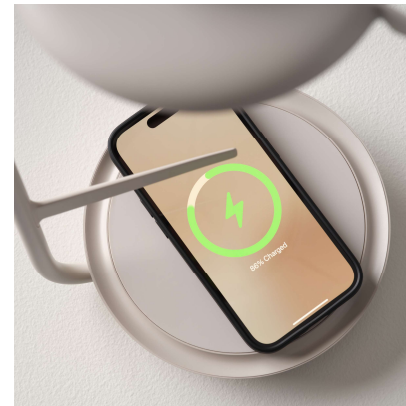

- Minimal in nature, the Verlay collection of collaborative tables adds warmth and comfort to the workplace.
- Thinner tops, organic shapes, solid wood or metal legs and tasteful color accents come together to create a broad range of choices that will complement your space.

**Steelcase**

# Steelcase Eclipse Light

- Inspired by the bright glow of the sun and moon, Eclipse's copper-tinted mirror and ring of light help people present themselves with visual confidence.

**Steelcase**

# Umami<sup>®</sup> Lounge System

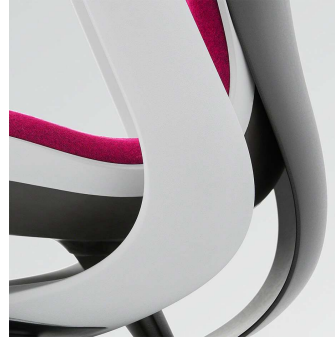

- Drifts of snow outside the windows of the Steelcase product design studio inspired the soft, sloping curves of Umami.
- Multiple design features can combine to promote variation over uniformity.

**Steelcase**

# SILQ<sup>™</sup> Chair

- Inspired by the use of carbon fiber in aerospace and prosthetics, SILQ is extremely strong and highly responsive.

**Steelcase**

# Flex Collection

- Observing how teams ingeniously hack their environments, the Flex Collection was designed to empower people to work their own way.
- Wheels, glides and many mobile components provide the freedom for teams to adapt their spaces on demand.

Steelcase

# Mackinac<sup>®</sup>

- Mackinac seamlessly connects spaces designed for diverse work modes, all within a compact footprint.
- Named after the bridge uniting Michigan's peninsulas, this research-driven solution helps people move fluidly through their day.

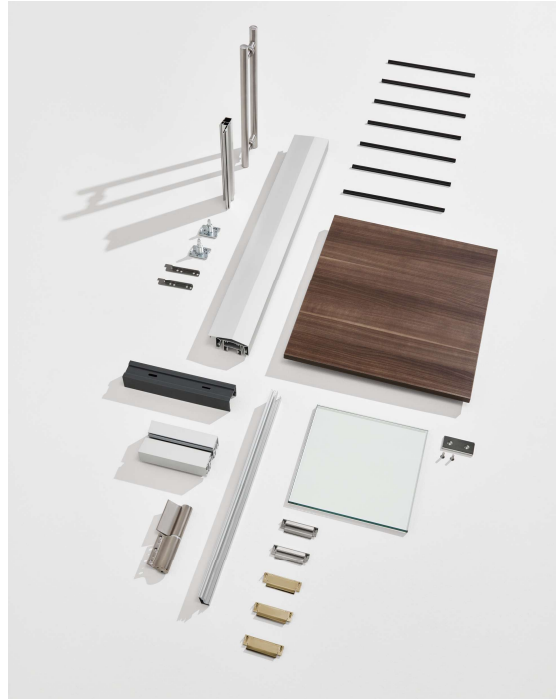

Steelcase

# Everwall™

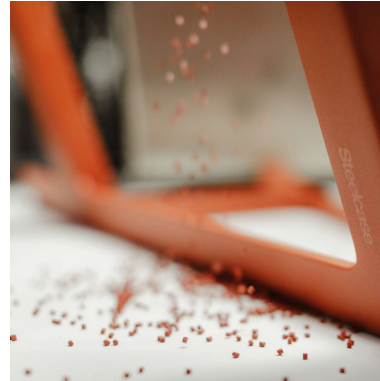

- Designed for disassembly, adaptability and circularity, Everwall enables interior spaces to evolve quickly and easily.
- A hybrid-unitized design enables fast, intuitive, and sustainable installation—among the quickest in the industry.

Steelcase

# Flex Perch Stool

- 100% recyclable, the space-saving Flex Perch Stool is designed for circularity.
- Our first furniture product made from electronics production waste.

**Steelcase**

# Amia<sup>™</sup> Chair

- Hidden technology is part of the implicit shape of the beloved Amia chair, quietly serving rather than drawing attention.

**Steelcase**

# Frank Lloyd Wright Rockford Collection

- The Frank Lloyd Wright Rockford Collection captures Wright's Usonian style in striking furniture that can be approached from any angle.

**Steelcase**

# Node<sup>®</sup> Chair

- Insights into how students learn best in active, flexible environments led to the design of the highly mobile Node chair.
- Interactive seating that replaces static chairs for quick transitions in the classroom.

# Brody™ WorkLounge

- Designed to be good for both brain and body, Brody WorkLounge offers a shelter from distractions, while adding high-performance features to aid deep focus.

# West Elm Health Mesa Collection

- The West Elm Health Collection is designed to create warm environments
- Available in a wide range of woven and coated fabrics that bring durability and cleanability to healthcare spaces.

**Steelcase**  
HEALTH

# Cluvo Height Adjustable Desk

- Cluvo desks pair an elevated design aesthetic with innovations in performance and movement — all factors that contribute to more wellbeing at work.

# Marien152 Seating Collection

- Marien's richly tailored seating echoes the idea of adding throw pillows to chairs for extra comfort.
- An exciting range of upholstery pairings adds custom style.

coalesse

# Jean Nouvel Seating Collection

- From architect Jean Nouvel and the Coalesse Design Group, elemental forms reminiscent of pebbles can be combined freely to take any shape in a space — furniture that flows naturally.
- Continuously curving upholstery expertly supports arms and backs across each seat.

**coalesse**

# Massaud Lounge Collection

- Inspired by first-class airline seating, the Massaud lounge chair serves as a compact executive workspace, providing supportive comfort, an optional swivel tablet surface and access to power.

coalesse

# Grid Collection

- Part sofa, part lounge, part meeting space, Grid is designed to divide and organize a larger work setting, while conveying an appealing sense of destination.
- Insights about how people choose a location helped to shape the versatile structure of this colorful, modular room-within-a-room.

# Knitty Lounge Chair

- Magnifying a small-scale knitting pattern to the full dimensions of a chair, Knitty's larger-than-life silhouette is made with super-sized 'yarn' that resembles the giant ropes used to anchor ships.

m o o o i

# Arco Lamp

- Designed in 1962, Arco was originally based on the shape of the common streetlight.
- Combining technical innovation and visual appeal, a curved, adjustable metal stem offers both direct and indirect light, while the marble base acts as a beautiful counterweight.

FLOS

# Hopper Picnic Table

- A fresh take on the classic picnic table, Hopper features unique angled legs reminiscent of the traditional poles used to string up hop plants in the fields around the Extremis HQ in Belgium.

**extremis®**

# West Elm Work Boardwalk Collection

- East meets West in the design of the modular Boardwalk system.
- Pillow-like cushion seats inspired by Japanese zaisu (a traditional floor chair with a supportive backrest) sit on a simple platform with natural wood detailing, adding a nod to 1960s California modern residential design.

west elm

Community of  
Brands

---

# West Elm Work Fulton Lounge Chair

- Timely yet timeless, the West Elm Work Fulton Lounge Chair offers a modern twist on the classic armchair.
- Inspired by vintage bentwood designs, its cushioned seat is cradled by a natural wood frame—bringing warmth and comfort to any space.
- With rich materials and crafted wood, Fulton blends in or stands out with ease.

west elm

# NomNom Light

- Designed by Odin Visser, NomNom is two lines and a sphere—like chopsticks holding something delicious.
- As a stand-alone, there's no way around NomNom's playful elegance, but when multiplied in a bundle or in a row, it's simply irresistible.
- Available in six colors.

m o o o i

# Funda Lounge Chair

- Designed by Stefan Diez, means “cover” in Spanish.
- Funda promotes the circular economy with its two different pieces – a metal frame and upholstered seat and backrest – able to be recycled independently, extending its lifecycle.

**viccarbe**

# Panigiri

- Named after the warmth of Greek festivals, Panigiri seamlessly combines intelligent design with a hospitable ambiance.
- This modular system offers endless seating combinations in a compact, flexible format.
- It's also compact to transport, store or move – each piece fits on a single pallet and moves easily through doors, vans, or elevators.

## Win a Local French-Inspired Experience *Exclusively for Dealer Design Teams*

Inspired by the refined elegance of French architect Jean Nouvel, Coalesse introduces a new way to win with Coalesse. Each quarter, the Dealer Design team with the highest invoiced sales of the Jean Nouvel Seating Collection by Coalesse will win an all-expenses-paid French-inspired experience, right in your own city.

### What is a French-Inspired experience?

- Experiences may include or dinner at a local French restaurant, a French wine and cheese night, or a French cooking class. Actual experience will vary based on market and location.

### Who is eligible?

- This prize will be awarded at the team level, by dealer branch, exclusive to Dealer Designers
- To qualify, you must be a in a design role at a dealership.

### Quarter Start and Close Dates

Orders will be credited to a quarter based on their invoice (ship) date.

- Quarter 1: Oct 1, 2025 - Dec 31, 2025
- Quarter 2: Jan 1, 2026 - March 31, 2026
- Quarter 3: April 1, 2025 - June 30, 2026
- Quarter 4: July 1, 2026 - Sept 30, 2026
