Kick Solutions Specification Guide

Availability

Electronic price list updated with release 200.L (U.S.) and 156.L (Canada), dated April 15, 2024.

All specifications subject to change without notice. Reference the electronic catalog/Hedberg for current pricing.

Transitional products in this specification guide are **maintained for existing customers only** and are likely to be phased out over time. These products are indicated with a 🇹. Products that are scheduled to be culled are indicated with an 🇽, followed by the last order entry date.

Surface Materials

The surface materials team has announced the launch of the Finish Library, found at www.steelcase.com/finishlibrary/.

▶ For a list of all trademarks, refer to the last page of this specification guide. © 2024 Steelcase Inc.
For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing.
Calculate in the following order to avoid rounding errors:
• Multiply the base price and each option by the Canadian factor.
• Round each to the nearest dollar.
• Add base and options for total list price.

Ten Tips:
How to Get the Most Out of This Book

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Find cross references by looking for page numbers flagged with an arrow.

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:
• Product Drawing
• Actual Dimensions
• Product Details
• Connections
• Wiring and Cabling
• Surface Materials
• Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Tip 5

Refer to the specifying pages for all the information needed to order a product. Each product specifying page contains a variety of elements to help you complete a specification:
• Product Drawing
• Standard Includes
• Required to Specify
• Options
• Related Products
• Specification Information
  • Dimensions
  • Style Number
  • Price

Standard Includes
(under the red or dark grey band) provides a list of what comes standard with the product.

Required to Specify
(under the red or dark grey band) itemizes the information that you must provide to order the standard product and the preferred sequence for specification.

Specification Information
(under the teal or light grey band) provides product dimensions, style numbers, and prices for the standard product and any surface material choices that are available.

Product Drawing
shows you what the product looks like.

Options
(under the black band) lists all the options that apply to the product, their price, and what is required to specify.

Related Products
provide specification information for products that are directly related.

Tip 6

Required to Specify

Specify *with Customiz Stain*

Italic typeface on specifying pages usually identifies wording that you should use in your order.

Tip 7

To determine how many skins are needed to complete a panel, consult the table at the right.
Tip: Remember to order skins for both sides of the panel buildup.

Watch for tips throughout the text that give you explanations and helpful instructions.

Tip 8

Learn what you cannot do by looking for drawings crossed out with an "X."

Tip 9

Use the surface materials listings in the Surface Materials section of this book to find surface material color numbers.

Tip 10

Style Number	Page
TS7042BL	131
TS7042S	130
TS7048BL	131
TS7048S	130
TS7060BL	131
TS7060S	130
TS7072BL	131

Refer to the style number index when you know a style number and you need to find the page that has more details about the product.

Additional Resources

Kick is supported with an array of informational materials, tools, and software to help you plan and install efficiently.

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources web site at village.steelcase.com.

Printed Materials

Kick Systems Furniture Brochure
Form Number 06-0001593

Kick Thought Starters
Form Number T3232

Storage Specification Guide contains storage that attaches to Kick.

Quick Ship Guide
This handbook describes all Steelcase and Coalesse products that are available for Rapid2 (ships in 2 days), Rapid5 (ships in 5-7 days), or Coalesse Rapid10 (ships in 10 days).

U-Free Product Brochure
This 8-page brochure introduces the U-Free family of freestanding solutions, including traditional and contemporary desk applications, tables and storage. Includes an abbreviated statement of line.
Form number 08-0000159

Surface Materials Reference Manual
This publication provides:
- An explanation of the surface materials program
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog
Accurate sales quotations and purchase orders for Kick products are created with specification software that uses Kick Electronic Catalog data. Use the data to specify and price style numbers and options for every Kick product. The data is updated bimonthly by Steelcase and provided to software programs like the Hedberg Business System, 20-20 CAP Studio.

Furniture Symbol Graphic Data
Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

For more information about these and other software tools to help you plan effective work environments, please email fsl@steelcase.com

Digital Publications
You can access these digital publications at www.steelcase.com or village.steelcase.com.

Kick Product Training
Basic training for the Kick systems products is available as part of the Building Product Muscle (BPM) curriculum on the Steelcase University Web site at village.steelcase.com.

The Kick BPM is an interactive, web-based course, filled with photos, detailed positioning, statement of line, features/advantage, application, and specification information, as well as practice exercises designed to build salespeople's knowledge of the Kick system. The course also contains printable job aids to provide ongoing performance support. The Kick BPM is course SAL188.

Support

Steelcase Capabilities
Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.800.STEELCASE (1.800.887.6786).

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to http://www.steelcase.com/warranty/.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies.

To learn more at a corporate level, visit: https://www.steelcase.com/discover/steelcase/esg-overview/environmental/

Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at Origin.build.

Panels

Monolithic Panels

Panels are constructed with a rigid, tubular steel frame and are shipped fully assembled. Remember to order trim separately.
▶ Specifying, page 176.

Wire separator for the panel base can be ordered through Kick Service Parts to provide a separate, isolated space for routing data and telecommunication cables. It also serves as a second metallic barrier between low-voltage communication wires and 120-volt electricity.

1/4"

2"

Steel top caps are available in two heights—low is standard and high is available as an option. High top cap will accommodate cable routing at the top of the panel.

Horizontal slots accommodate off-module connections.

Vertical slots in panel accommodate hang-on components, overhead storage bins, shelves, worksurface supports, and connector brackets. Components can be mounted at 1" increments.

Base cavity accepts a factory- or field-installed powerway. Cable routing is also possible.
▶ See *Powerway Facts,* page 40.

Removable base cover has receptacle knockouts. Base covers have a receptacles opening on the left and right side of the base cover. *Exception: 24"W base covers have a receptacle opening in the center of the base trim.*

Leveling glides adjust $1\frac{1}{2}$" to install panels on uneven floors.

Actual Dimensions

Height	42", 48", 54", or 66"
Width	24", 30", 36", 42", 48", or 60"
Thickness	2"
Base Raceway Height	$3\frac{5}{8}$"
Glides	$1\frac{1}{2}$" adjustment

Panels

Product Details

Kick panels come in four types.

Tackable acoustical—skin on each side, covered with vertical surface fabric.

Segmented—tackable skins on one or both sides, covered with vertical surface fabric.

Glass—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border. Glass panels can accept glass stackers.

Wiring & Cabling

Panel frames have hollow interior to allow routing cables from top cap through to base raceway.

Kick is available with an optional high top cap to accommodate additional cable capacity at the top of the panel.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Surface Materials

Base cover, top cap, and border
• Paint

Panel surface
• Fabric
• 6500 Clear Glass

Segmented Panels and Stacker Options

Kick allows a wide variety of panel arrangements to meet specific functional and aesthetic needs. Panels are not dedicated to a specific location and can be used anywhere on the face of the panel. Illustrations show largest sized skin in bottom position.

Stacking Guidelines

Stackers are available in 12"H, 18"H, or 24"H in tackable acoustical or glass.

Maximum height is 78".

Maximum number of tackable acoustical stackers is three.

Maximum number of glass stackers is one.

Any height base panel can be used with stackers.

Segmented Panels

48"H Base panels with stacker

54"H Base panels with stacker

66"H Base panels with stacker

Panels

Panel Stackers

Stackers are constructed with a rigid, tubular steel frame and are shipped fully assembled.
▶ Specifying, page 184.

1/4"

2"

Top cap and top cap aligner from base panel are used to trim the top of stacker.

Horizontal slots in stackers, identical to slots in base panels, accommodate off-module panel connections.

Vertical slots in stackers, identical to slots in base panel, accommodate overhead storage and hang-on components, and connector brackets. Components can be mounted at 1" increments.

Actual Dimensions

Height	12", 18", or 24"
Width	24", 30", 36", 42", 48", 60", or 72"
Thickness	2"

Product Details

All existing base panels accept stackers.

Stackers do not include vertical trim, must be specified separately.

Up to 78"H

Base panels can accept one, two, or three stackers, up to a total height of 78". Base panels can only accept one glass stacker. All stackers are load bearing, but load cannot be mounted above 66" height.
▶ See page 12.

Two fork connectors are included with every stacker.

Attaching stackers to panels will not cause disruption to existing panel connections.

Spanning stackers are available in 48", 60", or 72".

Stacker can span over an in-line connection between two base panels or two stackers. Width of stacker must equal total width of two base panels.

Two smaller stackers cannot be attached to the top of a larger stacker or panel.

Kick stackers are available in two surface options.

Tackable acoustical— skin on each side, covered with vertical surface fabric.

Glass—single pane of clear, tempered safety glass on panel centerline, surrounded by painted border.

Application Topics

Maximum height with base panel and stackers cannot exceed 78".

Maximum number of stackers is three.

Any base panel can accept stackers.

Bins and shelves can hang from first or second stacker, not above 66" in height.

When adding a stacker to existing panels with a power or cable pole connected at L-, T-, or X- corner, the universal panel connector can not be used. Order service part **TS100574SR** and use the special panel connector for poles to make the connection.

Surface Materials

Border
• Paint

Panel surface
• Fabric
• 6500 Clear Glass

Panel Connectors

Universal connector package joins panels of the same height in a straight line or in L-, T-, or X-configurations. The package, included with panels, contains two universal connectors—one for the top and one for the bottom connection.

▶ Specifying, page 191.

Same connector is used at both the top and bottom of panel.

Different slots are used to create in-line, L-, T-, or X-conditions.

Change-of-Height Connector

Universal Connector

120° Connector

Wall Start

Top brackets

Bottom brackets

Off-Module Connector—Universal

Bottom slotted rail

Top brackets

Bottom brackets

Off-Module Connector—Panel Width-Specific

Product Details

Wall start connector package is used to anchor a panel run to a perpendicular wall. Mounting screws that connect the brackets to the panel are included in each package.
Tip: Vertical end-of-run trim is not required at the end of panel that is attached to the wall.

Change-of-height in-line and corner panel connector package is used to join panels at varying heights in a straight line or at 90° angles. Package contains left and right connectors for both in-line and corner configurations.
Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.

Left and right in-line connectors are required to connect panels in a straight line.

One-handed corner connector is required for connecting panels at 90°.

To connect panels in a 120° application, a 120° panel connector is required. A two-panel connection requires one 120° connector package. A three-panel connection requires three 120° connector packages.
Tip: Change-of-height in-line and corner panel connectors cannot be used in 120° configurations.
▶ Page 191

120° connectors are for the same height panels only.

120° and 90° connections can occur within the same workstation.

Surface Materials

Universal and 120° connector
• 0835 Black

Panels

Off-Module Connections

Kick offers true off-module capability with the ability to mount a return panel anywhere along the spine in 1" increments.

Connection locations in 1" increments

3"W dead zone

3"W dead zone

Off-module connectors connect all types of Kick panels of the same height. Connection locations are at 1" increments and allow the use of standard-size worksurfaces for workstation planning. Stackers can be mounted on either or both of the panels. There is a dead zone at the last 3" of each end of the panel where an off-module connection cannot be made due to lack of horizontal mounting slots.

Off-Module Connector— Universal
Bottom connection requires the use of two self-drilling screws (included) through the skin of the host panel approximately $\frac{1}{2}$" above the base cover.

**Off-Module Connector—
Panel-Width Specific**
The panel width-specific
off-module connector incor-
porates a horizontal element
that connects to the base
feet of the host panel.
There is no defacing of
either panel.

Panel Trim

Steel top caps are available in two heights—low is standard and high is available as an option. High top cap will accommodate cable routing at the top of the panel.

Product Details

Panels

Vertical corner trim allows cables to be laid in before the cover is snapped into place and can be removed for cable access. Corner trim is required for L-, T-, and X-configurations and includes a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest panel.

L-configurations:

Carrier

Vertical corner trim

High L end cap or low universal end cap

High end-of-run cap or low universal end cap

T-configurations:

High T end cap or low universal end cap

High end-of-run cap or low universal end cap

Back filler

High end-of-run cap or low universal end cap

Tip: Back filler required for cable routing capability and non-sequential assembly only.

Back filler

High in-line cap or low universal end cap

Tip: Back filler required for cable routing capability and non-sequential assembly only.

High L end cap or low universal end cap

X-configurations:

High X end cap or low universal end cap

Tip: In an X-configuration, carrier and vertical corner trim must be attached to one panel prior to installation of last panel.

Back filler

Carrier

High end-of-run cap or low universal end cap

Tip: Back filler required for cable routing capability only.

Back filler

Steelcase
April 2024

Panel Trim, continued

End caps:

High T end cap

High end-of-run cap

High in-line cap

High L end cap

High X end cap

Low universal
end cap

Vertical corner trim and corner change-of-height trim are required in combination for L-, T-, and X-configurations when stackers are used. All corner trims include a low trim end cap. High trim end caps, available as an option, are application specific.

Always specify vertical corner trim the same height as the tallest base panel. Specify vertical corner change-of-height trim to cover the ends of stackers.

Vertical end-of-run trim covers the exposed end of panels and includes a low trim end cap. High trim end caps, available as an option, are application specific.

Vertical end-of-run trim must match height of base panel.

Vertical end-of-run trim must match combined height of base panel and stacker.

Vertical in-line change-of-height trim is available 6"H, 12"H, 18"H, 24"H, and 36"H in slim profile (standard with a low trim end cap) or with cable-routing capacity (standard with a high trim end cap). Trim covers the exposed section of the taller panel when panels of different heights are joined.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.
▶ Page 189

Application Topics

Always specify vertical corner trim the same height as tallest panel.

When specifying a base panel and a stacker, specify corner trim to match base panel and change-of-height trim piece to cover the ends of stacker.

When base panel and stacker are specified in end-of-run trim must match total overall height.

Surface Materials

Trim
• Paint

Panels

Sliding Panel Door

Sliding door is handed and can be added to workstations for additional privacy.

Door must be installed on the outside of the workstation.

Receiving panel height must match door height.

Door is attached to the host panel only; therefore, the stability of the door is closely related to the stability of the host panel.

The sliding door infill is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Sliding door is not freestanding; it must mount to panels.

Height of host panel must match height of door.

Sliding door frame and threshold are constructed from extruded aluminum and painted.

Lock mechanism is on the right-hand side of a left-hand sliding door.

Door handle is integral and is ADA compliant.

Left-hand sliding door closes from right to left.

Door slides along threshold on wheels. Wheels have 1" adjustment for installation on uneven floors. Threshold is ADA compliant.

Right-hand sliding door closes from left to right.

Lock mechanism is on left-hand side of a right-hand sliding door to lock into the host panel.

Actual Dimensions	
Height	66" or 78"
Width	36" or 42"
Thickness	1¼"

Product Details

Sliding door is handed. Right-handed sliding door or left-handed sliding door must be specified.

Sliding door can be specified with lock option. Specify lock cylinder and key separately.

Door insert is standard in ribbed, translucent plastic. Clear tempered glass and white laminated glass are available as options.

Application Topics

Sliding door is not free-standing. It must mount to panels.

Door is attached to the host panel only. Therefore, the stability of the door is closely related to the stability of the host panel.

Door track is attached to both host panel and opposite panel.

Height of door must match height of host panel - 66"H or 78"H.

Match the width of the host panel to the width of the door.

Sliding panel door cannot attach to a host panel with a double-pane window.

Circuit Specifications
Detailed Information for the Electrical Engineer

Five wiring schematics are available for Kick—two 3-circuit systems and three 4-circuit systems.

All the components in an electrical distribution network must use the same wiring schematic. The components (power poles, base power-ins, powerways, and receptacles) snap together and are keyed to make it impossible to connect mismatched parts. Color-coded and labeled components make it easy for installers to identify which wiring schematic each component is dedicated to.

Color coding:
For power components manufactured before June 19, 2023:
• 3 circuits shared = Black
• 3 circuits separate = White
• 4 circuits 3+D = Black
• 4 circuit 3I+1 = Tan
• 4 circuit 2+2 = Grey

For power components manufactured on or after June 19, 2023:
• 3 circuits shared = Blue
• 3 circuits separate = Rust
• 4 circuits 3+D = Black
• 4 circuit 3I+1 = Black
• 4 circuit 2+2 = Brown

Overview

Three-circuit electrical components with shared neutrals are standard with 5 wires to provide three circuits that share one oversized neutral and one ground.

3 Circuit Shared Neutral, 5 Wires
Hot 1
Hot 2
Hot 3
Oversized Neutral
System Ground

Three-circuit with separate neutrals have 8 wires providing three circuits, each with its own separate neutral. The first two circuits share an isolated ground; the third uses the system ground.

3 Circuit Separate Neutral, 8 Wires
Hot 1
Neutral 1
Hot 2
Neutral 2
Isolated Ground
Hot 3
Neutral 3
System Ground

Four-circuit 3+D are standard with 8 wires to provide four circuits. Three of these circuits share an oversized neutral and a system ground while the remaining circuit has its own neutral and isolated ground.

4 Circuit 3+D, 8 Wires
Hot 1
Hot 2
Hot 3
Oversized Neutral
System Ground
Hot 4
Neutral
Isolated Ground

Four-circuit, 3I+1 again have 8 wires but with three circuits that share an oversized neutral and isolated ground. The fourth circuit has its own neutral and is attached to the system ground. This electrical system is like the standard 3+D, but the grounds are switched, providing three isolated circuits and one general purpose circuit as compared to one isolated circuit and three general purpose circuits.

4 Circuit 3I+1, 8 Wires
Hot 1
Hot 2
Hot 3
Oversized Neutral
Isolated Ground
Hot 4
Neutral
System Ground

Four-circuit 2+2 also have 8 wires but provide two circuits that share an oversized neutral and a system ground and an additional two circuits with a second oversized neutral and an isolated ground.

4 Circuit 2+2, 8 Wires
Hot 1
Hot 2
Oversized Neutral
System Ground
Hot 3
Hot 4
Oversized Neutral
Isolated Ground

How to Calculate Power Needs
Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance:
The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:
Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.
▶See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

Device	Wattage	Amperage	Voltage	Number of Devices Supported on Single 20 Amp Circuit*
Laptop	90	0.8	110	20
CPU/Desktop Computer	120	1.1	110	15
Monitor	60	0.5	110	29
Phone	5	0.0	110	352
High Power Tablet (e.g. Surface Pro)	40	0.4	110	44
Low Power Tablet (e.g. iPad Air)	15	0.1	110	117
Desktop Printer	40	0.4	110	44
42" LCD Screen	210	1.9	110	8
DVD Player	25	0.2	110	70
Projector	175	1.6	110	10
Desktop Lamp	19	0.2	110	93
Large Printer/Copier (high)	1900	17.3	110	1
Large Printer/Copier (low)	850	7.7	110	2
Paper Shredder	360	3.3	110	5
Desktop Fan	20	0.2	110	88
Standing Fan	180	1.6	110	10
Coffee Maker (high)	1200	10.9	110	1
Coffee Maker (low)	600	5.5	110	3
Microwave (high)	400	13.6	110	1
Microwave (low)	150	5.5	110	3
Refrigerator (high)	1500	3.6	110	4
Refrigerator (low)	200	1.4	110	12
Vacuum (high)	1500	13.6	110	1
Vacuum (low)	200	1.8	110	9
Space Heater (high)	1500	13.6	110	1
Space Heater (low)	750	6.8	110	2

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

Special Requirements for Chicago

	Chicago Code	Specification:	Electrician will supply:
Panel Requirements **Chicago code** requires hardwiring of all electrical components.	**Panel** must be hardwired in the field. **Electrician hardwires** all receptacle boxes and conduits into panel bases in the field. *Tip: Panel depth prohibits use of standard device boxes for back-to-back receptacles in Chicago.*	• **Order panels** with factory-installed power base covers with receptacle knockouts where you intend to install receptacles. *Tip: Chicago code doesn't require a special base cover with different receptacle locations.* • **Receptacles** in Chicago are supplied by electrician. Because these receptacles will be duplex size, you must order a fi ller plate to occupy the remaining space in larger-size open ings. Reusable filler plates are available from Service Parts. *Tip: Because receptacles in Chicago cannot be installed back-to-back, you may want to avoid powered panels that are 30"W or less. These panels only have one recep-tacle location on each side, so these panels can only accommodate one duplex-size receptacle.* • **Order corner fillers** for L-, T-, and X-confi gurations separately to conceal electri-cal conduits.	• Connection to building power supply • Wires • Fittings • Duplex receptacle (Leviton 5325-Decora style) • Electrical components
Lighting Requirements	**Cords** must include integral overload protection.	• **Order Chicago version of shelf lights.**	

Cable Capacities

Test and verify capacities for your individual situation. We recommend that testing be conducted using your specific cable, as well as the furniture configuration you are considering. Cable capacities in this tabled are based on actual cable studies performed by an independent contractor following EIA/TIA codes and practices and can be taken as an accurate assessment of maximum practical capacity. Actual cable capacities may vary slightly depending on which manufacturer produced the cable and the specific field conditions.

Cable capacities are based on Category 6 and Category 6a cables at 55% fill capacity.
Tip: Low top cap does not accept any cables.

Cables Tested

Ⓐ CommScope Systimax Gigaspeed 1071E Series Category 6 Cable OD=0.23"

Ⓑ CommScope Systimax X10D 1091B Series Category 6A Cable OD=0.285"

Powerways reduce cable capacity. An average of 10-15 cables will be reduced per powerway used. However, this number varies according to installation practices and the type of cables used.

If glass stacker is used at the top of a panel, top cap lay-in cable capacity is 20 for category 6 cables.

When laying cables vertically behind skins, capacity is dependent on skin width.

L, T, X, V, and Y Horizontal Routing		Ⓐ	Ⓑ
	Lay-in cable routing at top of panels in L or V configuration	25 Hi	20 Hi
	Lay-in cable routing at top of panels in T configuration	30 Hi	25 Hi
	Lay-in cable routing in top of panels in X or Y configuration	30 Hi	25 Hi
	Lay-in cable routing (around the corner) at the top of a panel in T or X configuration	25 Hi	20 Hi

L, T, X, V, and Y Horizontal Routing		Ⓐ	Ⓑ
	Lay-in cable routing (corner) at base of panel **with** power in L, T, or V configuration	9	5
	Lay-in cable routing (corner) at base of panel **without** power in L, T, or V configuration	32	21
	Lay-in cable routing (straight) at base of panel **with** power in X or Y configuration	9	5
	Lay-in cable routing (corner) at base of panel **with** power in X or Y configuration	9	5
	Lay-in cable routing (straight) at base of panel **without** power, or with powerway routed above in X or Y configuration	32	21
	Lay-in cable routing (corner) at base of panel **without** power, or with powerway routed above in X or Y configuration	32	21

Straight Horizontal Routing		A	B
	Lay-in cable routing at top of panel	30 Hi	25 Hi
	Lay-in cable routing at base of panel **with** power	8	5
	Lay-in cable routing at base of panel **without** power or with powerway routed above	32	21

	Vertical cable routing inside power pole	28 Hi	18 Hi
	Change in height (top)	13 Hi	9 Hi
	Through center of X	24	16

Tip: Low top cap does not accept any cables.

Wiring and Cabling

Steelcase
April 2024

Powerway

Powerways that are installed in the panel base cavity allow power to be distributed wherever panels go. They are concealed when properly installed. All five wiring schematics are available.

On June 19, 2023, Kick power components changed design. Power components manufactured before June 19, 2023 are not compatiable with power components manufactured after June 19, 2023.

▶ See *Power Components Transition Details* on page 48.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment. Chicago, New York City, and Los Angeles have special requirements.

Wire separator tray supports the powerway and provides some space for cable routing.

Power blocks of the powerway are attached to the the wire separator tray.

Harness connectors come attached to the powerway and connect the powerway to the powerway in an adjacent panel.

Receptacles snap into power block of the powerway.

Two modular connections on end of powerkit accept modular connectors of adjacent powerkit or power infeeds.

Product Details

Straight connection is formed when a harness connector from one powerway attaches to the powerblock of the adjacent powerway.

L-connection is formed when a powerway connector harness turns to the left or right and connects to the power block of the adjacent panel.

T-connection is formed by two powerway connector harnesses each turning in the same direction.

X-connection is formed by three powerway connector harnesses each turning in the same direction.

The powerway connector harness comes attached to each powerway and can be removed in field.

Removing the powerway connector harness and adding it to the opposite end of the powerway powerblock can be used to correct planning and installation oversights.

Power can be routed through the base of panels in a two- and three-panel, 120° connection.

120

90

(inside measurement)

2" x 2" power and cable poles can bring building power and data from the ceiling to a 120° panel application at the end of a run or 90° connection only.

Application Topics

Factory included powerway for field installation replaces need to order separate powerways.

Field-installed powerways can be ordered through Kick service parts.

Wiring and Cabling

Chicago, San Francisco, and Los Angeles have special requirements.

Chicago electrical code requires that all electrical connections be hardwired in the field. Order a non-powered panel and have the electrician obtain conduit and receptacles (Leviton 5325) to make the connections in the field.

Underwriters Laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code. Consult with a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Receptacle

Receptacles are ordered separately and installed in the field in the base cover knockout opening. Receptacles snap into the power block in the field. Receptacles are designed to link to a specific circuit.
▶ Specifying, page 196

On June 19, 2023, Kick power components changed design. Power components manufactured before June 19, 2023 are not compatiable with power components manufactured after June 19, 2023.
▶ See *Power Components Transition Details* on page page 48.

All receptacles are duplex (two outlets) and are available in two versions - 15-amp and 20-amp.

Numbers printed on the receptacles indicate the line number. Label on receptacle indicates which circuit the receptacle connects to, so the user can control which devices are on specific circuits.

With the 3-circuit separate neutral system, these designations are with letters A, B, or C as compared to 1, 2, 3, or 4 in the other systems.

Specific circuits are accessed through the powerway by installing the appropriate receptacle in the receptacle location. All five wiring schematics are available.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

Available in 6000 Black plastic only.

Receptacles come in packages of six receptacles.

Receptacles snap into both faces of the power block in the field.

Controlled receptacle must be indicated when tying into the building management system. Duplex receptacles have an option for a factory permanent, pad stamp power icon symbol with the word controlled per compliance with the Energy Code.

Wiring and Cabling

2" x 2" Power and Cable Pole

Junction box, at the top of the power pole, encloses the hardwired connection to the building's electrical service.

Power poles bring building power from the ceiling to the powerways in the base cavity of panels. They can also be used to run cables into the top cap or into the panel base cavity. All five wiring schematics are available.

Trim conceals powerway and cables routed to the base of the panel.

Knockout

The power pole harness attaches to either end of a powerway.

Hanger bar secures the top of the pole to the ceiling grid.

Ceiling trim plate

Cable poles provide a space to route cables from the ceiling to the high top cap or base cavity of a panel.

Knockouts allow data distribution in change-of-height conditions.

Retainer attaches to the end of a panel with screws that attach below the top cap. Panel remains undamaged so power and cable pole can be removed and relocated later.

On June 19, 2023, Kick power components changed design. Power components manufactured before June 19, 2023 are not compatiable with power components manufactured after June 19, 2023.
▶ See *Power Components Transition Details* on page 48.

All the components in an electrical distribution network must use the same wiring schematics. Components are color coded and keyed to make it impossible to connect mismatched parts.

Product Details

Power and cable poles accommodate ceiling heights up to 10'4"H.

Height of the pole must correspond with the height of the panel it is attached to so that the pole will connect under the top cap. Adjacent panels can be lower.

Power and cable pole packages ship with one left-hand and one right-hand corner change-of-height connector. A separate change-of-height package may be required in certain X configurations. See assembly direction 93-9504745 for more information.

In T configurations, height of power and cable pole must correspond to the height of the center panel.

120° vertical corner trim is required for all 120° connections. The same 120° vertical corner trim is used for two- and three-way connections and is available with a low end cap only. Both two- and three-way end caps are included with each 120° vertical corner trim package.

Surface Materials

Power pole
• Paint

Ceiling trim plate
• 4790 Sodium paint

Wiring and Cabling

Base Power-In

Base power-ins are field installed and connect the panel electrical system to the building power source. All five wiring schematics are available.
▶ Specifying, page 199.

Power-ins are UL listed and CSA certified. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.

All the components in an electrical distribution network must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts. Building power source can come from the floor, wall, or column.

On June 19, 2023, Kick power components changed design. Power components manufactured before June 19, 2023 are not compatiable with power components manufactured after June 19, 2023.
▶ See *Power Components Transition Details* on page 48.

Connector on end of base power infeed harness occupies one receptacle location in power block.

Cover is included with base power to conceal the connection.

Flexible harness secures hardwired connection to building monument. The harness must be back fed through the base trim prior to connection into the building monument.

Wiring and Cabling

Power Components Transition Details

On June 19, 2023, Kick power components changed design. Power components manufactured before June 19, 2023 are not compatiable with power components manufactured after June 19, 2023.

The style numbers of power component have changed. The panel style numbers have not changed. Any panel segment ordered with power after June 19, 2023 will include the new power component design.

How power is specified remains unchanged. Power can be optioned on to the panel segment. Powerways can be specified as installed in the factory or installed in the field.

Components included in the design change are powerways, receptacles, base power-ins, and the harness included in the power pole.

Power before June 19, 2023	Power after June 19, 2023

Wiring and Cabling

Planning with power components manufactured before and after June 19, 2023.

Power components manufactured before June 19, 2023 can still be used but do not connect to power components manufactured on or after June 19,2023. The following two approaches can be used when both power systems are used:

Cluster with all power components manufactured before June 19, 2023.

Cluster with all power components manufactured on or after June 19, 2023.

Organize by cluster: power systems can be organized by workstation cluster. Some clusters can use power components manufactured before June 19, 2023 and other clusters can utilize power components manufactured on or after June 19, 2023.

Base power-in manufactured before June 19, 2023

Powerways manufactured before June 19, 2023

Powerways manufactured after June 19, 2023

Division between separate power systems.
No connection between the systems.

Base power-in manufactured after June 19, 2023

Utilize multiple infeed in a single cluster: a single workstation cluster can use both power systems by utilizing multiple infeeds. Power components manufactured before June 19, 2023 can power part of the workstation and have its infeed and power components manufactured on or after June 19, 2023 can power part of the workstation and have its infeed. Each power system covers part of the workstation and the two systems do not connect to one another.

Receptacle location change

24"W	24"W
12¹/₄" side 1 side 2 12¹/₄"	12" 12"
30"W	30"W
12¹/₄" side 1 side 2 12¹/₄"	12" 12"
36"W	36"W
12¹/₄" 12³/₄"	12" 12"
42"W	42"W
12¹/₄" 12³/₄"	12" 12"
48"W	48"W
12¹/₄" 12³/₄"	12" 12"
60"W	60"W
12¹/₈" 12⁵/₈"	12" 12"

Receptacle location for base trims manufactured before June 19, 2023

Receptacle locations for base trims manufactured after June 19, 2023

Status of power components manufactured before June 19, 2023

Powerways, panel connectors, receptacles, base power-ins, and harnesses included in the power pole manufactured before June 19, 2023 are no longer supported.

Base covers with receptacle cutouts for the receptacle locations of the pre-June 19, 2023 powerways are supported as service parts.

Receptacle knockout fillers for both the pre-June 19, 2023 and post-June 19, 2023 are available as a service part.

The pre-June 19, 2023 wire separator, which supports the powerway in the panel, is available as a service part.

How to convert a Kick panel manufactured before June 19, 2023 with post June 19, 2023 power components.

1. Remove all pre-June 19, 2023 power components and the pre-June 19, 2023 wire separator.
2. Order from service parts a post June 19, 2023 powerway and a post June 19, 2023 set of base covers of the appropriate width. Powerways, wire separators, and base covers are not available as style numbers.
3. Add post June 19, 2023 components to base area of the panel frame manufactured before June 19, 2023.

Wiring and Cabling

Worksurface-Height Power and Communication

Power and communication can be accessed at or near worksurface height by using panel- or worksurface-mounted receptacles, panel- or worksurface-mounted communication modules, or worksurface-mounted power and communication sphere.
▶Pages 200 and 216

**Panel-mounted
receptacle**

**Worksurface-mounted
communication module**

TS Series Worksurfaces

Worksurface has a wood core with laminate top and plastic edge band. Low-Pressure Laminates are available. Plastic edge band color is selectable.

Full-depth worksurfaces fit flush against panels.

Front (user's) edge is a plastic edge band with a 3 mm radius. Back and side edges are flat.

Grommet is standard on corner worksurfaces only. Field-installed grommet requires a 3" diameter hole in the worksurface.

Worksurface has a wood core with a Low-Pressure Laminate surface and is 1³⁄₁₆" thick.

Edge Profile is applied to front (user's) edge only.

120° Worksurface

Peninsula

Bullet peninsula, angled peninsula, and jetty worksurfaces can be supported two ways:
• With a cantilever, a center support panel, and a column
• With a cantilever, a side support bracket, and two post legs

Angled Peninsula

Linking worksurfaces with 3" notch accommodate Kick panels. One leg and two cantilevers must be used to support linking worksurfaces.

Visitor worksurfaces must be supported by a cantilever, a side support bracket, and a post leg.

Connections

Supports are ordered separately and installed in the field. The following supports are available for use with Kick worksurfaces:
• Post leg
• H-leg
• Cantilever with tie plate
• Side support brackets
• Tie plates
• In-line support plate
• Reinforcing channel
• On-module end panel

Post leg

H-leg with bracket

Cantilever with tie plate

Side support brackets   Tie plates

In-line support plate

Reinforcing channel

End panels— standard height and standing height

Cantilever with tie plate works in left-hand, right-hand, or shared applications.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Rein-forcing channel must be specified separately.
▶ Page 261

Wiring & Cabling

Grommet is standard on corner worksurfaces.

Surface Materials

Low-Pressure Laminate Worksurfaces
• Laminate
▶ See *Surface Materials Reference Manual*.
• Open Line laminate (option) A program including non-Steelcase laminates which are suitable for use on Steelcase products.
▶ See *Surface Materials Reference Manual*.

Front (user's) edge(s)
• Plastic

Back and side edges
• Plastic color default to match user's edge

TS Series Worksurfaces

Kick is available in a wide variety of worksurface shapes. Directional laminate grain direction is shown.

Low-Pressure Laminates, or LPLs, are created by dipping decorative crafted paper in melamine resin. The melamine dipped paper is then bonded to a wood core under heat and high-pressure. LPLs are generally suitable for use in lower impact areas. LPLs are generally used in vertical applications as well as tops for workstations and private offices.

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 10–20 worksurfaces. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of nine or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible.

TS Series Worksurface Supports

On-module supports can be used to panel support worksurfaces in various configurations.
▶ Specifying, page 260

End panel can be used to support the end of a worksurface at seated height or standing height.

Cantilever can be used to panel-support a worksurface at any height.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

Post leg

H-leg with bracket

Product Details

On-module worksurface supports engage the slots in the vertical uprights of Kick panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support bracket

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces. It is standard with these corner worksurfaces.

Actual Dimensions

	Cantilever	Center support panel	End panel	Post Leg	H-Legs
Height	13"	$28\frac{1}{2}$" or $40\frac{7}{8}$"*	$28\frac{1}{2}$" or $40\frac{7}{8}$"*	$28\frac{1}{2}$"	$28\frac{1}{2}$"
Depth	16"	11"	$23\frac{3}{4}$" or $29\frac{3}{4}$"	N.A.	14" or $22\frac{3}{4}$"
Glide Range	N.A.	$1\frac{1}{4}$"	$1\frac{1}{4}$"	2"	$2\frac{3}{4}$"

*Height dimensions include the thickness of a worksurface.

Right

Left

Shared

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated and standing heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a worksurface in place of an end panel.

57"W

Reinforcing channel required

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 261

TS Series Worksurfaces

Freestanding Guidelines

For TS Series Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations. Consult your local dealer or Steelcase representative prior to deviating from these guidelines.

Counterweight packages for storage products are required to ensure product stability.
▶See page 111 for *Counterweight Requirements for Storage Products*.

There are several ways to support the ends of a freestanding worksurface:

TS Series worksurface

Post leg

With post legs.

20"W H-leg

72" max.

72" max.

With a 22"D or 28"D pedestal.

11"W H-leg

Tie plate

H-leg can be used to support adjacent perpendicular worksurfaces up to 72"W.

Reinforcing channel (TSATRC39, TSATRC48, TSATRC57, or TSATRC72) is available to add support to worksurfaces that have 60" or more of unsupported kneespace and that are heavily loaded.

TS Series Worksurfaces

Understanding Universal Systems Worksurfaces and Supports

//

Universal Systems Worksurfaces

Statement of Line

All worksurface sizes and shapes are available in High-Pressure Laminate with 3 mm edge. Most sizes and shapes are also available in High-Pressure Laminate in wood veneer with square edge. See Specifying pages for details.

Worksurface dimensions shown apply to both wood veneer and High-Pressure Laminate versions of each worksurface.

Universal Systems Worksurfaces

Systems worksurfaces—with ½" cord drop feature built-in cable management flexibility, allowing cords to drop below the worksurface at any point along the back edge.
▶ Specifying Systems Worksurfaces, page 219

Systems worksurfaces—full depth feature a tighter fit to panels for a cleaner aesthetic.

Systems straight worksurfaces with ½" cord drop and full depth are available in a variety of widths and depths in modular and parametric dimensions.

Full-depth worksurfaces fit flush against panels. Cords and cables are routed through cable scallops.

Front (user's) edge is available in two edge profiles on laminate worksurfaces. Wood veneer worksurfaces have a square (3 mm) edge profile only. Back and side edges are flat.

Cable scallops allow cords and plugs to pass behind the worksurface. Cable scallops can be omitted as an option.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 1³⁄₁₆" thick.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in two shapes.

3 mm edge profile

Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.
▶ See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Straight worksurfaces are available to specify parametrically. The parametric dimensions available are from 18" to 36" deep and from 18" to 120" wide in ¹⁄₁₆" increments both depth and width.

Bubble Jetty

Visitor

Edge profile is applied to front (user's) edge only.
Tip: Straight worksurface width is available parametric from 18"W–120"W in ¹⁄₁₆" increments.
Tip: Straight worksurface depth can be specified parametric from 18"D–36"D in ¹⁄₁₆" increments.

Parametric straight worksurfaces are available in laminate with a 3 mm plastic edge, knife edge, or soft edge options and wood veneer with square edge or soft edge options.

Parametric straight worksurfaces have the option to specify a scallop, grommet cutouts, power and data access door and tray cutout, or power access door.

Dual-worksurfaces are two pieces - a large monitor surface with a smaller keyboard surface attached. A dual-arm spring mechanism provides superior stability when compared to the single-arm spring mechanism used in worksurfaces with an adjustable keyboard shelf.

Keyboard surface on dual worksurface can be adjusted to positions up to 6" higher or 5" lower than the monitor worksurface.

Keyboard surface tilts with a range of 25°.

A 1" gap separates the sides of the keyboard surface and adjacent worksurfaces. There is also a 1½" space between the keyboard and monitor surfaces.

Dual worksurfaces cannot be used as a single worksurface. Dual worksurfaces must be tethered to a panel or connected to an adjacent worksurface in a freestanding application.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Taper-flat worksurfaces can be supported at the larger end with a side support bracket and a post leg. If the larger end is 30"D, a 24"D end panel can also be used.

3 mm edge bullet peninsula, jetty, and bubble jetty worksurfaces can be supported two ways:
• With a cantilever, a center support panel and a column
• With a cantilever, a side support bracket, and two post legs

In certain applications, a center support panel should not be used because the unfinished top edge of the support panel would be exposed. Use a cantilever, a side support bracket, and two post legs instead. These applications include:
• Angled peninsula with 3 mm edge and ½" cord drop

3 mm edge visitor worksurfaces must be supported by either a cantilever and a center support panel, or by a cantilever, a side support bracket, and a leg.

Worksurfaces can be used freestanding or in panel-supported installations.

Supports are ordered separately and installed in the field.

For panel-supported applications you can use:
• Side support brackets
• Cantilever with tie plate
• End panel
• Standing-height end panel
• Support plate
• Center support panel with tie plate
• Standing-height center support panel with tie plate
• Columns or legs
▶ See page 100 for *Universal Panel-Mounted Systems Worksurface Supports.*
• Universal pedestal with filler
• Universal lateral file with underworksurface lateral file filler.
▶ See *Storage Specification Guide.*

Universal Systems
Worksurfaces

For leg-based applications you can use:
• Post legs
• Double post leg
• Double post C-leg
• Support plate
▶ See page 102 for *Legs and Columns for Universal Systems Worksurfaces. Tip: Pedestal can also be used in leg-based freestanding installations.*

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Page 261

Knife edge worksurfaces require reinforcement channels for spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Heavy load worksurfaces spanning greater than 60", or all worksurface spans wider than 72", require additional support of a cantilever, pedestal, intermediate support, or leg.

Wiring & Cabling

1/2"

Worksurface depth is 1/2" less than nominal and allows cords and cables to pass over at any point. Cable scallops provide space for plugs to pass over the back edge of the worksurface.

Cable scallop allows cord plugs to easily pass below the worksurface. Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. Wire managers are included with wood veneer worksurfaces. Wire managers for use with laminate worksurface must be ordered separately.

12 1/2"   12 1/2"

Corner worksurfaces have scallops located 12 1/2" from the rear corner of the worksurface to the center of the scallop. Taper-flat worksurfaces have a single scallop located 18 1/2" from the larger end. Scallops are centered on the rear edge of all other worksurfaces that include them.

Cable scallop can be omitted for freestanding applications or panel-supported applications where plugs do not need to pass over the back edge of the worksurface.

Cable management devices are available to help manage conventional and fiber-optic cables beneath the worksurface.
▶ See *Worksurface Power and Communication,* page 52.

Parametric straight worksurfaces have two grommet cutout options. The 2" round grommet cutout option fits the AWAG2 grommet which is specified separately.
▶ See page 259

The 3" round grommet cutout option fits the TSAEGROM grommet which is specified separately.
▶ See page 259

The grommet cutout option is not available on a worksurface when the power access door option is selected.

Grommet cutouts in parametric straight worksurfaces can be specified in the center, the left, or the right sides of the worksurface. Grommet cutouts are available in the below configurations.

Grommet Location on Worksurface	Minimum Worksurface Widths
Center, Right, or Left	All widths
Right and Left	At least 25"W
Right and Center	At least 34"W
Left and Center	At least 34"W
Center, Right, and Left	At least 34"W

FrameOne post legs will interfere with the left or right grommet cutouts on parametric Universal straight worksurfaces.

6 1/2"   6 1/2"

3 5/16"   3 5/16"

Grommet cutouts in parametric straight worksurfaces are located 3 5/16" from the back edge of the worksurface to the back edge of the grommet cutout. Left and right grommet cutouts are located 6 1/2" from the edge of the worksurface to the outside edge of the grommet cutout.

Surface Materials

High-Pressure Laminate Worksurfaces
• Laminate

• Wood veneer (standard)
• Customiz stain (option)
• Full-fill finish (option)

Square (3 mm) edge profile
• Wood veneer to match worksurface

Front (user's) edge(s)
• Wood edge band

Application Topics

Full-depth worksurfaces provide an uninterrupted working surface and are designed to allow traditional corner or L-configuration planning without creating uneven gaps.

Plan using worksurfaces actual dimensions when panel- wrapping worksurfaces because worksurface depths and widths vary by type. Straight and transition worksurfaces are full-width to correspond directly with panel width. Corner, extended corner, 120° corner, bullet peninsula, jetty, and visitor worksurfaces are ½" less than panel width to allow for a consistent ½" cable-management gap when used in combination with straight worksurfaces.

Tip: To avoid uneven gaps in panel-supported applications, use full-depth worksurfaces to create L-configurations.

Do not use a Universal Systems Worksurface as a top for storage that matches the worksurface width. Universal Systems Worksurfaces are slightly undersized for panel-wrapped applications and will not fit over full-width storage. Use field-installed storage tops for this type of application.

▶ See *Storage Specification Guide.*

Knife edge worksurfaces have limitations for support options and application restrictions.

▶ *Knife Edge Worksurface Application Guidelines.*

Shipping

Palletizing streamlines unloading and staging of worksurfaces. Identical worksurfaces ordered on the same line item are packed on pallets containing 5–50 worksurfaces depending on worksurface size. Remaining worksurfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer worksurfaces cannot be palletized.

Universal Systems
Worksurfaces

Steelcase
April 2024

Worksurface Support Guidelines

Worksurface spans greater than 54" require a brace or additional support to the floor. Spans greater than 72" wide cannot be supported only by a reinforcing channel, and require additional supports to the floor. Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface.
Exception: When using pedestals or lateral files to support a worksurface, measure from the inside edge of the storage unit.

Worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. A light load application is less than 40 pounds placed on a worksurface. Reinforcing channel must be specified separately.

Exception: Knife edge worksurfaces require support on spans greater than 48"W.

Reinforcing channel is not required on worksurfaces with spans less than 54"W.

Lightly loaded applications typically include a workstation with monitors, lighting, limited organizational tools, and personal items.

Reinforcing channel or additional support is required for worksurfaces with spans greater than 54"W and less than 72"W in light use applications and on worksurfaces with spans greater than 54"W and less than 60"W in heavy load applications.

Worksurface span cannot be supported solely by a reinforcing channel. Additional to the floor supports are required.
Tip: Reinforcing channels add 1"D below the worksurface.

Tip: For maximum effectiveness, place the reinforcing channel in the middle of the worksurface span.

Kick Solutions Specification Guide

Calculate span distance by measuring from edge of one end of worksurface to edge of other end of worksurface. To determine size of reinforcing channel needed, deduct the amount listed in the matrix below from the measured span. Deduction in inches is based on combination of the left-hand and right-hand supports.

Example: 72"W measured span, with application of cantilever for left-hand support and end panel for right-hand support, has a span deduction of 6" for a reinforcing channel size of 66" (72"–6" = 66"). For this application, use reinforcing channel TS7WKSPT66.

Worksurface Span Deductions for Determining Reinforcing Channel Size		Right-Hand Support						
		End Panel	FrameOne Leg	FrameOne Leg-Table Application	Intermediate Support	DBL Post Leg	Cantilever	All other Legs/Supports
Left-Hand Support	End Panel	–6"	–6"	–9"	–9"	–6"	–6"	–6"
	FrameOne Leg	–6"	–6"	–9"	–9"	–6"	–6"	–6"
	FrameOne Leg-Table Application	–9"	–9"	–12"	–12"	–9"	–9"	–9"
	Intermediate Support	–9"	–9"	–12"	–12"	–9"	–9"	–9"
	DBL Post Leg	–6"	–6"	–9"	–9"	–6"	–6"	–6"
	Cantilever	–6"	–6"	–9"	–9"	–6"	–6"	–6"
	All other Legs/Supports	–6"	–6"	–9"	–9"	–6"	–6"	–6"

Note: Not all supports shown work effectively with this panel system. Please check with your field sales representative for clarification and understanding prior to ordering

Reinforcing Channel Sizes		
Style Number	**Nominal**	**Actual**
TS7WKSPT39	39"W	39.231"W
TS7WKSPT48	48"W	47.547"W
TS7WKSPT51	51"W	50.547"W
TS7WKSPT54	54"W	53.547"W
TS7WKSPT	57"W	56.547"W
TS7WKSPT60	60"W	59.547"W
TS7WKSPT63	63"W	62.547"W
TS7WKSPT66	66"W	65.547"W
TS7WKSPT72	72"W	71.547"W

Note: If the deducted span distance falls between two reinforcing channel sizes, select the smaller of the two sizes.

Reinforcing Channel Size for Straight 120° Worksurfaces

To calculate the reinforcing channel size for a straight 120° worksurface, use the user edge length, subtract 6", and order the next shortest channel. See chart below.

Back Edge Width	Worksurface Depth	User Edge Depth	Reinforcing Channel Size
48"	23½"	61 1/16"	54"W
48"	29½"	65 1/16"	57"W
60"	23½"	73 9/16"	66"W
60"	29½"	77 1/16"	66"W
72"	23½"	85 9/16"	72"W
72"	29½"	89 1/16"	72"W

Worksurface Support Guidelines, continued

Support Requirements for Peninsula Worksurfaces

Cantilever

59$^1\!/_2$"W
or less

Reinforcing
channel

60"W
or more

Peninsula worksurfaces smaller than 60"W do not require a reinforcing channel. Location of leg or column support, determined by pilot holes, meets the requirements for worksurface support every 54". Sizes 60"W or greater require a reinforcing channel. Determining brace size for peninsula worksurfaces:
If worksurface is supported by a single column or legs, subtract 21" from span of worksurface to determine reinforcing channel size.
Example: 72"W measured span has a span deduction of 21" for a reinforcing channel size of 51" (72"–21" = 51"). For this application, use reinforcing channel TS7WKSPT51.

Universal Systems Worksurfaces with Soft Edge, Power and Data Access Door and Tray

Soft edge provides a comfortable user experience reducing strain on wrists and forearms.
▶Specifying page 228

Power and data access door and tray provides desk top access and management of cords.
▶Specifying page 258

Soft edge and power and data access door and tray cutout are available in modular and parametric straight worksurfaces, both ½" cord drop and full depth.

Cutout is optional; power and data access door and tray is ordered separately. 24"W cutout is centered near the back of the worksurface.

Edge is soft to the touch and flexes to conform to the arm.

Power and data access door and tray is available with cord or with modular or hardwire connection.

Soft edge is 36"W centered on the worksurface; balance of front edge is 3 mm radius. Back and side edges are flat.

Soft edge and power and data access door and tray are available on straight and taper Universal Systems Worksurfaces with ½" cord drop and full depth.

Tray includes six simplex receptacles and cutout for data access.

Dimensions

	Soft edge	Cutout for Door	Tray (below worksurface)
Width	36"	24"	27$\frac{1}{8}$"
Depth	3"	4$\frac{5}{8}$"	6"
Thickness	½" at front	N.A.	N.A.
Height	N.A.	N.A.	4$\frac{3}{4}$"

Product Details

Soft edge profile is polyurethane and is available with Bactiblock™ antimicrobial protection.

High-Pressure Laminate Worksurfaces

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

3 mm front edge is specifiable. Back and side edges match 3 mm front edge.

Edge profile finish for 3 mm front edge is specified separately from laminate color.

Wood Veneer Worksurfaces

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Scallops are omitted on worksurface when cutout for power and data access door and tray option is selected.

Power and data access door and tray cutouts are 3⁵⁄₁₆" from the back edge of the worksurface and always centered on the width of the worksurface.

Power and data access door and tray cutouts are available on worksurfaces 24"D through 36"D.

Inner tray
Outer tray

Inner tray provides under the surface power and data connections and access and cord management.

Outer tray provides cover and management for cord, and/or data cables to and from the panel.

Data cutout

Data cutout in tray can accommodate either a single gang or a modular furniture communication faceplate.

Tray includes adapter to accommodate modular faceplate.

Filler packages are available to fill unused data cutout. Order separately in package of 24.

Corded tray includes 10' cord with plug and has an integrated overload circuit breaker. Non-PVC version is available.

Power and data access door and tray flips toward the user.

Connections

Fixed storage can be used with worksurfaces with soft edge but must not encroach the 36" width of the edge.

Worksurfaces connected perpendicular should not encroach the 36" width of the soft edge.

Soft edge worksurfaces are available with the same support options and follow the same application rules as other Universal Systems worksurfaces. *Exception: 48"W worksurface with soft edge cannot have a post leg at the front edge.*
▶See page 86 for Universal Systems Worksurfaces Understanding.

Access holes in tray allow power and data to be routed straight back when worksurface is against the panel or routed to the sides when the worksurface is perpendicular to the panel.

Worksurfaces with power and data access door and tray are available with the same support options and follow the same application rules as other Universal Systems worksurfaces.
▶See page 86 for Universal Systems Worksurfaces Understanding.

Tray with cord and plug can be used in a freestanding table application.

6"
4³⁄₄"
27¹⁄₈"

Height of tray is 4³⁄₄" so lower storage height must be accounted for when used adjacent to tray.

Width of outer tray is 27¹⁄₈" so adjacent lower storage dimensions must be accounted for on each worksurface width.

Tray with cord and plug includes two cord clips to help manage the cord below the worksurface.

Soft edge worksurfaces and power and data access door and tray worksurfaces require reinforcement channel or other support on worksurfaces 60"W or larger.

Worksurfaces greater than 72"W require additional support such as cantilevers, pedestals, or legs beyond the brace.

Universal Panel-Mounted Worksurface Supports

For Kick Panel Applications

On-module supports can be used to panel support worksurfaces in various configurations.
▶ Specifying, page 260

Worksurface supports feature alignment tab used to set a depth for Universal Systems Worksurfaces—with $\frac{1}{2}$" cord drop. This tab is bent down when installing full-depth worksurfaces.

End panel can be used to support the end of a worksurface.

Center support panel can be shared by two worksurfaces and may be required for longer runs of worksurfaces.

Cantilever can be used to panel-support a worksurface at any height.

Side support brackets can be used to support the ends of straight and corner worksurfaces and to support the back corner of any corner worksurface.

On-module worksurface supports engage the slots in the vertical uprights of Kick panels.

Side support brackets support worksurfaces at any height in 1" increments. Brackets ship as a left- and right-hand pair and are ordered separately.

Side support bracket

Side support brackets can be used to support the end of a worksurface that is wrapped by a panel with the same width dimension that matches the worksurface depth.

Actual Dimensions

	Cantilever	Center support panel	End panel
Height	12$\frac{1}{4}$"	28$\frac{1}{2}$" or 40$\frac{7}{8}$"*	28$\frac{1}{2}$" or 40$\frac{7}{8}$"*
Depth	15$\frac{1}{2}$"	11"	23$\frac{3}{4}$" or 29$\frac{3}{4}$"
Glide Range	N.A.	1$\frac{1}{4}$"	1$\frac{1}{4}$"

*Height dimensions include the thickness of a worksurface.

Steelcase
April 2024

Single side support bracket can be used to support the rear corner of corner, extended corner, and 120° corner worksurfaces.
Tip: For off-module fin wall applications, the single side support bracket must be handed appropriately for connection to the fin wall.

Single side support bracket can be used to support the user's side rear corner of bullet peninsula, angled peninsula, visitor, jetty, and bubble jetty worksurfaces.

Right

Left

Shared

Cantilevers support worksurfaces at any height in 1" increments. Cantilever is non-handed and can be used to support either end of a worksurface, or shared to support two worksurfaces at the same height simultaneously. One tie plate ships with each cantilever.

30"D straight, tapered, and transition cantilevered worksurfaces require additional floor support along the front edge, such as a pedestal, end panel, post leg, side support bracket, or an adjacent return worksurface.

Adjacent cantilevered worksurfaces must be the same height in order to connect with a tie plate and provide panel stability.

Center support panel is an alternative to a cantilever in supporting longer runs of worksurfaces for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

Center support panels are available in seated and standing heights, and cannot be used in freestanding applications or as a substitute for an end panel. One tie plate ships with each center support panel.

End panels can be used to support the end of a worksurface for additional panel stability. Refer to the applicable panel stability guidelines for specific requirements.

End panels are available in seated and standing heights, and cannot be used in freestanding applications.

All panel mounted supports can be removed and repositioned later without any permanent damage to panels or skins.

Pedestals and lateral files with a filler can be used to support the end of a worksurface in place of an end panel.
▶ See *Storage Specification Guide.*

57"W

Reinforcing channel required

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Specifying, page 262

Surface Materials

Side support bracket and reinforcing channel
• Black paint only

Cantilever, center support panel, and end panel
• Paint

Universal Systems Worksurfaces

Legs and Columns for Universal Systems Worksurfaces

Without Alignment Tab

Legs are available to support worksurfaces in freestanding or panel-supported applications.
▶Specifying, page 264

Post leg can be used on a single worksurface. Non-locking caster and glide versions are available.

Double post C-leg can be used on a single worksurface or in a shared application.

Support plate can be used with a double post leg to join and support two worksurfaces. Plate is 14"D or 20"D and $3^{11}/_{16}$"W.

Leveling glide allows worksurface height to be adjusted on uneven floors.

Column is 4" in diameter and can be used as a column support on a single worksurface. Adjustable and non-adjustable versions are available.

Double post leg can be used as a column support on a single worksurface or to support a shared application.

Adjustable-height leg can be used with a single worksurface. Locking caster and glide versions are available.

Adjustable-height leg adjusts from $25^1/_2$"H to $31^1/_2$"H in $^3/_4$" increments.

Actual Dimensions							
	Column	Adjustable column	Double post leg	Post leg	Adjustable-height leg	Double post C-leg	Support plate
Height*	$28^1/_2$"	$28^1/_2$"–$31^5/_8$"	$28^1/_2$" or $40^7/_8$"	26", $28^1/_2$", or $40^7/_8$"	$25^1/_2$"– $31^1/_2$"	$28^1/_2$"	N.A.
Glide range, for legs equipped with glides	$1^1/_2$"	$3^1/_8$"	$^3/_4$"	$^3/_4$"	$^3/_4$"	$^3/_4$"	N.A.

*Height dimensions include the thickness of a worksurface.

Product Details

Legs support Systems Worksurfaces at 26"H nesting, 28$\frac{1}{2}$"H standard, 40$\frac{7}{8}$"H standing or 25$\frac{1}{2}$"H to 31$\frac{1}{2}$"H adjustable heights.

Legs for Systems Worksurfaces do not include alignment tabs. Pilot holes help the installer locate the proper leg position under the worksurface.

45° orientation

Post legs are always installed at a 45° orientation.

26"H nesting height legs allow worksurfaces to nest underneath an adjacent worksurface supported with 28$\frac{1}{2}$"H legs or a panel-supported worksurface.

Double post leg can be used in a shared application with a support plate, or it can be used as a column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces in panel-mounted applications.

Post leg, in conjunction with a side support bracket, can be used to support the end of a visitor or taper-flat worksurface.

Two post legs can be used in place of one double post leg as column support for spanner, jetty, bubble jetty, bullet peninsula, and angled peninsula worksurfaces for added stability.

Standing-height post or double post legs can be used as column support in panel-mounted applications only.

Column can be used on spanner, bullet peninsula, angled peninsula, jetty, and bubble jetty worksurfaces in panel supported applications.

For U-Free desk applications, column can be used on bullet peninsula and jetty worksurfaces. Adjustable and non-adjustable versions are available.

Column cannot be used in a shared application.

Bottom View Column | Bottom View Post Leg

Column is not recommended for applications that include post legs because it has a round shape, while post legs are more of an elliptical shape. Use single or double post legs as a column support in applications that include other post legs.

Adjustable-height legs adjust from 25$\frac{1}{2}$"H to 31$\frac{1}{2}$"H in $\frac{3}{4}$" increments. Legs can be used to support the primary worksurface, or legs can support a worksurface in a nesting application.

The adjustable-height leg with casters cannot support freestanding worksurfaces that are less than 24" deep.

57"W

Reinforcing channel required

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.

▶ Specifying, page 261

Application Topics

Freestanding Guidelines for TS Series Worksurfaces with Legs

Universal Systems
Worksurfaces

Knife Edge Worksurface Application Guidelines

When planning an L-configuration, two UFB flat brackets should be used to support the worksurfaces. A cantilever is not wide enough to support the gap where the knife edge worksurface comes together.

Knife edge
Flat bracket

Freestanding L-configuration should be avoided due to profile on the backside of the worksurface.

25$^{1}/_{2}$"H Pedestal
(cantilever supported worksurface)

Box/file
(cantilever supported worksurface)

Compatible storage includes 25$^{1}/_{2}$"H pedestal with freestanding conversion kit, box/file mobile pedestals, and 1-high storage.

Knife Edge with 27"H Lateral and 27"H Pedestal

Knife Edge with 25$^{1}/_{2}$"H Pedestal

Knife edge worksurface over 27"H storage can make files difficult to access. Use a 25$^{1}/_{2}$"H pedestal that is flush with the front edge of the worksurface to avoid this issue.

Knife edge worksurfaces require reinforcement channels for unsupported spans greater than 48". Use TS7WKSPT39 for 54"W worksurfaces, TS7WKSPT for 60"W and 66"W worksurfaces, and TS7WKSPT72 for 72" worksurfaces.

Although a 25$^{1}/_{2}$"H pedestal looks good when paired with knife edge, keep in mind that it does not align with other storage – drawers and base trim do not align. Use a box/file mobile pedestal instead.

End panels, 27"H standard pedestals, side support brackets and FrameOne legs for Universal do not align properly with knife edge worksurfaces. Instead, use cantilevers as shown.

**Side support brackets will work to support the back end of a worksurface; front end is where they won't align properly.

Freestanding Guidelines For Universal Systems Worksurfaces with Legs

The following section on freestanding worksurfaces gives some guidelines to be used with common freestanding configurations.

Counterweight packages for storage products are required to ensure product stability.
▶See page 111 for *Counterweight Requirements for Storage Products.*

Remember to specify "omit scallops" option on worksurfaces intended for use in freestanding applications.

There are several ways to support the ends of a freestanding worksurface:

With post legs. Nesting post legs can also be used.

With a double post C-leg.

With adjustable-height legs.

With a pedestal. Other storage products can also be used.

Double post C-legs can be used on a single worksurface or in a shared application.

Kick Solutions Specification Guide ▶**Freestanding Guidelines For Universal Systems Worksurfaces with Legs,** continued **105**

Steelcase
April 2024

Universal Systems
Worksurfaces

Tie Plate

Double Post C-Leg

Tie plate is recommended to align worksurfaces.

18"D

18"D worksurfaces can be freestanding down to 24"W.

18"D

Freestanding worksurfaces greater than 72"W need additional center front and back floor support.

The adjustable-height leg with casters cannot support freestanding worksurfaces that are less than 24" deep.

Tie Plate

Support Plate

Double Post Leg

Combined worksurfaces can give each other support when joined with a double post leg and support plate. Use 14"D support plate on worksurfaces 24"D and smaller and 20"D support plate on worksurfaces $24^1/_{16}$"D and larger. Tie plate is recommended to align the worksurfaces.

Double Post C-Leg

Double Post C-Leg   Double Post C-Leg

Double post C-leg can be used to support a corner or extended corner worksurface and adjacent worksurfaces.

Double Post C-Leg

Double post C-leg can be used to support an extended corner worksurface and adjacent worksurfaces.

Double Post
C-Leg

Double post C-leg can be used to support a corner, 120° worksurface and adjacent worksurfaces.

Worksurface spans greater than 54" require additional support of a cantilever, pedestal, intermediate support, or leg. Exception; worksurfaces can span up to 60" in heavy load applications and up to 72" in light load applications if a reinforcing channel is used. Reinforcing channel must be specified separately.
▶ Page 262

Divisio Side Screen

Divisio side screen is magnetic and provides a territorial boundary between users. The user-movable functionality allows users to decide when and where they need additional privacy. The screens may be used on any $\frac{3}{4}$"- to $1\frac{1}{2}$"-thick worksurface.
▶ Specifying, page 267

Magnetic body accommodates magnets for visual display.

$21\frac{1}{2}$" of the screen sits on the worksurface. The depth allows the side screen to work on any 24"D or deeper worksurface.

Finger trigger makes it simple for the end user to move the screen to allow for expansion, compression, increased privacy, or collaboration.

Clamp can accommodate $\frac{3}{4}$"- to $1\frac{1}{2}$"-thick worksurfaces.

Overhang provides greater peripheral privacy.

Divisio side screen can be made more permanent by adding two screws through the clamp. For worksurfaces 1" thick or less; FrameOne, Ology, Migration, a #10 x $\frac{3}{4}$" countersunk wood screw is recommended. For worksurfaces over 1", a #10 x $\frac{7}{8}$" countersunk wood screw is recommended.

Actual Dimensions

Depth	$29\frac{1}{2}$" (total), $21\frac{1}{2}$" (sits on worksurface)
Width	$1\frac{1}{4}$"
Height	$14\frac{1}{4}$" (total), $11\frac{5}{8}$"(above worksurface)

Understanding Counterweights

Counterweights

Counterweights

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.
▶See *Counterweight Requirements for Storage Products,* page 111.

Counterweight Packages for Lateral Files and Cabinets

23⅛"	24"	36"	40"	Package 2	**RLF24363_**

Product specification pages indicate proper counterweight package for each style number.

Specification Information

Dimensions				Counterweight	Style
D Flush Steel Front	Proud Steel/ Wood Front	W	H	Package	Number
65½"H Tower with Door Hinged on Left, continued					
Partition with Coat Rod, Two Adjustable Shelves, One Fixed Shelf, and					
23⅛"	24"	24"	65½"	Not required	**RFF24245LW__**

If a counterweight is not required in any condition for a particular style number, the product specification page will indicate not required.

Counterweights

Counterweight Requirements for Storage Products, continued

Requirements for Freestanding Applications

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the floor.

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.

Note: **Local seismic requirements vary.** *Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials.*
Tip: Anchor bracket cannot be used with pedestals.

Floor anchor brackets for Universal with FrameOne foot secure lateral files and towers to the floor for stability or in seismic zones to reduce the risk of hazards during earthquakes.
Note: **Local seismic requirements vary.** *Compliance with local code requirements is the responsibility of the customer or their authorized agent.*

Wall Anchors

2. Counterweights are not required for lateral files, towers, cabinets, and bookcases anchored to the wall.

For wall anchoring of lateral files, towers, cabinets and bookcases, consult with the building's designated design professional (architect or engineer) and work with local codes authorities for approvals to ensure adequate support when product is fully loaded.

Ganging Brackets

3. Counterweights are not required for lateral files, towers, cabinets, and bookcases ganged back-to-back with ganging hardware.

TS Series towers which do not include ganging hardware, order *8425808SR* from Service Parts.

Counterweights

Units ganged side-by-side **require** counterweights.

Requirements for Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.
▶See *Panel Stability Guidelines* in the appropriate panel specification guide. (Storage may support panel stability)

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Counterweights are not required for Two Drawer lateral files installed right below a worksurface attached to the panel system when the application is mirrored back-to-back (a two-pack minimum).

TS Series underworksurface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.

1.5-High Intermediate Support

2. Counterweights are not required for One-High and 1.5-High lateral files and cabinets used with an intermediate support, when the application is mirrored back-to-back (a two-pack minimum).
Note: This includes storage either perpendicular or parallel to the panel.

Counterweights

Counterweight Requirements for Storage Products, continued

Requirements for Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide*.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. A counterweight is not required for a single Two Drawer lateral file attached to desks connected in an L-configuration.

2. A counterweight is not required for a single Two Drawer lateral file attached to a desk made with corner, extended corner, or 120 degree corner worksurfaces.

L-configurations with two or more lateral files **require** counterweights in each file.

Configurations with two or more lateral files **require** counterweights in each file.

Counterweights are **required** for all lateral files in stand-alone desk or credenza applications.

Hutch kit applications with lateral files always **require** counterweights in the lateral files.

Requirements for Pedestals in Freestanding Applications

Counterweights are required for all freestanding applications.

1. Universal fixed pedestals converted to freestanding pedestals require a counterweight and drawer interlock system.

Universal fixed to freestanding pedestal conversion kit includes $\frac{1}{8}$"H steel top, counterweight package, and drawer interlock system.

Fixed pedestals, converted to freestanding with a laminate or veneer top, require a counterweight and drawer interlock system. Drawer interlock system is available from service parts.

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface and cannot be converted to freestanding.

Laminate fixed pedestals can never be freestanding.

2. Mobile pedestals include counterweight and drawer interlock system as standard.

Requirements for Pedestals in Panel Applications

Panel stability guidelines must be met prior to determining counterweight requirements.
▶ See *Panel Stability Guidelines* in the appropriate panel specification guide.

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

Counterweights are not required for fixed pedestals installed below a work-surface attached in a panel spine application. Single workstation applications **require** a counterweight in each pedestal.

Counterweights

Requirements for Pedestals in Answer Freestanding Desk Applications

Answer Freestanding Desk guidelines must be met prior to determining counterweight requirements.
▶ See *Answer Freestanding Desk Stability Guidelines* in the *Answer Freestanding Specification Guide.*

Counterweights are required as shown in the product specification pages unless any of the following conditions are met:

1. Single pedestal desks less than 48"W require a counterweight and an interlock. Single pedestal desks with 30"D pedestals require a counterweight and interlock.
Tip: Interlock is available as a service part for Universal pedestals, 1043575SR for box/box/file and file/file configurations.

2. Double pedestal desks 60"W and wider only require one pedestal with counterweight.

All other desk applications with multiple pedestals **require** a counterweight for each pedestal.

3. Counterweights are not required for a single fixed pedestal in desk with hutch kit applications. Any additional pedestals within the application **require** counterweights.

Requirements for Pedestals in Answer Freestanding Desk Applications, continued

4. A counterweight is not required for a single fixed pedestal attached to a desk attached to another worksurface in an L-configuration. Any additional pedestals within the application require counterweights.

5. A counterweight is not required for a single fixed pedestal attached to desks made with corner, extended corner, or 120 degree corner worksurfaces. Any additional pedestals within the application require counterweights.

Kick Solutions Specification Guide

Steelcase
April 2024

TS Series Storage

TS Series Pedestals

TS Series pedestals provide fixed and mobile storage for personal items and filing of infrequently referenced materials.
▶ Specifying, page 270

Top of pedestal is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on pedestals adjust to install furniture on uneven floors. Leveling glide range is 1".

Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Pedestal file drawers are made of steel with steel ball-bearing suspensions and open their full depth for total access to the contents. File drawer accommodates letter- and legal-size filing (legal filing requires the use of optional dividers).

Handle on mobile pedestal can be positioned in front or at rear to access contents of drawer. Also available without handle.

Lock is standard keyed random and controls all of the drawers. Lock cylinders must be specified separately. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.
▶ *Lock and Keying Options,* page 372

Cushion tops are 1¾" thick.

Actual Dimensions

	Fixed Pedestals	Mobile Pedestals with Steel Top	with Cushion Top
Depth	21³⁄₁₆", 27¹³⁄₁₆"	23" and 19"	22"
Width	15³⁄₁₆"	15³⁄₁₆"	15³⁄₁₆"
Height	27"	21", 26⁵⁄₈"	21"

Product Details

Handle pull

Ledge pull

Contemporary pull

Pull Choices
Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Extra handle pull, available as an option on mobile pedestals, allows pedestals to be moved easily within the workstation.

Box drawer and file drawer dividers and pencil tray for use with fixed pedestals are available as optional accessories. Mobile pedestals have different dividers that are not interchangeable.

Dividers and pencil tray for use with mobile pedestals must be ordered separately. Mobile pedestal accessories are not interchangeable with under-worksurface pedestal accessories.
▶ Page 274
Tip: Under-worksurface pedestals shipped prior to January 2005 require the use of drawer accessories from the mobile pedestal collection.

To file legal-size or side-to-side letter-size filing in pedestal file drawers, specify optional 15"W file rails.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.
Tip: TS Series pedestal counterweights are available from Service Parts catalog.

Connections

TS Series fixed pedestals are only intended for use under a panel-mounted worksurface. Attachment hardware is provided.

Pedestal filler, ordered separately, adds structure and fills the gap between the pedestal and panel. TS Series pedestal filler works with Kick panels only.
▶ Page 288

Mobile pedestal fits under 24"D and 30"D worksurfaces or can be moved wherever storage is needed.

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets of other cable-routing accessories.

▶ For interior dimensions, see *Storage Capacities and Dimensions* in the *Storage Specification Guide*.

Counterweight Requirements for Storage Products
▶ Page 111

Shipping

Fixed pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amountof corrugated board needed.

Mobile pedestals are shipped in corrugated board to minimize damage during transport.

TS Series Storage

TS Series Bins

TS Series bins can be attached to Answer and Kick with integrated hooks. These storage bins provide overhead storage in the workspace.
▶ Specifying, page 275

On-module attachment hooks are integral to the end supports and are used to mount bins on panels of the same width as bins.

Safety catch locks overhead storage unit to frame to prevent accidental removal.

Bin is steel and ships assembled.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike.
▶ *Lock and Keying*, page 372

Recess beneath unit can accommodate a shelf light.
▶ Page 338

Actual Dimensions

Depth	15³⁄₄"
Width	24", 30", 36", 42", 48", 60", or 72"
Height	16¹⁄₄"

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

On-module steel support hooks can be used above and adjacent to slatwall on Kick panels.

Width of overhead bin must match the width of the panel or panels that it is attached to. Bin may span up to two frames.

38"H

TS Series bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

TS Series bins cannot be attached to upmount brackets.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.
▶ Page 156

Wall channel horizontal brace is required with wall channels to support shelves and bins that are wider than 48".
▶ Page 156

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
▶ Page 348

Surface Materials

Overhead bin

• 9201 Polished Chrome

Dividers
• White plastic

Application Topics

$21^3/8$" Clearance

Clearance between Universal Systems worksurfaces or Universal tables and bottom of overhead bins is $21^3/8$" when storage unit is installed in the highest position on a 66"H panel and glides are adjusted all the way into the panel.

Storage Capacities and Dimensions
▶ See *Storage Specification Guide.*

Bracket Application Rules for Bins and Shelves
▶ Page 158

Stability Guidelines
▶ Page 26

Guidelines for Stackable Components

TS Series bins, Universal bins, and shelves can hang from first or second stacked tier, as long as it is not above 66"H.

Only TS Series bins, Universal over the case bins or shelves can be supported on the second stacked tier.

TS Series Storage

TS Series Laminate Common Shelves

Product Details

Surface Materials

Shelf
• Laminate

Edge
• Plastic

Supports
• Paint

Laminate common shelf has a wood core and is covered with Low-Pressure Laminate and High-Pressure Laminate. Plastic edge band is selectable.

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Laminate common shelf

Laminate common shelf ships with steel support brackets. Support brackets hook into the vertical panel slots or wall channel and lock into place with a safety catch. Support brackets can be used in either orientation.

38"H

TS Series shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Wiring and Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
▶ Page 356

Actual Dimensions

Depth	15"
Width	24", 30", 36", 42", or 48"
Height	7¾"

TS Series Under-Worksurface Lateral Files

Top of lateral file is open to attach beneath the worksurface.

Finished back and sides are standard.

Leveling glides on lateral files adjust to install furniture on uneven floors. Leveling glide range is 1".

Tip: The actual depth of under-worksurface lateral files is 18$\frac{1}{4}$"D, which will not accommodate the use of the 18"D Kick straight worksurfaces.

Lock cylinders are specified separately from the lateral file. Random, consecutive, and specific keying are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.

Lateral file drawers are made of steel with steel ball-bearing suspensions and open their full depth for total access to the contents.

Lateral file drawers are standard with two side-to-side hanging file frames to file letter- or legal- size papers. Clearance is provided for two rows of filing.

Product Details

Handle pull

Ledge pull

Contemporary pull

Pull Choices
Handle, ledge, and contemporary pulls are available as an option on drawers and doors.

Under-worksurface lateral file drawer dividers, front-to-back file rails, and side-to-side hanging file frames, ordered separately, are available for use with under-worksurface lateral files.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Actual Dimensions

Depth	18$\frac{1}{4}$"
Width	31$\frac{1}{2}$" or 36"
Height	27"

Connections

TS Series underwork-surface lateral files are only intended for use under a panel-mounted worksurface and cannot be used as freestanding.

Kick plate (2"H) and lock bar align with underworksurface pedestal and Tower Too.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.
▶See *Counterweight Requirements for Storage Products,* page 111.

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.
*Note: **Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.*

TS Series Tower Too

TS Series Tower Too accommodates paper filing, miscellaneous storage, and wardrobe storage.
▶Specifying, page 282

Finished top, sides, and back allow storage cabinet to be positioned anywhere.

Shelves are fixed and can accommodate binders or other storage needs.

Lock, standard, is located on the lock bar and secures file drawers below. Lock cylinders are specified separately from the tower. Random, consecutive, and specific keying are available. Consecutive and specific keying options are available. Master-keyed locks are also available. Products with locks ship with a lock face ring and removable plastic plug to accommodate a lock cylinder installed on site.
▶ *Lock and Keying Options,* page 372

Safety interlock system allows only one drawer to be opened at a time.

Leveling glides on lateral files adjust to install furniture on uneven floors. Leveling glide range is ¾".

Doors open 98° for access to contents.

Drawers open their full depth for total access to the contents. Drawers have full-height sides; hanging file folder frames are not needed for front-to-back letter-size filing. Legal or side-to-side filing is accommodated using Universal filing rails. Tower Too file drawers and optional box drawers are made of steel with steel ball-bearing suspensions.
▶ For interior dimensions see *Storage Capacities and Dimensions* in the *Storage Specification Guide.*

Product Details

Handle pull

Ledge pull

Contemporary pull

Pull Choices
Handle pull is standard. Ledge pulls are available as an option on drawers and doors. Contemporary pulls are available as unique Tower Too style numbers.

Wardrobe left

Wardrobe right

TS Series Tower Too is available 48"H, 54"H, or 66"H. Wardrobe storage can be left or right. 48"H is open side only.

Actual Dimensions

Depth	24"
Width	24"
Height	48", 54", or 66"

Wardrobe interior can be specified with wardrobe hook or wardrobe rod with shelf.

Two box drawers in place of top file drawer is available as an option on 48"H, 54"H, and 66"H towers. Box drawers have 3⁄4 extension.

Dome, field-installed only, can be added to Tower Too for a unique aesthetic.

All locking (one lock for wardrobe, second lock for drawer, third lock for cabinet if applicable), is available as an option on 48"H, 54"H, and 66"H towers.

Towers are available with open side shelving in place of the upper cabinet. Fixed shelves provide two openings (with clearance of 5"H on 48"H units, 12"H on 54"H units, and 18"H on 66"H units).

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Kick plate (2"H) and lock bar align with fixed pedestals and under-worksurface lateral files.

Ganging hardware is available to provide alignment by joining adjacent components side-by-side, back-to-back, or both. Order *8425808SR* from Service Parts.

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Universal Pedestals

27"H fixed pedestals are floor-standing and can support worksurfaces at 28½"H.
▶ Specifying, page 286
▶ Specifying *Storage Accessories,* page 330

Top is open and accommodates attachment to a worksurface. Attachment hardware is included.

Lock is standard on pedestals and secures all drawers. Lock is located in the top drawer. Locks are standard factory-installed, keyed random.
▶ *Lock and Keying*, page 373

Leveling glides adjust to install pedestals on uneven floors. 25½"H pedestals have a ⅞" adjustable glide range, and 27"H pedestals have a 1⅞" adjustable glide range.

Mobile pedestals fit under a worksurface and can be moved wherever storage is needed. They provide an auxiliary worksurface when you need more space to spread out your work.
▶ Specifying, page 290
▶ Specifying *Storage Accessories,* page 330

Finished back and sides are standard.

Four casters are hard composition and non-locking, with a full-rotation swivel mechanism. Casters are exposed at the base of box/file pedestals and concealed with the base of box/box/file and file/file pedestals.

Drawer fronts are available in steel, laminate, or wood veneer. Mobile pedestals maintain drawer pull and drawer front alignment with other storage components that have a 3" base.

Pull on proud-front pedestal is available in a variety of shapes.

3"H base is integral to 27"H pedestal case.

Pull on flush-front pedestal is full width and integral. This pull is available on steel drawer fronts only. Full-width wood pull is available as an option. Wood pull, if selected, ships separately from pedestal and is field installed, attaching to the integral pull with double-sided tape.

Drawers open their full depth for total access to the contents. Box and file drawers are available.

Top on mobile pedestal is ⅛"H steel. Additional top options are available.

Mobile pedestal cushion top provides a temporary seat ideal forinformal gatherings. Optional handle can be extended to easily transport mobile pedestal. Available factory- or field-installed.
▶ Specifying, page 292

Product Details

Box drawers are a welded steel construction and available with proud or flush fronts. One divider is included with each box drawer.

File drawers are a welded steel construction and available with proud or flush fronts. Drawer body sides are full height and accommodate front-to-back filing of hanging letter-size file folders.

Optional rails accommodate side-to-side filing of letter-, A4-, and legal-size hanging folders. *Exception: Legal-size file folders cannot be filed in 17⅛"D or 18⅜"D pedestals.*

Drawer fronts can be removed and changed in the field to create a different aesthetic or to replace damaged drawer fronts.

Actual Dimensions

	Fixed	Box/File	Box/Box/File and File/File
Depth with flush steel front	17½", 22⅝", and 28⅝"	17½" and 22⅝"	17½" and 22⅝"
Depth with proud steel, laminate, or wood front	18⅜", 23½", and 29½"	18⅜" and 23½"	18⅜" and 23½"
Width	15"	15"	15"
Height	25½" and 27"	N.A.	N.A.
Overall height with ⅛"H top	N.A.	21"	27"

Pencil tray to hold small office supplies is included with each box/box/file pedestal.

Optional basic drawer interior allows box/box/file pedestals to be ordered without rails, box drawer dividers, or pencil trays.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 128 mm and available on steel or wood veneer drawers. c:scape pulls (200 mm) are available on steel drawers only.

Label holders are available through Service Parts. Label holder fits inside the integral pull of flush-front drawers and over the top edge of drawer front on proud-front drawers.

Safety interlock system allows only one drawer to be opened at a time for added stability.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying,* page 373

Individual drawer locks are available on file/file pedestals for applications where you want to limit access to each drawer. Pedestals include a security shield above each drawer to prevent unauthorized access. Individual locking drawers are only available with field-installed lock cylinders. Consecutive, specific, and random keying options are available. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying,* page 373

Non-locking pedestal is available as an option.

27"H fixed pedestals have base alignment with other Universal Storage components that have a 3"H base.

Steel top 1"H

Laminate top with square edge 1³/₁₆"H

Veneer top 1³/₁₆"H

Steel, laminate, and wood veneer tops are available in place of standard ⅛"H steel tops. 1"H steel tops, 1³/₁₆"H laminate with square edge profile, and 1³/₁₆"H wood veneer with square edge profile.

Handle of mobile pedestal cushion top is retractable. In the stowed position, handle is flush with mobile pedestal front. In the travel position, handle is completely extended and articulates upward for longer distance transport. Cushion top is also available without a handle.

Basic cushion enhanced is ordered separately for use on Universal mobile pedestals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener.

Basic cushion enhanced for field installation can be used with mobile pedestals RPM1821CF, RPM1821CP, RPM1821CW, RPM2421CF, RPM2421CP, and RPM2421CW only.

**Counterweight packages** are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

18³/₈"D

23¹/₂"D

29¹/₂"D

Fixed pedestals are intended to attach under a worksurface for security and support. Three pedestal depths are available to correspond with Universal Worksurface depths. Proud-front pedestals exactly match the depth of Universal Worksurfaces. Flush-front pedestals are ⁷/₈" shorter.

Filler conceals the gap that may exist between the face of a panel and the back of a 27"H pedestal. Fillers are also used to provide stability for pedestal and worksurface configurations that are not panel-wrapped.
Tip: Fillers for proud front pedestals conceal a ¹/₂" gap. Fillers for flush front pedestals conceal a 1³/₈" gap.

Freestanding applications that don't require attachment to a worksurface should be used with a conversion kit that includes a steel top, counterweight package, and components to convert the locking system to a safety interlock system.
▶ Page 289

Field-installed accessories are available, including pencil trays, media trays, stationery trays, dividers, and rails.

Wiring & Cabling

Fixed pedestals do not accommodate cable-routing. Plan accordingly when installing pedestals underneath worksurfaces with grommets or other cable-routing accessories.

Counterweight Requirements for Storage Products
▶Page 111.

Shipping

Pedestals are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Universal Sliding Door Bins
For Use with Kick

Universal sliding door bins attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel or wood.
▶ Specifying, page 294

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Steel, laminate, and wood front doors glide smoothly from one side of the case to the other.

Bin ships assembled.

Metal backstop prevents notebooks and equipment from damaging panel surface.

Lock is standard on bins to secure the door. The door can be locked in the closed position on either the right- or left-hand side of the bin. Lock is located underneath the center of the shelf. Lock is standard factory-installed, keyed random. A no-lock option is available.
▶ Lock and Keying Options, page 373

Recess beneath unit can accommodate a shelf light.
▶ Page 338

Product Details

On-module attachment brackets are independent of the storage bin and unique to the panel system they are used on. If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	$15^3/_4$"
Width	36", 42", 48", 60", 66", and 72"
Height	$16^1/_4$"

Upmount brackets, optional, are for use on Answer, Kick, Avenir, and Montage. Brackets enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side-by-side in an in-line, T-, or X- application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 373

Shelf lights are available for use beneath bins. Lights recess into the bottom of the overhead storage unit.
▶ Page 338

Dividers are available as an option for use on bins. Dividers ship in a package of four.

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Connections

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

38"H

Universal sliding door bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as separate style number.
Tip: Select the omit brackets option when ordering the bin.

Wall channels are available to attach bins to concrete or block walls. Wall channels can be used to attach bins and tackboards to wood, dry wall, or plaster walls if the wall is reinforced.
▶ Page 156

Wall channel horizontal brace is required with wall channels to support bins that are wider than 48".
▶ Page 156

Wiring & Cabling

Vertical wire managers are available to conceal cords that are routed from light mounted beneath overhead storage.
▶ Page 348

Surface Materials

Guidelines for Stackable Components

First Tier

Correct

First Tier

Incorrect

TS Series bins, Universal bins, and shelves can hang from the first stacked tier only.

Universal Over the Case and In the Case Bins

For Use with Kick

Universal over the case bins can be attached to panels with an on-module bracket and provide overhead storage in the work space.
▶ Specifying, page 296

Safety catch locks overhead storage unit to frame to prevent accidental removal.

On-module attachment brackets are used to mount bins on panels of the same width as bins and are included with the bin as a standard component.

Backstop prevents notebooks and equipment from damaging the surface of the panels or walls.

Bin is steel and ships assembled.

Universal in the case bins, attach to panels with an on-module bracket and provide overhead storage in the work space. Door is available in steel, laminate, or wood.
▶ Specifying, page 298

Flat-front lift-up doors open and close quietly. When up, the doors rest on top of the case to provide more storage space inside.

Locks are standard on bins to secure the door(s). Lock is located underneath the center of the shelf. Locks are standard factory-installed, keyed random. Two-door units are keyed alike. A no-lock option is available.
▶ *Lock and Keying*, page 373

Recess beneath unit can accommodate a shelf light.
▶ Page 338

Flat-front lift-up doors (steel, laminate, or wood) recess into the overhead storage bin.

Product Details

On-module attachment brackets are independent of the storage bins and unique to the panel system they are used on. The following style number suffixes indicate the panels they attach to:
TAK = Answer and Kick
AVR = Avenir
MON = Montage
If the storage bin needs to be attached to a different panel in the future, additional on-module attachment brackets can be purchased through Service Parts.

Vertical off-module brackets, optional, can be used to mount one or two sides of an overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical slot patterned panels. To mount an overhead bin with one side off-module, specify with one vertical off-module bracket. To mount an overhead bin with two sides off-module, specify with two vertical off-module brackets. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin.

Vertical off-module brackets are used with bins up to 12" wider than the panel, allowing them to overhang the panel seam.

Actual Dimensions

Depth	15¾"
Width	24", 30", 36", 42", 48", 60", 66", and 72"
Height	16¼"

Steelcase
April 2024

Upmount brackets are optional for use on Answer, Kick, Avenir, and Montage. Brackets attach the bin near the top of 54"H panel to enable overhead storage to be used on lower panel heights. Bins using an upmount bracket must be installed on a panel of the same width.

Two upmount bin brackets can be hung side by side in an in-line, T-, or X-application. Bin can be upmounted on slatwall skin as long as there is not another bin or another slatwall skin on the adjacent in-line panel.

Omit brackets option must be specified when bin is being used in hutch kit or when attaching bin to a horizontal wall attachment bracket. Order hutch kit separately.

Picture frame door— omit insert, optional, is available on Universal over the case and in the case bins with flat steel fronts only. An omit insert option allows custom material to be field installed in the aluminum door frame.

The omit insert custom material must be ordered from a material vendor. If an omit insert option is specified and a door assist mechanism is also required, an assist mechanism must be specified as a separate option to the storage bin. The weight of a custom insert on a Universal over the case bin can not exceed $10\frac{1}{2}$ pounds. An insert for a Universal over the case storage bin door with an assist mechanism must weigh within the range of $7\frac{1}{4}$ pounds to $10\frac{1}{2}$ pounds or the assist mechanism will not function correctly. Custom materials being installed in a door insert must comply with local building codes. Consult with local authorities to determine compliance requirements. The use of safety glass is required if installing custom glass in a door insert. To install customer provided material in a picture frame door with the insert omitted, make sure the material is cut precisely to the sizes listed on the dimensions matrix.
▶ See *Dimensions for Custom Field-Installed Picture Frame Door Inserts,* page 151

Door assist mechanism, optional, consist of a gas cylinder and spring that provides an assisted open and close of the door. When opening the door, the spring pulls the door to the fully recessed position. When closing the door, the assist mechanism will slowly close the door. Universal bins ship with two assist mechanisms per door when specified.

Lock in bin is concealed from view beneath the shelf. Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Two-door units are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 373

Shelf lights are available for use beneath bins. Lights recess into the bottom of overhead bins.
▶ Page 338

Divider is available as an option on overhead bins. Dividers ship in a package of four.
▶ Page 154

Back of storage bin is open to allow panel surface to show. Metal backstop prevents contents of bin from damaging panel surface.

Overhead storage bin height accepts standard and A4 binders.

When mounting on Answer or Kick panels, top of bin cannot be loaded.

Steel support hooks on end supports insert into the slotted channel of a panel or wall channel and lock into place with a safety catch.

Width of overhead bin must match the width of the panel or panels that it is attached to when using an on-module bracket. Bin may span up to two frames.

38"H

Universal over the case bin may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

Horizontal wall attachment brackets are available to attach storage bins to wall of building. Specify as a separate style number. *Tip: Select the omit brackets option when ordering the bin.*

75"	37$\frac{1}{2}$" (per door)	15.000"	36.664"	0.138"

Tip: A custom insert cannot be factory installed. Custom insert must be ordered from a material vendor and will not be handled like a Steelcase Customer's Own Material. In selecting materials for customer supplied inserts, consider material characteristics, such as effects from thermal changes, humidity changes, aging characteristics, and strength of material. Do not use materials that allow the overall size of the custom insert to deviate by amounts larger than the acceptable tolerances listed in the matrix.

Universal Shelves and Universal Personal Shelves
For Use with Kick

Universal shelves—supported by Answer, Kick, Avenir, and Montage—provide overhead storage in the work space.
▶Specifying, page 301

Universal personal shelves provide a wall-supported surface that attaches to Answer, Kick, and Avenir.
▶See *Storage Specification Guide.*

Metal backstop on Universal shelves prevents notebooks and equipment from damaging panel surface. Universal personal shelves do not have a backstop.

On-module attachment hooks are integral to the end supports and are used to mount shelves on panels of the same width as bins.

Safety catch locks shelf units to frame to prevent accidental removal.

Shelves are steel and ship ready to assemble.

Actual Dimensions

	Universal shelves	Universal personal shelves
Depth	$14^3/_4$"	$13^{11}/_{16}$"
Width	24", 30", 36", 42", 48", 60", and 72"	24", 30", 36", 42", and 48"
Height	$7^1/_2$" (Kick, Answer, and Avenir)	$1^{11}/_{16}$" (thickness of shelf)

38"H

Universal shelf may be mounted at 38"H or lower if another panel-mounted component prevents it from being seated upon.

On-module attachment hooks cannot be attached to upmount brackets.

Width of shelf must match the width of the panel or panels that it is attached to with the on-module brackets. Shelves may span up to two frames.

Wall channels are available to attach shelves to concrete or block walls. Wall channels can be used to attach shelves to wood, dry wall, or plaster walls, if wall is reinforced.

Horizontal Wall Attachment Brackets

For Use with Universal Sliding Door, Universal Over the Case, and Universal In the Case Bins

Horizontal wall attachment brackets can attach to wall of building to accept Universal sliding door, Universal Over the Case, and Universal In the Case storage bins. Brackets will not accept bins introduced prior to March 2007 or TS Series bins.
▶Specifying, page 302
Tip: Specify as a separate style number.

Product Details

Horizontal wall attachment brackets must match the width of the storage bin.
Tip: Select the omit brackets option when ordering the bin.

Horizontal wall attachment brackets include brackets and a steel back to enclose the storage bin.

Horizontal wall attachment brackets can be positioned on wall at height needed.

Connections

Horizontal wall attachment brackets can be used to attach Universal sliding door, Universal over the case, and Universal in the case bins to a building wall. TS Series bins cannot attach to horizontal wall attachment brackets.

Shelves cannot hang off horizontal wall attachment brackets.

Mounting of horizontal wall attachment brackets must include attachment to at least two wall studs, but it is recommended to attach to all studs in wall behind the storage bin. Storage bins that are 24"W or 25"W can only be mounted with horizontal wall attachment brackets if wall is constructed with 16" stud centers.

Field install:
- Concrete walls with Hilti type anchors.
- Drywall or plywood with $\frac{5}{8}$" thick Toggler R-type $\frac{3}{16}$" wall anchors with countersunk flat head screw.
- Wood studs with #10 wood screws of appropriate length with countersunk flat head screw.
- Steel studs with #10 sheet metal screws of appropriate length with countersunk flat head screw.

Limit of one bin for each horizontal wall attachment bracket.

Attaching worksurfaces to horizontal wall attachment brackets is not possible.

Horizontal wall attachment brackets allow overhead storage bin to fit flush to wall.

Actual Dimensions

Width   24", 30", 36", 42", 48", 60", 70", and 72".

Wall Hang Channels and Horizontal Braces

For Use with Overhead Storage Bins and Shelves

Slotted steel channel can attach to wall of building to accept shelves, overhead storage bins, worksurfaces, or tackboards. Channel will accept all universal bins and shelves, TS Series bins and bins and shelves introduced prior to March 2007.
▶Specifying, page 304
Tip: Must specify bin or shelf with Answer, Kick, or Avenir bracket to hang on wall channel.

Floor

Actual Dimensions

Wall hang channels and horizontal braces

Depth	1¹/₈" (28 mm)
Width	¹⁵/₁₆" (24 mm)
Height	66" (1676 mm)

Product Details

Wall channel can be positioned on wall at height needed.

Connections

Wall channels can be used to support shelves, overhead storage bins, worksurfaces, and tack-boards. Wall channels can be shared.

Field install:
• Concrete walls with Hilti type anchors.
• Drywall or plywood with ⁵/₈" thick Toggler R-type ³/₁₆" wall anchors with counter-sunk flat head screw.
• Steel or wood studs with #10 sheet metal or wood screws of appropriate length with countersunk flat head screw.

Anchors must be used in each screw hole location on the wall channel.

screw position

Components attach at 1" increments, but screws block some slot locations.

Component limits for each pair of wall channels are as follows:
• Two bins or shelves
• One worksurface and two shelves
• One worksurface and one bin

Horizontal brace is available to reinforce verti-cal wall channels that sup-port storage bins, shelves, or worksurfaces that are attached to walls. Bins and shelves that are 48"W or less do not require a horizontal brace. All work-surfaces require horizontal braces.

Wall channel horizontal brace is required for EACH storage bin or shelf that is wider than 48". The brace should be placed at the posi-tion along the vertical wall channel where the top of the bin or shelf will be placed.

Width of horizontal brace must match width of shelf or storage bin.

Wall channel horizontal brace is also available in 42" and 48" widths and can be used in applications where there is concern regarding the strength of the wall. These braces must also be used with wall-mounted worksurfaces.

Wall hang channels for shelves, overhead storage bins, or tackboards cannot be used with a wall start junction.

Worksurfaces may be attached to wall channels with cantilevers, subject to the following application guidelines:
• All worksurfaces must be 24"D or less.
• Worksurfaces must be supported by a cantilever or legs every 42" or 48". Cantilevers can be shared when worksurfaces are adjacent.
• Wall channel horizontal braces must be installed directly behind all wall-mounted worksurfaces, and also at the top of the wall channels.
• Worksurface-supported pedestals cannot be hung from a wall-mounted worksurface.

Application Topics

Reinforce wall by position-ing studs where wall chan-nels will be attached. See dimensions below.

Distance between center lines of reinforced wall channels matches width of overhead storage unit.

Top view

Tip: Wall channels can be shared.

Slim Shelves

Slim shelves provide a panel-supported surface that attaches to Kick with panel–specific brackets.
▶ Specifying, page 306

Slim shelf is an extruded aluminum shelf that provides storage for small items.

Product Details

Slim shelves attach to Kick with panel-specific brackets.

Gap at back of slim shelf allows routing of shelf light cord.

Kick will not support two shelves installed end to end.

12" max

12" max

Slim shelves can be mounted off-module. No more than 12" overhang on either side of panel is recommended. Brackets attach on vertical seams of panel, while the shelf adjusts off-module on the brackets.

Two attachment brackets are included with shelves less than or equal to 48"W. Two attachment brackets and a mid-span support are included with shelves wider than 48"W.

Surface Materials

Slim shelves
• Paint

Attachment brackets
• Painted to match shelf

Actual Dimensions

Width   24", 30", 36", 42", 48", 60", 72", or 96"

Bracket Application Rules for Bins and Shelves

For TS Series Bins, Universal Sliding Door Bins, Universal Over the Case Bins, Universal In the Case Bins, and Universal Shelves

Bracket Application Matrix

Panels	TS Series Bins, Universal Bins, and Universal Shelves— On-Module	Universal Bins— Single Side Vertical Off- Module	Universal Bins— Two Sided Vertical Off- Module	Universal Bins— Horizontal Off- Module (for use with and Montage only)	Universal Bins— Upmount
Answer	●	●	●		●
Kick	●	●	●		●
Avenir	●	●	●		●
Montage	●	●	●	●	●

On-Module Brackets and Hooks

On-module brackets and hooks are used to mount overhead bins and Universal shelves to panels with vertical slot patterns. Answer, Kick, Avenir, and Montage panels can support on-module attachment brackets.

Universal personal shelves can attach on-module to all panels except Montage.

Width of overhead storage unit must match the width of the panel or panels that it is attached to. Storage bins or shelves may span up to two panels.

Additional support for stability may be required when shelves and overhead storage bins are attached to panels. Counterbalancing loads on the opposite sides of the panels increases stability.
Tip: See Stability Guidelines *in each corresponding specification guide.*

On-module attachment brackets install in panel seams.

On-module brackets can be used above and adjacent to slatwall on Answer and Montage Panels.

On-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Off-module brackets are used with bins up to 12" larger then the panel, allowing them to overhang the panel seam.

Off-Module Brackets

12" max

x + y =12" max

Vertical off-module brackets, optional, can be used to mount one or two sides of the overhead bin off-module on Answer, Kick, Avenir, and Montage with vertical-slot-patterned panels. Both of these brackets attach to the on-module bracket that comes standard with the overhead bin. Vertical off-module brackets allow bins to be installed a maximum of 12" off-module. Vertical off-module brackets can be used with 30"W to 60"W Montage bins only.

Vertical off-module brackets can be used above and adjacent to slatwall on Answer and Montage panels.

Vertical off-module brackets can be used with a panel stacker on Answer, Kick, and Montage panels. Follow standard panel stacker guidelines for each panel.

Horizontal off-module brackets, optional, accommodate off-module installations of overhead storage bins on panels with horizontal slot patterns. Enhanced off-module Montage frames can support horizontal off-module brackets. Horizontal off-module brackets can be used with 24"W to 48"W Montage bins only.

Horizontal off-module brackets can be used above and adjacent to slatwall on Montage panels.

Horizontal off-module brackets can be used with a panel stacker on Montage panels. Follow standard panel stacker guidelines for each panel.

Enhanced off-module Montage frames have horizontal slot patterns and must be specified for horizontal off-module Montage configurations.

Horizontal off-module brackets push bin out from panel $5/8$" on enhanced off-module Montage panels.

Horizontal off-module brackets cannot span a vertical or joint where two frames come together on enhanced off-module Montage panels. Shift the bin to avoid the joint.

Only two pairs of off-module brackets and associated storage can be mounted per frame.

Upmount brackets,
optional, can be used with
Universal sliding door, Uni-
versal over the case, and
Universal in the case bins.
Brackets attach bins near
the top of 54"H panels. TS
Series bins and Universal
shelves cannot be attached
to upmount brackets.

Upmount bin width
must match the width of
the panel or panels that it
attaches to. Upmounted
bins and shelves cannot be
supported off-module.

Upmount brackets
can be used with a panel
stacker on Answer, Kick,
and Montage panels. Follow
standard panel stacker
guidelines for each panel.

Omit Brackets

Omit brackets option
must be specified when bin
is used in hutch kit or when
attaching bin to a horizontal
wall attachment bracket.
Order hutch kit separately.
Hutch kit supports bin at 66"
height.

Kick Solutions Specification Guide

159

Application Rules for Overhead Storage on Answer and Kick Panels

Tip: For complete panel specific stability guidelines, see the corresponding panel specification guide.

Answer Panel

12' run

Side support brackets required

30" min

Guidelines for Universal Bins. Applies to universal sliding door bin or universal in the case bin on Answer and Kick panels.

The following application restrictions must be complied with when hanging universal overhead bins on Answer and Kick panels. Otherwise, standard Answer and Kick application guidelines apply.
- Universal sliding door bin or universal in the case bins cannot hang on an Answer or Kick panel above the 66"H connection point.
- Universal sliding door bin and universal in the case bins or shelves cannot hang on a stacked segment of an Answer panel.
- The maximum panel run length when using a universal overhead bin on Answer or Kick panels is 12'.
- Top of bins and shelves are not designed to support the weight of a seated person. Bins and shelves may be mounted at 38"H or lower only if another panel-mounted component prevents it from being seated upon.
- When ganging binder bins, the use of a tie plate is required.

⚠ **WARNING**

Failure to comply to these guidelines may result in personal injury.

Universal One-High, 1.5-High, and Two Drawer Lateral Files

One-High and Two Drawer lateral files serve a dual purpose as high-density storage and as an inviting space for guests.
▶Specifying, page 308

1.5-High lateral files provide multi-zone storage for binders, hanging folders, and piling surfaces at a height which allows for comfortable guest seating in collaborative environments.
▶Specifying, page 308

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Finished back is standard.

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height.

Lock is standard on lateral files and is located at top left corner of drawer. Locks are standard factory-installed, keyed random.
▶*Lock and Keying*, page 373

Pulls on flush-front lateral files are full width and integral.

Pulls on proud-front lateral files are available in a variety of shapes.

Top is standard 1"H steel on units with steel fronts and standard $1\frac{3}{16}$"H wood veneer on units with wood fronts. Other top options are available.

Drawer fronts are available in steel, laminate, or wood veneer.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawers are standard 12"H and open full depth for total access to the contents.

Actual Dimensions

Depth with flush steel or open front	18" and $23\frac{1}{8}$"
Depth with proud steel, laminate, or wood front	$18\frac{7}{8}$" and 24"
Width	30", 36", and 42"
Height	16", 22", and 28"

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base
*Tip: All base options have
same overall height.*

Flush-front pull is full
width and integral with the
drawer. Pull is available on
steel drawers only.

Contemporary
pull

Handle
pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are
available in the following
styles—contemporary,
handle, jazz, and bar. Each
pull is 192 mm and available
on steel or wood veneer
drawers. c:scape pulls (200
mm) are available on steel
drawers only.

Drawer interiors include
one hanging folder bar per
drawer in each 18"D case and
two rails per drawer in each
24"D case. Alternative interi-
ors are available as options.

Hanging folder bar
accommodates side-to-
side filing of letter-, A4
international-, and legal-size
hanging folders. Additional
bars are available and must
be specified separately.
▶See *Storage Specification
Guide.*

Rails accommodate front-
to-back filing of letter-, A4
international-, and legal-
size hanging folders. Rail
packages accommodate
two rows of letter-size files
in 30"W and 36"W drawers
and three rows of letter-size
files in 42"W drawers. See
Storage Capacities for addi-
tional details. Additional rails
are available and must be
specified separately.
▶For interior dimensions,
see *Storage Capacities and
Dimensions* in the *Storage
Specification Guide.*

Dividers accommodate
side-to-side filing of expand-
able folders and other objects.
Divider packages include
three dividers per drawer,
12"H file drawers also include
one hanging folder bar per
drawer. Additional dividers
are available and must be
specified separately.
▶See *Storage Specification
Guide.*

**Safety interlock sys-
tem** allows only one drawer
to be opened at a time.

Locks are available fac-
tory- or field-installed.
Factory-installed locks are
standard and available
keyed random only. Optional
field-installed locks are
available with consecutive,
specific, and random keying
options. Master-keyed locks
are also available. Field-
installed lock cylinders must
be specified separately.
▶*Lock and Keying*, page 373

Individual drawer locks
are available as an option
for an application that would
limit access to each drawer.
Lateral files include a security
shield between drawers to
prevent unauthorized access.
Individual locking drawers
are only available with field-
installed locks. Consecutive,
specific, and random keying
are available. Field-installed
lock cylinders must be speci-
fied separately.
▶*Lock and Keying*, page 373

No-top lateral files
are available for use with
cushion top or beneath
a common top shared
among several lateral files.
Hardware is included to
attach case to worksurface.
No-top option reduces
height of file by 1".

Steel top
1"H

Veneer top
1 3/16"H

Laminate top
1 3/16"H

**Laminate and wood
veneer tops** with square-
edge profiles are available in
place of standard 1"H steel
tops. Laminate and wood
veneer tops are 3/16" taller
than steel tops and will add
that dimension to the overall
height of the lateral file.

Security top is available
as an option for installa-
tions where the file will be
installed beneath a work-
surface, but not physically
attached. Thin steel top pre-
vents unauthorized access
to the contents of the cabi-
net. Security top is not struc-
tural and can be specified on
28"H files only. Security top
reduces overall height of file
to approximately 27"H.

Ganging hardware is
included to provide align-
ment by joining adjacent
components side-by-side,
back-to-back, or both.

**Counterweight pack-
ages** are required to ensure
product stability and are ord-
ered as an option or sepa-
rately. Product specification
pages indicate the correct
counterweight package for
each style number and any
exceptions where counter-
weights are not required.

Connections

Cushion top is ordered separately for use on One-High, 1.5-High, and Two Drawer lateral files without top.

Basic cushion enhanced is ordered separately for use on Universal One-High, 1.5-High, and Two Drawer laterals with metal, laminate, or veneer top. Basic cushion enhanced is field-installed and attaches to the existing top with hook and loop fastener.
Tip: Basic cushion enhanced is available on Universal lateral files with a top only.

When applying the basic cushion enhanced on 30"W or 36"W Universal laterals with an open configuration, a support brace must also be specified.

Wood veneer with square edge profile

Laminate with square

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.
▶See *Storage Specification Guide.*

Field-installed accessories are available, including drawer accessories and counterweight packages.
▶Page 330

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet.
Note: **Local seismic requirements vary.**
Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.
▶Page 331

Overfile cabinets are separate components that are field installed on top of lateral files, combination cabinets, storage cabinets, and wardrobe cabinets to provide space for additional files, ring binders, or miscellaneous storage.
▶See *Storage Specification Guide.*

Surface Materials

Lateral, including steel top, fixed shelf, and integral pulls
• Paint

Contemporary, handle, jazz, and bar pulls
• 0835 Black
• 9201 Polished Chrome
• 9211 Nickel
• 9212 Silver

Wood veneer top, lift-up door, and drawer fronts
• Wood veneer—
  Open pore finishes
• Customiz stain (option)
• Full-fill finish (option) is available on field-installed wood veneer tops only.
Tip: Specify file with no top option.

Laminate top, lift-up door, and drawer fronts
• Laminate
• Open Line laminate (option)

Lock
• 9201 Polished Chrome
• 9250 Ember Chrome (option)

Drawer bodies, hanging folder bars, rails, and dividers
• Black

Cushion top
• Fabric
• Leather

Basic cushion enhanced
• Fabric

Tip: For both cushion top and basic cushion enhanced: fabric patterns with a linear design will always be applied from the front to back of the unit or the depth of the unit. Pattern matching will not be done on COM.

Cushion top will be manufactured in a four seam pattern in all standard solid color seating upholstery, leather, vinyls, COM leathers, and COM vinyls. These upholsteries are:
• Brisa
• Buzz2
• Cogent: Connect
• Elmosoft Leather
• Foundation
• Gaja
• Leather
• Stand In
• Select Surfaces leather
• Vinyl

Cushion top will be manufactured in a two seam pattern for all approved standard patterned seating upholstery, leather, vinyl, COM leathers, and COM vinyls. All approved standard textured upholsteries will also be manufactured in a two seam pattern including leather, vinyl, COM leathers, and COM vinyls.

**Basic cushion
enhanced** will be manufac-
tured in a two seam pattern
for all approved standard
seating upholstery and
Customer's Own Materials
(COMs).
*Note: Leathers and vinyls
are not approved for basic
cushion enhanced.*

Requirements for
Storage Products**
▶Page 111.

Shipping

Lateral files are normally
shipped in heavy-duty, recy-
clable stretch wrap to reduce
the amount of corrugated
board needed.

**Counterweight pack-
ages** ship separately from
case and must be
field-installed.

Universal Towers

Towers provide storage of a variety of work and personal items for an individual, including paper, binders, books, and coats.
▶Specifying, page 316

Finished back is standard.

Interior of tower is available in a variety of configurations combining coat storage, fixed and adjustable shelves, and file drawers.

Pull on flush-front tower is integral and full height on doors and full width on drawers.

Locks are standard on door and drawers. Locks are standard factory-installed, keyed random. Door and drawer locks are keyed alike.
▶*Lock and Keying*, page 373

Three base options are available: the universal 3" base, FrameOne foot, and c:scape glide. All three bases have the same overall height. All other universal towers are available with the universal 3" base only.

Top is standard 1"H steel. Other top options are available.

Door is available in steel, laminate, or wood veneer. Hinges are European-style and allow doors to open to 110° for full access to the interior. Door is available hinged on left or right.

Locker space is 9" wide and standard with a coat rod.

Pull on proud-front tower is available in a variety of shapes.

Drawer fronts are available in steel, laminate, or wood veneer.

Drawers open their full depth for total access to the contents.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install tower on uneven floors.

Actual Dimensions	
Depth with flush steel front	18", 23⅛", and 29⅛"
Depth with proud steel, laminate, or wood front	18⅞", 24", and 30"
Width	24"
Height	47½", 52", and 65½"

Product Details

Base options

Universal 3" Base

c:scape Glide Base

FrameOne Foot Base

All base options have same overall height. FrameOne foot base and c:scape glide base are only available on 18"D and 24"D open side towers.

Interior of tower combines coat storage, box and file drawers, fixed and adjustable shelves.

Flush-front pull is integral and full height on the door and full width on the drawers. Pull is available on steel doors and drawers only.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Door pull is 192 mm and drawer pulls are 128 mm. Proud-front pulls are available on steel, laminate, or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Adjustable shelves on 52"H and 65½"H open side towers are recessed from the front and side of the tower. Shelves adjust in 2½" vertical increments. Opening on 47½"H tower is 13½"H and does not come with an adjustable shelf.

Post on open side towers supports adjustable shelves and is painted to match the case.

Adjustable shelves in dual door towers can be positioned in the interior of the tower in ¾" vertical increments using a reversible bracket. The first shelf above a file drawer is a fixed shelf.

Drawer accessories include one divider and one pencil tray in each box drawer. File drawers can accommodate front-to-back filing of letter-size hanging folders without the use of additional accessories.

Safety interlock system allows only one drawer to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Door and drawer locks are keyed alike. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.

Drawer lock in open side tower is located in the top file drawer.

Drawer lock in dual door tower is located approximately 36" from the floor.

Steel top 1"H

Veneer top 1³/₁₆"H

Laminate top 1³/₁₆"H

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ³/₁₆" taller than steel tops and will add that dimension to the overall height of the tower.

Steel top | Proud wood front

Top will default to steel on towers with proud wood fronts since the door overlaps and partially conceals the top. Wood top is available as an option.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Connections

Worksurface to tower alignment. Proud front towers align with 23½"D, 24"D, 29½"D, and 30"D worksurfaces. Flush front towers extend ⅞" beyond 24"D and 30"D worksurfaces, and ⅛" beyond 23½"D and 29½"D worksurfaces.

Field-installed accessories are available, including drawer accessories and shelf bookends.
▶Page 330

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet. *Note: **Local seismic requirements vary.** Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.*

Counterweight Requirements for Storage Products
▶Page 111.

Shipping

Towers are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field installed.

Universal Lateral Files

Lateral files are ideal for high-density paper storage.
▶Specifying, page 326

Finished back is standard.

Lock is standard on lateral files and secures all drawers and lift-up door. On 52"H and 65½"H files, lock is located at top left corner of drawer that is third from the bottom. On 28"H and 40"H files, lock is located at top left corner of top drawer. Locks are standard factory-installed, keyed random.
▶*Lock and Keying*, page 373

Base is 3"H and is integral to the case.

Leveling glides adjust up to ¾" for universal 3" base and up to 1" for c:scape glide and FrameOne foot base to install lateral file on uneven floors.

Drawer and lift-up door fronts are available in steel, laminate, or wood veneer.

Pulls on proud-front lateral files are available in a variety of shapes. Pulls are located at the top of a drawer and at the bottom of a lift-up door.

Top is standard 1"H steel on units with steel fronts and standard 1³⁄₁₆"H wood veneer on units with wood fronts. Other top options are available.

Drawers open their full depth for total access to the contents are standard 12"H.

Label holders are included with each drawer. Label holder fits inside the integral pull or can be affixed to the front of the drawer or door. Perforated labels are included and can be created using the template available on www.steelcase.com/label.

Pull on flush-front lateral file is full width and integral.

Flush-front pull is full width and integral with the drawer. Pull is available on steel drawers only.

Contemporary pull

Handle pull

Jazz pull

Bar pull

c:scape pull

Proud-front pulls are available in the following styles—contemporary, handle, jazz, and bar. Each pull is 192 mm and available on steel or wood veneer doors and drawers. c:scape pulls (200 mm) are available on steel only.

Actual Dimensions

Depth with flush steel front	18" and 23⅛"
Depth with proud steel, laminate, or wood front	18⅞" and 24"
Width	30", 36", and 42"
Height	28", 40", 52", and 65½"

Drawer interiors include one hanging folder bar per drawer in each 18"D case and two rails per drawer in each 24"D case. Alternative interiors are available as options. *Tip: Your specification for optional drawer interiors will apply to all the drawers within a single lateral file.*

Hanging folder bar accommodates side-to-side filing of letter-, A4 international-, and legal-size hanging folders. Additional bars are available and must be specified separately.
▶See *Storage Specification Guide.*

Rails accommodate front-to-back filing of letter-, A4 international-, and legal-size hanging folders. Rail packages accommodate two rows of letter-size files in 30"W and 36"W drawers and three rows of letter-size files in 42"W drawers. See *Storage Capacities* for additional details. Additional rails are available and must be specified separately.
▶ For interior dimensions, see *Storage Capacities and Dimensions* in the *Storage Specification Guide.*

Dividers accommodate side-to-side filing of expandable folders and other objects. Divider packages include three dividers and one hanging folder bar per drawer. Additional dividers are available and must be specified separately.
▶See *Storage Specification Guide.*

Lift-up door with fixed shelf is standard in the top position of 65½"H cases. Door is 13½"H to accommodate standard-height binders. Door on lateral files with flush-front recesses inside the case; door on proud-front case lifts up above the case.

Lift-up door on flush-front cases is available with an optional roll-out shelf in place of the standard fixed shelf. Roll-out shelf includes three dividers and one hanging file folder bar to function as a backstop.

Safety interlock system allows only one drawer or roll-out shelf to be opened at a time.

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 373

Individual drawer locks are available as an option for applications where you want to limit access to each drawer. Lateral files include a security shield above each drawer to prevent unauthorized access. In 65½"H cases, the lock in the drawer below controls the lift-up door in the top position. Individual locking drawers are only available with field-installed locks. Consecutive, specific, and random keying options are available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 373

No-top lateral files are available for installations where cases will be installed under a worksurface or beneath a common top shared among several lateral files. Hardware is included to attach case to worksurface. No-top option reduces height of file by 1".

Steel top 1"H

Veneer top 1³/₁₆"H

Laminate top 1³/₁₆"H

Laminate and wood veneer tops with square-edge profiles are available in place of standard 1"H steel tops. Laminate and wood veneer tops are ³/₁₆" taller than steel tops and will add that dimension to the overall height of the lateral file.

Ganging hardware is included to provide alignment by joining adjacent components side-by-side, back-to-back, or both.

Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.

Wood veneer with square edge profile

Laminate with square edge profile

Field-installed tops are available in two choices—wood veneer with square edge profile or laminate with square edge profile. Tops can be used on an individual lateral file, or larger tops can be used to connect files to make a credenza.
▶See *Storage Specification Guide.*

Field-installed accessories are available, including drawer accessories and counterweight packages.
▶Page 330

Floor anchor bracket (for TS Series Storage and Universal Storage with 3" base) secures lateral files, towers, cabinets, or bookcases to the floor for stability or to reduce the risk of hazards during earthquakes in seismic zones. Four bracket packages are required for each cabinet. *Note:* ***Local seismic requirements vary.*** *Compliance with local code requirements is the responsibility of the customer or their authorized agent. For a California Office of Statewide Health Planning and Development (OSHPD) approved anchor bracket, contact Steelcase Specials. Tip: Anchor bracket cannot be used with pedestals.*

Surface Materials

Lateral file, including steel top, drawer fronts, lift-up door, fixed shelf, and integral pulls
• Paint

Contemporary, handle, jazz, and bar pulls
• 0835 Black
• 9201 Polished Chrome
• 9211 Nickel
• 9212 Silver

c:scape pull
• 4140 Arctic White Gloss
• 4144 Black Gloss
• 4799 Platinum Metallic

Wood veneer top, lift-up door, and drawer fronts
• Wood veneer—
  Open pore finishes
• Customiz stain (option)
• Full-fill finish (option) is available on field-installed wood veneer tops only.
Tip: Specify file with no top option.

Laminate top, lift-up door, and drawer fronts
• Laminate
• Open Line laminate
  (option)

Lock
• 9201 Polished Chrome
• 9250 Ember Chrome
  (option)

Drawer bodies, roll-out shelves, hanging folder bars, rails, and dividers
• Black

Application Topics

Storage Capacities and Dimensions
▶See *Storage Specification Guide.*

Counterweight Requirements for Storage Products
▶Page 111.

Shipping

Lateral files are normally shipped in heavy-duty, recyclable stretch wrap to reduce the amount of corrugated board needed.

Counterweight packages ship separately from case and must be field-installed.

Sliding Panel Doors
For Use with Kick

▶ Need help?
Product details,
page 24

Standard Includes	Required to Specify
• Panel door frame: paint price group 1 • Panel door infill: 6625 Translucent plastic • Floor track: paint price group 1 • Attachment bracket: paint price group 1	1 Style number 2 Paint color number for panel door frame, floor track, and attachment bracket 3 Options, if selected (see below) ▶ See *Surface Materials,* page 358.

	Options	U.S. Price	Required to Specify
Surface Materials	• Paint price group 1 • Paint price group 2	No cost +$ 16	Specify paint color number. Specify paint color number.
	Panel door infill • 6500 Clear Tempered glass • 6541 White laminated glass	 +$379 +$594	 Specify *with 6500 Clear glass.* Specify *with 6541 White laminated glass.*
Door Hand	• Left-hand sliding door • Right-hand sliding door	No cost No cost	Specify *with left-hand door.* Specify *with right-hand door.*
Door Lock	• Lock	+$492	Specify *with lock.* ▶ See *Lock and Keying,* page 372

Panels

Specification Information

• Dimensions			• Style	• U.S.
D	**W**	**H**	**Number**	**Base Price**

Kick Options Doors

1¼"	36"	66"	**TSAPDSO6636**	$3647
1¼"	42"	66"	**TSAPDSO6642**	$3863
1¼"	36"	78"	**TSAPDSO7836**	$3974
1¼"	42"	78"	**TSAPDSO7842**	$4185

Tip: The sliding door is located outside of the panel system when installed in the standard position.

Tip: The standard door is handed and non-locking. When a lock option is specified the lock will be on the trail end of the door. The illustration above shows a left-handed sliding door. If a lock option is specified, the lock will be on the right (trail) side of the door.

Tip: Width of host panel should always be equal to the width of sliding door.

Tip: Height of host and receiving panels must match height of door.

Tip: Remember to specify lock cylinder and key separately.
▶ *Lock Cylinders,* page 372

Tip: When attaching the sliding door to an Answer panel, a junction stabilizer bracket is available for added rigidity to the host panel. If a host and/or receiving panel run exceeds 4', a junction stabilizer bracket must be applied to the door end of the host and/or receiving panel run. On long runs, apply a junction stabilizer bracket or perpendicular panel every 8'.

Specifying Universal Systems Worksurfaces

Universal Systems Worksurfaces

Steelcase
April 2024

Straight Worksurfaces
High-Pressure Laminate or Wood Veneer

B

A

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long worksurface spans require additional support.
▶ *See understanding section for details, page 88*

For wood and laminate group 2 and 3 pricing, *please refer to the electronic catalog or SmartTools.*

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, US1830 becomes US1830SW for wood with square edge profile.)

Tip: Power and data access door and tray is ordered separately to be used with cutout.
▶ *See page 258*
▶ *See page 94 for worksurface size availability matrix.*

Tip: Scallop will be omitted if you select power access door.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: Power access door option is only available on straight worksurfaces with ½" cord drop.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
▶ See page 1 for details.

	Standard Includes	Required to Specify

	• Right and center	No cost	Specify *with right and center grommet.*
	• Right, left, and center	No cost	Specify *with right, left, and center grommet.*

▶ **Options, continued on next page**

Tip: When selecting with cord drop, subract ½" from depth.

Tip: Scallop is available in the center location only. If cutout for power and data access door and tray or power access door is selected, scallop will default to omit scallop.

Tip: Power and data access door and tray is ordered separately to be used with cutout.
▶ *Page 258*
▶ *See page 94 for worksurface size availability matrix.*

Tip: Cutout for power and data access door and tray is available in the center location only. Worksurface depth must be greater than 24".

Tip: Power access door option is only available on straight worksurfaces with ½" cord drop.

Tip: Power access door option includes the power access door and a cutout for the door in the worksurface.

Tip: If cutout for power and data access door and tray or power access door is selected, grommet will default to no grommet.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Corner, 120° Worksurfaces

High-Pressure Laminate or Wood Veneer

C   D

A   B

Tip: Supports must be specified separately, including side support brackets for rear corner support in panel-mounted applications.
For wood and laminate group 2 and 3 pricing, *please refer to the electronic catalog or SmartTools.*

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, UB223636 becomes UB223636SW for wood with square edge profile.)

	Standard Includes	Required to Specify

Spanner Worksurfaces
High-Pressure Laminate or Wood Veneer

B

A

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

For wood and laminate group 2 and 3 pricing, *please refer to the electronic catalog or SmartTools.*

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, USPC47 becomes USPC47SW for wood with square edge profile.)

▶ Need help? Product details, page 86

Standard Includes
- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
  –Plastic 3 mm edge profile on front edge
  –Plastic default flat profile on side and back edges
- Wood worksurface:
  –Wood 3 mm edge profile on front edge
  –Matching veneer flat profile on side and back edges

Required to Specify
1 Style number with appropriate edge profile suffix
  SW Wood with square edge
▶ See edge profiles below.
2 High-Pressure Laminate or wood color number for worksurface
3 Plastic color number for front edge on laminate worksurface, if selected
4 Options, if selected (see below)
▶ See *Surface Materials,* page 358.

	Options	U.S. Price	Required to Specify
Surface Materials	**High-Pressure Laminate worksurfaces**		
	• Laminate price group 2	See information at left	Specify laminate color number.
	• Laminate price group 3	See information at left	Specify laminate color number.
	• Open Line laminate	+$102 plus cost of laminate	▶ See *Surface Materials Reference Manual.*
	Wood veneer worksurfaces		
	• Wood group 2	See information at left	Specify wood color number.
	• Wood group 3	See information at left	Specify wood color number.
	• Customiz stain	No cost	Specify *with Customiz stain.*
			▶ See *Surface Materials Reference Manual.*
	• Full-fill finish on wood group 1	Prices below	Specify full-fill finish number.

Universal Systems Worksurfaces

Bullet Peninsula Worksurfaces
High-Pressure Laminate or Wood Veneer

B   A

Tip: Supports for freestanding and panel-mounted applications must be specified separately.

Tip: Long worksurface spans require additional support.
▶ *See understanding section for details, page 88*

For wood and laminate group 2 and 3 pricing, *please refer to the electronic catalog or SmartTools.*

Tip: Bullet peninsula worksurfaces are recommended for use with other curved-front shapes such as corner, curved-front worksurfaces.
▶ *Page 242*

Tip: The same bullet peninsula worksurfaces can be used with either worksurfaces with ½" cord drop or with full depth worksurfaces.

Tip: To specify 3 mm edge profile, no suffix is required. For all other edge profiles, add a suffix to the style number. (For example, UPBC3060 becomes UPBC3060SW for wood with square edge profile.)

Standard Includes	Required to Specify
▶ Need help? Product details, page 86	

Standard Includes
- Worksurface: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate worksurface:
  –Plastic 3 mm edge profile on front edge
  –Plastic default flat profile on side and back edges
- Wood worksurface:
  –Wood 3 mm edge profile on front edge
  –Matching veneer flat profile on side and back edges
- Cable scallop on back edge

Required to Specify
1. Style number with appropriate edge profile suffix
   SW Wood with square edge
   ▶ See edge profiles below.
2. High-Pressure Laminate or wood color number for worksurface
3. Plastic color number for front edge on laminate worksurface, if selected
4. Options, if selected (see below)
▶ See *Surface Materials,* page 358.

Kick Solutions Specification Guide

Divisio Side Screen

Tip: The Divisio side screen can be used on any ³⁄₄"- to 1¹⁄₂"-thick worksurface.

Tip: The Divisio side screen has an overhang of 8". This is important when planning for returns or storage.

Tip: The Divisio side screen weighs approximately 14¹⁄₂ pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: The Divisio side screen is intended for use on the front of a worksurface.

Tip: The Divisio side screen does not work on knife edge profiles.

TS Series Mobile Pedestals
With Seat Cushion

Tip: Counterweight packages for mobile pedestals are required to ensure product stability and are included.

▶ See *Counterweight Requirements for Storage Products,* page 111.

▶ Need help? Product details, page 122

Standard Includes

- Pedestal: paint price group 1
- Seat cushion: fabric price group 1
- Pulls: metal
- Lock face ring with plastic plug to accommodate lock cylinder: 9201 Polished Chrome
- Handle on pedestal with seat cushion and handle, if selected: 0835 Black
- Steel ball-bearing suspensions on box and file drawers
- 1½"-diameter front-locking, hard casters
- Counterweight package

Required to Specify

1 Style number
2 Fabric color number for seat cushion
3 Paint color number for pedestal
4 Pull (see below under required selections)
5 Options, if selected (see below)

▶ See *Surface Materials,* page 358.
Tip: Remember to specify lock cylinder and key.

TS Series Laminate Common Shelves

Tip: For anticipated heavy loads on 42" and 48"W laminate common shelves, a field-installed reinforcing channel (TSATRC39) can be used.

Tip: Standard worksurfaces are 1⅛" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.

For laminate price group 2 and 3 pricing, *please refer to the electronic catalog or SmartTools.*

Standard Includes	Required to Specify

Tip: Counterweight packages are required to ensure product stability and are ordered as an option or separately. Product specification pages indicate the correct counterweight package for each style number and any exceptions where counterweights are not required.
▶ See *Counterweight Requirements for Storage Products,* page 111.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RPF1827A__ becomes RPF1827AP for proud steel front).

Tip: Use 27"H pedestals to align with Universal Storage with 3" base. 27"H pedestals support worksurfaces at 28½"H.

Tip: Only 22⅝"D, 23½"D, 28⅝"D, and 29½"D pedestals can accommodate legal-size filing.

Universal Mobile Pedestals

With Flush Steel, Proud Steel, Proud Laminate, or Proud Wood Fronts

Tip: ⅛"H steel top is non-structural.

Tip: Counterweight packages for mobile pedestals are required to ensure product stability and are included.

▶ See *Counterweight Requirements for Storage Products,* page 111.

▶ Need help? Product details, page 140

Standard Includes	Required to Specify

• Pedestal: paint price group 1
• ⅛"H steel top: paint to match pedestal
• Removable drawer fronts: paint to match pedestal, laminate price group 1 if proud laminate selected, or wood group 1 veneer if proud wood front selected
• Integral pulls on units with flush steel fronts
• Pulls: metal
• Full drawer interiors: black only
  – One pencil tray per box/file or box/box/file and box drawer dividers
• Lock, keyed random: 9201 Polished Chrome
• Four hard-composition, non-locking casters: black only
• Safety interlock mechanism
• Counterweight package
	1 Style number with appropriate front style suffix in the space provided
	  F Flush steel front
	  P Proud steel front
	  L Proud laminate front
	  W Proud wood front
	2 Paint color number for pedestal
	3 Laminate color number for drawer fronts, if proud laminate front selected
	4 Wood color number for drawer fronts, if proud wood front selected
	5 Pull (see below under Required Selections)
	6 Metal color number for pulls, if proud steel, proud laminate, or proud wood front selected
	7 Options, if selected (see below)
	▶ See *Surface Materials,* page 358.

Kick Solutions Specification Guide

Steelcase
April 2024

Tip: Height dimension listed is for units with 1" top. Overall height will vary if another top is selected.

Tip: Your specification is not complete until you add a suffix to the style number to define the front style (for example, RLF18301__ becomes RLF18301F for flush steel front).

Tip: For open-open units, the shelf is affixed with screws. The screws can be removed to adjust the clips/shelf to a different height.

Universal Lateral Files
## with Flush Steel, Proud Steel, Proud Laminate, or Proud Wood Fronts

▶ Need help?
Product details,
page 170

| Standard Includes	Required to Specify

• Lateral file: paint price group 1
• 1"H top on units with flush steel or proud steel fronts: paint to match file
• Drawer fronts on units with proud laminate fronts: laminate price group 1
• Drawer fronts on units with proud wood fronts: wood group 1 veneer
• Integral pulls on units with flush steel front
• Pulls: metal
• Lift-up door with fixed shelf on 65½"H units with flush steel or proud steel front: paint
• Lift-up door with fixed shelf on 65½"H units with proud laminate fronts: laminate price group 1
• Lift-up door with fixed shelf on 65½"H units with proud wood fronts: wood group 1 veneer
• Central lock, keyed random: 9201 Polished Chrome
• One label holder per drawer: clear plastic
• Drawer body: black only
• Drawer suspensions: black only
• One hanging folder bar per drawer on 18"D units
• Two rails per drawer on 24"D units
• One hanging folder bar and three dividers on roll-out shelf, if selected
• Four adjustable leveling glides
• Ganging hardware
• Counterweight package, if selected
	1 Style number with appropriate front style suffix in the space provided
	  F Flush steel front
	  P Proud steel front
	  L Proud laminate front
	  W Proud wood front
	2 Paint color number for file
	3 Laminate color number for drawer fronts, if proud laminate front selected
	4 Wood color number for drawer fronts, if proud wood front selected
	5 Pull (see below under required selections)
	6 Metal color number for pulls, if proud steel, proud laminate,or proud wood front selected
	7 Options, if selected (see below)
	▶ See *Surface Materials,* page 358.

Understanding Lighting

//

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These lights have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Statement of Line and Comparison

Shelf lights mount into the recessed bottom of storage shelves and bins to illuminate the worksurface. Four types of shelf lights are available to control the quality of light for specific applications. Each type is compatible with Steelcase systems furniture.

Shelf Lights

Storage-Mounted Lights

Standard Shelf Light

Mounting Options	• Universal mounting package (standard) • Flush mount • Competitive mounting package

April 2024

Lighting

Shelf Lights
Standard

End cap cord managers, molded into the durable plastic end caps, allow you to route and manage excess cord.

Plug is flat so it remains close to the receptacle.

Housing is painted black. Optional paint colors are available.

On-off switch is centered on the front edge of the Standard shelf light.

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago code.

Cord exits from the center of the back of the light for Standard shelf light.

Daisy chain cords have modular connectors to link Standard shelf lights together.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with three-prong plug or daisy-chain cords.

45°

Plug configuration allows two Standard shelf lights to engage adjacent outlets in one receptacle.

Energy-saving T8 lamps have triphosphor coating for balanced color and pleasing light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Universal bracket allows shelf light to be installed without tools under most metal overhead storage bins and shelves.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Daisy chain starter cord must be ordered separately when used with Standard shelf lights in a daisy chain application.

Actual Dimensions

	Standard
Depth	9¼" (235 mm)
Width	24⅝", 36⅝", or 48⅝" (625 mm, 930 mm, or 1235 mm)
Height	1¾" (44 mm)

Width	Lamp width	Lamp wattage	Replacement lamps
24⅝"	24"	17 watts	F17T8-TL735
36⅝"	36"	25 watts	F25T8-TL735
48⅝"	48"	32 watts	F32T8-TL735

Keyhole slots in housing of fixture allow shelf light to be mounted beneath wood or laminate overhead storage bins and shelves using screws provided. Keyhole slots are also used to mount lights to overhead storage bins and shelves manufactured prior to August 1991.

Standard shelf competitive mounting package provides attachment hardware to mount Steelcase shelf lights on all major competitive furniture lines. Package includes screws and installation instructions.

Shelf light can be mounted anywhere from side to side beneath overhead storage bin or shelf. The cord length is the only limitation.

Wiring & Cabling

Power drawn is approximately ½ amp.

Daisy chaining permits interconnecting up to six Standard shelf lights from a single power outlet.
▶ Page 347

Starter cord powers first light in a daisy chain and allows you to convert any daisy chain light for independent operation.

Electronic high-power-factor ballast that is roughly 45% more efficient than a normal-power-factor ballast is available on Standard.

Shelf Lights
Bottomline

Bottomline

**Housing** is painted steel.

9' cord with grounded plug is factory installed. Length is maximum allowed by U.S. National Electrical Code. Cord with circuit breaker is available to meet the requirements of the Chicago Code.

On-off switch is centered on housing.

Product Details

Shelf light includes the lamp, ballast, and either a 9' cord with a three-prong plug or a Chicago plug.

45°

Plug configuration allows two task lights to engage adjacent outlets in one receptacle.

Optics: Bottomline includes a batwing lens with mylar reflector that provides low glare and broad distribution of light.

Connections

Shelf light mounts recessed or flush depending on the design of the overhead storage bin or shelf. Standard with universal spring brackets for recessed mount or screw-in for flush mount.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.
Width	Lamp width	Lamp wattage	Replacement lamps
24"	23.3"	14 watts	F14T5-835
36"	35.1"	21 watts	F21T5-835
48"	46.8"	28 watts	F28T5-835

Lamp life of a fluorescent lamp that turns on and off once a day will last longer than a lamp that turns on and off many times a day. Environmental effects can shorten the life of a lamp, such as: moisture or higher humidity, higher or colder than normal temperatures, excessive vibration, and power surges.
Tip: If the light begins to flicker, or shuts down immediately, the sensor is indicating the lamp is at the end of its life and needs to be replaced.

Wiring & Cabling

Power drawn is approximately ½ amp.

Daisy chaining is only available on Bottomline shelf lights.

Daisy chaining on Bottomline permits interconnecting up to six shelf lights from a single power outlet.
▶ Page 347

Daisy chaining on Bottomline allows for independent operation of lights.

Electronic ballast is more energy efficient than T8 electronic ballasts.

LED Shelf Lights

Plastic cover finish in black or arctic white.

Soft on and soft off light activation.

Illuminated soft touch switch has continuous dimming.

Daisy chain lights connect to ports on the back corner of the light.

Cord exits from the back corner of the light.

Product Details

Shelf light includes the lamp and power supply with cord set. Daisy chain primary light includes lamp and larger power supply to support up to three lights. Daisy chain secondary light includes lamp and daisy chain cord set.

An 18 watt power supply is used on the LED standard light; it is 9' long with a two prong driver plug. *Tip: Energy saving mini-LEDs greatly reduce power use.*

Power supply for LED daisy chain starter light uses an 11' 60 watt modular cord with standard two prong plug, an integrated low voltage cord, and a connector to attach to light.

Connections

Shelf light mounts recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnetic mounting allows shelf light to be installed without tools under most metal overhead storage bins and shelves. This mounting allows the light to be mounted to most competitive steel bins and shelves.

Optional fastener kit allows shelf light to be mounted to wood shelves.

Specify LED shelf light or LED linear shelf light for use under 24" wide bins. Standard and Bottomline 24" wide lights do not fit under 24" wide bins.

Actual Dimensions

LED Linear Shelf Lights

A properly diffused light source under the linear head provides a softly blended light pattern that reduces eye strain.
▶ Specifying, page 354

Optional occupancy sensor turns off after 30 minutes of no activity and will turn back on upon return.

Single touch on/off pad plus touch and hold dimming for easy individual user control.

Continuous dimming from 100% to 15% with last state memory.

Cord exits from either end of the light.

Magnetic mounts and wood mount bracket hardware, both come standard with both LED light and optional occupancy sensor.

Light widths available in 17", 31", 44", and 58".

Product Details

LED linear stand alone and daisy chain starter lights include the lamp, power supply, and both magnetic mounts, and wood bracket hardware with adhesive cord managers.

LED linear daisy chain lights include the lamp, daisy chain cords, and both magnetic mounts, and wood mount bracket hardware with adhesive cord managers.

Optional occupancy sensor is a separate component that connects to the light fixture and activates in 30 minutes when no movement is detected to conserve energy. It will also turn back on upon return.

Average rated lamp life of LED linear shelf lights is 50,000 hours.

Color temperature LEDs is 3500K.

Color rendering index of LEDs is 84.

Automatic turn off after 10 hours (+/- 15 mins.); standard with both models.

Connections

Lights mount recessed or flush depending on design of overhead storage bin or shelf. Installation is done in the field.

Magnet mounts allow shelf lights to be installed without tools under most metal overhead storage bins of shelves.

Wood mount brackets allow shelf lights to be mounted to wood shelves.

Actual Dimensions

Chart for Daisy Chaining Fixture

Standard Output Linear Shelf Light											
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light										
17"	6	4	3	2	2	1	1	–	–	–	–
31"	–	1	–	2	–	2	1	3	1	1	–
44"	–	–	1	–	–	–	1	–	1	–	2
58"	–	–	–	–	1	–	–	–	–	1	–

High Output Linear Shelf Light				
Light fixture widths	Maximum number of fixtures allowed with daisy chain starter light			
17"	4	2	1	–
31"	–	1	–	2
44"	–	–	1	–

• A 60 watt power supply is required for daisy chaining.
• Total system wattage of all fixtures together cannot meet or exceed 60 watts, see chart.
• Cannot daisy chain standard output and high output together.
• Cannot daisy chain 58" high output fixtures.
• Occupancy sensor must be positioned between the power supply and the first starter fixture.
• Only need one sensor when daisy chaining.
Tip: Each column is the maximum number of fixtures that can be daisy chained together.

Occupancy Sensor

• Turns off after 30 minutes of no activity and will turn back on upon return
• 360° lens view
• 90° outward detection angle
• 30" diameter coverage if mounted 15" above worksurface
• 36" diameter coverage if mounted 18" above worksurface
• Connects to fixture with one end-to-end connector. 8" or 30" jumper cords
Daisy Chaining
For Standard and Bottomline Lights

Daisy chaining shelf lights together extends power from one fixture to another within workstations to help keep receptacles clear for other uses.

For Standard shelf lights, starter cord is required with daisy chain cords to bring power to the first shelf light in a daisy chain so there's no need to designate where each fixture will be used within the chain.

Daisy chain cords

Starter cord

Power will not be interrupted in a chain even if one of the shelf lights is turned off or its lamp has burned out. That's because the path of power through the chain doesn't pass through the lamps or switches.

For Bottomline lights, starter light is required with daisy chain lights to bring power to the first light in the daisy chain.

Starter Light

Daisy Chain Light

Twist tie
Daisy chain end
Jumper cord

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Overhead cabinets and shelves provide a recessed area for shelf lights. They are not designed to conceal cords when daisy chaining.

Tip: When using upmount brackets with overhead storage and daisy chaining lights, use the open design upmount bracket for better cord management.

of a shelf or overhead stor-
age bin and a worksurface.
Wire manager can be cut in
the field to suit specific
application.

Wire manager can
also be used below the
worksurface.

**Power cords and
cables** can be routed from
the wire manager and the
½" gap along the back edge
of the worksurface.

Connections

Snaps into the slotted
channel of the junction.

Specifying Lighting

Lighting

Standard Shelf Lights

Tip: Daisy chaining is not allowed in Chicago. Local electrical codes vary, so you should consult a qualified electrical contractor or engineer for proper installation of all electrical equipment.

Tip: Because shelf lights are usually recessed, black is the standard paint color. Paint colors other than black have an upcharge.

Tip: If an optional paint color is selected for the housing, the electrical switches and end caps will remain black plastic.

▶Need help? Product details, page 338

Standard Includes	Required to Specify

• Light housing with centered on-off switch: black paint
• End cap cord managers: black plastic only
• Cords:
  —Standard and Chicago (including circuit breaker), 9' cord with three-prong plug at 45° angle: black plastic only
  —Daisy chain, one 78" cord with modular connectors for daisy chaining: black plastic only
• Contrast sleeve around lamp
• Faceted reflector: white only
• T8 3500K lamp
• Ballast
• Universal mounting hardware package
• Daisy chain starter cord, if selected: black plastic only (order separately)

Tip: Some wood veneer finishes and woodgrain laminates share the same name. Because of the difference in materials, veneers and laminates of the same name are not an exact match but do coordinate with each other.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of $102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements
To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:
• Visit *www.steelcase.com*

For additional information, refer to the *Steelcase Surface Materials Reference Manual.*

Applies to:
• Universal worksurfaces
• Universal Storage tops and fronts
• Overhead storage
• TS 200 Series tops

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:
• Do not store products in trailers
• Store products in areas that simulate office temperatures (60°F to 90°F)
• Store products in areas that maintain constant, office-like humidity levels
• Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

▶ See *Surface Materials Reference Manual* for a listing of available veneers for Victor2.

3P41   OP Planked Cherry
3P51   OP Planked Maple
3P61   OP Planked Oak
3P71   OP Planked Walnut
3VFX   OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on *village.steelcase.com* for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore
3832   QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from Designtex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit *steelcase.com/surface-materials* under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Select Surfaces and available as Wood Group 1 pricing.

Wood Group 1

Flat-Cut Open-Pore

3GGX   QC/OP Zebrano Composite
3HGX   QC/OP Oak Composite
3HVX   QC/OP Walnut Composite
3ZNX   QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A $500 stain-matching fee applies on CUSTOMIZ requests (Exception: The $500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The $500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A $1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a $1,000 fee at any point within five years after the $1,500 initiation fee was paid. If the finish is not reactivated within five years after the $1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the $1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual.*

Specification Guidelines for Directional Fabrics

Warp Horizontal

The standard application direction of fabric on Kick panels, skins, and Hutch kit tackboard is warp horizontal. Standard Steelcase fabrics were designed for this application direction.

Warp Vertical

The optional application direction of fabrics on Kick panels, skins, and Hutch kit tackboard is warp vertical. This is most commonly used on COMs designed for warp vertical application.

For more information about the warp direction of fabrics, see the *Surface Materials Reference Manual.*

Wood Veneer Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Lock and Keying

For TS Series Storage

Lock face ring

Lock cylinder

Front-removable lock cylinders can be installed or removed in the field with a special tool. This feature allows you to field install lock cylinders after the furniture is installed.

All locks are designated with key numbers. You can specify a key number; however, if you don't specify a key number, the locks in your order will be keyed random.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Standard Keying

All products are standard keyed random.

Step 1

Furniture will be shipped with a plastic shipping plug. Specify lock cylinder and keying options separately. Only products with factory-installed lock mechanisms can accept lock cylinders in the field.
Tip: Be sure to specify a lock color number (9201 Polished Chrome or 9250 Ember Chrome) for the lock face ring.

Step 2

Order enough lock cylinders to fill each lock location. You must also order a lock tool.
Tip: Lock tools are reusable. You don't need to order additional lock tools with every furniture order. Lock cylinders and the installation tool will be shipped separately so that you can install the locks when you are ready.

To specify lock cylinders, list the total number of lock cylinders that you want with the appropriate style number. If you are specifying key numbers, list the breakdown of the quantity of each key number.

An example of how your order should look is shown below:

Example:
10	LOCK9201FR	FR320
5	LOCK9201FR	FR350
15	LOCK9201XF	XF1100

30 Total

1 877102003SR standard lock tool
1 877102002SR master lock tool

Keying Options

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454.
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

FR305

FR421

FR305

Key specific means that you can specify any key number from FR305 to FR454. This option can be used to key all the furniture units in a workstation or department the same.
*Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.*

FR350

FR350

FR350

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454.

FR350

FR351

FR352

Master key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.

XF1020

XF1021 ← XF Master Key

XF1022

Master key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from XF1001 to XF1150. All XF locks can be opened with a master key.
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key numbers for all locks.

XF1011

XF1042 ← XF Master Key

XF1011

Master key specific means that you can specify any key number from XF1001 to XF1150. All the locks in the XF series can be opened with a master key.
Tip: Designate the quantity per key number in your specification when ordering more than one product with the same style number.

XF1020

XF1020 ← XF Master Key

XF1020

For Universal Steel Storage Products

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.
Exception: Individual locking drawers are only available with field-installed locks.

Lock face ring

Lock cylinder

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.

Required to Specify

Master key random	+$36	Specify *with master key random*.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

1	877102002SR master lock tool

Resources

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes	Required to Specify
• Lock cylinder: 9201 Polished Chrome or 9250 Ember Chrome • Two keys	1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify *key consecutive* and select beginning key number from FR305–FR454.
Master key random	+$36 each	Specify *master key random*.
Master key specific	+$36 each	Specify key number from XF1001–XF1150.
Master key consecutive	+$36 each	Specify *master key consecutive* and select beginning key number from XF1001–XF1150.

Specification Information

•Color	•Style Number	•U.S. Base Price

FR Series (Standard Keying System)—Lock Cylinder

Polished Chrome	**LOCK9201FR**	No cost
Ember Chrome	**LOCK9250FR**	No cost

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

Standard Lock Tool

	877102003SR	$36

XF Series (Master Keying System)—Lock Cylinder

Polished Chrome	**LOCK9201XF**	No additional cost. Price included in price of furniture with master-keyed locks.
Ember Chrome	**LOCK9250XF**	No additional cost. Price included in price of furniture with master-keyed locks.

Master Lock Tool

	877102002SR	$36

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
