Steelcase Hybrid Solutions

Availability

Electronic price list updated with release 206.B (U.S.) and 159.B (Canada), dated October 19, 2026.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a T. Products that are scheduled to be culled are indicated with an X, followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

▶For a list of all trademarks, refer to the last page of this specification guide. © 2026 Steelcase Inc.

Note: Ocular tables are not available to Canadian government.

For Canadian Pricing
Canadian factor can be found at www.steelcase.com/CADpricing.
Calculate in the following order to avoid rounding errors:
- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog
Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools – Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project-Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data
Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications
You can access these digital publications at www.steelcase.com or village.steelcase.com.

Planning Ideas

Planning ideas are available to help inspire, envision, and plan great solutions. 2D and 3D AutoCAD drawings, Sketch-Up files, and SmartTools drawings are available on the Planning Ideas site: www.steelcase.com/planningideas.

Support

Steelcase Capabilities
Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance, call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to http://www.steelcase.com/warranty/.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

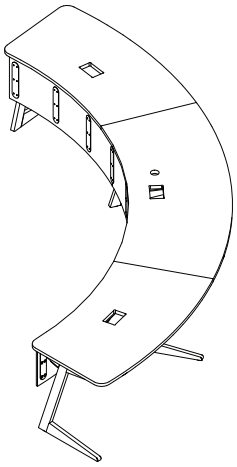

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: *https://www.steelcase.com/discover/steelcase/esg-overview/environmental/* Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at *Origin.build*.

Ocular Tables

Ocular is a collection of tables designed to improve sightlines and create more equitable and engaging hybrid meeting experiences within the workplace.

Ocular's unique table shapes position users intentionally around the worksurface to ensure that each user has equal presence while on camera while also delivering more natural conversations with virtual meeting attendees.

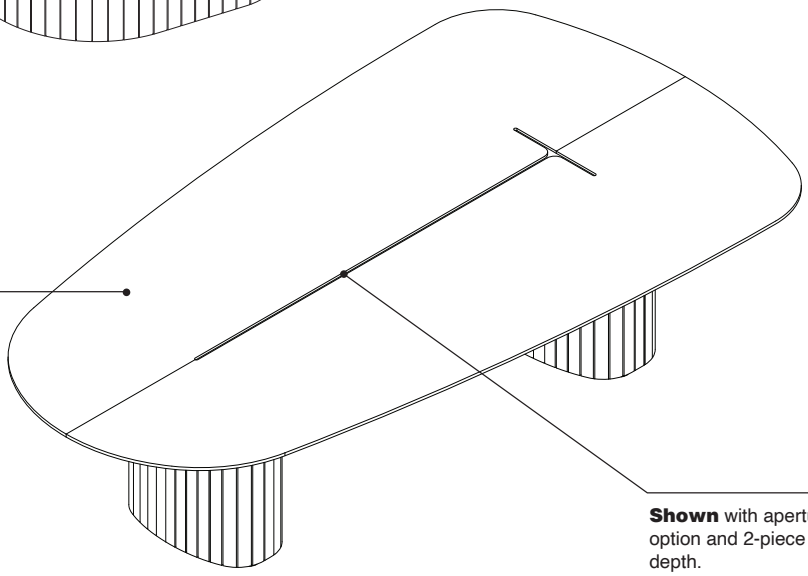

▶ Specifying, pages 10–20

Coupe3 has space for three seats and is 72" in width and 48" in depth.

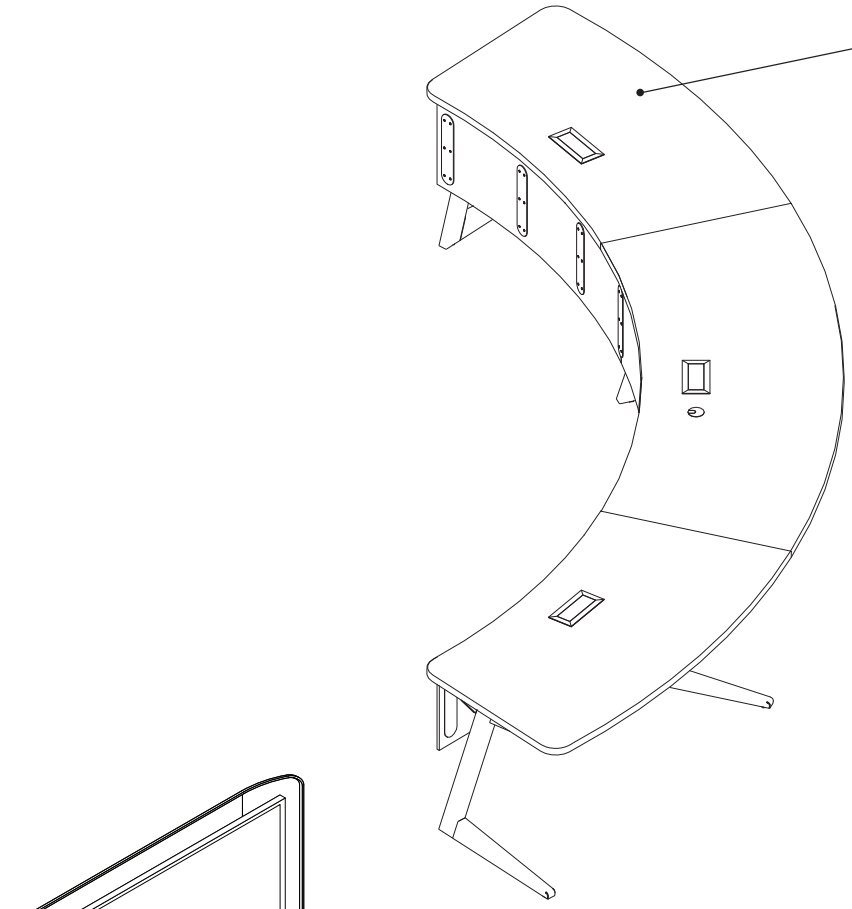

Coupe5 has space for five seats and is 82" in width and 70" in depth.

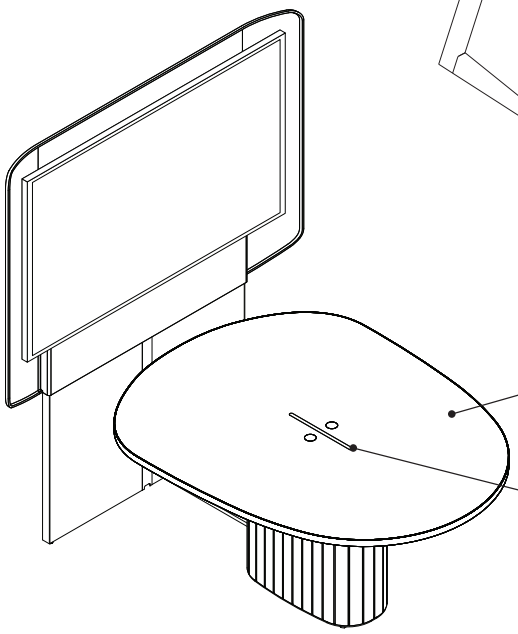

Sightline comes is sizes that support six (66" width and 91" in depth), eight (66" width and 120" in depth) , or ten (74" width and 156" in depth) seats.

Shown with aperture cutout option and 2-piece 120" depth.

Arc7 has space for seven seats and is 189½" in width and 60½" in depth.

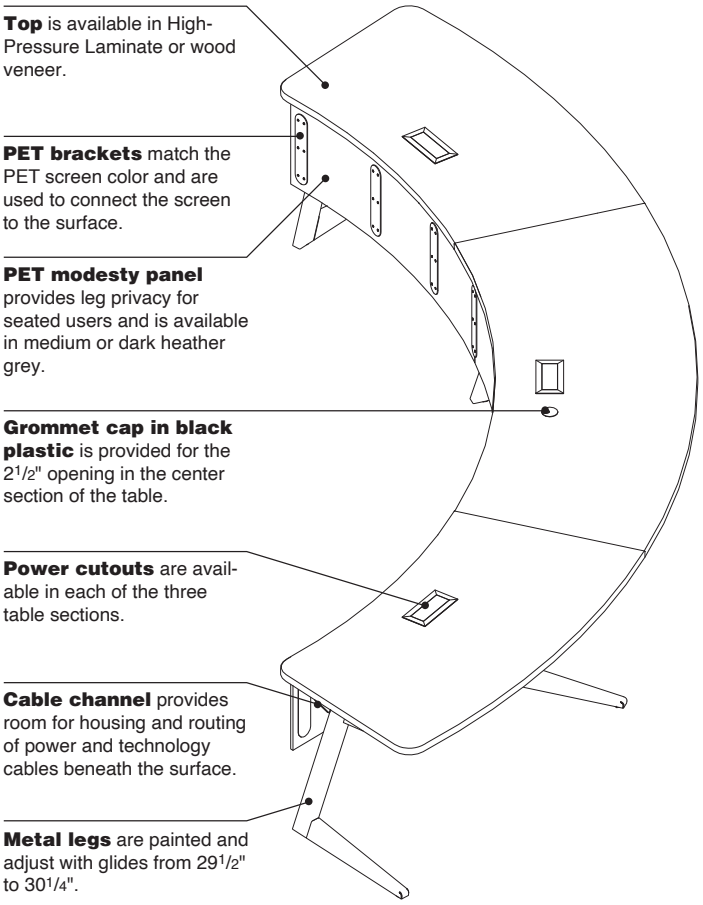

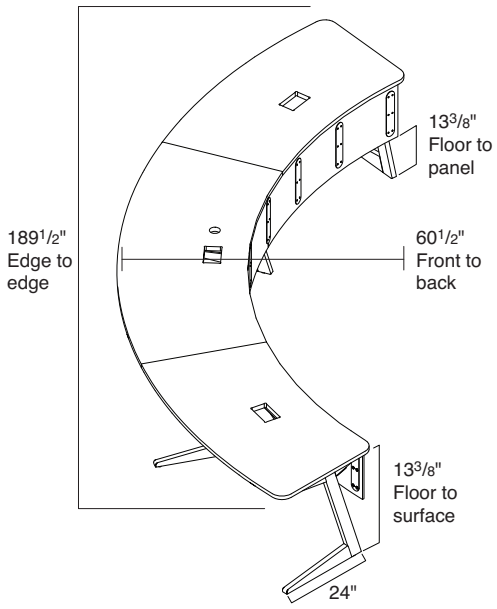

Coupe towers are available in both seated and standing heights. Each tower comes with two worksurface size options: 48" wide by 61" deep, or 60" wide by 67" deep. These configurations comfortably accommodate three to four users.

Shown with aperture and power module cutout option.

Arc7

▶ Specifying, page 48

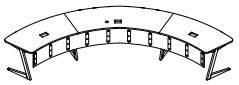

Actual Dimensions

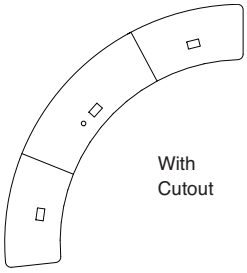

Width	189 1/2"
Height	29 1/2"
Depth	60 1/2"
Weight	326 pounds

Product Details

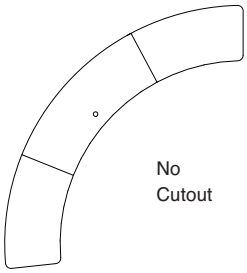

Arc7 is a curved table designed specifically for video centered meetings. All seats (up to seven) are placed on a single side of the table to provide a premier video meeting experience for both in-room and virtual participants.

Two table cut out types:

- With cutout includes three 6 1/2" x 4" cutouts for the three window pop-up power modules. A power module cutout is placed in each of the three sections of the table. A single 2 1/2" grommet hole is also included within the middle section of the table to accommodate for a room controller.

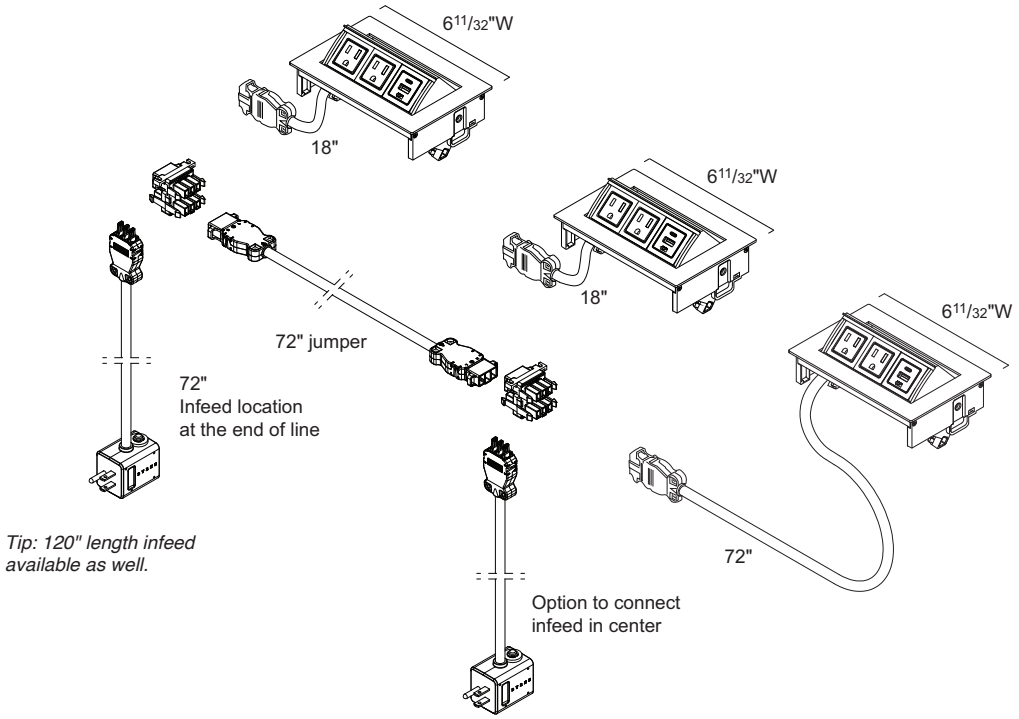

- No cutout provides a 2 1/2" grommet hole within the middle section of the table. Power module cutouts are not included within this configuration.

Surface edge is only available in straight 3 mm plastic or wood veneer.

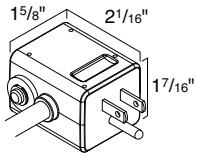

Steelcase
October 2026

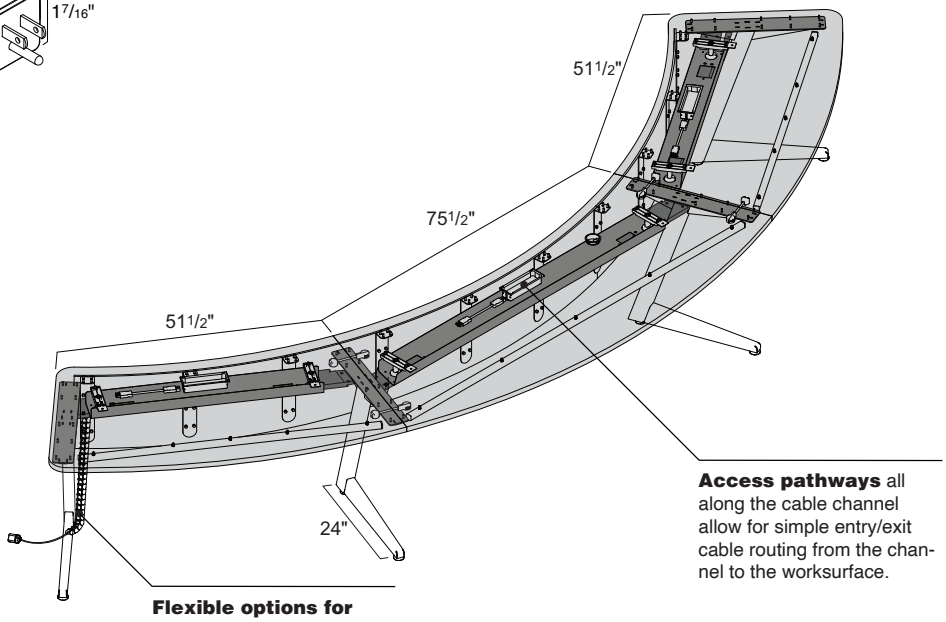

Three Window Pop-Up Power

Tip: 120" length infeed available as well.

Overcurrent Protection (OCP) 90° Plug

Flexible options for covering and routing all power and data cables are available up the table legs.
▶ See *Height-Adjustable Desks Specification Guide*

Access pathways all along the cable channel allow for simple entry/exit cable routing from the channel to the worksurface.

Power

Power units are three window pop-up units with two 110V AC power receptacles and one combination 20W USB Type-A + Type-C.

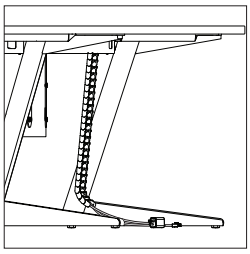

The modular power configuration (illustrated) utilizes the Steelcase universal modular power infeeds, jumpers, and power distribution blocks.

A hardwired power configuration (not shown) is available and instead includes 10' of cable directly attached to each pop-up power window, that must be hardwired into the building/structure power.

Cable channel with entry/exit passthroughs is beneath the surface for power devices and data cables making their way to the surface.

To ensure flexible access to power and data, it is important to plan infeed routing during installation. Please note that Arc7 table legs do not include factory cutouts for internal infeed routing.

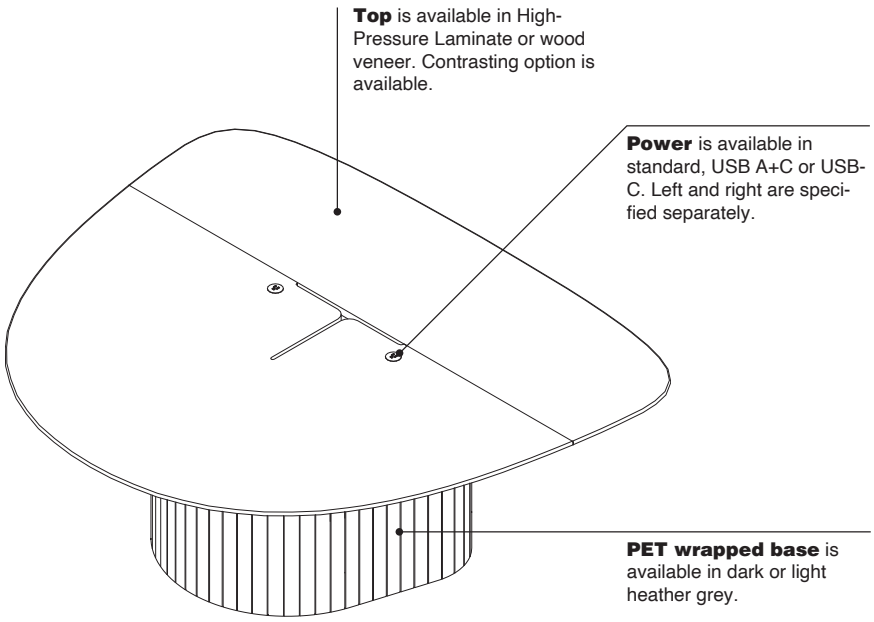

For cable management, Steelcase cable managers (style numbers **OLCR** or **MIGCR**) with fence connections can be added to the Arc7 table, as shown in the illustration.
▶ See *Height-Adjustable Desks Specification Guide*

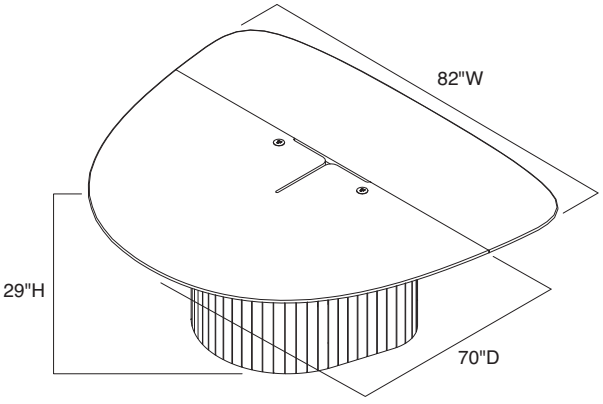

Additionally, third-party cable risers may be used to support the setup.

Coupe5

▶ Specifying, page 50

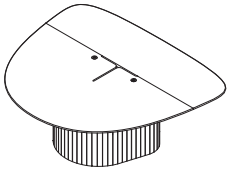

Actual Dimensions

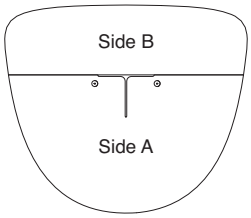

Width	82"
Height	29"
Depth	70"
Weight	291 pounds

Product Details

The Coupe5 is designed specifically for video-centered meetings. The table has ample space for up to five seats. The table's surface comes in two sections that are joined together.

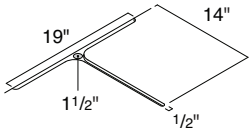

Two top types are available for the Coupe5 table:

- **Contrasting** allows specifiers to select two unique laminate or two unique veneer surface finishes for side A and side B of the table surface. *Tip: Contrasting color schemes must be either laminate to laminate, or veneer to veneer. Laminate to veneer contrasting is not supported due to mismatch in surface material thickness.*
- **Non-contrasting** allows specifiers to select a single laminate or veneer surface finish for side A and side B of the table surface.

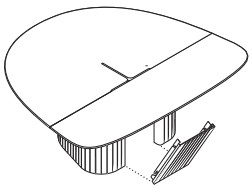

T-shaped aperture cutout is standard with the table and allows for easy, flexible access from above and below the table while also helping future proof for new power and technology systems.

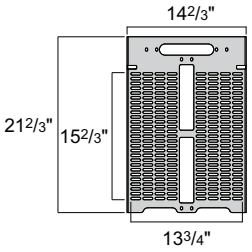

Aperture

Aperture cutout is 19" x 14" x ½". There is a 1½" opening in the center of the aperture.

Glides below the base adjust from 29" to 30½" to level the table on uneven floors.

Access door to the large hollow base provides easy access management to any housed power or technology components.

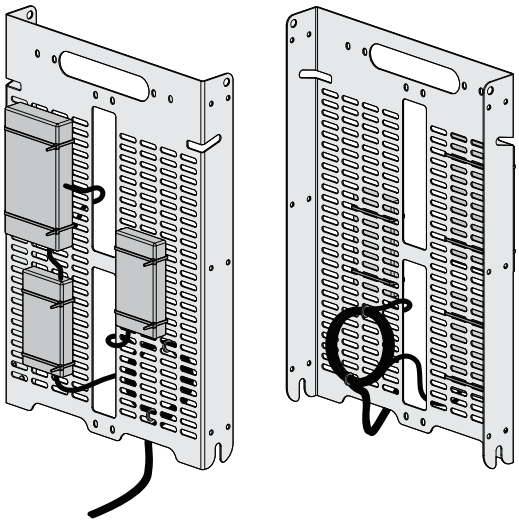

Surface edge is only available in plastic or wood veneer, in a ½" profile to an overall thickness of 1⅛".

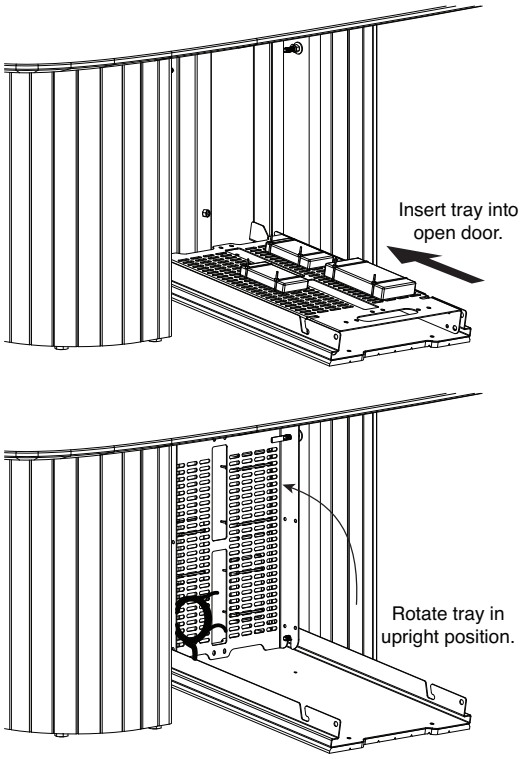

Wiring and Cabling

The tech tray for the Coupe5 comes standard and is included in the list price.

The tech tray can also be specified separately through Service Parts.

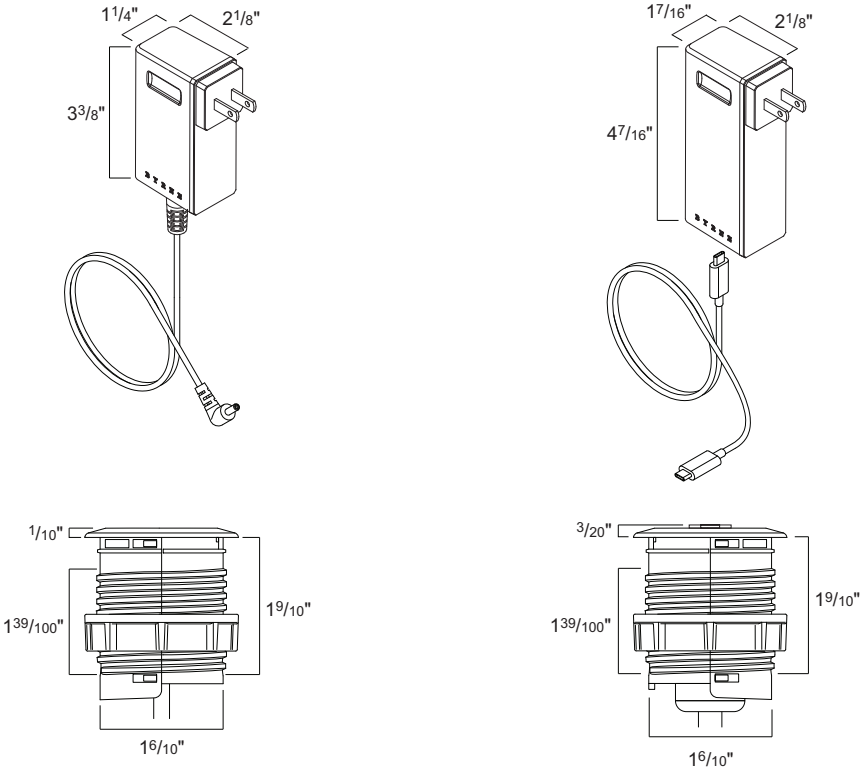

Tech tray can be used for mounting and housing a variety of audio video, power, and other technology components (components not sold by Steelcase).

The tech tray is easily inserted into the door of the Coupe tables for mounting cleanly within the base.

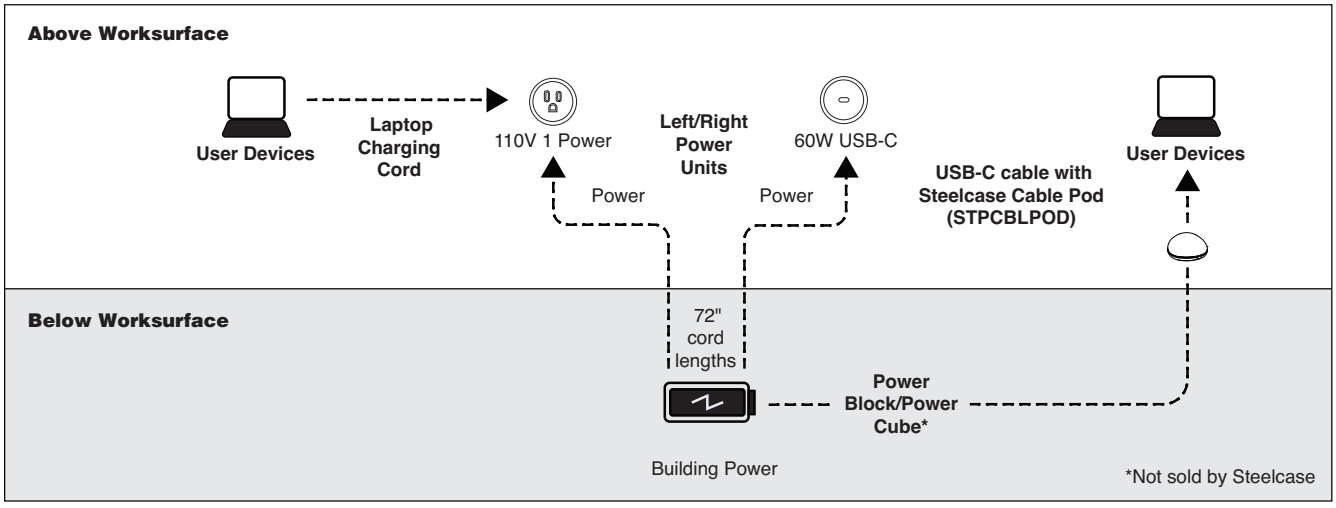

Coupe 5 Power Units

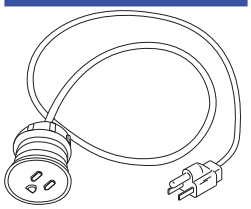

20W USB Type A+C,
Barrel connector, 72" cord

Type A+C

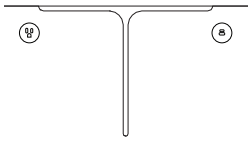

60W USB
Type C

Power is available in 110V standard power, combination 20W USB Type A+C, or single 60W USB Type C.

Standard power — standard three-prong power. Hardwired connection is not available.

Left-hand and right-hand power units can be specified into the surface of the table.

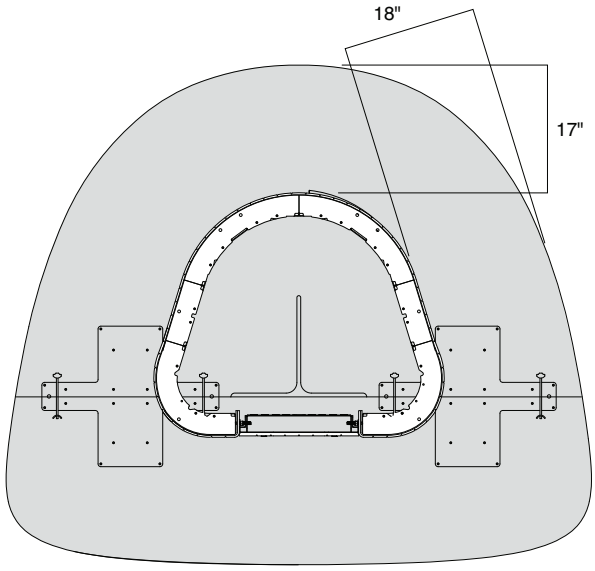

Aperture and power unit placements.

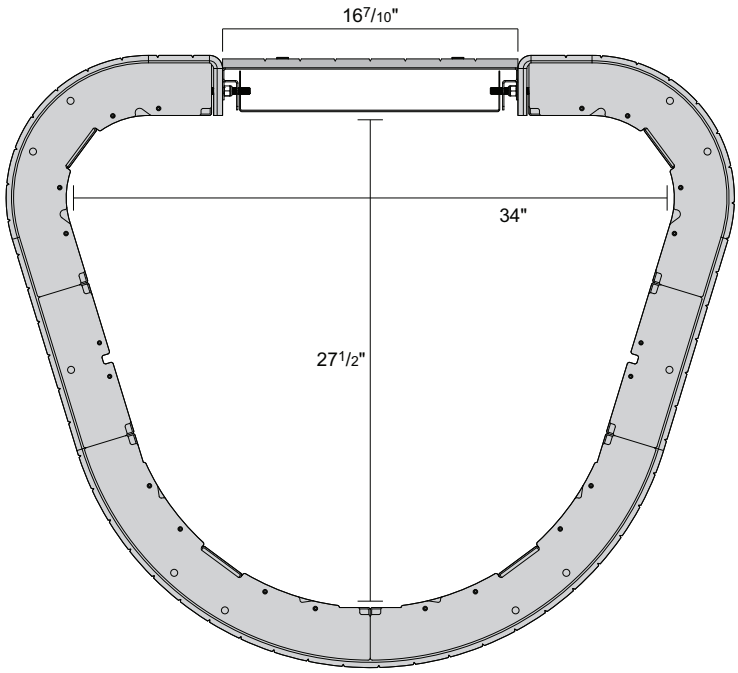

Plan for power beneath table — 72" cable length.

Knee and Foot Clearance for Coupe5

Tip: Knee and foot clearance is approximate.

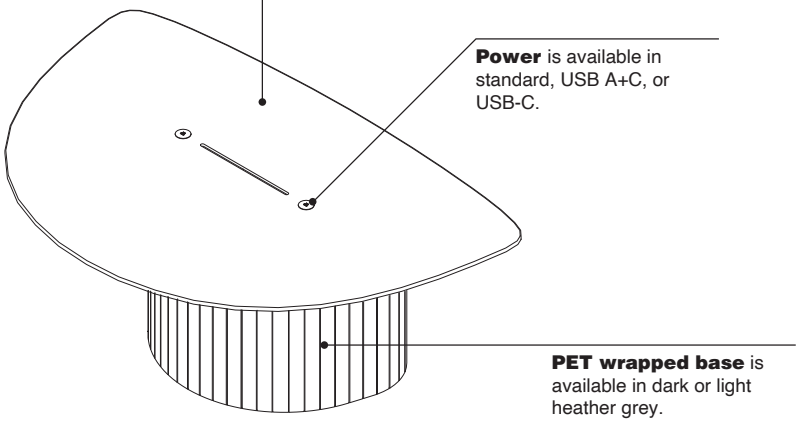

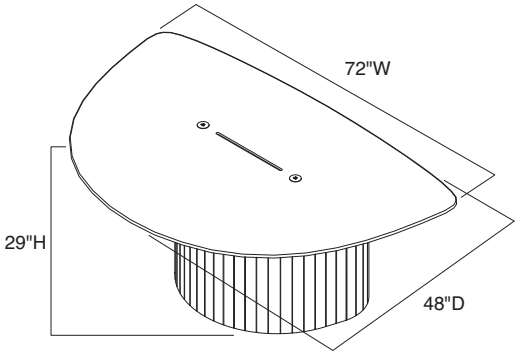

Access Door Clearance and Inside Dimensions

Coupe3

▶ Specifying, page 52

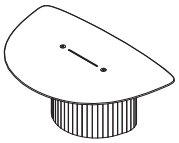

Actual Dimensions

Width	72"
Height	29"
Depth	48"
Weight	187 pounds

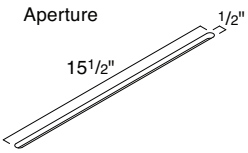

Product Details

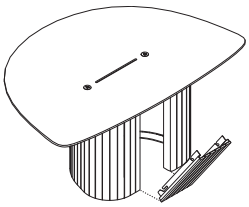

The Coupe3 is designed specifically for video centered meetings. The table has ample space for up to three seats.

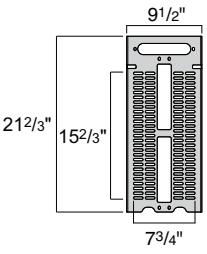

Top is available in High-Pressure Laminate or wood veneer.

Straight aperture cutout is standard with the table and allows for easy, flexible access from above and below the table while also helping future proof for new power and technology systems.

Aperture pass-through cutout is 15 1/2" in length and 1/2" in width.

Access door to the large hollow base provides easy access management to any housed power or technology components.

Glides below the base adjust from 29" to 30 1/2" to level the table on uneven floors.

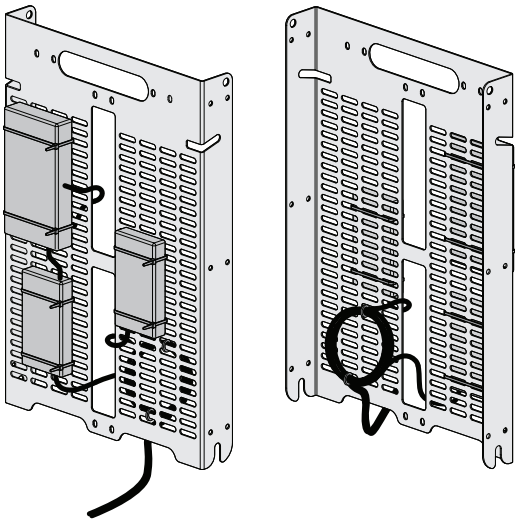

Surface edge is only available in plastic or wood veneer, in a ½" profile to an overall thickness of 1⅛".

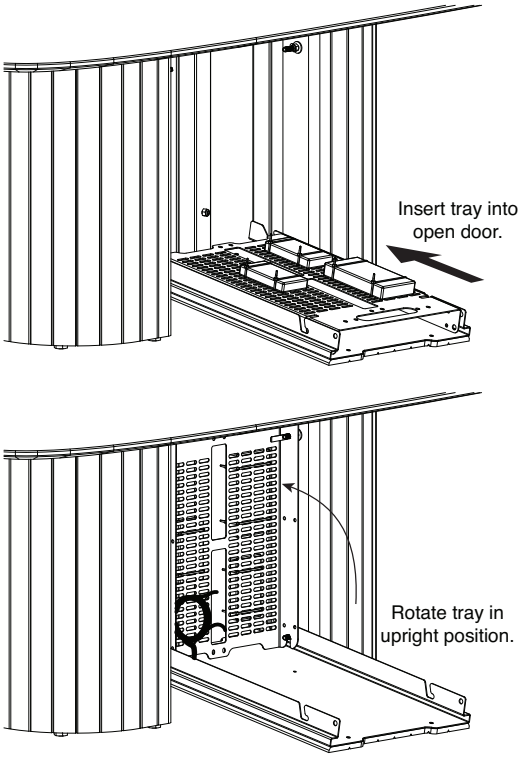

Wiring and Cabling

The tech tray for the Coupe3 comes standard and is included in the list price.

The tech tray can also be specified separately through Service Parts.

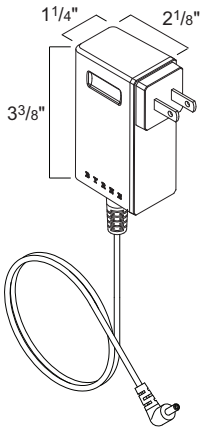

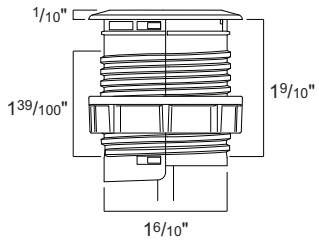

Tech tray can be used for mounting and housing a variety of audio video, power, and other technology components (components not sold by Steelcase).

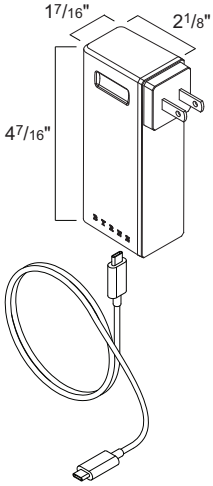

The tech tray is easily inserted into the door of the Coupe tables for mounting cleanly within the base.

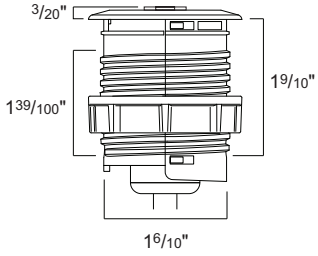

Coupe 3 Power Units

Sightline

▶ Specifying, page 54

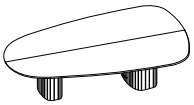

Actual Dimensions

Depth	91",120", or 156"
Width	66" or 74"
Height	29"
Weight	390, 432, or 557 pounds

Product Details

The Sightline tables are thoughtfully designed for people to people connection for both in-person and remote participants. The versatile shapes work across the floor plan accommodating various sizes of meetings.

High-Pressure Laminate Worksurfaces

User's edge profile is available in two shapes.

3 mm Plastic Edge

Knife Edge, Plastic

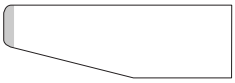

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

User's edge profile is available in two shapes.

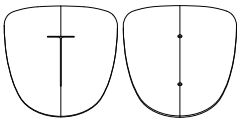

3 mm Wood Edge

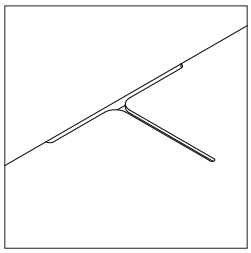

Knife Edge

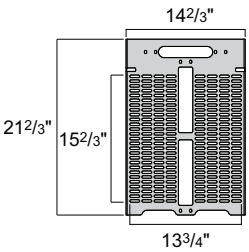

Optional grommet for wire pass-through can be used on both 3 mm plastic or wood edge and knife edge. The grommets are available in multiple finishes and will be centered along the depth of the table.

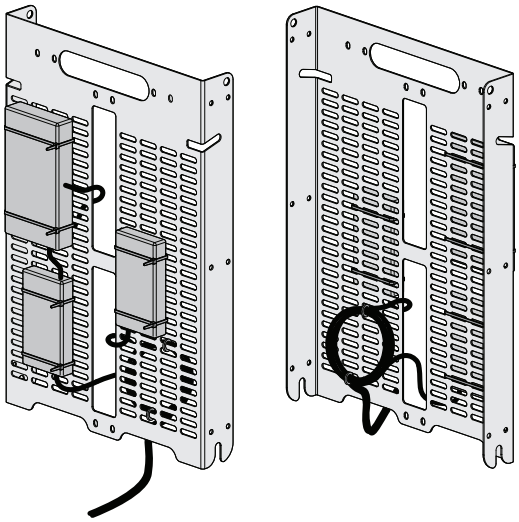

Optional aperture design for wire pass-through allows accessibility of power and technology from one end of the table to the other. Available on knife edge only.

Access opening to the large hollow base provides easy access management to any housed power or technology components.

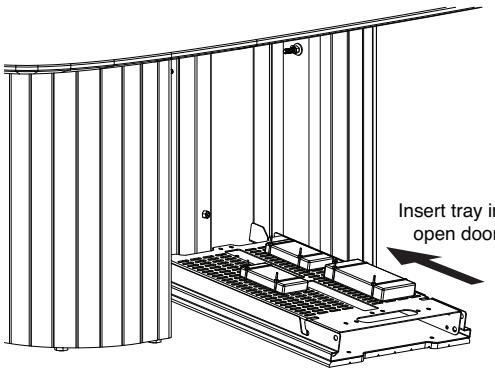

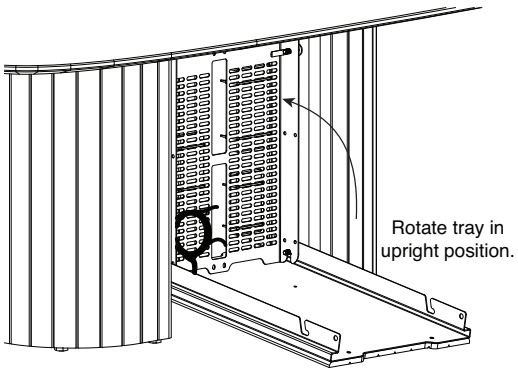

The tech tray for Sightline comes standard and is included in the list price.

The tech tray can also be specified separately through Service Parts.

Tech tray can be used for mounting and housing a variety of audio video, power, and other technology components (components not sold by Steelcase).

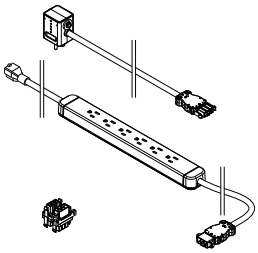

The tech tray is easily inserted into the door of the Sightline tables for mounting cleanly within the base.

Tech tray is always located at the wider end of the table.

PET wrapped base is available in dark or light heather grey.

Cable trays neatly route tech wires to base and are wrapped in PET for a clean aesthetic.

Power, Wiring, and Cabling

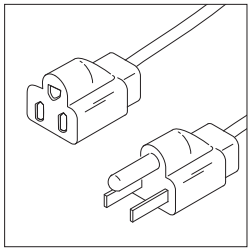

Utility power package includes all the components needed to power the table and works seamlessly with the power pyramids. Utility power package includes:

- (1x) 120" infeed power cord
- (1x) distribution block
- (1x) 24" under worksurface utility power cord with 6 standard NEMA 5-15 3 prong OCP outlets
- (1x) additional female outlet

Modular power pyramids are compatible with Sightline tables and can be added to the worksurface, connecting to the utility power package. Each unit includes standard power with 2 outlets and 1 USB-A + USB-C 20W. The long cord allows users to pull power closer for ease of use.

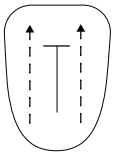

Standard NEMA 5–15 three-prong plug connects to building power.

Coupe Towers

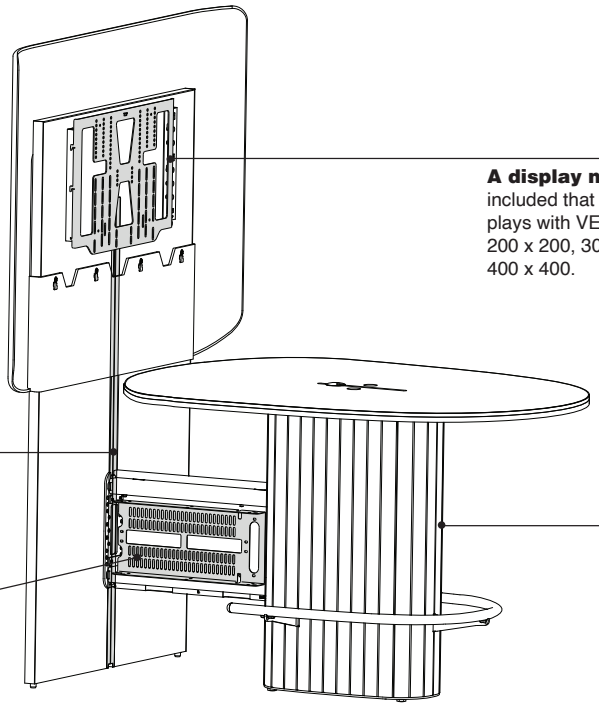

▶ Specifying, page 60

Actual Dimensions

	Seated	Standing
Depth	61" or 67"	61" or 67"
Width	48" or 60"	48" or 60"
Surface Height	29"	40"
Shroud Height	73"	84"
No Shroud Height	63"	74"

Coupe Tower Power, Technology and Cable Management

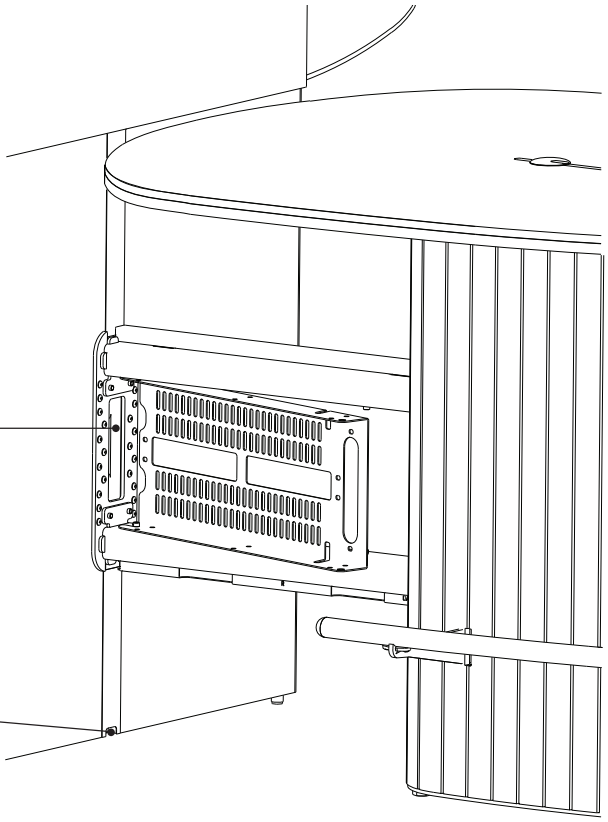

A display mount is included that supports displays with VESA patterns of 200 x 200, 300 x 300, and 400 x 400.

Removable cable covers provide easy access to all cable routing and management throughout the unit.

PET base is pressure fit for easy access.

An accessible technology tray can be used for housing power supplies, PCs, and other necessary AV meeting equipment.

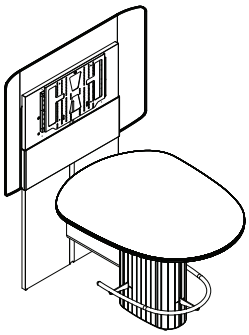

Tech tray houses the cables from the channel cover and routes them to the base of the table. The door does not require tools to take off, simply lift and remove to reveal the tech tray to neatly arrange the wires.

Power can be routed up the column base or through the mouse-hole at the base of the tower.

▶**Coupe Towers,** continued

Product Details

Coupe towers are a collaboration-ready, versatile, standalone solution that integrates technology and furniture in open and enclosed huddle spaces.

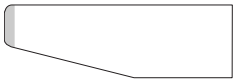

The Coupe towers are offered in seated and standing height options.

High-Pressure Laminate Worksurfaces

User's edge profile is available in two shapes.

3 mm Plastic Edge

Knife Edge, Plastic

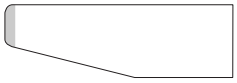

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

User's edge profile is available in two shapes.

3 mm Wood Edge

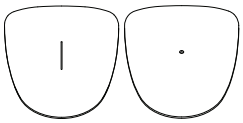

Knife Edge

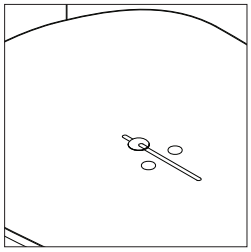

Optional grommet for wire pass-through can be used on both 3 mm plastic or wood edge and knife edges. The grommets are available in multiple finishes and will be centered along the depth of the table.

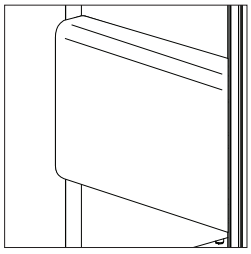

Power, Wiring, and Cabling

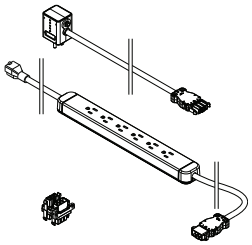

Aperture Grommet

Optional aperture design for wire pass-through available on knife edge only.

Channel cover is a toolless steel plate that covers cables routing from the wall to the monitor. The channel is easily accessible to wires for tech updates.

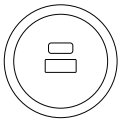

Utility power package includes all the components needed to power the table and works seamlessly with the power modules:

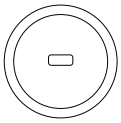

- (1x) 120" infeed power cord
- (1x) distribution block
- (6x) standard NEMA 5-15 3 prong OCP outlets
- (1x) 24" under worksurface utility power cord
- (1x) additional female outlet

110V Standard power

20W USB Type A+C

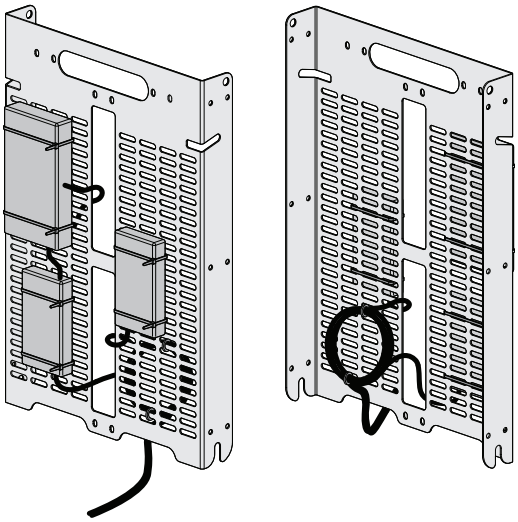

60W USB Type C

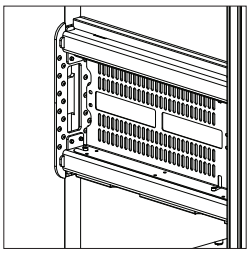

Power modules are available in 110V standard power, combination 20W USB Type A+C, or single 60W USB Type C and can be integrated into the worksurface.

Standard power — standard three-prong power. Hardwired connection is not available.

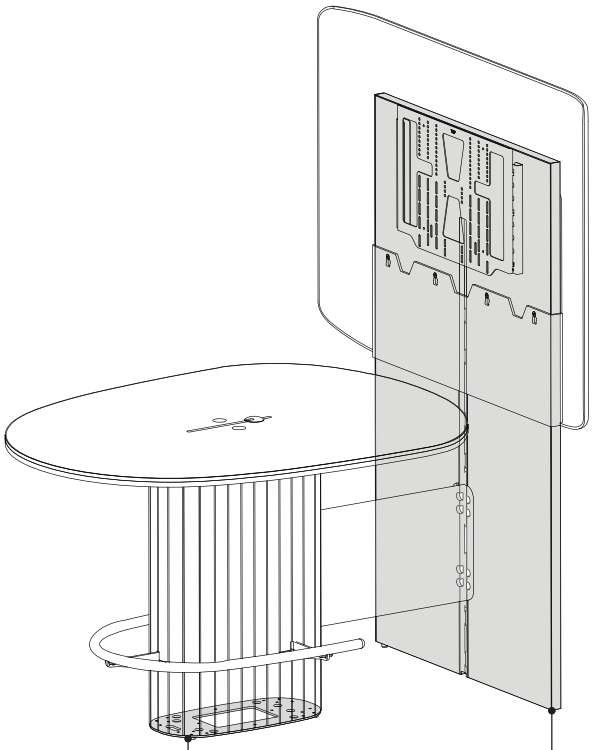

Left-hand and right-hand power units can be specified into the surface of the table.

Tech tray can be used for mounting and housing a variety of audio video, power, and other technology components (components not sold by Steelcase).

The tech tray is easily inserted into the door of the Coupe tower for mounting cleanly within the base.

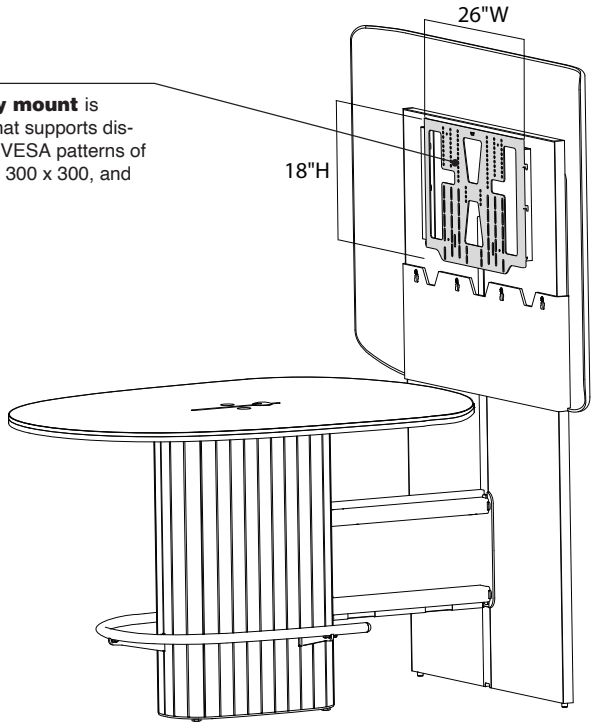

The tower base has an access port at the bottom for an alternative route for power and data cables to make their way into the structure.

The tower panel is on glides and has a cable pass through in the middle to provide a clear path for power and data cables to make their way into the structure.

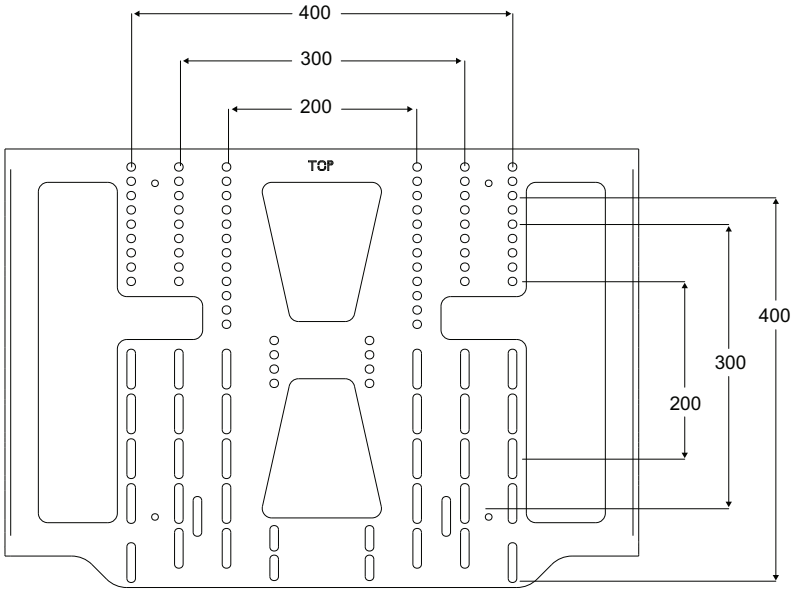

▶**Coupe Towers,** continued

Display Mount Plate and Rails

Supports up to 400 x 400 VESA.

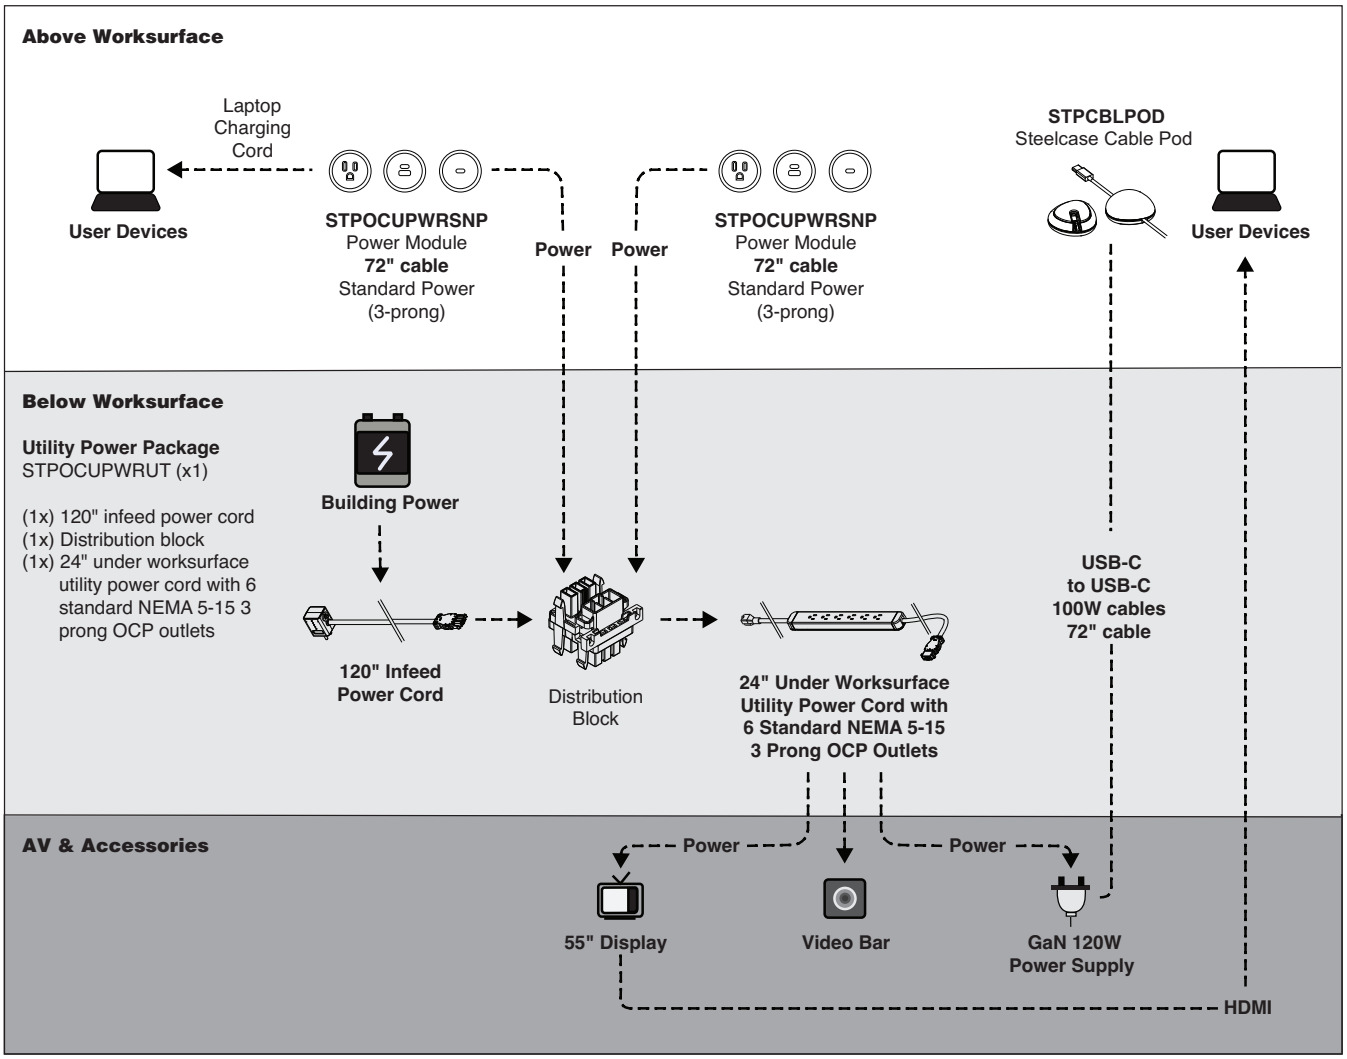

A display mount is included that supports displays with VESA patterns of 200 x 200, 300 x 300, and 400 x 400.

Display Mount Plate and Rails

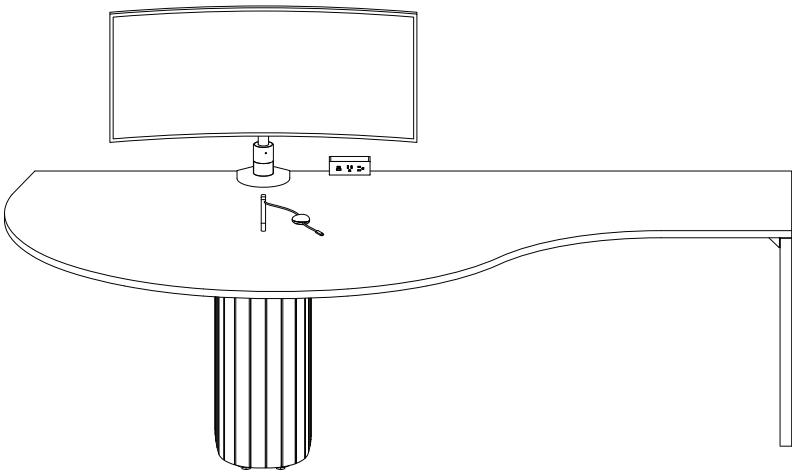

Coupe Towers Power Planning Guide

Ocular Shift Desk

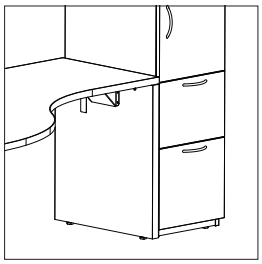

Ocular shift desk is a solution for both small meeting room and private office spaces.

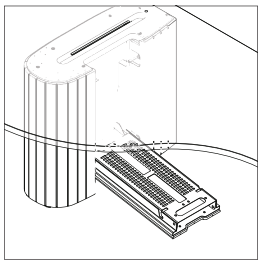

Ocular shift desk's unique worksurface enables users to comfortably work alone for extended time periods, while also supporting group working sessions or collaborative virtual calls.
▶ Specifying, page 62

Ocular shift desk is freestanding and does not require any tethering to the wall for installation.

A straight-edge worksurface profile with a panel termination is included for application planning alignment with Currency and Elective Elements product lines.

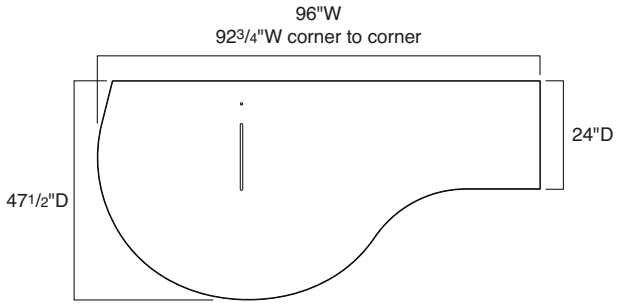

An accessible drum base is included for storing any technology and power components that are required of a huddle space, shared focus space, or private office.

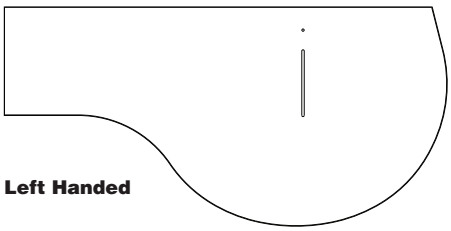

Actual Dimensions	
Width	96"
Height	28½"
Depth	47½"
Weight	251 pounds

Left- and right-handed worksurface options are available.

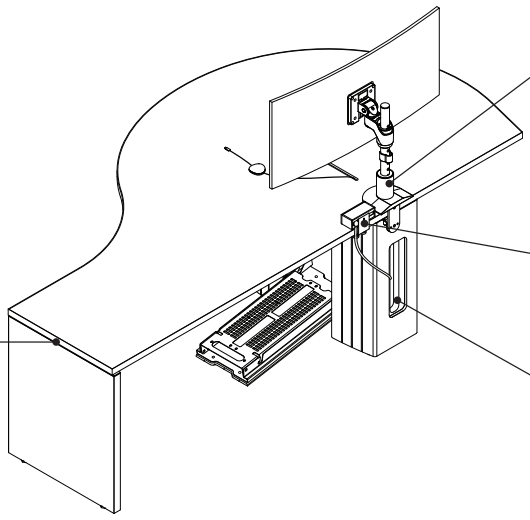

An aperture cutout is included in the worksurface that allows for the simple routing of cables for charging devices and connecting to any installed monitors.

Right Handed

Left Handed

A monitor arm through-mount grommet is included for installing Steelcase monitor arms. *Tip: Reference the* Worktools Specification Guide *for monitor arm weight restrictions. When specifying monitor arms, specify a through-mount installation in the "brackets" option.*

A ½" cord drop is included behind the worksurface to accommodate edge clamp power units and cable routing into the base.

A power access cutout is included in the back of the base to accommodate power strips or other power distribution units that plug into the wall.

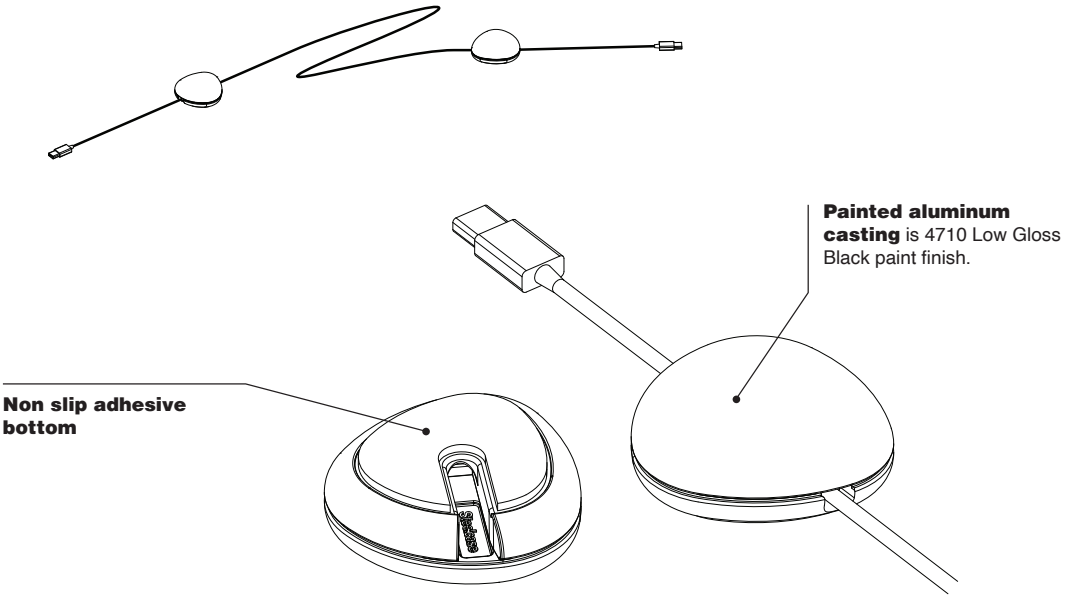

Edge thickness of 1 1/10".

Cable Pods

Cable pods keep power and display connections where needed, offering a clean and flexible solution for managing cables at the worksurface.

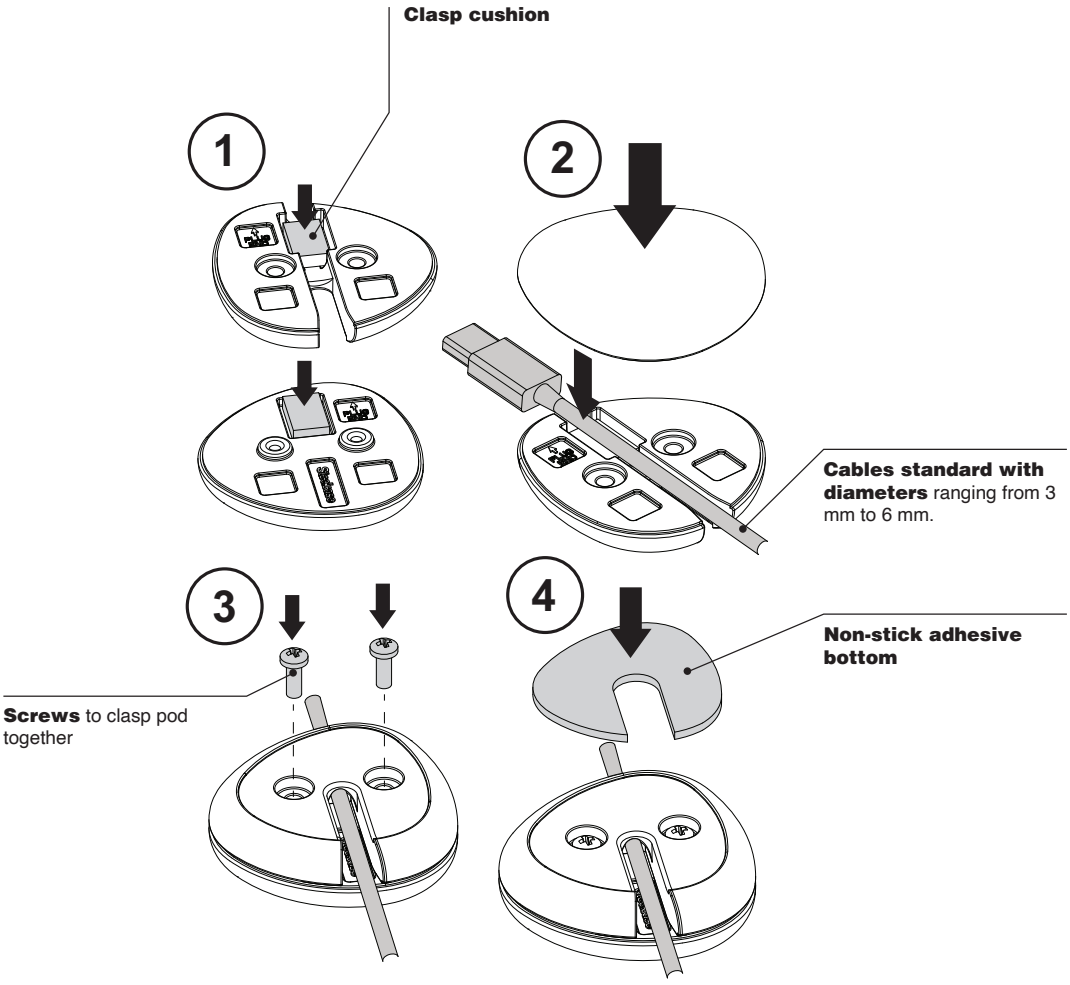

Cable pods are designed for use on surfaces that have an open aperture and are attached to cables that are sold separately.

Cable pods come in a pack of four and are designed to clasp around cables with diameters ranging from 3 mm to 6 mm.
▶ Specifying, page 64

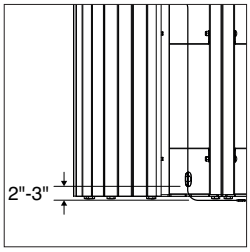

Actual Dimensions	
Depth	2"
Width	2"
Height	3/4"
Weight	70 grams

Cable Pods Assembly Directions

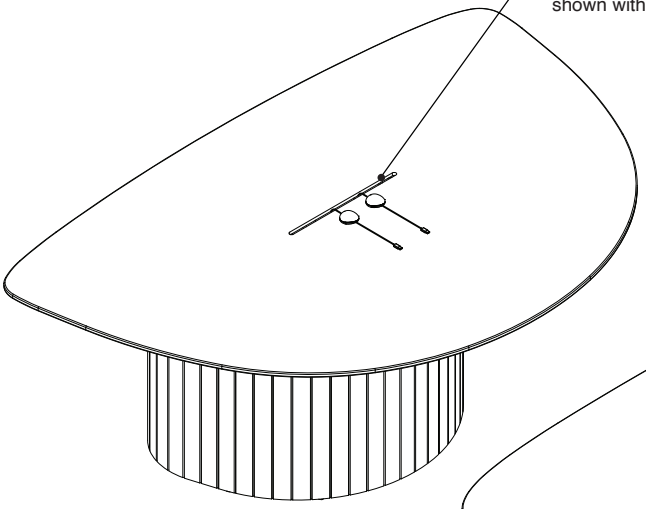

Cable pods are clasped together via two screws. A non-slip adhesive bottom is provided for each pod and is easily applied over the screws once the desired clasp tension is achieved.

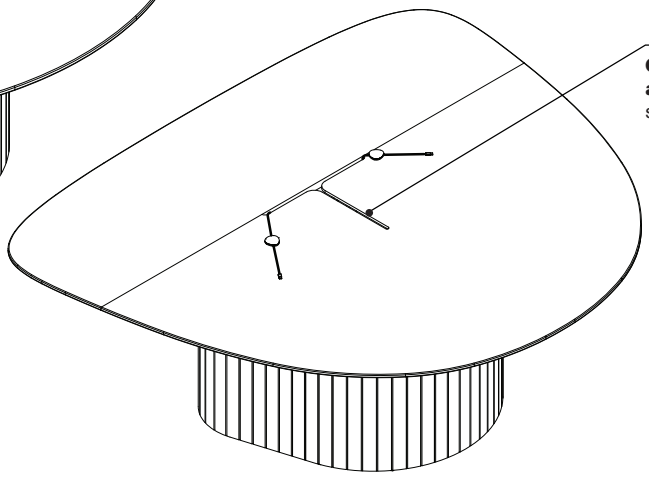

The cable pod used as the counterweight (the pod below the worksurface) should be placed at least 2 inches above where the cable rests above the floor. For optimal use, each cable should be fitted with two pods - one above the work-surface and one below to keep connections in place and provide a counterweight for stability.

▶**Cable Pods,** continued

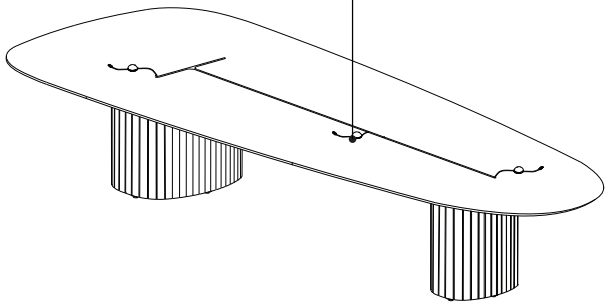

Cable Pod Applications

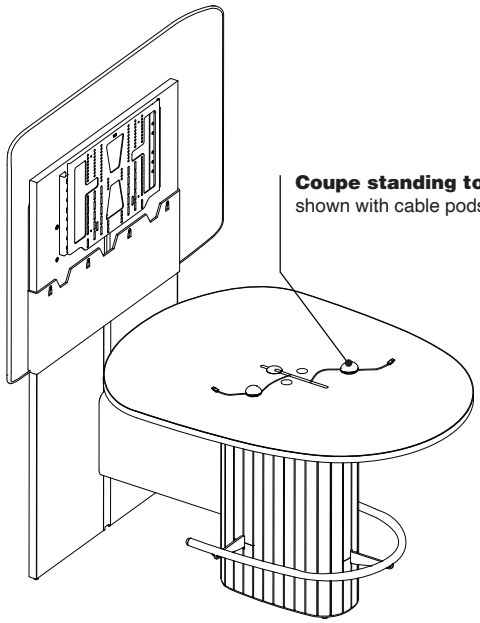

Coupe3 table with aperture pass through shown with cable pods.

Coupe5 table with aperture pass through shown with cable pods.

Sightline table shown with cable pods.

Coupe standing tower shown with cable pods.

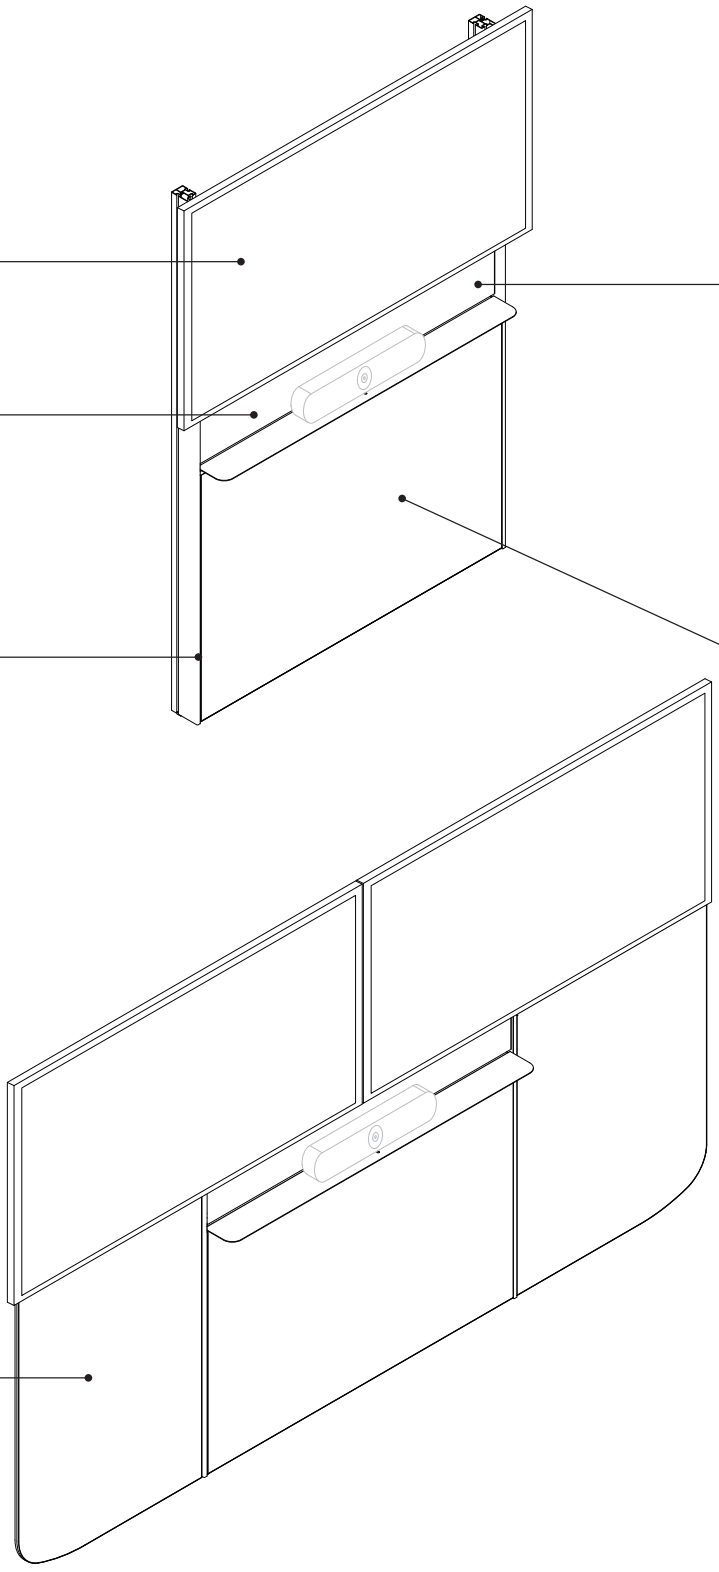

Ocular Frame

Ocular frame features a simple design that reduces install times and provides an adaptable, future-proof technology solution in huddle rooms or large conference spaces.
▶ Specifying, pages 66–68

Monitor support ranging from a single 55", single 105" (21:9), and up to dual 75" displays.

Accent panel offers a mountable structure for wall-mounted cameras and enhances visual aesthetics by seamlessly integrating the cameras into the environment. The camera panel can only be specified in laminate or veneer.

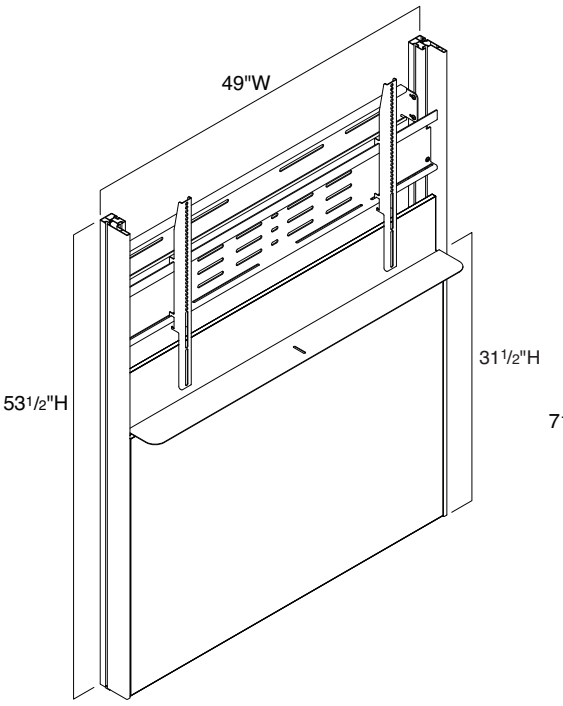

Metal frame is painted.

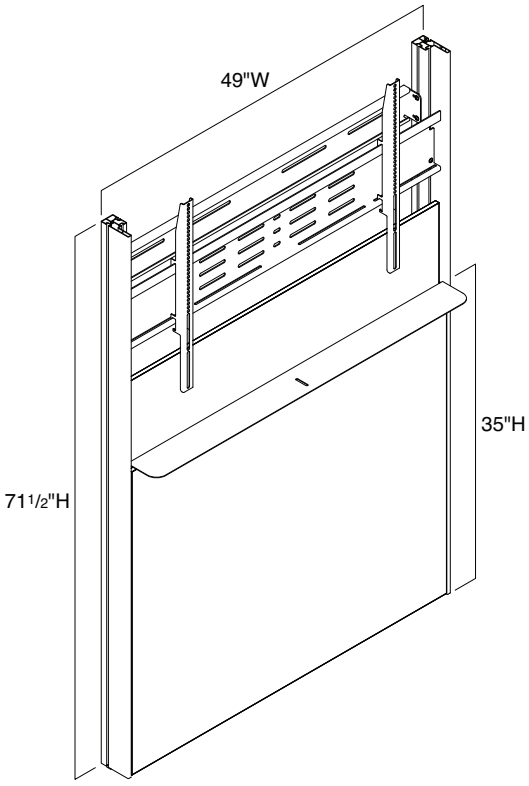

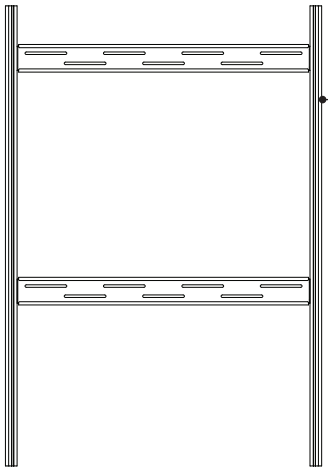

Camera shelf is included for foot mounting cameras and sound bars allowing for a simple and flexible installation within the space. The camera shelf is paint matched to the specified frame paint color.
Tip: If mounting camera above the display, the mounting bracket is not included. Please purchase the camera and the camera's OEM display mount bracket separately.

Panel is easy to open and can be used for housing power supplies and other AV meeting equipment. The access panel can be specified in High-Pressure Laminate, fabric, or wood veneer.

Side panels meet ADA compliance for dual or large screen installations. Side panels can be specified in High-Pressure Laminate, fabric, or wood veneer.

Ocular frame must be fastened to the wall by two different connection points along each of the two horizontal attachment beams.

Actual Dimensions

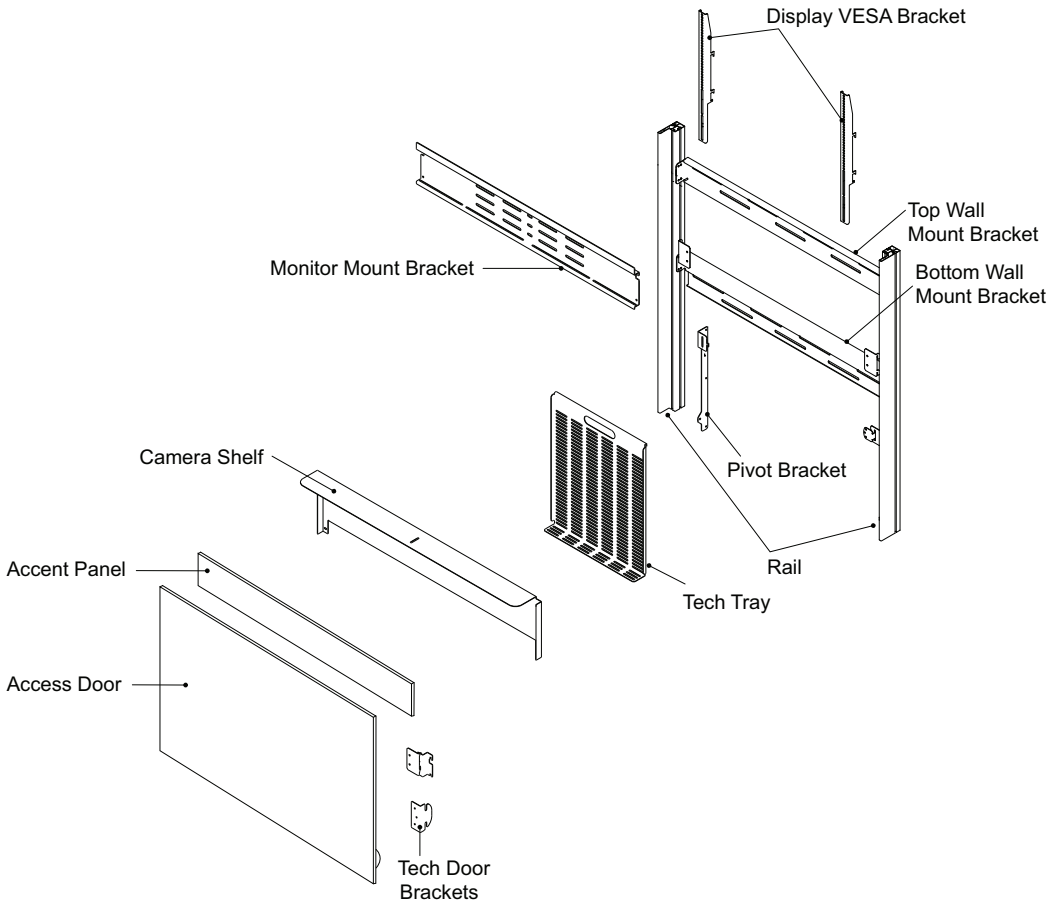

Width	49"
Height	53½" or 71½"
Depth	4½"
Weight	52 pounds

Product Details

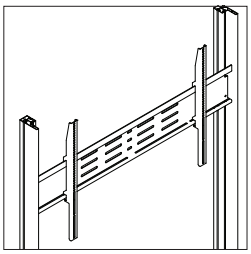

Ocular frame is available in two sizes:

- **Ocular frame, 71" height** is designed for conference or task seat and stool height meeting room configurations that can support displays 55" and larger.
- **Ocular frame, 53" height** is designed for lounge seat meeting room configurations that can support 43" to 55" displays.

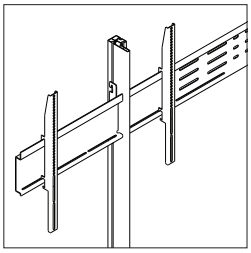

There are ten primary parts that make up the base unit (non-ADA panel) for Ocular frame.

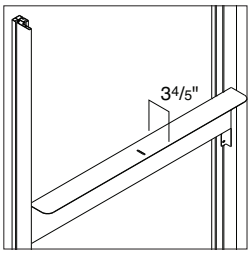

Product Details

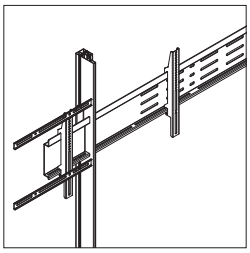

VESA display mount is included and supports display configurations with VESA hole patterns up to 1100W x 600H.

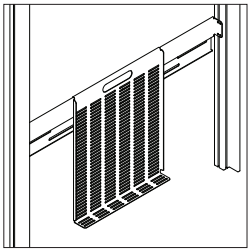

For the 71"H frame, a VESA extension kit is required for single monitor with a horizontal VESA pattern greater than 1200 mm or for any dual monitor setup. For the 53"H frame, dual 43" monitors do not require the VESA extension kit, but do require the included offset bracket.

Camera shelf is included for foot mounting cameras and sound bars allowing for a simple and flexible installation within the space.

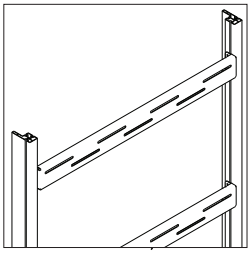

For dual 75" displays the offset bracket is required.

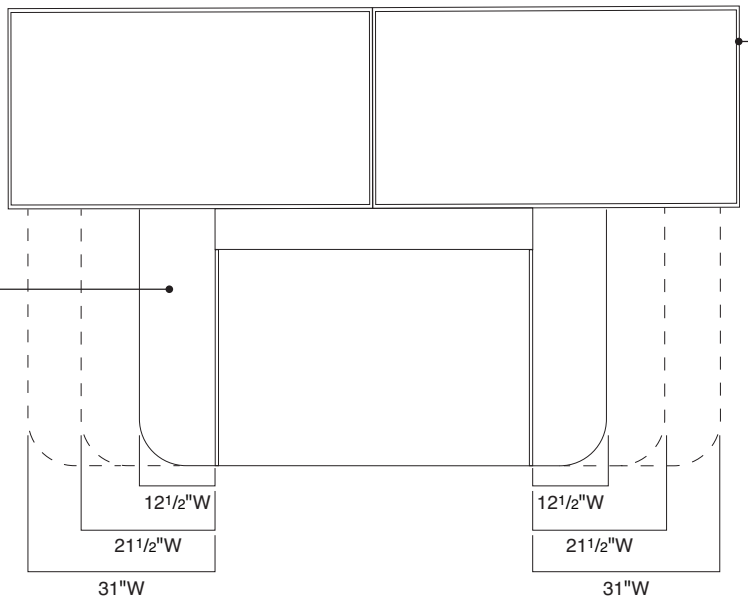

Tech tray utilized for mounting AV technology and power components is accessible behind the access door and can slide along a horizontal support to accommodate existing power and data outlet locations at the wall.

Tech tray contains 500 square inch of mountable space.

Horizontal wall attachment includes seven different slot openings that span the entire cross section to ensure that the desired attachment point at the wall can be utilized.

▶**Ocular Frame,** continued

Tip: The width of the display should not over-hang the edge of the Ocular frame rail or the specified ADA panel size by more than 12".

Side ADA panels are available in 12½", 21½", and 31" widths. Parametric sizes are also available allowing for 1/16" adjustment between 12½" and 31" widths. ADA panels should be specified anytime the overall width of the display(s) exceed 12" beyond the edge of the Ocular frame rail.

ADA Panel Sizing Guide

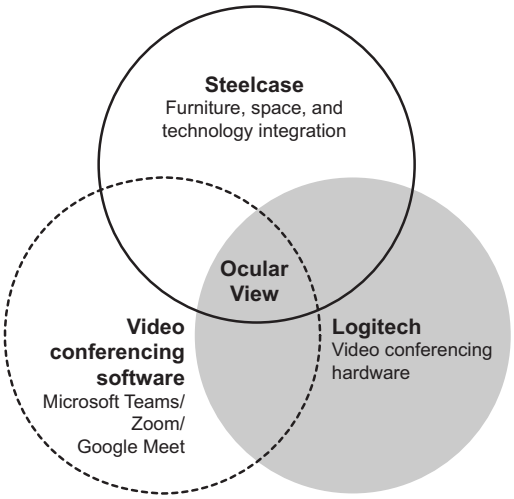

ADA Panel Size	No ADA Panels	12½"W	21½"W	31"W
Total Display Width	<72.43"W	<97.43"W	<115.43"W	<134.43"W

Tip: The total display width should not exceed the listed width to be ADA compliant.

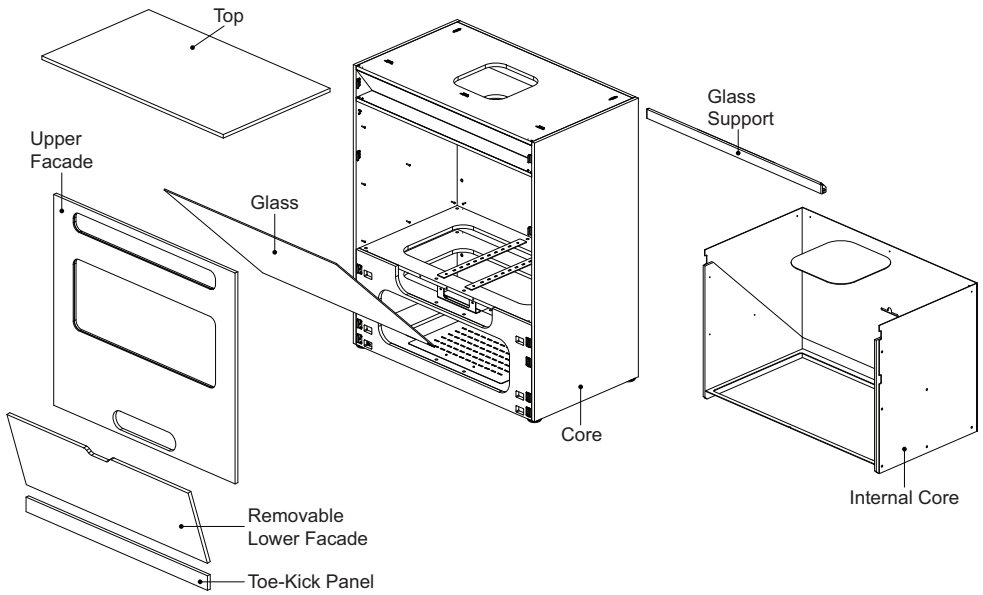

Ocular View

Ocular View is an immersive meeting experience created and manufactured by Steelcase in partnership with Logitech. It's an exploration of braiding digital with physical to create a more natural and immersive meeting environment.

The Ocular View experience uses well-known Logitech AV equipment, the leading meeting platforms (Teams, Zoom, etc.), and a Steelcase designed space, including furniture and the manufactured digital counterpart to create an unsurpassed and new-to-world meeting experience.

The technology experience is housed in the bottom of this manufactured box known as the "digital counterpart". This product is manufactured by Steelcase Inc. and houses the Logitech technology used to enable the Ocular View experience. The digital counterpart must be sold with an Everwall application at launch. Logitech technology sold separately.

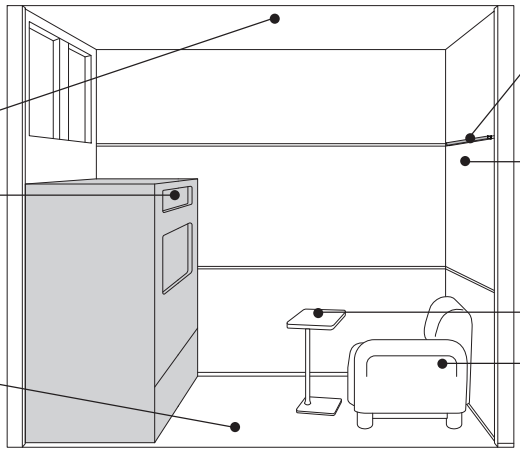

Ocular View—Digital Counterpart

Engaging face-to-face in a hybrid world is difficult, forcing us to find new ways to connect regularly through digital tools.

Ocular View integrates digital technology within the physical work environment to form an immersive experience that simulates a more natural human connection, fostering stronger relationships.

Room Scheduler
(by Logitech)

Ceiling (must be existing)

Digital Counterpart

Flooring (must be existing)

Rear LED light

DesignTex Hush Fabric
(rear panel only)

Side table

Lounge

Ocular View shown in fully enclosed Everwall enclave for reference. Lounge and side table sold separately.

Tip: Entry wall, door, and room scheduler not shown for clarity purposes.

Tip: Several single-user and two-user lounge options will be available from Steelcase and other partner brands for order specification by the dealer. Please see the Ocular View Ordering Guide on Village for more details. Please work with the Architectural Solutions Specification team to specify the best Everwall option for your customer's needs.

Product Details

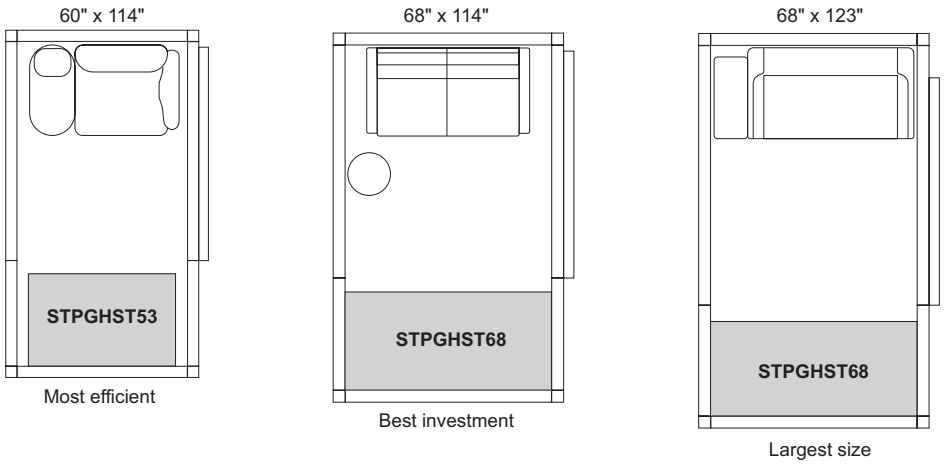

Two sizes of the digital counterpart are available:

The 53" digital counterpart is best for Everwall spaces between 53½" and 67½" wide. The digital counterpart will slide/drop into the wall opposite the lounge. The dimensions of the 53" digital counterpart are 30½"D x 53"W x 47"H. This size is the most versatile for customer applications and Everwall footprints.

The 68" digital counterpart is designed for Everwall with a 68" width and creates a flush wall-to-wall experience that feels premium and integrated to the user. This size is only available on 68" Everwall units. The dimensions of the 68" digital counterpart are 30½"D x 68"W x 47"H.
Tip: View technology is ordered through a Dealer's AV business or AV integrator/reseller partner as a Logitech reference bundled kit. A technology installation guide will be provided to the customer. Please refer to the Logitech technology and installation guide for more details on technology required for purchase and installation.

Ocular View—Everwall Application (Americas only)

Three standard footprints:

Tip: All sizes can achieve ADA compliance. Please work with local codes and jurisdictions, as well as the Steelcase Architectural Solutions Specification team to specify an ADA compliant solution.

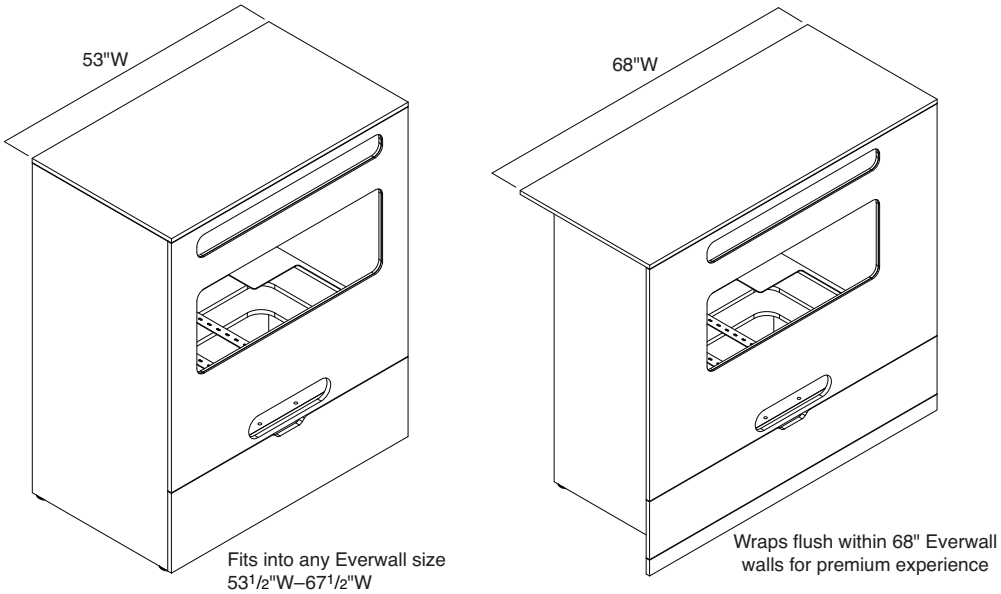

Product Details

Ocular View Everwall comes in three standard footprints. The minimum recommended width is 60" and maximum 68" wide. The minimum required length is 114", and the maximum is 123".

The 68"W x 114"L and 68"W x 123"L versions come with the 68" wall-to-wall digital counterpart and are designed to provide a more comfortable and premium user experience.

The 60"W version is more compact and designed to be most efficient for floor plans.
Tip: Only on the 53" unit are the side panels specifiable with a finish option. This is due to the sides not sitting flush with the Everwall system, as they are with the 68" unit.

Two standard sizes of the digital counterpart:

Product Details

Two sizes of the digital counterpart are available:

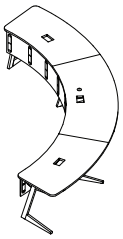

The 53" digital counterpart is best for Everwall spaces between 53 1/2" and 67 1/2" wide. The digital counterpart will slide/drop into the wall opposite the lounge.

The 68" digital counterpart comes standard on Everwall units with a 68" width and creates a flush wall-to-wall experience that feels premium and integrated to the user.
Tip: View in Everwall will be specified through the Architectural Solutions Specification team.The experience requires various physical rules in materiality, sizing, distances, and design specifications to work properly for the user. Please reach out to them using their intake form: https://steelcase.co1.qualtrics.com/jfe/form/SV_0PWXC4kFdVxJ229

Ocular Frame

Tip: The 53" height Ocular frame unit is ideal for meeting spaces that will include lounge seating. The lower seating heights and associated postures benefit from the shorter rails of the 53" height Ocular frame.

Tip: The 71" height Ocular frame unit is ideal for most meeting and conference spaces. Meeting spaces that are specified with conference seating (29" worksurfaces) or stool height (42" worksurfaces) are ideally supported with the 71" height Ocular frame.

Tip: If the space that Ocular frame is being installed in will include dual displays specify with VESA extension kit.

Tip: The 53"H Ocular frame only supports the following displays:
- *Dual 43"*
- *Dual 50"*
- *Single or dual 55"*

For Canadian Pricing

Ocular Frame with ADA Panels

▶ Need help? Product details, page 40

Standard Includes	Required to Specify
• Frame: paint price group 1 • Camera shelf: painted to match frame • Access panel: High-Pressure Laminate price group 1 or fabric price group 1 • Accent panel: High-Pressure Laminate price group 1 • Left- and right-hand ADA panels: High-Pressure Laminate price group 1 or fabric price group 1 • Tech tray: painted to match frame • Two VESA brackets: painted to match frame	1 Style number 2 Paint color number for frame 3 Laminate or fabric color number for panel 4 Laminate color number for accent panel 5 Width (see below under Required Selections) 6 Laminate or fabric color number for ADA panels 7 VESA extension kit (see below under Required Selections) 8 Options, if selected (see below) ▶ See *Surface Materials,* page 76.

Tip: Knowing the size of the display(s) in the meeting room that Ocular frame will be installed will determine whether the ADA panel style should be specified. The ADA panel logic is integrated into SmartTools to make this selection and specification experience streamlined. ADA panels should be included whenever the sides of the paired display(s) over-hang the Ocular frame rails by more than 12". Depending on the width of the paired display(s), Ocular frame ADA panels can be specified at 12½", 21½", or 31" widths with parametric options that allow for 1/16" variations.

Tip: ADA panels cannot be specified to extend above the displays.

Tip: If the space that Ocular frame is being installed will include dual displays specify with VESA extension kit.

	Required Selections	U.S. Price	Required to Specify

Surface Materials

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see *steelcase.com/surface-materials*.

Surface Materials Binders include:
- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of $115 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement. When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements
To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:
- Visit *www.steelcase.com*

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:
- Ocular tables
- Ocular View
- Ocular frame

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:
- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on *village.steelcase.com* for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Composite Quarter-Cut Open-Pore
3LEX QC/OP Desert Oak on Oak Composite
3LGX QC/OP Chai on Walnut Composite
3LJX QC/OP Ebony on Walnut Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A $500 stain-matching fee applies on CUSTOMIZ requests (Exception: The $500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The $500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A $1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a $1000 fee at any point within five years after the $1500 initiation fee was paid. If the finish is not reactivated within five years after the $1500 initiation fee was paid, the finish will be culled and the customer will need to pay the $1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual.*

Understanding Customer's Own Material (COM)

The Customer's Own Material (COM) program allows customers to select textiles that are not offered through the standard Surface Materials program.

The COM process consists of seven steps: COM website, Testing/Approval, Steelcase to Purchase Service, Pricing, Cutting Direction, Yardage Requirements, and the Purchase Orders.

COM Application Testing or "approved for application" means the COM fabric has been reviewed for manufacturability using the standard manufacturing techniques to achieve acceptable appearance per Steelcase quality standards.

COM fabric performance, including durability, pilling, color fastness, stretch, splitting, fraying, etc. is not tested by Steelcase. Therefore, COMs are not covered by the Steelcase Warranty. Each COM vendor is responsible for all warranty claims related to fabric performance.

Steelcase reserves the right to reject or reverse any COM approval that does not meet the manufacturing requirements in actual production. COM approval may be rejected or reversed because not all application testing is based on actual production conditions and because some materials vary in fabrication.

- If the COM is approved, you may continue the order process.
- If the COM has failed, you must reselect a fabric.
- If the COM is not listed, that means Steelcase has not tested that fabric on our products.
  Helpful hint: Foundation vinyl does not require testing. Customer's own vinyl is available on all seating products that accept Steelcase standard vinyl.
- If your material has not been tested, then send yardage (4.5 yards for seating, 2 yards for vertical surfaces) and submit a completed COM Application Testing Request form to:
  Steelcase, Inc.
  Attn: COM Test Lab
  Test Request #*
  Door 630
  901 44th St SE
  Grand Rapids, MI 49508
  **To avoid delays in receiving, please include the test request number on the shipping label.*
- To ensure rapid processing, please use the electronic COM Application Testing Request form found on the COM website under the "How To Test" tab **or** fax a copy of the COM Testing Request form from the *Surface Materials Reference Manual* to 616.698.4700. **All information on the form is required in order to complete testing. COM tests cannot be performed if information is incomplete. Contact your requested fabric vendor for any missing information.**
- Test results will be returned (by fax or e-mail) in four working days from receipt of fabric and completed form.

COM materials that are approved for application to panel systems might require UL approval after application test approval. UL approval does involve fees and extended lead times.

All vertical surface COMs tested and approved with a content of 100% polyester meet a minimum of class C/UL1286. If class A or B fire rating is indicated, a burn test must be performed. All vertical surface COMs with a blended fabric construction require a UL burn test. For further UL information, contact a COM Consultant at 616.475.2426.

Steelcase to Purchase Service

The COM program also includes a service to purchase approved COM for our customers for use on products. Steelcase will facilitate the ordering, scheduling and shipment of COM directly from the suppliers. There are no additional charges for this service.

Steelcase is the only party that may purchase COM for all products.

In some instances, not all colors in a fabric family are approved. You will be informed of these instances before Steelcase purchases the fabric.

If for some reason the fabric must be ordered directly from the supplier, contact your Steelcase Solutions Fulfillment Team Representative for approval and instructions prior to purchase. The only time the customer can purchase fabric is for testing.

COM Pricing

- Confirm COM is tested and approved.
- Use the COM price group found under Surface Materials Options within each product specification guide.
- Calculate yardage required by using the COM Calculator found on the COM website at *www.steelcase.com*.
- Or call 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.
  Helpful tip: Fabric width, repeat and product quantity and style number are required in order to calculate yardage accurately.
- Add the cost of the fabric to the COM.
- The cost of the COM will be shown as a separate line on the acknowledgement.

COM vendors require fabric purchases in half or full yard increments. Therefore, Steelcase will round all final yardage calculations to the half yard.

Base price of chair includes standard fabrics. Steelcase will not allow credit or deduct the cost of the standard fabric when a COM fabric is selected in its place.

Steelcase cannot be held responsible for costs incurred when a COM supplier ships a COM fabric that does not meet Steelcase application standards or for costs incurred for late deliveries when a COM supplier commits to shipping a COM fabric for manufacturing by a specific date and misses that date.

COM Warranty

Steelcase standard warranty does not apply to Designtex or any other COM vendor's fabric.

- Designtex and other COM suppliers are responsible for color consistency within commercial tolerances, abrasion resistance, UV stability, and resistance to soiling and perspiration. These fabrics or vinyls are subject to policies regarding appearance, behavior, and durability that have been Excluded by the fabric supplier. The customer's remedy for a fabric defect is limited to the replacement of the fabric by the supplier. Durability, performance, and fabric defects of COM fabrics are not guaranteed by Steelcase.

Steelcase cannot guarantee pattern repeat match from product to product. Steelcase also cannot guarantee pattern repeat match within each product listed. (i.e., seat and back, arms to back, etc.)

COM Yardage Requirements

- For the most accurate yardage requirements, visit the Calculator found on the COM website or call 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.
- The Calculator on the COM website provides the same yardage requirements used by Steelcase purchasing.

Yardage requirements will change depending on:

– width of fabric
– fabric repeat
– cutting direction
– product style number
– quantity of products being manufactured

- COM vinyl requires upholstering in the railroad cutting direction. Please visit our website or call 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com for yardage requirements.
- Certain fabric treatments and backings require additional yardage or yardage minimums. Please contact the supplier for specific information.
- COM fabric vendors require fabric purchases in half- or full-yard increments, and the Steelcase COM calculator will automatically round all final yardage calculations to the half yard.
- Steelcase is the only party who may purchase COMs.
