Steelcase

Technology of Choice
media:scape TC

media:scape TC has thoughtfully integrated furniture and technology – bringing people, space and information together to enhance productivity and help groups excel.

With media:scape TC, organizations can optimize each media:scape setting to best meet their technology and collaboration needs.

Value Proposition

All in One Tech Hosting

It has never been more important to seamlessly braid the experience of people working remotely and in person. media:scape TC is designed with intention to support tech-enabled engagement, collaboration and connection. It leads the market in its versatility to host your technology of choice, with:

• Wide range of table sizes and heights

• Multiple options for monitor integration

• Application in spaces of any size and type

Easy to Install

Thoughtfully designed to meet ever-changing needs, media:scape TC routes and houses the most sophisticated technology – quickly, intuitively and with neat cable management. Hybrid teams are up and running in no time.

Features and Benefits

media:scape TC is an invitation to meet, power up and collaborate like never before.

• Supports the changing tech of your choosing

• Intuitive cable routing for fast, clean installation

• Specify with or without media well

• With media well, table offers power access to all users

• Tables with totem may be specified with dual shrouds to enhance content sharing

• Technology components may be securely mounted to the underside of table

Statement of Line

media:scape tables are shown with media wells. Tables are also available without media wells.
