

IM#: 19-0115698

A multi-functional monitor stand.

Computer monitors are multi-functional in the workplace today. We're using the same screens at personal workstations, in small collaborative environments and for in-between spaces. With so much visibility, aesthetic is as important as function.

With a sleek design, the Forco Monitor Stand supports monitors of up to 36 inches and 20 pounds without any clamps or brackets. It's available in a wide range of colors, and it organizes and conceals cables for a clean, cohesive display throughout the workplace.

STATEMENT OF LINE

Side View

Back View

Max Monitor Weight: 20lbs
Max Monitor Size: 36"

FEATURES

Movement

Large monitors often require less articulation, so Forco was designed with the ability to tilt and pan to avoid unnecessary reach and dynamic movement.

Color

Forco is available in all standard colors to match any existing workspaces or add a touch of color to your environment.

Freestanding

No planning or clamp installation is required. Simply mount the monitor to the included tilt head and it's ready to be used in any type of workspace.

SURFACE MATERIALS

Sample Stand
