For Canadian Pricing

Canadian factor can be found at www.steelcase.com/CADpricing/. Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing

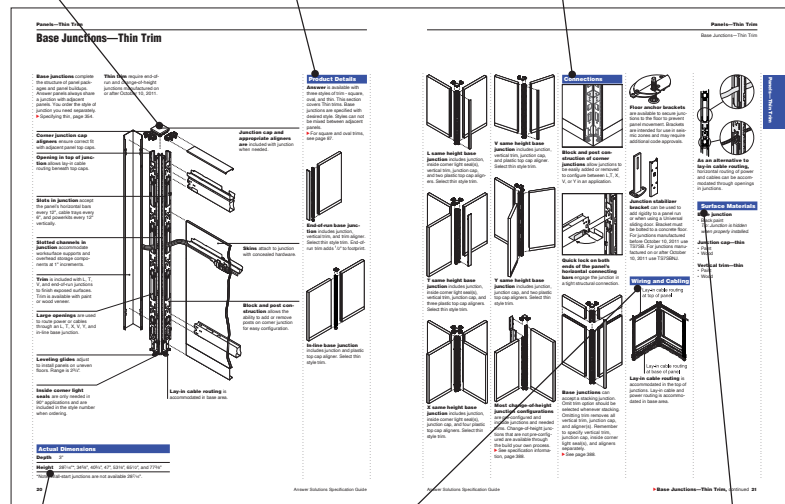

shows you what the product looks like and points out important features.

Product Details

gives specific information on the product and how it is used.

Connections

describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Additional Resources

Conference and Collaborative Tables

products are supported with informational materials, tools, and software to help you plan, specify, and order an installation efficiently.

Printed Materials

Other Specification Guides

Steelcase offers a comprehensive portfolio of furniture and solutions. For the full offering of products, refer to the individual product specification guides. These can be accessed at the www.steelcase.com web site or at village.steelcase.com

Computer Tools

Electronic Catalog

Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools—Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Support

Steelcase Capabilities

Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance, please call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to: <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

For information about Steelcase, the name of your nearest Steelcase dealer, or for product literature, call 1.800.333.9939 or visit our Web site: www.steelcase.com.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies.

To learn more at a corporate level, visit: <https://www.steelcase.com/discover/steelcase/esg-overview/environmental/>

Product Environmental Profiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at Origin.build.

Occasional Tables

Occasional tables are available in round, square, rectangular, oval, and racetrack.

Tables tops are offered in Low-Pressure Laminate, High-Pressure Laminate, veneer, glass, and solid surface.

Overall table height is 13" including the legs, spacer, and table top.

► Specifying, pages 24–30

Tables tops are $\frac{3}{4}$ " thick.

Leveling glides have $\frac{1}{2}$ " adjustability range to install tables on uneven floors.

Edge finish has an edge band that is defaulted to match the laminate surface. Veneer tops have a wood edge and laminate tops have a 3 mm edge.

Leg height is $12\frac{1}{4}$ ".

Product Details

Square and rectangular tables have options for rounded corners or squared corners.

Occasional tables and Bivi Rumble Seat legs share the same visual aesthetic.

► See *Benching Specification Guide* for Bivi Rumble Seat information.

Surface Materials

Table tops

Actual Dimensions

Base-Only Tables

Base-Only Tables enable you to personalize your table with a custom top and make it your own.

► Specifying page, 32

The Base-Only Tables come with a black $\frac{3}{4}$ " Low-Pressure Laminate (LPL) platform in the shape specified. Adhere custom top to the platform using the provided 3M™ hook and loop fasteners.

Tip: Base-Only Tables platform is smaller than the legs. Custom top will extend beyond the platform to align with the legs.

Fully assembled tables support a maximum weight of 800 pounds. This includes the weight of your custom top and any items put on the table.

Tip: Base-Only Tables are only available in four leg shapes and sizes.

25" Round Table

39" Round Table

Your custom top for circle bases may not extend more than 2" in any direction from the standard Base-Only Table size.

18 $\frac{7}{8}$ " Square Table

28 $\frac{3}{4}$ " Square Table

Your custom top for square bases may not extend more than 5" in any direction from the standard Base-Only Table size.

36" Racetrack Table

Your custom top for rectangular, oval, and racetrack bases may not extend more than 5" in any direction from the standard Base-Only Table size.

Asymmetrical Tables

Asymmetrical Tables

have an irregular shape and are offered in Low-Pressure Laminate, High-Pressure Laminate, veneer, glass, and solid surface.

Overall table height

is 13" including the legs, spacer, and table top.

► Specifying, page 34

Table tops are $\frac{3}{4}$ " thick.

Leveling glides have $\frac{1}{2}$ " adjustability range to install tables on uneven floors.

Edge finish has an edge band that is defaulted to match the laminate surface. Veneer tops have a wood edge and laminate tops have a 3 mm edge.

Leg height is $12\frac{1}{4}$ ".

Asymmetrical Tables are available in small, medium, and large.

Product Details

Asymmetrical Tables and Bivi Rumble Seat legs share the same visual aesthetic.

► See *Benching Specification Guide* for Bivi Rumble Seat information.

Storage

Bassline Storage is free-standing storage pieces that can also be used to divide spaces.
► Specifying pages, 40–42

Storage cases are available in Low-Pressure Laminate, High-Pressure Laminate, and veneer with painted metal accent panels.

Storage is standard as one sided. A YinYang configuration is available to create openings on both sides for shared storage.

Case sides are 3/4" thick.

Leveling glides have a 1/2" adjustability range to install on uneven floors.

Accent panels are available in various configurations.

Edge finish has an edge band that is defaulted to match the laminate surface. Veneer cases have a wood edge and laminate tops have a 3 mm edge.

Leg height is 12 1/4".

Actual Dimensions	
Standing Storage	
Depth	18"
Width	60"
Height	42"
Credenza	
Depth	18"
Width	60"
Height	28 1/2"

Product Details

Metal accent panels and sliding doors are available with or without a cut out design. Design shown on Standing Storage with full back.

If the cut out design is specified, it will be applied to the metal accent panel. If design cut out is desired on sliding doors, select doors with design.

Paint for metal accent panel and base are specified separately allowing match or mix finishes.

One Sided

Yin Yang

Both Credenza and Standing Storage can be one sided or YinYang to allow for access on both sides.

Sliding doors are an option on full back storage only.

Sliding doors are not available on full back units with the design cut out that are installed yin yang to prevent injury.

Flush

Inset

Credenza and Standing Storage legs can be specified in either flush or inset.

Inset legs are defaulted on the Credenza for a residential aesthetic.

Flush legs are defaulted on the Standing Storage for a clean aesthetic.

When storage units are being used together, option the legs the same for both units.

Full Back

Half Back

Accent panel configurations for the Standing Height Storage can be specified in two different configurations.

Full Back

Half Back

Meet Me In The Middle Accent panel configurations for the Credenza can be specified in three different configurations.

Weight capacity is 50 pounds per opening and 200 pounds on top.

Power

Round and Module power facilitate function and accessibility by bringing the power to the user.

Round power available in plastic colors to coordinate or accent in a space.

Module power available in black plastic only.
 ▶ Specifying, page 48

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and installation instructions. However, the building owner or designated agent is responsible for verifying that the installation is in compliance with local codes and regulations.

Product Details

Round or Module power have been tested and approved for use with the Box Top Table, **TSBLNTBX**.

Box Top Tables have pre-drilled pilot holes to accommodate power.

Round power is available with one power receptacle or 2 USB ports.

Module power is available with two power receptacles or one power receptacle/2 USB ports.

Round and Module power include a 72" cord with wall plug.

Wiring and Cabling

Round power features one simplex 15-amp spill proof receptacle.

Module power features two simplex 15-amp receptacles.

Round power has optional dual USB ports and offers 2-amps per port. Module power has optional dual USB ports in place of one receptacle.

All electrical components are cULus listed to the appropriate industry standards in accordance with the National and Canadian Electrical code.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Wood veneers and solid wood finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Ⓔ = Established

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available or quarter cut, except for Oak, which is rift cut.

► Refer to the *Veneer Cut Guidelines* on page 55 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Flat-cut open-pore

Open-Pore Planked Veneer

3P41	OP Planked Cherry
3P51	OP Planked Maple
3P61	OP Planked Oak
3P71	OP Planked Walnut
3VFX	OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surface program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore
3832 QC/OP Figured Anegre

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1

3GGX QC/OP Zebrano Composite
3HGX QC/OP Oak Composite
3HVX QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1000 fee at any point within five years after the \$1500 initiation fee was paid. If the finish is not reactivated within five years after the \$1500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Veneer Cut Guidelines

**Flat Cut**

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

**Quarter Cut**

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

**Rift Cut**

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Specification Guidelines for Vertical Fabric Applications

Warp horizontal means the height dimension of the tackboard is perpendicular to the warp of the fabric.

Application Topics

Tip: Fabric warp direction cannot be altered from standard on tackboards.

Customer's Own Material Yardage Requirements

Pre-approved fabrics are available. To determine if the fabric you want is on the pre-approved list, call a COM Consultant at 616.246.9822.

Surface Materials Representatives

are also available to answer your questions and to provide clarification. They can also help with situations where you are using fabrics under 66"W. Call 616.246.9822.

For further information regarding COM fabrics, refer to the *Steelcase Surface Materials Reference Manual*.

Additional fabric is required to accommodate flaws, wrinkles, and other imperfections.

B-Free High Tables

B-Free rectangle and pint tables make it easy

to leverage in-between space across the entire floor plan and create effective workspaces for people to come together and collaborate. Tables support standing and high-sit postures encouraging postural changes while promoting wellbeing through movement and boosting creative thinking and engagement. Pair the B-Free high table with the beam which share the same leg design to elevate any team setting, creating a relaxed and informal atmosphere for dynamic collaboration to flourish.

► Specifying, page 64.

► See *Seating*

Specification Guide for B-Free beams.

Tables are 39¹/₂"H.

Top is 1" thick with High-Pressure Laminate or veneer and black backer. Laminate tops have 3 mm edge band on all sides. Edge band color is selectable for laminate tops. Veneer tops have 3 mm wood edge that matches the veneer top finish selection.

Rectangle tops have square corners.

Pint tops have square corners on the wide end of the table and 2" (50 mm) radius edges on the short end of the table. The pint table has standard dimensions of 32"D (short end: leg width 23¹/₄"), 44"D (wide end: leg width 31") x 80"W.

Legs are available in powder coated steel. Steel legs are constructed of 2¹/₂ mm material bent steel, 3 mm horizontal steel tube, and 3 mm thick powder coated epoxy resin paint.

Legs ship standard with four glides.

- Steel leg table: ⁵/₈" glide adjustment range

Product Details

Solid core tops with 1" nominal edge thickness have a particle board core (45 lb cu ft density) with High-Pressure Laminate or wood veneer on the top and a backer applied to the opposite side for a balanced construction. High-Pressure Laminate, wood veneer, and backer are bonded to the core with a PVA adhesive.

Woodgrain laminates

are always oriented with the grain direction running parallel with the length of the table top. You cannot specify woodgrain laminates with end- or side-matched grain directions.

Woodgrain runs parallel to the length on rectangle and pint tops.

Wiring and Cabling

Steel leg profile

Steel leg tables include integrated wire manager and merle cover in the leg.

Horizontal steel beam, located in the middle of the legs, is constructed of 1¹/₄ mm bent steel and powder coated epoxy resin paint.

MhoB is a 4" x 5" flip-top power module that mounts at the top surface of the table and can be configured in different power/USB-A configurations:

- Two receptacles for power
- One power/one dual USB-A

Single/dual power and USB solutions come standard with a 15-amp, one-circuit power solution with a 10' cord.

► See *Power Matrix* on page 62 for available options and power module locations.

MhoB, one power module, is located 10" from the short end of the table; on the centerline of the width/depth specified.

MhoB, two power modules (center or both ends), are connected by a corded system with just one infeed.

Tip: Center power position is only available on tables that are at least 32"D x 66"W.

Tip: Power on both ends is only available on tables that are at least 70"W.

Tip: Center and two end power position options will default to two power modules, one with two receptacles for power and one with one receptacle for power/one dual USB-A port.

Tip: Steel leg tables include integrated wire manager and cover in the leg.

Surface Materials

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials

Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood Stain

Applies to:

- Wood legs
- 3860 Espresso
- 3861 Natural Beech

E = Established

Wood

Applies to:

- Table tops

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Flat-Cut Open-Pore

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry **E**
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple
- 3592 FC/OP Blonde on Maple **E**
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3752 FC/OP Medium Walnut **E**
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Flat-Cut Open-Pore, Natural Veneer

- 3342 FC/OP Black Walnut
- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

Quarter-Cut Open-Pore

- 3042 QC/OP Ash **E**
- 3222 QC/OP Clear Maple
- 3292 QC/OP Blonde on Maple **E**
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3352 QC/OP Medium Walnut **E**

- 3082 FC/OP Washed Walnut

Wood Group 1

Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill

Rift-Cut Full-Fill

- 3604 RC/FF Desert Oak

Wood Group 3

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anegre

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Big Table

Big Tables are offered in Low-Pressure Laminate, High-Pressure Laminate, and veneer. Table tops and end panels are 1 $\frac{3}{8}$ " thick and center panel is 1" thick. Table top comes standard with two reinforcing channels built into the worksurface for added strength.

► Specifying, pages 81–84

Big Tables are available at seating height of 28" high or standing height of 40" high.

Big Tables are available with an uninterrupted worksurface, uninterrupted worksurface with pop-up power, or Big Tables can be specified with a split worksurface top with a trough that runs down the center of the table.

Big Table Half Depth comes as an uninterrupted worksurface, where the center panel is moved to the end. Half-depth tables are available in two heights like the other Big Tables.

Big Table Trough has a 10" depth, with a 6" open inside the split worksurface and 2" open each side underneath the Big Table worksurface.

Product Details

Low-Pressure Laminate Table Drawer is 3"D x 48"W, can be placed in three locations on either side of the Big Table and Big Table with Trough. Trough must be ordered separately. *Tip: When used on a 28"H Big Table knee clearance will be reduced by 3".*

Flip grommets come standard on each end of Big Table with Trough when power is not optional.

Actual Dimensions

Depth	24" or 48"
Width	96"
Height	28" or 40"

Two Receptacles for power (TS4TPWR) are available in place of the standard grommet on each end.

Big Table trough is a painted platinum open steel technology tray that allows for cable management. Either end of the trough comes standard with grommet that has a flip-top panel for access to route cables. Trough comes standard on split worksurface.

Optional anodized aluminum table Center Rail installs in the table trough and allows for SOTO rail accessories. Can be ordered separately.

Wiring and Cabling

Dual power, data, and USB solutions are available as a standard option or field installed. 15-amp, one-circuit power solution with a 10' cord is standard. TS4TPWR, TS4TPWRD, and TS4TPWRUSB require one building outlet and provide four user outlets. When ordering data TS4TPWRD, user will get one outlet and one data opening on each end.

One receptacle and one data (TS4TPWRD) are available in place of the standard grommet on each end.

Tip: Includes open data port. Communication voice/data jacks are customer provided.

One receptable and one USB A+C (TS4TPWRUSB) are available in place of the standard grommet on each end.

Single power, data, and USB solutions are also available for field installation. They replace one of the standard grommets. 15-amp, one-Circuit power solution with a 10' cord is standard. TS4TPWR1 and TS4TPWRD1 provide a lower cost solution that requires one building outlet and provides two user outlets. When ordering data TS4TPWRD1, user will get one outlet and one data opening.

Two receptacle (TS4TPWR1) replaces one of the standard grommets.

One receptacle/one data (TS4TPWRD1) replaces one of the standard grommets.

When using two single power, data, and USB solutions, a second building outlet is required.

Vertical Cord Covers (TS4TVWM28 and TS4TVWM40) come in two heights, 28"H and 40"H. Vertical Cord Covers are used to route electrical cords vertically on Big Table with Trough.

Thread Power Application

When using Thread power solutions in conjunction with Big Table power, please specify the following Thread power options to create a connection for Big Table power options to Thread power system:

- **Thread connector (PFLCNCTR)** Please note there are one-door and two-door options available.
 - **Thread plug adapter (PFLADPTR)** Thread plug adapter is needed to connect Big Table power plug to Thread power system.
- See *Architectural Solutions Specification Guide*.

Surface Materials

Mobile Storage Cabinet

Mobile Storage Cabinets are offered as left-hand or right-hand units in Low-Pressure Laminate with two adjustable shelves. ▶ Specifying, page 86

Storage Cabinets can be used with 40"H Big Tables and Big Tables with Trough or as freestanding storage units.

Mobile Storage Cabinets ship standard with casters. When Mobile Storage Cabinets are intended to be used underneath a Table Drawer, the glide option will need to be selected to provide enough clearance underneath the drawer.

Storage Cabinets have an optional front-removable lock.

Product Details

Up to four Mobile Storage Cabinets can fit up to four per side underneath a Big Table.

Cabinet Stop Brackets are available through Service Parts (TS4C025SR) to assure that the cabinets are aligned with the Big Table edge.

Surface Materials

Mobile Storage Cabinets

- Low-Pressure Laminate

Height (with glides)	35"

Paper Table and Personal Table

Paper Table and
Personal Table

Paper Table has three top configurations:

- Paper (installed over steel table top tray)
- Glass (installed over steel table top tray)
- Steel table top tray

► Specifying, page 87

Paper Table is constructed with laminate base, plastic rotating table top, and steel table top tray.

Personal Table is made from bent poplar wood with a natural edge finish. It nests underneath Campfire Lounges and can be used for a writing surface or laptop.

Tip: The Personal Table is not intended to be sat or stood on.

► Specifying, page 89

Product Details

Personal Table is designed to be used in the vertical position only.

Surface Materials

- Paper Table base**
- High-Pressure Laminate
 - 2535 Virginia Walnut
 - 2536 Blackwood
 - 2538 Clear Walnut

 - Open Line laminate

Actual Dimensions

	Personal Table	Paper Table
Depth	19½"	25"
Width	14"	25"
Height	26"	22½"

Skate Table and Slim Table

Slim Table serves as a functional anchor at a lounge setting, providing space definition, surface for piling, and distributing power for technology.

► Specifying, page 91

Skate Table is constructed of a painted steel base with 1/2" top in High-Pressure Laminate (HPL).
Tip: The Skate Table is not intended to be sat on or stood on, because of these limitations it might not be appropriate for education applications.

► Specifying, page 92

Standing Height Slim Table works in any environment: as a space divider, at the end of a bench run, in front of a meeting room, near a classroom, or as a stand-alone piece. Its shallow width maximizes available real estate.

Standing Height Slim Table is constructed of a painted steel frame with 1/2" top and side panels in Low-Pressure Laminate (LPL), High-Pressure Laminate (HPL), or select veneers.

Slim Table is constructed of a painted steel frame with 1/2" top and side panels in Low-Pressure Laminate (LPL), High-Pressure Laminate (HPL), or select veneers.

Actual Dimensions

	Standing Height Slim Table	Slim Table	Skate Table
Depth	18"	14"	18"
Width	48" or 60"	66"	22"
Height	42"	23"	24 ⁷ / ₈ "
Weight	109 lbs. or 121 lbs.	43 ¹ / ₂ lbs.	10 ¹ / ₂ lbs.

Product Details

Standing Height Slim Table serves as a short-term workstation and supports a breadth of applications.

Standing Height Slim Table has built-in power on each side that keeps devices charged, and bag hooks provide a space for personal belongings.

The integrated footshelf facilitates a shift in weight for comfort and well-being, and can be specified with contrasting paint.

Standing Height Slim Table comes equipped with two receptacles in the middle of each side of the table, with various configurations available:

- Standard: two simplex receptacles
- Power + USB: one simplex receptacle and one simplex receptacle with two USB ports
- Power + USB-C: one simplex receptacle and one simplex receptacle with one USB C port

The power cord has approximately 66" (5½') of length from the bottom of the Standing Height Slim Table to reach a power outlet.

Slim Table comes equipped standard with two platinum simplex 15-amp power receptacles in the middle of each side of the table.

The power cord has 78" (6½ feet) of length from the bottom of the Slim Table to reach a power outlet.

Glides are self leveling, three on either side of the Slim Table and are not adjustable.

The Slim Table's 66" width fits perfectly behind a Big Lounge or two Half Lounges.

Skate Table comes equipped with two hard plastic glides on the front of the table base, but also two skate wheels on the back of the table base for easy maneuvering.

Skate Table has a Merle plastic grommet to manage cords when powering technology.

Big Lamp

Big Lamp has a painted steel base with fabric lamp shade and white diffuser. At a height of 7'9", the Big Lamp can be installed in a room with an 8' high ceiling or taller. 15-amp plug with 9' electrical cord and an on/off foot switch.

► Specifying, page 93

Tip: Consult local fire code authorities if a Big Lamp is placed near ceiling sprinkler system.

Screens are constructed with a steel frame and a mesh sock. Screens are handed. Right-hand and left-hand versions are available.

► See *Seating Specification Guide*.

Product Details

Light bulb is not included. Use a 100 watt 19 incandescent bulb or 15 watt BR30 LED flood bulb. A compact fluorescent bulb may be used as long as the overall length does not exceed 4⁷/₁₆".

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Wood veneers and solid wood finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Ⓔ = Established

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available quarter cut, except for Oak, which is rift cut. Refer to page 100 for descriptions of each cut.

Applies to:

- Ottoman round legs
- V1AC Natural Cherry
- V1AM Clear Maple
- V1EW Dark Walnut

Applies to:

- Big Table

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill

- 3604 RC/FF Desert Oak

Wood Group 3

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surface program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

3HVG QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1000 fee at any point within five years after the \$1500 initiation fee was paid. If the finish is not reactivated within five years after the \$1500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Veneer Cut Guidelines

**Flat Cut**

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

**Quarter Cut**

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

**Rift Cut**

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Flip-Top Training Tables

Groupwork flip-top training tables offer a solution for active learning environments and multipurpose rooms. With its easy to use one-handed activation lever and mechanism on the user side, one person can set it up or take it down, move it, and compactly store a roomful of tables with minimal effort. This table series is available in multiple top sizes and two leg styles on casters.

► Specifying, pages 122–126

Worksurfaces have 2" radius corners with 3 mm edge band on all sides when Low-Pressure or High-Pressure Laminate is specified. Edge band color is specifiable.

Legs support 19"D, 24"D, and 30"D rectangle tables and 36"D team tables.

Top is 1" thick particle board with Low-Pressure or High-Pressure Laminate and three coordinating backer finishes or wood veneer with Gatorboard backer.

Tables are 28½"H.

Product Details

Underside of table

can be specified in one of three color options—light, medium, or dark.

Tip: Veneer worksurfaces do not have a colored laminate underside. The underside color must still be specified for the support brackets and reinforcing channels.

Reinforcing channel

must be used on worksurfaces 66"W and greater to minimize deflection. On tables 66"W to 84"W, reinforcing channels come standard and are field installed. When installed, channels add 1" below the table.

The reinforcing channel will match the understructure finish selection (light, medium, or dark).

Casters are 3" diameter, dual wheels that allow the tables to move easily on carpet or hard floors. Flip-top training tables are available with either two locking casters (user/handle side) and two non-locking casters or with four locking casters. Soft casters are available as an option and can be specified light or dark. The brake on soft casters is always red. Soft casters are recommended for use on hard floors. Glides are not available on the flip-top training table.

Modesty panels are constructed of a lightweight fiberglass substrate wrapped with fabric. Panel attaches to the underside of the table with a plastic extrusion that allows the panel to rotate from both the in-use and nested position with ease. Modesty panel stays with the table when flipped and in nesting position, or in-use position.

Modesty panels can not be used on 36"D team tables.

Modesty Panel Dimensions

Table Width	Actual Width
36"	22 ¹ / ₅ "
42"	25 ¹ / ₅ "
48"	31 ¹ / ₅ "
60"	46 ¹ / ₅ "
66"	49 ¹ / ₅ "
72"	55 ¹ / ₅ "
84"	67 ¹ / ₅ "

Flip-top training table

flips from its in-use position to its nesting position by using one hand to pull the release handle and in the same motion lift the top to its nesting position. The movement is easy and controlled and no additional locking is required.

Release handle is black and is only used to unlock the table from the in-use position. Flip-top tables in the in-use position have a natural flex in them and are not completely static.

Rectangle training tables

are parametric in width from 36"W to 84"W in ¹/₁₆" increments. Team training tables are parametric in width from 60"W to 84"W in ¹/₁₆" increments.

Team tables are designed specifically for small group work and project teams offering an angled shape on both sides of the table.

Clamp on power units

are not recommended on flip-top tables due to possible collision when tables are nested.

Tip: Attaching monitor arms to freestanding tables with casters or glides is not recommended due to tipping hazards.

36"	66"	2"	4"	58 ¹ / ₈ "	52"
36"	72"	2"	4"	64 ¹ / ₈ "	58"
36"	84"	2"	4"	76 ¹ / ₈ "	70"

Flip-Top Training Tables, continued

Flip-top training tables can be nested for space saving storage. Two 24"D or 30"D tables nested together are 26 $\frac{3}{4}$ "D while two 19"D tables nested together are 21 $\frac{3}{4}$ "D. Each nested flip-top table adds approximately 3 $\frac{3}{4}$ " to the nesting depth. Three tables nested together fit through a standard door. It is recommended to move one table at a time for both in-use or nested position.

Tip: Old flip-top tables (TS4FL2724TC2 and TS4FL2730TC2) cannot be nested with new flip-top tables (TS4FLIP and TS4FLIP2).

Tip: For legs, the 19"D legs are different and do not nest with 24/30/36"D legs. 24", 30", and 36"D tables use the same legs.

Leg bumper will always be the main point of contact between two nesting tables.

Surface Materials

Laminate
Woodgrain Direction

Woodgrain laminates are always oriented with the grain direction running parallel with the length of the table top. You cannot specify woodgrain laminates with end- or side-matched grain directions.

Wood veneer table tops are fabricated with Architectural Grade AA hand-selected hardwood veneer, plain sliced, book matched, and bonded to the core with a backing sheet for balance. Due to natural variations in wood, finished products may vary from samples in color, texture, and grain.

Wood is a natural material; slight variations occur in veneer texture, color, grain configuration, and stain acceptance. Steelcase stains are all applied with an exacting regard for consistency and are well within traditional tolerances for wood products.

Tip: Finished tops may vary slightly in tone or character from each other or from the samples Steelcase produces. No guarantee can be made of an absolutely exact match.

Swatch cards and actual samples of standard wood veneers

are available from your Customer Service representative.

Additional wood veneer species are available. To confirm availability and to determine pricing, contact your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Stains applied to Steelcase wood veneer table tops are standard with the same stain color applied to both the top and the solid hardwood edge profile. Steelcase strives to produce a consistently high quality product and some natural variation in color is to be expected. This is especially apparent on natural woods which have no stain applied. This color variation is normal and reflects the unique and natural properties of wood. This should not be considered a defect.

Care & Maintenance

Laminate should be cleaned with soap and water. For stubborn stains, use a non-abrasive household cleaner.

Veneers should be cleaned regularly with mild soap and water and dried with a soft cloth. To polish, use silicone-free household polishers. Use sparingly. *Tip: Never use ammonia based cleaners or wax on wood surfaces.*

Powder coat finishes on table legs

should be cleaned with a liquid detergent and water. Remove stubborn stains with liquid cleanser, such as Formula 409.

Tables should be inspected and maintained regularly by tightening screws and bolts, inspecting casters for damage, and inspecting all moving parts for damage and wear.

Non-Flip Training Tables

Groupwork non-flip training tables offer a solution for active learning environments and multipurpose rooms. With its light but sturdy construction, tables are easily rearranged to fit any room or layout. This table series is available in multiple top sizes and two leg styles on casters or glides.

► Specifying, pages 128–132

Top is 1" thick particle board with Low-Pressure or High-Pressure Laminate and three coordinating backer finishes or wood veneer with Gatorboard backer.

Worksurfaces have 2" radius corners with 3 mm edge band on all sides when Low-Pressure or High-Pressure Laminate is specified. Edge band color is specifiable.

Tables are 28½"H.

Legs support 19"D, 24"D, and 30"D rectangle tables and 36"D team tables.

Glides are available on non-flip tables only. Cast leg glides are painted to match the leg color chosen. Overall height of the table remains the same whether standard casters, soft casters, or glides have been chosen.

Product Details

Underside of table

can be specified in one of three color options—light, medium, or dark.

Tip: Veneer worksurfaces do not have a colored laminate underside. The underside color must still be specified for the support brackets and reinforcing channels.

Reinforcing channel

must be used on worksurfaces 48"W and greater to minimize deflection. Tables 60"W and greater require 2 channels. On tables 48"W to 84"W, reinforcing channels come standard and are field installed. When installed, channels add 1" below the table. The reinforcing channel will match the understructure finish selection (light, medium, or dark).

Casters are 3" diameter, dual wheels that allow the tables to move easily on carpet or hard floors. Non-flip training tables are available with either two locking casters (user/handle side) and two non-locking casters or with four locking casters. Soft casters are available as an option and can be specified light or dark. The brake on soft casters is always red. Soft casters are recommended for use on hard floors. Glides are available on non-flip training tables only.

Modesty panels are constructed of a lightweight fiberglass substrate wrapped with fabric. Panel attaches to the underside of the table with a plastic extrusion.

Modesty panels can not be used on 36"D team tables.

Training Table Power and Connections

Power, Data, and Wiring

Pop-Up Power

Pop-up power is a 4 1/2" x 6 3/4" desktop module and can be configured in several choices:

- Three power
- Two power/one data
- Two power/one dual USB-A
- One power/one USB-C 100W

The pop-up power unit has a six-foot power cord and choice of standard NEMA 15-amp plug or low profile plug type.

For access to the outlets, the user opens a hinged door. Pop-up power can not be closed when cords are attached. Pop-up power are NRTL and CSA listed. When data is specified, an array of faceplates are supplied to accommodate a range of voice/data communication outlets.

Hinge Door

4799 Platinum
7243 Seagull
7360 Merle

Outlets

6527 Merle
6053 Seagull
6527 Merle

Flush Power

Flush power is a 2 3/10" x 6 5/8" desktop module and can be configured in several choices:

- Three power
- Two power/one data
- Two power/one dual USB-A
- One power/one USB-C 100W

The flush power unit has a six-foot power cord and choice of standard NEMA 15-amp plug or low profile plug type. Flush power are NRTL and CSA listed.

When data is specified, an array of faceplates are supplied to accommodate a range of voice/data communication outlets.

Factory installed cutouts are available as standard option for tables. For the top to have a factory installed cutout, you must specify the option, where applicable, otherwise the table will be shipped without a cutout.

► See pages 117 and 118

Field installed desktop modules are ordered separately, not as an option, therefore, the table top will not have a cutout and must be cut in the field per the required locations.

► See pages 117 and 118

Grommets are available and have a 2" diameter opening. For factory cutout, specify the grommet as an option on the table. Field installation is available. To specify, order the grommet and the table as separate items.

36"	84"	6

When several tables need to be connected to one another, providing power to the entire series, modular power can be specified as an option. When modular power is specified, a flush or pop-up power unit is required to be specified in order to access power. When modular power is selected, an infeed needs to be ordered. These are ordered separately. One infeed can support up to a maximum of eight connections. Tables 54"W or less require one infeed per eight tables. Tables 54"W and greater with one power unit require a jumper which counts as a connection, so one infeed per four tables is needed. Jumpers ship automatically when needed. Each power unit also counts as a connection so tables 72"W and greater with two power units require a new infeed every four tables.

Tables 36"W to 60"W—
no jumper required

Tables 60¹/₁₆"W to 84"W—
jumper required

The installation of the modular power system must be followed in accordance with all assembly directions. Improper usage could result in risk of fire or electric shock. Only connect to products labeled "Modular Power System". For use in indoor, dry locations only.

Training Table Power and Connections, continued

The **modular power kit** consists of one "male" modular connector and one "female" modular connector allowing only one way to connect the power system. The modular connectors snap together, and easily disengage by pressing the release buttons on either side of the connection. The modular connectors are designed for easy end-user reconfigurations.

The **modular connectors** are pattern-coded for intuitive match-up when connecting the modular power system. Match the pattern in order to properly connect tables together.

The **modular power system** is easily installed into pre-drilled holes in the table. The modular power system connectors are easily accessible and always in the same location, and comes with all the necessary hardware.

Modular power requires an infeed to power the tables which are ordered separately. The power cord is 6 feet with the option for either a 15-amp plug or a low profile plug.

One infeed can support up to a maximum of eight connections. Tables 54"W or less require one infeed per eight tables. Tables 54"W and greater with one power unit require a jumper which counts as a connection, so one infeed per four tables is needed. Jumpers ship automatically when needed. Each power unit also counts as a connection so tables 72"W and greater with two power units require a new infeed every four tables.

The **modular power system** is based on the width of the table. For tables wider than 54", a jumper is required and will be shipped automatically, no need to order separately. There are eight connections allowed per infeed, using jumpers adds connections and reduces the number of tables that can be linked together before a new infeed is required.

Specifying desktop power with modular power system.

Tip: Grommets cannot be mixed with desktop modules on a single table.

1. Determine the type of desktop module required and its configuration.

Desktop power is required when using modular power. Choose between flush or pop-up power and pick the desired configuration.

Tip: Grommets are available, however, cannot be used with desktop or modular power as they occupy the same space as desktop power units.

2. Determine how many desktop modules.

Understand the number of people sitting at the table with the requirements between power, data, and USB along with where the desktop modules are located, one in the center or two in left and right position for individual or shared use.

3. Table width determines your modular power harness length.

When table width has been specified and modular power is selected, SmartTools will automatically select the proper length modular power unit for your table. It will also automatically include a jumper if required.

4. Determine number of infeeds required.

Infeeds are required when using modular power and are ordered separately with either a 15-amp plug or a low profile plug to power the tables.

One infeed can support up to a maximum of eight connections. One infeed per eight tables is required on tables 54"W or less. One infeed per four tables is required on tables greater than 54".

Horizontal Cable Manager Dimensions

Plan Width	Actual Width
36"	20"
42"	23"
48"	29"
60"	44"
66"	47"
72"	53"
84"	65"

Horizontal cable managers are available as an option or a separate style number and match the width of the table. They are made of molded PET felt and hinge on one side for easy user access.

Vertical cable managers can be added to help route cables down the leg to the floor or wall.

Vertical Cable Manager Dimensions

Plan Depth	Actual Depth
19"	5"
24"	10"
30"	10"
36"	10"

Vertical cable managers designed to work on 24/30"D and 36"D legs will not fit on 19"D legs.

Connections

Flex Ganger Package	Style Number
Flex Ganger	TS4FG

Flex ganger packages are available and are installed on-site. They are useful in situations when tables will frequently be reconfigured and reganged. Specify one package for each table.

Flex gangers can be used to easily link adjacent tables in multiple configurations. Flex gangers use a flexible loop that engages a hook to hold two adjacent table tops in place. No tools are required to stretch the loop across the seam between two table edges and to connect it to the hook on the adjacent table. All flex ganger locations are pre-drilled for simple relocation when desired.

When modular power is selected, flexible ganging brackets are required and will automatically be added to your order. If additional ganging brackets are desired, more can be ordered using style number **TS4FG**.

Flex gangers that are not in use can be folded back into the parked position.

Product details,
page 112

Standard Includes

- Table: 1"- thick top, Low-Pressure or High-Pressure Laminate price group 1 or wood group 1 veneer
- 3 mm radius profile edge: plastic
- Cast legs with standard casters: paint group 1
- Reinforcing channel(s) on 48"-84"W tables
- Underside color scheme: light or dark

Required to Specify

- 1 Style number
 - 2 Size option (see below under Required Selections)
 - 3 Table size (see below under Required Selections)
 - 4 Low-Pressure or High-Pressure Laminate or veneer color number for table
 - 5 Plastic edge band color number for table, if selected
 - 6 Paint color number for legs
 - 7 Underside color scheme
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 166.

	Required Selections	U.S. Price	Required to Specify

Tables

Groupwork furniture supports team activities. It is appropriate in an open plan and an enclosed work space. Table tops and table legs are ordered separately. ▶ Specifying, page 148

Tables are 28½"H.

90° corner bridge creates additional seating where space is a premium.

Worksurfaces are woodcore with laminate top and plastic edge band. Low-Pressure Laminates or High-Pressure Laminates are available.

Worksurfaces have 2" radius corners with 3 mm edge band on all sides. Edge band color is selectable.

Table legs ship standard with levelers. Casters are optional.

Groupwork tables are available with post legs.

Conference tops come standard with a grommet. For one-piece conference tops, the grommet is centered in the middle of the table. For two-piece conference tops, two grommets are standard, with grommets positioned 21" from the middle to the center of the grommet. Flip grommets are available for cable routing needs. Conference tops are offered in four shapes—rectangular, boat-shaped, race-track, and oval. Table tops come in one piece (96"W) or two pieces (120"W or 144"W). Oval is offered in 96"W only. All tops are offered in standard 1½" or optional 1¾" thickness. Conference table tops 120"W and 144"W, two-piece with HPL woodgrain laminates, will always be grain matched. These same tops, with LPL woodgrain laminates will not be grain matched, as well, LPL laminate 25L5 Virginia Walnut and 25L6 Blackwood will not be available on 120"W and 144"W table tops. You can use HPL 2535 Virginia Walnut and 2536 Blackwood on 120"W and 144"W and they will be grain matched. *Tip: 25L5 Virginia Walnut and 25L6 Blackwood are not available on 120"W and 144"W groupwork conference table tops.*

Product Details

Round and square table tops should be used with either Groupwork round table bases or Groupwork post legs. 48"W oval table top should only be used with Groupwork post legs. All tops are offered in standard 1 $\frac{1}{8}$ " or optional 1 $\frac{3}{8}$ " thickness.

Table legs can be ordered individually to create a combination of two legs with levelers and two legs with casters.

Wire management trough attaches to underside of worksurface to provide cable management and has capacity to support a powerstrip.

Grommets are available to finish exposed edges of field-installed openings in the worksurface for vertical cable routing. Grommets are 2" diameter black plastic.

Laminate modesty panel attaches below rectangular table tops to provide privacy. Modesty panels are 9"H and are $\frac{1}{2}$ " thick. Modesty panels are finished with High-Pressure Laminate on both sides. Laminate modesty panels can be used with any table leg specification, except training tables (**TS4FLIP2** and **TS4NFLIP**).

Groupwork tables can be attached together using Kick tie plates (**TSATTIE**).

90° corner bridges use Kick in-line support plates for connectivity. 14"D in-line support plates are used with 24"D bridges, and 20"D in-line support plates are used with 30"D bridges.

Standing-height adjustable legs adjust on 1" increments from 28 $\frac{1}{2}$ "–45" (includes top thickness). The legs measure 24"–40 $\frac{1}{2}$ " with 3 $\frac{3}{8}$ " levelers. Due to the large range of the leveler, tables may vary in height depending on how far the leveler is inserted into the leg. The 1" adjustments match the Kick Systems vertical upright adjustment pattern.

Tip: Standing-height adjustable legs have natural movement in them and are not completely rigid due to the two-piece construction.

Groupwork tables with post legs also blend with Kick Systems furniture. Post leg tables are 28 $\frac{1}{2}$ " tall (includes top thickness). The legs measure 24" with 3 $\frac{3}{8}$ " levelers. Due to the large range of the leveler, tables may vary in height depending on how far the leveler is inserted into the leg.

Levelers adjust 2 $\frac{1}{2}$ " for installation on uneven floors.

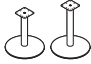

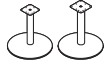

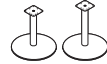

Reinforcing channel (TSATRC39, TSATRC48, TSATRC57, or TSATRC72), ordered separately, must be used with tops 60"W and larger. Please refer to the matrix for the appropriate worksurface brace size and quantity. Table dimensions not listed in the matrix do not require bracing.
▶ See *Groupwork Table Reinforcing Channel Requirement Matrix*, page 147.

Tip: Wider rectangular tables with casters, sizes 66", 72", and 84"W, require multiple reinforcing channels. One long and one short channel can be used to maintain the use of modesty panels, grommets, and wire management troughs. Please reference the Table Reinforcing Channel Requirement Matrix for details.

Tip: Attaching monitor arms to freestanding tables with casters or glides is not recommended due to tipping hazards.

Table Bases

Bases attach to square, round, or conference table tops. Bases support square and round tops at 28½"H or 42"H overall, including top thickness. 28"H bases support conference table tops at 28½"H overall, including top thickness.

► Specifying, page 154

Product Details

22" diameter by 16½"H base can be used to create coffee tables with smaller-size round and square tops (24"–30") in reception or teaming areas. Glides are standard.

28" diameter by 16½"H base can be used to create coffee tables with larger-size round and square tops (36" round and square and 42" round) in reception or teaming areas. Glides are standard.

22" diameter by 27¾"H or 41"H bases can be used to create standard-height or cafe-height tables with smaller-size round and square tops (24"–30") in cafeterias or teaming areas. Glides are standard.

28" diameter by 27¾"H or 41"H bases can be used to create standard-height or cafe-height tables with smaller-size round and square tops (24"–36") in cafeterias or teaming areas. Large-size round and square tops (42" and 48") and conference tops in all sizes can be used with the 5" diameter column. For heavy use applications with any size top, it is recommended to use the 28" diameter base with 5" diameter column for added rigidity. Glides are standard.

60"W
to 96"W

Over
96"W

Conference table tops can be used with **TS4TBASE285** or **TS4TCAFE285** only. Both the 27¾"H and 41"H bases are designed to structurally support the additional load bearing requirements of the larger conference table tops. Two bases must be used with tops 60"W to 96"W, and three bases must be used with all tops over 96"W.

Glides on Groupwork round table bases are not adjustable.

Table Legs

► Specifying, page 156

Laminate modesty panels can be used with any table leg specification.

Standing-height adjustable leg is available individually or as a package of four legs. Levelers are standard. Casters are available as an option.

Caster

Post leg is available individually or as a package of four legs. Levelers are standard. Casters are available as an option.

Standing-height legs with pin height adjustment adjust from 27³/₈"–43⁷/₈" in 1" increments. Levelers make up 3³/₈" of leg height.

Post legs are 27³/₈" without worksurface. Levelers make up 3³/₈" of leg height.

Tip: Table dimensions not listed in the matrix do not require bracing.

Rectangular, Half-Round, Trapezoid, 90° Corner Bridges

Tip: Standard worksurfaces are 1 1/8" thick. However, the actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications. Please use caution when mixing and matching different worksurface types.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Reinforcing channel (**TSATRC39**, **TSATRC48**, **TSATRC57**, or **TSATRC72**), ordered separately, must be used with tops 60"W and larger.

- ▶ See page 136, *Supports*.
- ▶ See page 147 for *Groupwork Table Reinforcing Channel Requirement Matrix*.

Tip: To ensure proper leg usage, consult the Groupwork table top, leg, and base combination section of the specification guide.

Table Legs

Tip: Levelers are adjustable (lower height), but do not slide. To easily move tables, order tables with casters.

Tip: Attachment hardware is to be used with Currency, Kick, or Groupwork table tops only.

Tip: To ensure proper stability when casters are specified, see the Groupwork table top, leg, and base combinations section of the specifications guide.
▶ See page 142

Tip: Attaching monitor arms to freestanding tables with casters or glides is not recommended due to tipping hazards.

Tip: Translucent screens and slatwalls are not available on 18"D fixed tops, if post legs are selected.

Tip: Translucent screens and slatwalls are not available on 18"D or 24"D height-adjustable tops, if standing-height adjustable post legs are selected.

Tip: Standing-height adjustable post leg is not available with 18"D tops.

Screens and Marker Tray

Screens are available with laminate markerboards on both sides, e³ CeramicSteel on both sides, or tackboard on both sides. Screens are available in two heights—54"H and 66"H—and five widths—24"W, 30"W, 36"W, 42"W, and 48"W—to coordinate with Kick panel systems.

► Specifying, page 162

Laminate markerboard surface has a non-glare writing surface and accepts all standard dry-erase markers. e³ CeramicSteel surface is magnetic.

Four-leg base is standard on screens.

Four locking casters allow for easy movement.

Tackboard surface is available in a variety of fabric options.

Laminate markerboard surface is available in the U.S. only. For Canada orders, specify either e³ CeramicSteel on both surfaces or tackboard on both sides.

Levelers adjust 1/4" for uneven floors. Levelers do not slide and should be used in applications where infrequent movement is required.

Three-leg base is available on 54"H screens only as an option to create a privacy wall.

Product Details

Screens nest easily and require minimal space. The leg bases are 16"D, and each screen nested adds another 1 1/2" to the depth.

Marker tray is available to hold dry erasers and markers. The tray is attached on top of the screen top cap. Marker trays are available in all five screen widths.

Flip-chart pegs are available as an option on the top cap. They are positioned 17 5/8" apart center to center and are available on one side only. Flip-chart peg top cap works in conjunction with marker trays.

Screens

Tip: Screens must be specified with fabric on both sides, e³ CeramicSteel on both sides, or laminate on both sides. For Canada, screens are available in fabric or e³ CeramicSteel on both sides only.

Tip: See CeramicSteel Cleaning/Daily Care and Maintenance for additional information.
 ▶ See *Collaborative Surfaces Specification Guide*.

Tip: 54"H screens are available in vertical or horizontal fabric direction. 66"H screens are available in vertical fabric direction only.

Tip: e³ CeramicSteel writing surface is magnetic.

Tip: Three-leg base is used when two or more screens are placed next to each other on angles. Four-leg bases can be used next to each other only in a straight configuration.

Tip: 66"H screens are not available with the three-leg base option.

Tip: Levelers have 1/4" adjustment (higher only) and do not slide. If frequent movement is needed, order screen with casters.

Tip: Flip-chart pegs, located 17 5/8" apart, are located on only one side of the top cap.

Surface Materials

This listing includes all the surface material choices that are available for the products in this section.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Edge color for the Open Line laminate on worksurfaces must be determined by the dealer and customer before orders can be entered. Specify appropriate 2K finish number.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Groupwork flip-top and non-flip training tables

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultra-violet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

E = Established

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2**Flat-Cut Full-Fill**

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3**Quarter-Cut Open-Pore**

- 3832 QC/OP Figured Anegre

Select Surfaces**Composite Veneer**

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1**Flat-Cut Open-Pore**

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite

Quarter-Cut Open-Pore

- 3F8X QC/OP European Walnut Composite
- 3GGX QC/OP Zebrano Composite
- 3HGX QC/OP Oak Composite
- 3HVX QC/OP Walnut Composite
- 3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Understanding Low-Pressure and High-Pressure Laminates

Low-Pressure Laminates, or LPLs, are created by dipping decorative crafted paper in melamine resin. The melamine dipped paper is then bonded to a wood core under heat and high-pressure. LPLs are generally suitable for use in lower impact areas. LPLs are generally used in vertical applications as well as tops for workstations and private offices. Generally, it is more cost effective to use LPLs when the performance of HPLs are not required.

High-Pressure Laminates, or HPLs, are composed of multiple layers of crafted paper individually soaked in resin. There are 7-15 layers of paper combined to make the final sheet. The top layers are translucent melamine sheet and a decorative layer. The sheets are combined under heat and high pressure to form a single laminate sheet. The resulting sheet is then bonded under heat and high pressure to a wood core. HPLs are generally considered more durable than LPLs due to the extra layers of craft paper (backer) used in their creation. While they cost more, they are more durable. HPLs are generally used in higher traffic areas such as cafeterias and conference rooms. Generally, it is more cost effective to restrict their use to areas needing the added durability HPLs provide.

Simple Tables

Simple Tables

Simple Tables come in three different heights and five shapes.
► Specifying, page 184

Table tops are 1 1/8" thick with edge band color default to match laminate.

Casters are available as an option on working-height post legs. Come in a package of four (two locking and two non-locking).

Power can be added to all tables except the personal size table, ordered separately.
► See page 208

Square table tops come with all four edges crowned.

Café-height tables (41"H) are supported with column bases.
► Specifying, page 206

Actual Dimensions			
	Lounge-Height	Working-Height	Café-Height
Square	●	●	●
Round	●	●	●
Rectangle	●	●	
Soft Square	●	●	
Soft Rectangle	●	●	

Reinforcing channel (TSATRC57), ordered separately, must be used on tables with post legs that have 60" or more of unsupported knee space.
► See page 159

Working-height tables (28 1/2"H) come standard with post legs on glides and are 1 1/2" in diameter with 1" of leveling. Columns and bases are available as an option on working-height table.

Lounge-height tables (25 1/2"H) are supported with column bases and work well with Campfire lounge seating.

Product Details

Simple Tables come in three different heights and five shapes:

- Lounge height, 25¹/₂"H. Shapes – Square, round, rectangle, soft square, and soft rectangle.
- Working height, 28¹/₂"H. Shapes – Square, round, rectangle, soft square, and soft rectangle.
- Café or standing height, 42"H. Shapes – Square and round.

Personal Simple Tables

come in 16"-18"D x 24"-28"W with a 3" offset column that allows for maneuvering work close to you. Column is 2³/₄" in diameter and base is 15"W x 23"D.

Table tops are 1¹/₈" thick with edge band color default to match laminate.

Bases vary in sizes based on the size of the table top.

► See *Column and Column Base Size Matrices*

Rectangular and square table tops offer slightly crowned edges that leave a gap to allow power cord routing when two or more tables are used together.

► Specifying, page 184

Square tops come with all four edges crowned.

Rectangular table tops come with two crowned edges on longer sides.

Power Specifications

Single and double power options come standard with plastic clips and two Velcro straps for cord management.

Single power unit

- Two power or one power/one dual USB-A
- 10 or 15 foot cord length

Determining power cord length depends on the size of the table top and distance to power source.

Double power unit

- Four power or three power/one dual USB-A or two power/two dual USB-A
- 10 or 15 foot cord length
- Two branch length options

Determining power cord length depends on the size of the table top and distance to power source.

Double power units are ideal for larger tables where more outlets are needed.

Double power is designed to attach to opposite corners of the table.

Branch lengths:
Combo 1 (two at 36" each)
Combo 2 (one 51" and one 38")

If you choose the double power option, here are the combo suggestions:

- Up to 54"W – Combo 1 (branch arms 36" each)
- Over to 54"W – Combo 2 (branch arms 51" and 38")

Rectangle power (freestanding or clamp-on) can also be used on Simple Tables. Clamp-on option works with worksurfaces that range from 1/2" to 2¹/₂" thick.

Column Matrix

Column and base sizes are determined by the size of the table top.

Table Width	Up to 30"W	31-54"W	55"-72"W
Column Size	One 3" Column	One 5" Column	Two 5" Column

Column Base Size Matrix

Top Size	Base Size

► Need help?
Product details,
page 178

Standard Includes

- 1¹/₈" thick table top: Low-Pressure Laminate (LPL)
- Edge band: default color to match laminate
- Base and column: paint price group 1

Required to Specify

- 1 Style number
 - 2 Worksurface size type (see below under Required Selections)
 - 3 Depth (see below under Required Selections)
 - 4 Width (see below under Required Selections)
 - 5 Low-Pressure Laminate color number for table top
 - 6 Paint color number for base and column
 - 7 Options, if selected (see below)
- See *Surface Materials*, page 211.

Tip: Parametric sizes available by the inch.

Tip: Tops 36"W and over get a 5" column. Tops 55"W and over get two 5" columns.

Universal Tables

Universal tables can be used in a variety of individual and team settings. ▶ Specifying tables, page 232

Product Details

High-Pressure Laminate Tables

Continuous edge profile is available in two shapes.

PVC-free, 3 mm edge profiles are a proprietary polyolefin blend for all solid colors and seven woodgrain finishes. See surface material listing in this book for specific PVC-free availability.

Knife edge with 3 mm user edge is available on straight and tapered systems worksurfaces and on round tables.

Edge profile finishes are specified separately from laminate color.

Wood Veneer Tables

Edges of worksurfaces are available in square (3 mm) profile.

Square (3 mm) edge profile is achieved by adding wood veneer surfaces to table core. This technique can be applied to tables that are straight or curved.

Connections

Universal tables are supported by bases or legs, which are ordered separately and installed in the field.

Use the Table and Base Combinations matrix to determine the type and number of bases you need to order for the tables you choose.

Tip: Not all sizes and shapes of tables can be supported by bases.

▶ Page 224

Use the Table and Legs Combinations matrix to determine the type and number of legs you need to order for the table you choose.

Tip: Not all sizes and shapes of tables can be supported by legs.

▶ Page 224

Reinforcing channels

are available to support tables that are wider than 60"W and supported by legs. When installed, the channels add 1" below the table. Channels are available as an option on larger tables and are field installed. Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table is 96" or smaller and will be supported by T- or X-bases. Channels are required and are always included with tables 120" and larger.

Underside of table has inset locations that support slip-fit applications. Post legs are positioned in 45° orientation only.

► See *Table Leg Positions*, page 226.

90° orientation

45° orientation

Legs installed in a 90° orientation allow for greater storage and kneespace below the table.

45° leg orientation is a preferred aesthetic for many customers.

Legs may be installed inset from the edge of the table to accommodate slip-fit planning. Amount of available space (3", 6", or 9") is measured from the edge of the table to the edge of the leg. Amount of slip-fit varies by table shape and size.

► See *Table Leg Positions*, page 226.

Slip-fit planning allows workstation footprint to expand or decrease, and is ideal for off-module applications.

Alignment tab corresponds to under work surface alignment slots in tables. Alignment features ensure legs are installed in the proper 45° or 90° orientation and slip-fit position.

Adjustable-height legs adjust 25½"H to 31½"H in ¾" increments.

Spanner table enables conferencing at the end of two tables that are placed back-to-back.

52"W or 64"W spanners should be used when tables are separated by a panel. These widths are designed to create a 4" gap.

Surface Materials

High-Pressure Laminate Tables

- Laminate
- See *Surface Materials Reference Manual*.
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- See *Surface Materials Reference Manual*.

3 mm profile

- Plastic

Wood Veneer Tables

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square (3 mm) edge profile

- Wood veneer to match table

Adjustable height legs, post, and post with caster

- Paint

Post leg caster

- Black plastic

Application Topics

Table and Leg Combinations

► Page 225

Table Leg Positions

► Page 226

Table Fit in Panel Environments:

Dimensions on straight tables are ¼" less than nominal dimension. This allows for an easy fit of freestanding tables in panel-wrapped environments and allows tables to move in and out of the area with ease.

Mobile pedestals up to 27"H will fit under 28½"H tables without reinforcing channels.

Tables with reinforcing channel will reduce the available space by 1".

Table and Base Combinations

Wiring and Cabling Accessories

► Page 476

Shipping

Palletizing streamlines unloading and staging of work surfaces. Identical work surfaces ordered on the same line item are packed on pallets containing 5-50 work surfaces depending on work surface size. Remaining work surfaces are packed individually in cartons. If palletizing is not desired, order in quantities of four or less per line item. For maximum unload efficiency, utilize pallet handling equipment at job site whenever possible. Wood veneer work surfaces cannot be palletized.

Hex conference tables

150"W or larger are shipped in two pieces. Tight-joint fasteners are supplied for proper assembly.

Bases for Universal Tables

Pedestal-base tables

fill a variety of needs for conference and work tables in general offices, institutions, and educational work spaces. Tables and bases are ordered separately.

► Specifying, page 243

Adjustable leveling glides

allow tables to remain level when installed on uneven floors.

Column support includes a cylindrical steel column and a base with feet.

T-base

X-base

Product Details

26"W or 36"W

26"W or 36"W

Bases are available 26"W and 36"W and are 27⁹/₁₆"H.

Application Topics

Table and Base Combinations

► Page 224

Shipping

Bases are shipped knocked down (K.D.) and will require assembly.

Legs for Universal Tables

Legs attach to a table to make it freestanding.
► Specifying, page 244

Alignment tab helps installers locate proper leg position under the table.

Post legs are available with non-locking casters or glides.

Leveling glides, included, allow table height to be adjusted on uneven floors.

Adjustable-height leg adjusts from 25½"H to 31½"H in ¾" increments.

Product Details

Legs support tables at 28½"H overall, including table thickness.

Table legs are ordered separately and installed on site.
► See *Table and Leg Combinations*, page 225.

Table legs are non-handed to accommodate left- and right-hand applications.

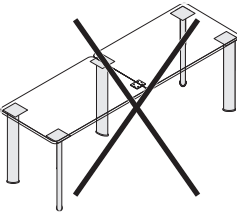

Table legs cannot be used in a shared application with two tables. Radius corners do not provide enough attachment space for leg plate. When a shared leg application is required, order Universal Systems Worksurfaces.

Single post legs can only be installed in a 45° orientation.
► See *Table Leg Positions*, page 226.

Tip: Oval tables 42"D x 72"W and larger, can only be supported with T-bases.

1 = Number of legs to order.
Blank spaces in matrix designate table and leg combinations that are not valid.

Table Leg Positions

For Use with Adjustable-Height Leg or Post Leg

Table leg positions allow for slip-fit and nesting capabilities. Both 45° and 90° angled leg positions are available on most tables. However, certain tables accommodate either 45° or 90° angled positions only. Leg positions on the underside of tables are shown at right.

Legs installed in positions 1, 2, or 3 will vary in their distance from the worksurface edge:

Position 1 is 3" from edge

Position 2 is 6" from edge

Position 3 is 9" from edge

Tip: Positions 2 and 3 are not available on every table.

Rectangle Tables

High-Pressure Laminate or Wood Veneer

► Need help?
Product details,
page 220

Standard Includes

- Table: High-Pressure Laminate price group 1 or wood group 1 veneer
- Laminate table: plastic 3 mm edge profile on all sides
- Wood table: wood square 3 mm edge profile on all sides

Required to Specify

- 1 Style number with appropriate edge profile suffix
SW Wood with square edge
- See edge profiles below.
- 2 High-Pressure Laminate or wood color number for table
- 3 Plastic color number for edge on laminate table, if selected
- 4 Options, if selected (see below)
- See *Surface Materials*, page 246.

For wood and laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Select the reinforcing channel option if the table will be supported by legs. Channels are not required if the table will be supported by T- or X-bases.

Tip: Bases and legs to support Universal Tables must be specified separately.

Tip: For base and leg support guidelines, ► See Table and Base Combinations, page 224 and Table and Leg Combinations, page 225.

Tip: To specify 3 mm edge profile, no suffix is required. For other edge profiles, add suffix to the style number. (For example, BFRR3672 becomes BFRR3672SW for wood square edge profile.)

Surface Materials

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials

Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Paint

Tip: All products may not be available in all colors listed below.

► See page 249 for an overview of the paint colors available on each component.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Universal worksurfaces and Universal Storage tops, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Universal tables—wood veneer

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Ⓔ = Established

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Surface Materials, continued

Select Surfaces**Composite Veneer**

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

3HGX QC/OP Oak Composite
3HVX QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Wood Veneer Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Verb

Verb is an integrated collection of classroom furniture designed to support a full range of teaching and learning styles on demand.

Tables come standard with access legs. Other options are available.

Verb worksurfaces are 1¹/₈" thick wood-core with High-Pressure Laminate top and plastic edge band.

Plastic components are optional and used to provide storage and display for Verb whiteboards.

Seated height-adjustable post legs are available on personal, student, and media tables only, not on teaching stations.

Standing height-adjustable post legs are available on student and media tables, not on personal tables or teaching stations.

Teaching stations can be installed with the lectern on the left- or right- hand side of the table.

Active media tables

Verb active media workspaces are 1" thick wood-core with High-Pressure Laminate tops and plastic edge bands.

Flip-top tables

Flip-top legs are available on student tables and not on personal tables, media tables, or teaching stations.

Personal Tables

The Verb ecosystem is designed to quickly and easily reconfigure while providing equal access to collaborative tools.

Verb personal tables are designed for active learning environments where flexibility and engagement are key. Personal tables provide a highly mobile, easy to reconfigure personal workspace that supports the active learning environment.

Product Details

Personal tables come in keystone, rectangle, and triangle shapes to support active learning in a small footprint.

The keystone shape table provides the optimal reconfiguration capability in a small footprint, and can achieve the same arc created in lecture applications as the chevron table. Keystone tables are available with access legs, and seated height-adjustable post legs with glides.

The rectangle shape table supports more traditional configurations in small footprints. Rectangle tables are available with access legs, and seated height-adjustable post legs with glides.

The triangle shape table supports small footprints and is standard with three access legs with glides.

Triangle tables have a rounded rear corner to support lecture and discussion applications and provide access to Thread hubs.

39" width is the smallest a table can be while still being ADA compliant. ADA regulations require a minimum of 36" between the inside of the table legs.

Worksurfaces are wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have a 2" radius.

Side docks allow display of whiteboards on the tables. For best results, rock the boards into place rather than pressing straight down. Side hooks allow storage of up to four boards per hook.

Tip: Side docks are not available on 19"D personal tables with casters.

Tip: Only one side dock set is available on triangle tables. ▶ See Dock Storage Availability, page 280.

Two leg designs are available on personal tables, the access leg and the seated height-adjustable post leg.

Personal tables come standard with the access leg with non-locking casters. Access legs are also available as an option with four locking casters, four glides, or two non-locking casters and two glides.

Seated height-adjustable post legs are available with four glides on personal tables. ▶ See *Table Top and Leg Choices*, page 278.

Table height on access legs is 28½". On seated height-adjustable post legs, the midpoint is 28½" and the legs adjust 4½" up and 4½" down for a total range of 24"–33".

Tip: Tables with seated height-adjustable post legs set below standard table height will not allow the personal whiteboards to be hung on the plastic side hooks as they will not have sufficient clearance. The boards may still be used with the side docks since table height does not affect board display.

Glides are available and are used for leveling for installation on uneven floors. The glide is 1½" long and provides 1" of leveling.

Tables

Verb tables are designed for active learning environments where flexibility and engagement are key.

Product Details

Tables have chevron shape tables, team shape tables, trapezoid shape tables, and rectangle shape tables.

The chevron shape tables provide a sense of personal space division as well as creating a subtle arc when in lecture mode to allow line of sight to everyone in the row.

The team shape tables are designed specifically for small group work and project teams, offering the same angled shape as the chevron tables but on both sides of the table.

On 84"W chevron and team tables, there is a slight modification to the shape to allow three people to sit at the table instead of two. Rather than having two facets on the angled side of the table, 84" tables have three facets.

The trapezoid shape table is designed specifically for small group work and project teams. Each table can accommodate three people.

The rectangle shape tables can be used for more traditional applications as well as when smaller table sizes are necessary because the rectangle tables are available in 39" and 48" widths as well as the larger sizes.

39" width is the smallest table can be while still being ADA compliant. ADA regulations require a minimum of 36" between the inside of the table legs.

Worksurfaces are wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have a 2" radius.

Center docks are optional and used to provide a storage area for markers, erasers, and other items students may bring as well as providing a dock for supporting test mode.

84"W tables are designed to have three students and will have two center docks (if center docks are specified).

Center docks are not available on tables smaller than 60" because they are designed primarily for test mode and tables smaller than 60" do not accommodate two students.

Tip: Center docks are not available on team and trapezoid tables.

Side docks allow display of whiteboards on the tables. For best results, rock the boards into place rather than pressing straight down. Side hooks allow storage of up to four boards per hook.

Side docks may only be placed on the angled sides of the trapezoid table.

► See *Dock Storage Availability*, page 280.

Three leg designs are available on tables: the access leg, the seated height-adjustable post leg, and the standing height-adjustable post leg.

Access legs with non-locking casters are standard on tables. Access legs are also available as an option with four locking casters, four glides, or two non-locking casters and two glides.

Seated height-adjustable post legs are available with four non-locking casters, four locking casters, four glides, or two non-locking casters and two glides.

Tables that are either 19"D or up to 39"W are available with glides only when using the seated height-adjustable post legs due to stability test requirements.

Standing height-adjustable post legs are available with four non-locking casters, four locking casters, four glides, or two non-locking casters and two glides.

Tip: Standing height-adjustable trapezoid tables are only available with glides.

Table height on access legs is 28½".

On seated height-adjustable post legs, the midpoint is 28½" and the legs adjust 4½" up and 4½" down every ¾" for a total range of 24"-33".

Tip: Tables with seated height-adjustable post legs set below standard table height will not allow the personal whiteboards to be hung on the plastic side hooks as they will not have sufficient clearance. The boards may still be used with the side docks since table height does not affect board display.

► See *Table Top and Leg Choices*, page 278.

On standing height-adjustable post legs, legs adjust every ¾" for a total range of 28½"-42".

Modesty panels are available for chevron and rectangle tables and are made of painted steel. Modesty panels are not available on 19"D x 39"W or 24"D x 39"W rectangle tables. *Tip: When ordering tables with a modesty panel, it is not necessary to order optional reinforcing channel as the modesty panel acts as a reinforcing channel.*

Tip: On tables 24"D with standing height-adjustable post legs and modesty panels, chevron and rectangle tables are only available with glides.

Tip: On tables with standing height-adjustable post legs and casters, chevron tables 30"D x 60"-84"W must be used with a modesty panel.

Tip: On tables with standing height-adjustable post legs and casters, rectangle tables 30"D x 48"-84"W cannot be used with a modesty panel.

Reinforcing channel is not required on tables smaller than 60"W. On tables 60"-72"W a reinforcing channel is strongly recommended for medium to heavy duty applications to minimize deflection over time. 84"W tables come standard with a reinforcing channel.

Glides are available and are used for leveling for installation on uneven floors. The glide is 1½" long and provides 1" of leveling.

Media Tables

Verb media tables are designed for active learning environments where flexibility, student engagement, and technology collaboration is important.

Media tables are offered in three shapes to encourage collaboration through technology display and facilitate a seamless flow of information sharing during the learning process. The tables optimize the use of media:scape mini and media:scape mobile, while also offering the ability to incorporate personal whiteboards for analog content creation.

Product Details

Media tables come in three shapes; rounded, square, and trapezoid.

The rounded shape table provides seamless small group, face-to-face, and technology collaboration. The rounded table can accommodate up to five people.

The square shape table provides small group, face-to-face and technology collaboration in a smaller footprint. The square table can accommodate up to six people.

The trapezoid shape table provides an optimal view of technology screens and more surface for class materials. The trapezoid tables can accommodate up to five or six people.

Worksurfaces are 1 1/8" thick wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have 2" radius.

Side docks allow display of whiteboards on the tables. For best results, rock the boards into place rather than pressing straight down. Side hooks allow storage of up to four boards per hook.
▶ See *Dock Storage Availability*, page 280.

Three leg designs are available on media tables, the access leg, the seated height-adjustable post leg, and the standing height-adjustable post leg.

Access legs with non-locking casters are standard on media tables. Access legs are also available as an option with four locking casters, four glides, or two non-locking casters and two glides.

Seated height-adjustable post legs are available with four non-locking casters, four locking casters, four glides, or two non-locking casters and two glides.

Standing height-adjustable post legs are available with four non-locking casters, four locking casters, four glides, or two non-locking casters and two glides.
▶ See *Table Top and Leg Choices*, page 278.

Table height on access legs is 28 1/2".

On seated height-adjustable post legs, the midpoint is 28 1/2" and the legs adjust 4 1/2" up and 4 1/2" down every 3/4" for a range of 24"-33".
Tip: Tables with height-adjustable legs set below standard table height will not allow the personal whiteboards to be hung on the plastic side hooks as they will not have sufficient clearance. The boards may still be used with the side docks since table height does not affect board display.

On standing height-adjustable post legs, legs adjust every 3/4" for a total range of 28 1/2"—42".

Reinforcing channels are standard on all media tables.

Glides are available and are used for leveling for installation on uneven floors. The glide is 1 1/2" long and provides 1" of leveling.
Tip: Glides must be used on media tables when used with media:scape mini.

Active Media Tables

Verb active media tables provide versatile, intuitive, and unobstructed technology support for the classroom. The mobile table can support a range of existing technology and provide a flexible, cost-effective solution for institutions. Digital and analog white board storage and display integration encourages continuous collaboration and idea-sharing among students and educators.

Active media tables come in three sizes: rectangle, rounded, and tapered.

Optional side docks allow for display of whiteboards on the table while stow hook allows for the storage of whiteboards on the table. Stow hooks allow storage for up to two whiteboards per hook.

Brackets, legs, and shroud share the same finish.

Worksurfaces are 1" thick wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have 2" radius.

The media case top can be selected with a contrasting finish. The media case surface and table worksurface will always match.

Access legs with locking casters are standard on active media tables.

Verb active media tables are designed for active learning environments where flexibility, student engagement, and technology collaboration is important.

Active media tables are offered in three shapes to encourage collaboration through technology display and facilitate a seamless flow of information sharing during the learning process. The tables offer the ability to incorporate personal whiteboards for analog content creation.

Product Details

Active media tables come in three shapes; rectangle, tapered, and rounded.

Worksurfaces are 1" thick wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have 2" radius.

Side docks allow display of whiteboards on the tables. For best results, rock the boards into place rather than pressing straight down. Side hooks allow storage of up to four boards per hook.

Side dock and hooks are not available on the rounded active media table.

Access legs with non-locking casters are standard on active media tables. Access legs are also available as an option with glides.

Table height on access legs is 28½".

Reinforcing channels are standard on all active media tables.

Glides are available and are used for leveling for installation on uneven floors. The glide is 1½" long and provides 1" of leveling.

Media Case

Lift mechanisms have a 130 pounds total lift capacity with a near silent operation and no exposed tracks or gears. The monitor lift can be fully raised in 15 seconds. Lift control box comes standard with a contact closure interface.

Lift mechanism for 32" deep tables:

- Supports up to a 32" monitor
- Travels 23"

Lift mechanism for 43" deep tables:

- Supports up to a 43" monitor
- Travels 26½"

Universal mounting patterns accommodates standard VESA mounts:

- 75 mm x 75 mm
- 100 mm x 100 mm
- 200 mm x 100 mm
- 200 mm x 200 mm

The active media case is designed with a lid that has a 2" overhang over the worksurface.

Available space for technology within the media case:

- 34" case:
- A: 2¾" (75 mm)
 - B: 15¾" (400 mm)
 - C: 8" (210 mm)
- 43" case:
- A: 3¾" (96 mm)
 - B: 13¾" (350 mm)
 - C: 12" (310 mm)

Technology

The active media table is a technology agnostic solution, allowing one to bring their own technology application to the table. Customers are responsible for bringing and integrating technology and audio visual components.

Tip: Consult an AV or IT professional early on in the design process for potential technology applications.

User power trough provides access to power and technology connections for everyone at the table (3 outlet, 1 dual USB and 3 knockouts) or (3 Outlet, 1 dual USB and extron adapter plate cover).

Tip: AV cords or extron AAP super plates will not be included, customers will need to specify own AV configuration.

Technology components can be securely mounted to the media case and powered by the power receptacles within the media case.

Wire managers allow ease of cable routing and managing.

Flip-Top Tables

Verb flip-top tables are a folding and nesting table for active spaces. With easy to use one-handed folding lever and mechanism, one person can set it up, take down, move, and compactly store a roomful of tables with minimal effort. The table series is available in three shapes with two leg configurations on casters.

Legs are extruded and die-cast aluminum available in cast base.

Cast leg:

- 19"D, 24"D, and 30"D tables
- Chevron, team, and rectangle tables

Top is 1" thick particle board core with laminate surface and three backer finishes.

Nesting depth between tables is 3¾".

Verb flip-top tables are designed for active learning environments where flexibility and student engagement are key.

Product Details

Flip-top tables have chevron shape tables, team shape tables, and rectangle shape tables.

The chevron shape tables provide a sense of personal space division as well as creating a subtle arc when in lecture mode to allow line of sight to everyone in the row.

The team shape tables are designed specifically for small group work and project teams, offering the same angled shape as the chevron tables but on both sides of the table.

Casters are 3" diameter, dual wheels that allow the tables to move easily on carpet or hard floors. Flip-top tables are standard with two locking casters (user/flip-handle side) and two non-locking casters. Glides are not available on the flip-top table.

On 84"W chevron and team tables, there is a slight modification to the shape to allow three people to sit at the table instead of two. Rather than having two facets on the angled side of the table, 84" tables have three facets.

The rectangle shape tables can be used for more traditional applications as well as when smaller table sizes are necessary because the rectangle tables are available in 39" and 48" widths as well as the larger sizes.

Worksurfaces are wood-core with High-Pressure Laminate top and plastic 3 mm edge band. All corners have a 2" radius.

Center docks without storage are optional and provide a dock to support test mode.

84"W tables are designed to have three students and will have two center docks (if center docks are specified).

Center docks are not available on tables smaller than 60" because they are designed primarily for test mode and tables smaller than 60" do not accommodate two students.

Tip: Center docks are not available on team tables.

Side docks allow display of whiteboards on the tables. For best results, rock the boards into place rather than pressing straight down. Side hooks allow storage of up to four boards per hook.

Stow hook allows for easy whiteboard storage when the table is in flipped mode.

Cast legs with two non-locking and two locking casters are standard on flip-top tables. Legs are also available with four locking casters.

Table height on legs is 28½".

Reinforcing channel is not required on tables smaller than 60"W. On tables 66"W to 84"W, reinforcing channel comes standard to minimize deflection. The reinforcing channel will match the understructure finish selection (light, medium, or dark).

Flip-top modesty panels are constructed of a light-weight fiberglass substrate wrapped with Buzz2 fabric. Panel attaches to the underside of the table with a plastic extrusion that allows the panel to rotate from both the in-use and nested position with ease. Modesty panel stays with the table when flipped and in nesting position, or in-use position. Modesty panels are available for 39", 48", 60", 66", 72", and 84" flip-top rectangle and chevron tops.

Leg bumper will always be the main point of contact between two nesting tables, even with the stow hooks and whiteboards.

Tables should be inspected and maintained regularly by tightening screws and bolts, inspecting casters for damage, and inspecting all moving parts for damage and wear.

Release handle is black and only used to unlock the table from the in-use position. Flip-top tables in the in-use position have a natural flex in them and are not completely static.

Rectangle table dimensions shown above

Flip-top tables can be nested for space saving storage. Each nested flip-top table adds approximately 3¾" to the nesting depth.

Surface Materials

Top

- High-Pressure Laminate
- Open Line laminate (option)

3 mm radius profile edge

- Plastic

Access legs, seated height-adjustable post legs, and standing height-adjustable post legs

- Paint

Dock and hooks on student tables

- 6059 Sterling Dark Solid
- 6249 Platinum Solid
- 6259 Midnight
- 6337 Element

The underside of the table can be specified in one of three color options:

- Light
- Medium
- Dark

Teaching Stations

The Verb teaching station is designed to provide support for a range of postures and work modes, including instruction, collaboration, and concentrated work.

Product Details

Verb teaching station work surfaces are wood-core with High-Pressure Laminate top and plastic 3 mm edge band.

Teaching stations are 30"D and come in 50", 60", and 72" widths.

Modesty panels are optional on teaching stations.

The lectern can be installed on the right or left side of table.

Access legs with non-locking casters come standard on teaching stations. Access legs are also available as an option with four locking casters, four glides, or two non-locking casters and two glides.

Tip: Seated and standing height-adjustable post legs are not available on teaching stations.

► See *Table Top and Leg Choices*, page 278.

The lectern top and lectern arm swivel 360° allowing for maximum position flexibility and enhanced sightlines.

The lectern has an ergonomic 8° slant and a ledge at the bottom.

The lectern top is a High-Pressure Laminate with a urethane edge.

The lectern has an optional cup holder.

Easel and Wall Track

Verb easel facilitates effective display, storage, and presentation of Verb whiteboards.

Verb wall track offers additional display options for the Verb whiteboards and can add functionality to otherwise blank walls.

Product Details

Two-sided easel comes standard with two shelves on each side and is 36"W.

Each easel comes standard with casters for ease of mobility.

The easel top shelf can be used to store markers and erasers and is available only in 6249 platinum solid finish.

Wall track comes in 6' and 8' lengths and is made from extruded anodized aluminum. It may be easily cut to length in the field.

Each wall track comes standard with hooks for use with the whiteboards.

Maintenance

- Wipe board with a clean cloth moistened by a liquid markerboard cleaner or a solution of 50% water and 50% isopropyl alcohol.
- Rinse with clear water.
- Wipe dry with a clean cloth. If your board is used daily, the cleaning should be performed at least 2-3 times a week.

More thorough cleaning may be required if writing is left on the board for more than two days.

Markers

Use any high-quality dry erase marker.

CAUTION! The use of Low Odor markers may cause ghosting to occur. If Low Odor markers have been used, the surface can be completely cleaned by following the cleaning instructions above. Remember to discard eraser if used with Low Odor markers.

Removing Permanent Marker

Option 1:

- Write over the top of the permanent marker ink with a dry-erase marker
- Simply erase

Option 2:

- Moisten a clean, dry cloth with isopropyl alcohol
- Wipe the board in a circular motion to loosen marker residue
- Rinse with clear water
- Dry the board with a clean cloth
- Repeat these steps as necessary

Installer's Instructions for Initial Cleaning at Time of Installation

NOTE: These initial cleaning instructions are shipped with every board.

- For initial cleaning, wipe your board with a clean cloth moistened by a mild, alcohol-based cleaner.
- Rinse with clear water. This step is simple, but very important.
- Wipe dry with a clean cloth.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line Laminate on Verb, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Convene Conference Tables and Coordinating Furniture

Convene coordinating furniture matches the aesthetic of the Convene conference tables and is ideal for use in conference rooms and large offices. Two furniture styles are available: Contemporary and Transitional.

Wallboard is available 56"W and 70"W. Doors open 180° and the interior writing surface accommodates dry-erase markers.

Media carts are available with drawers, open shelves, and double doors in three configurations. 2½"-round grommet is standard in cart top.

Conference tables are available in a wide variety of table top and base combinations.

► See *Conference Table Top and Base Combinations*, page 312.

Table bases are available in eleven styles. Various sizes are available in both metal and wood. All bases accommodate cords and cables to bring power and data to the worksurface.

Convene Conference Tables

Convene table collection allows tops and bases to be combined to create a wide variety of conference tables with numerous power and communication options.

Product Details

Conference tables include a top and bases that are ordered separately and combined in the field. Conference tables are 29"H. *Tip: Use the Conference Table Top and Base Combinations matrix to determine the type and number of bases you need to order for the table you choose.* ▶ Page 312

Seven conference table tops are available in a variety of sizes.

Standard Edge Profiles

Large Edge Profiles

Two edge profiles are available on table tops. To keep the proportions of edge profile and table size visually consistent, tables over a certain size receive a larger edge profile. Standard edge profile is 1 1/4"D x 1 3/8"H, large edge profile is 1 7/8"D x 1 7/8"H. Edge profiles are solid wood.

Solid wood edge profiles are achieved by adding a specially shaped wood edge to table tops. Both wood and laminate table tops have solid wood edge profiles.

Solid wood edge profile finishes will not be an exact match to wood grain laminates. We highly recommend ordering physical samples to understand visual differences.

Grain direction on wood veneer tops runs the width on all tops up to 72"W. Grain direction runs the depth on all tops 84"W or wider.

Directional laminates run the width on all tops up to 60"D. Directional laminates run the depth on tops 66"D or deeper.

Conference table bases are available in nine styles—T-flex, X-flex, U-panel, X-panel, rectangular panel, circular drum, elliptical drum, and half drum. Not all bases can be used on all table tops.

▶ See *Conference Table Top and Base Combinations* matrix, pages 312–323.

Cylinder and square feet are available on certain conference table bases.

Metal T-flex and X-flex bases are available 24"W and 30"W.

U-panel and X-panel bases are available 24"W, 30"W, and 36"W. U- and X-panel bases are wood and standard with cylinder feet. Square feet are available as an option.

Rectangular panel bases are available 24"W, 30"W, and 36"W. Rectangular panel bases are wood and available with a recessed toe kick plate in a metallic or black finish, cylinder feet, or square feet.

Freestanding table base is available 28"W.

Circular drum bases are available 24"W, 30"W, and 36"W. Circular drum bases are wood and available with a recessed toe kick plate in a metallic or black finish.

Half drum bases are available 24"W, 30"W, and 36"W. Half drum bases are wood and available with a recessed toe kick plate in a metallic or black finish.

Elliptical drum bases are available 24"W, 30"W, and 36"W. Elliptical drum bases are wood and available with a recessed toe kick plate in a metallic or black finish.

Leveling glides adjust to install tables on uneven floors. Leveling glides are standard on all bases.

Connections

Conference table combinations require a certain size and number of bases to support a specific top. ▶ Page 312

Wiring & Cabling

2 1/2"-round grommets are available factory installed on conference tables to allow cords and cables to pass through the top.

Power channels are available in the table top to provide lay-in cable routing and access to electrical outlets and voice and data receptacles. Technology covers are included to conceal outlets and receptacles. Tables can accommodate one or two power channels depending on table dimensions. Power channels are standard with a conduit and must be hardwired in the field.

Tip: Power channels cannot be used on any table supported with an X-panel base. ▶ See *Availability of Conference Top Options*, page 334.

Power units are available in the table top to provide access to electrical outlets and voice and data receptacles. Technology covers are included to conceal outlets and receptacles. Tables can accommodate one, two, four or six power units depending on table dimensions. Power units are standard with a conduit and must be hard-wired in the field.

Tip: Power units cannot be used on any table supported with T-flex, or X-flex bases.

► See Availability of Conference Top Options, page 334.

Power channels and power units have an opening for data that can be filled. The first method is two simplex voice/data jacks (customer supplied).

The second method is two single space Extron Electronics Architectural Adapter Plates (AAPs) for data solutions. These are supplied by the customer and can be used in any combination.

Flip up power unit provides two electrical outlets at worksurface height. Power unit is flush with worksurface when not in use. It has a 6' power cord with grounded plug. This is field-installed only.

Removable wire access covers on power channels and power units allow cords and cables to pass through the table top. The cover, when replaced, holds cords in place.

Factory-cut holes for power and communication spheres and ports are available as options on conference table tops. Tables can accommodate one, two, or four holes depending on table dimensions. Power and communication spheres and ports must be specified separately.

► See Availability of Conference Top Options, page 334.

Decorative round and oval port covers snap on to the plastic cover that ships standard with the ports. Covers are metal and available in two metallic finishes.

Power and Communication Accessory Locations

► Page 330

X-panel and U-panel bases can accommodate cords and cables through cutouts in the top and cavities that run all the way through to the floor.

Rectangle panel, half drum, elliptical drum, and round drum bases can accommodate cords and cables through a wire access cavity with a removable panel. A hole is standard in the bottom of the half drum, elliptical drum, and round drum for direct access to floor monuments.

T-flex and X-flex bases can accommodate cords and cables routed through the center and out through an opening in the bottom.

Application Topics

Conference tables are shipped knocked down and are assembled in the field. All conference table tops ship as on piece with the following exceptions:

The following table tops are shipped in two pieces:

- 66" and 72" diameter round tops
- 54"D x 144"W oval tops
- 60"D x 144"W/168"W oval tops
- 48"D x 144"W rectangular, boat-shape, and racetrack tops
- 54"D x 144"W/168"W rectangular, boat-shape, and racetrack tops
- 60"D x 144"W/168"W/192"W/216"W rectangular, boat-shape, and racetrack tops

The following table tops are shipped in three pieces:

- 66"D x 144"W/168"W, 72"W x 168"W/ oval tops
- 66"D x 144"W/168"W rectangular, boat-shape, and racetrack tops
- 72"D x 168"W rectangular, boat-shape, and racetrack tops

The following table tops are shipped in four pieces:

- 66"D x 192"W, 72"D x 192"W/216"W oval tops
- 66"D x 192"W/216"W rectangular, boat-shape, and racetrack tops
- 72"W x 192"W/216"W rectangular, boat-shape, and racetrack tops

Actual Dimensions

Conference Table Tops

Table top thickness	1 ³ / ₈ "
Round table top diameter	36", 42", 48", 54", 60", 66", or 72"
Square table top depth and width	36", 42", 48", 54", or 60"
Oval table top depth	36", 42", 48", 54", 60", 66", or 72"
Oval table top width	60", 66", 72", 84", 96", 108", 120", 144", 168", 192", or 216"
Rectangular and racetrack table top depth	36", 42", 48", 54", 60", 66", or 72"
Boat-shape table top depth	30"/36", 36"/42", 41"/48", 46"/54", 51"/60", 56"/66", or 61"/72"
Rectangular, boat-shape, and racetrack table top width	60", 66", 72", 84", 96", 108", 120", 144", 168", 192", or 216"

Conference Table Bases

T-flex and X-flex base width	24" or 30"
U-panel and rectangular panel base depth	4" or 6"
U-panel and rectangular panel base width	24", 30", or 36"
X-panel width and depth	24", 30", or 36"
Elliptical drum width	24", 30", or 36"
Circular drum base diameter	24", 30", or 36"
Half drum width	24", 30", or 36"
Freestanding table base	28"

Convene Contemporary-Style Coordinating Furniture

Product Details

Media carts, 32"W and 38½"H, are available with casters or feet. Media carts are available with an open shelf, drawer, and double doors in three configurations.

Table top lectern is 16½"H and includes a task light and a wire management channel for routing cords and cables.

Full-height lecterns are 48"H and are available with casters or feet. Task light and wire management channel for routing cords and cables are included. Full-height lecterns are available with a non-locking door.

Cylinder feet are standard on lecterns. They are also available on media carts. Square feet are available as an option wherever cylinder feet are offered.

Pulls are available in three styles—jazz, Nile, and tab.

Nile and jazz pulls are located in the positions indicated above.

Tab pulls are located in the positions indicated above.

Convene edge profile samples can be ordered to meet your specifications. These 12"D x 12"W work-surfaces can be ordered in veneer or laminate and any Convene edge profile.
▶ Page 376

Lock & Keying

Locks are available factory- or field-installed. Factory-installed locks are standard and available keyed random only. Optional field-installed locks are available with consecutive, specific, and random keying options. Master-keyed locks are also available. Field-installed lock cylinders must be specified separately.
▶ *Lock and Keying*, page 500

Media carts have locks located on both double doors.

Wiring & Cabling

Media carts are standard with a grommet.

Media cart back panel folds down to allow access to wire management cavity.

Surface Materials

Specifying Conference Top Options

Grommets

► See Availability of Conference Top Options, page 334.

Options	U.S. Price	Required to Specify
• One 2½"-round grommet	+\$117	Center: Specify <i>with CGRC</i> and select 0835 Black, 4799 Platinum Metallic, 9201 Polished Chrome, or 9211 Nickel.
• Two 2½"-round grommets	+\$234	Left/Right: Specify <i>with CGRLR</i> and select 0835 Black, 4799 Platinum Metallic, 9201 Polished Chrome, or 9211 Nickel.
• Four 2½"-round grommets	+\$468	Left/Center/Center/Right: Specify <i>with CGRLCCR</i> and select 0835 Black, 4799 Platinum Metallic, 9201 Polished Chrome, or 9211 Nickel.

Power Channels

► See Availability of Conference Top Options, page 334.

Tip: Power channel conduit must be hard-wired in the field.

Tip: Power channels cannot be used on tops supported by X-panel bases.

Tip: Power channels cannot be used on 54"D x 120"W oval tops supported by T- or X-flex bases.

Tip: Technology covers are included with power units and power channels. Specify additional covers only if you need a different style or replacements.

Tip: AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at extron.com.

Options	U.S. Price	Required to Specify
<ul style="list-style-type: none"> One power channel <ul style="list-style-type: none"> Power channel with four electrical outlets and 6' conduit for hardwiring in the field Faceplates to accommodate four customer-supplied voice/data receptacles Two square and two wire access technology covers In place of the faceplates provided, up to four single space Extron Electronics Architectural Adapter Plates (AAPs) can be used for data solutions Sleeve: paint or metal 	+\$1128	Center: Specify <i>with CPCC</i> and select technology cover color: 2868 Cameo White Low Gloss (default) or 2869 Nocturne Black Low Gloss. Select sleeve color: 0835 Black or 4799 Platinum (default).
<ul style="list-style-type: none"> Two power channels <ul style="list-style-type: none"> Two power channels each with four electrical outlets and 6' conduit for hardwiring in the field Faceplates to accommodate eight customer-supplied voice/data receptacles Four square and four wire access technology covers In place of the faceplates provided, up to eight single space Extron Electronics Architectural Adapter Plates (AAPs) can be used for data solutions Two sleeves: paint or metal 	+\$2256	Left/Right: Specify <i>with CPCLR</i> and select technology cover color: 2868 Cameo White Low Gloss (default) or 2869 Nocturne Black Low Gloss. Select sleeve color: 0835 Black or 4799 Platinum (default).

Power Units

► See Availability of Conference Top Options, page 334.

Tip: Power unit conduit must be hardwired in the field.

Tip: Technology covers are included with power units and power channels. Specify additional covers only if you need a different style or replacements.

Tip: AAPs are available from Extron Electronics. For information on AAPs and to find an Extron Electronics dealer, contact Extron at 800.633.9876 or online at extron.com.

Options	U.S. Price	Required to Specify

Specifying Conference Top Options, continued

Factory-Cut Hole for Power and Communication Accessories

► See Availability of Conference Top Options, page 334.

Tip: Remember to order the power and communication ports and spheres separately.
► Page 500

Tip: Oval ports cannot be used on the following top and base combinations:
— 54" x 120" oval tops with T- or X-flex bases
— 54" x 144" oval tops with X-panel bases
— 60" x 144" racetrack, rectangle, and boat-shape tops with elliptical drum bases.

Options	U.S. Price	Required to Specify
Hole for power and communication sphere		
• One 3" diameter hole	+\$ 49	Center: Specify with CPSC. Left/Right: Specify with CPSLR. Left/Center/Center/Right: Specify with CPSLCCR.
• Two 3" diameter holes	+\$ 98	
• Four 3" diameter holes	+\$196	
Hole for round power and communication port		
• One 3½" diameter hole	+\$ 49	Center: Specify with CSPC. Left/Right: Specify with CSPLR. Left/Center/Center/Right: Specify with CSPLCCR.
• Two 3½" diameter holes	+\$ 98	
• Four 3½" diameter holes	+\$196	
Hole for oval power and communication port		
• One 12"W hole	+\$ 49	Center: Specify with CLPC. Left/Right: Specify with CLPLR.
• Two 12"W holes	+\$ 98	

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.
► See page 1 for details.

Round Wood Conference Table Tops

Tip: Your specification is not complete until you add a third letter to the style number to define the table top edge profile.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Wood veneers and solid wood finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

❸ = Established

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available or quarter cut, except for Oak, which is rift cut.

► Refer to the *Veneer Cut Guidelines* on page 381 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Flat-cut open-pore

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry ❸
- 3422 FC/OP Medium Cherry

- 3592 FC/OP Blonde on Maple ❸
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3752 FC/OP Medium Walnut ❸
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Flat-Cut Open-Pore, Natural Veneer

- 3342 FC/OP Black Walnut
- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

Quarter-Cut Open-Pore

- 3042 QC/OP Ash
- 3222 QC/OP Clear Maple
- 3292 QC/OP Blonde on Maple ❸
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3352 QC/OP Medium Walnut ❸
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

Quarter-Cut Open-Pore, Natural Veneer

- 32A2 QC/OP Blanch Maple
- 33A2 QC/OP Thunder Walnut
- 3392 QC/OP Black Walnut

Rift-Cut Open-Pore

- 3602 RC/OP Desert Oak

Rift-Cut Full-Fill, Natural Veneer

- 36A2 RC/OP Volcanic Oak

Wood Group 3

Flat-Cut Open-Pore, Natural Veneer

- 3082 FC/OP Washed Walnut

Wood Group 1

Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry ❸

Rift-Cut Full-Fill

- 3604 RC/FF Desert Oak

Wood Group 3

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surface program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

3832 QC/OP Figured Anegre

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Wood Group 1

Flat-Cut Open-Pore

3GGX QC/OP Zebrano Composite
3HGX QC/OP Oak Composite
3HVX QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1000 fee at any point within five years after the \$1500 initiation fee was paid. If the finish is not reactivated within five years after the \$1500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Veneer Cut Guidelines

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Plated and Painted Metal Color Availability Matrix

Plated and Painted Metal

Not every plated metal color is available on every metal component for every product line. This matrix gives you an overview of which plated metal colors are available on each product line and component.

Tip: Table tops are tapered. Depth will change over the length of table from the depth listed above to a 36\"D.

Tip: Straight shape type is available parametrically in 1/16\" increments.

Tip: Softened shape type is available parametrically in 3\" increments for laminate tops and 1/16\" increments for wood veneer tops.

Tip: Straight shape is available with rounded corners only.

Verlay Collaboration Tables

Verlay is a suite of tables created for collaborative environments and was designed to encourage the smooth flow of ideas across the office landscape. Verlay's wood design offers a material range that provides a comfortable presence to the workplace.

Verlay consists of a series of table shapes and sizes, supporting a wide array of settings from small collaboration to large conference rooms with a modern design aesthetic with multiple leg materials and types.

Solid wood legs offered in oak, maple, or walnut.

CC grommet is available.

Top in wood veneer or High-Pressure Laminate.

Leg bracket below the worksurface of wood leg tables adjusts from 28½" to 29⅜" to level the table on uneven floors.

Tan, flat, plastic foot glides.

Metal legs offered with furniture grade linoleum inserts. Glide adjustment on metal legs is 1¼".

Leg ring is painted metal, providing a foot rest when standing or seated.

CC grommet is available in standard power, USB type A, and USB type C.

Long grommet is available in standard power with data knockouts only.

Width	42" or 48"	42", 48", 54", or 60"	42" or 48"
Rectangle			
Depth	42" or 48"	42", 48", 54", or 60"	42" or 48"
Width	72", 84", or 96"	66", 72", 84", 96", 108", 120", 144", 168", 192", or 216"	96"
Sightline			
Depth	42" or 48"	36"/48"	N.A.
Width	72" or 96"	96", 108", or 120"	N.A.

Tip: Seated-height is 28½"H, standing-height is 40"H.

Tip: Available parametrically with exceptions. See parametric sizes understanding information.

Verlay Collaboration Tables, continued

Product Details

Verlay table top has a wood composite core with a wood veneer or laminate surface and is available in five different shapes; round, gumbdrop, square, rectangle, and sightline.

Round

Square, Straight

Rectangle, Straight

Sightline, Straight

Straight shapes are available on round, square, rectangle, and sightline tables and feature a choice of square or rounded corners.

Square corners, available as an option on straight shapes, have 90° corners on all four sides.

Rounded corners, available as an option on straight shapes, have a 4" radius on all four sides with a continuous edge banding.

Gumbdrop

Square, Softened

Rectangle, Softened

Sightline, Softened

Softened table shapes offer a continuous radius pillow aesthetic for seated-height tables.

Softened table shapes are available on gumbdrop, square, rectangle, and sightline tables.

Gumbdrop table is only offered with wood legs in a softened shape.

3 mm Edge, Plastic or Wood Veneer

Slice Edge, Plastic or Wood Veneer

Drop Edge, Solid Wood

Edge detail is available in three options—3 mm, slice, or drop.

Tops are 1 1/8" thick.

Slice edge gives the appearance of a thinner top which is 1/2" thick and tapers to an overall thickness of 1 1/8".

Slice edge on laminate tops with square corners will be laser edge banding.

Underside of slice edge exposes MDF core.

Drop edge gives the appearance of a thicker profile with a 1 5/8" solid wood edge. Drop edge is not available in softened shapes or on laminate tops.

Wood legs are available in solid wood, maple, oak, or walnut.

Wood leg species is specifiable for laminate top tables but for veneer top tables will default to match the veneer species.

Leg brackets are painted metal.

Leveling of wood legs occurs between the wood leg and the metal bracket. This eliminates the need for additive levelers, resulting in a visually clean interaction between floor and leg. Leg bracket adjusts from 28 1/2" to 29 13/16".

Standing-height tables are available as square or rectangle shapes, with rounded or square corners.

Leg ring is painted metal, providing a foot rest when standing or seated.

Metal legs come in a variety of types: X-leg, U-leg, trestle leg, split trestle leg, and asymmetric trestle leg.

Tip: The number of U-legs is driven by the width of the table.

► See page 288 for Verlay Leg Configurations.

A soft-touch linoleum insert lines the interior of the metal leg to conceal power and provide an accent of color. It is a flexible furniture grade linoleum.

Leveling of metal legs occurs with leveling glides that adjust for installations on uneven floors. Adjustability range is 1 1/4".

Sectioned tops will occur when the top is larger than 120"W. The top will be split into two equal sections that ship with connecting hardware.

Woodgrain laminate sectioned tops cannot guarantee a perfect match of grain pattern at the seam where the two sections join. However, the best match of grain pattern possible will be pursued.

Short grain direction

Long grain direction

Rectangular

Grain direction on woodgrain laminate tops less than or equal to 60"W are available in short or long grain. Tops greater than 60"W will always have long grain direction.

Grain direction on veneer tops less than or equal to 96"W are available in short or long grain. Tops greater than 96"W will always have short grain direction.

Power, Wiring & Cabling

Surface power is available with two options—CC grommet or long grommet. Both are field installed.

CC grommet features an exposed power outlet or USB port on one side, lid concealing additional power and USB ports. The grommet bezel and lid can be specified in contrasting finishes.

Power, Power, Power

USB-C, Power, 2 USB-A

USB-C, Power, Power

Power, Power, 2 USB-A

Four power and USB configurations are available to accommodate a variety of user needs.

Single

Stacked

CC grommet is available in either single or stacked configurations.

► See Verlay Grommet Availability Matrix, page 398

Power infeed for CC grommet is available as cord and plug or hardwired. Cord and plug version has a 9' cord.

Hardwire is available in 72" or 144" conduit length options.

Tables with three or more CC grommets include a junction box which mounts to the underside of the worksurface and replaces the infeed. Electrician supplied conduit feeds the junction box and connects to the hardwire conduit of the grommet electrical system.

Verlay Collaboration Tables, continued

Wire management tray for CC grommet attaches to the underside of the table. The tray houses the CC grommet power squid box and manages cables. Cables can route out of the tray through side access holes or bottom center hole.

Plastic knobs allow the tray to drop and tilt for easy access to the contents of the tray.

36"W

26"W

20"W

2 13/16"

varies with table width

2 5/16" dia.

10 1/16"

Number of trays and tray size varies based on table size and number of CC grommets. Tray sizes are 20"W, 26"W, and 36"W.

Tip: Wire management tray is only included when CC grommet is specified and is not available on square tables less than 48" and round tables less than 54".

Long grommet features two metal hinged doors that allow for access to power and data tray.

Long grommet has an internal depth of 3 1/2". Below the worksurface depth extends to 4 1/2". This includes the added dimension of power outlet boxes.

The tray includes four power receptacles and two cutouts for modular data housings located at each end of the tray.

Number of long grommets can be specified from one to four but is dependent on table size.

► See *Verlay Grommet Availability Matrix*, page 398

Power infeed for long grommet is available as cord and plug or hardwired.

Cord and plug version has a 9' cord.

Hardwire conduit is 72" or 144".

Tables with two or more metal grommets include a junction box which mounts to the underside of the worksurface and replaces the infeed. Electrician supplied conduit feeds the junction box and connects to the hardwire conduit of the grommet electrical system.

Interior of tray is accessible by the user and has ample room to manage cords and power bricks.

Black mesh cable manager with velcro attachment manages cables down the inside of wood leg tables. Leg features a routing for cable manager to nest. Cable manager ships standard with wood leg tables.

Interior of metal legs allow for cable routing concealed by the linoleum insert.

Access holes at the bottom of each leg allows cables to exit. When fully recessed, glides allow cables to route from underneath the leg. One leg will accommodate grommet power cord or hardwire conduit. Each other leg can house either one power cord or up to three category six cables.

Parametric Sizes

Parametric dimensions are available on Verlay tables.

Tables are available in 1/16" increments with the following exceptions:

- Softened shape tables with laminate tops are only available in 3" increments.
- Standing-height tables are not available parametrically.

Surface Material

Table top

- Laminate
- Wood veneer
- Customiz stain (optional on wood)
- Full-fill finish (optional on wood)

Edge profile

- Plastic edge on laminate tops with 3 mm and slice edge
- Wood veneer edge on wood veneer tops with 3 mm or slice edge
- Solid wood edge on wood veneer

Laser edge band

finishes (for laminate table tops with square corners and slice edge):

- 6000 Black
- 6052 Milk
- 6053 Seagull
- 6213 Acacia
- 6654 Sand

Wood leg species

- Oak
- Maple
- Walnut

Tip: Leg species is driven by the natural veneer top species.

Tip: Composite veneer table tops do not provide an exact match to a solid wood leg.

Leg bracket for wood legs

- Painted metal
- PerfectMatch paint
- Lux Coatings on metal

Metal legs

- Painted metal
- PerfectMatch paint
- Lux Coatings on metal

Metal leg insert

- Furniture grade linoleum

CC grommet

- Painted metal bezel and lid
- Lux Coatings on metal bezel and lid
- 6527 Merle plastic power insert

Long grommet

- Silver metallic painted metal doors
- Black power insert

Seated-Height Round Tables

With Wood Legs

► Need help?
Product details,
page 388

Standard Includes

- Top: High-Pressure Laminate price group 1 with 3 mm plastic edge
- Long grain direction
- Solid wood legs: maple
- Leg bracket: paint price group 1
- Black mesh cable manager with velcro attachment

Required to Specify

- 1 Style number
 - 2 Size option (see below under Required Selections)
 - 3 Diameter (see below under Required Selections)
 - 4 Edge profile (see below under Required Selections)
 - 5 Laminate color number for top, if selected
 - 6 Plastic color number for 3 mm plastic edge, if selected
 - 7 Paint color number for leg bracket
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 440.

Standing-Height Rectangle Tables

With Wood Legs

► Need help?
Product details,
page 388

Standard Includes

- 96"W top: High-Pressure Laminate price group 1 with 3 mm plastic edge
- Long grain direction
- Solid wood legs: maple
- Leg ring: paint price group 1
- Leg bracket: to match leg ring
- Black mesh cable manager with velcro attachment

Required to Specify

- 1 Style number
 - 2 Depth (see below under Required Selections)
 - 3 Corner shape (see below under Required Selections)
 - 4 Edge profile (see below under Required Selections)
 - 5 Laminate color number for top, if selected
 - 6 Plastic color number for 3 mm plastic edge, if selected
 - 7 Paint color number for leg ring
 - 8 Options, if selected (see below)
- See *Surface Materials*, page 440.

► Options, continued on next page

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Leg finish defaults to top surface finish if top surface is a maple, oak, or walnut species. With all other species of top surface, the leg is specifiable in any finish.

Tip: Composite veneer table tops do not provide an exact match to a solid wood leg.

Tip: When leg ring is specified, leg bracket will default to match.

Leg Type	Required Selections		U.S. Price	Required to Specify
	U-leg			
	Modular	Parametric		
	• 42"D	• 42"—47 ¹⁵ / ₁₆ "D	+\$ 198 per leg	Specify with U-leg.
	• 48"D	• 48"—53 ¹⁵ / ₁₆ "D	+\$ 232 per leg	Specify with U-leg.
	• 54"D	• 54"—59 ¹⁵ / ₁₆ "D	+\$ 331 per leg	Specify with U-leg.
	• 60"D	• 60"D	+\$ 397 per leg	Specify with U-leg.
	Trestle leg (42"D–48"D only)			
	Modular	Parametric		
	• 96"W	• 96"—107 ¹⁵ / ₁₆ "W	+\$ 662	Specify with trestle leg.
	• 108"W	• 108"—119 ¹⁵ / ₁₆ "W	+\$ 859	Specify with trestle leg.
	• 120"W	• 120"W	+\$ 925	Specify with trestle leg.
	Split trestle leg (42"D–48"D only)			
	Modular	Parametric		
	• 120"W	• 120"—143 ¹⁵ / ₁₆ "W	+\$ 993	Specify with split trestle leg.
	• 144"W	• 144"W	+\$1189	Specify with split trestle leg.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

	Options	U.S. Price	Required to Specify
Surface Materials	High-Pressure Laminate top		
	• High-Pressure Laminate price group 2	See information at left	Specify High-Pressure Laminate color number.
	• High-Pressure Laminate price group 3	See information at left	Specify High-Pressure Laminate color number.
	• Open Line laminate (OLL)	+\$ 102 plus cost of laminate	▶ See <i>Surface Materials Reference Manual</i> .
	Wood top		
	• Wood group 1	Prices at right	Specify wood color number.
	• Wood group 2	Prices at right	Specify wood color number.
	• Wood group 3	Prices at right	Specify wood color number.
	• Customiz stain	No cost	Specify <i>with Customiz stain</i> .
	• Full-fill finish on wood group 1	Prices at right	▶ See <i>Surface Materials Reference Manual</i> . Specify full-fill finish number.
Paint price group 2 for U-leg			
Modular	Parametric		
• 42"D	• 42"—47 ¹⁵ / ₁₆ "D	+\$ 72 per leg	Specify paint color number.
• 48"D	• 48"—53 ¹⁵ / ₁₆ "D	+\$ 105 per leg	Specify paint color number.
• 54"D	• 54"—59 ¹⁵ / ₁₆ "D	+\$ 138 per leg	Specify paint color number.
• 60"D	• 60"D	+\$ 172 per leg	Specify paint color number.
Paint price group 2 for trestle leg (42"D–48"D only)			
Modular	Parametric		
• 96"W	• 96"—107 ¹⁵ / ₁₆ "W	+\$ 346	Specify paint color number.
• 108"W	• 108"—119 ¹⁵ / ₁₆ "W	+\$ 380	Specify paint color number.
• 120"W	• 120"W	+\$ 416	Specify paint color number.
Paint price group 2 for split trestle leg (42"D–48"D only)			
Modular	Parametric		
• 120"W	• 120"—143 ¹⁵ / ₁₆ "W	+\$ 380	Specify paint color number.
• 144"W	• 144"W	+\$ 484	Specify paint color number.
Paint price group 3 for U-leg			
Modular	Parametric		
• 42"D	• 42"—47 ¹⁵ / ₁₆ "D	+\$ 105	Specify paint color number.
• 48"D	• 48"—53 ¹⁵ / ₁₆ "D	+\$ 138	Specify paint color number.
• 54"D	• 54"—59 ¹⁵ / ₁₆ "D	+\$ 172	Specify paint color number.
• 60"D	• 60"D	+\$ 207	Specify paint color number.
Paint price group 3 for trestle leg (42"D–48"D only)			
Modular	Parametric		
• 96"W	• 96"—107 ¹⁵ / ₁₆ "W	+\$ 484	Specify paint color number.
• 108"W	• 108"—119 ¹⁵ / ₁₆ "W	+\$ 518	Specify paint color number.
• 120"W	• 120"W	+\$ 556	Specify paint color number.

Seated-Height Sightline Tables

With Metal Legs

► Need help?
Product details,
page 388

Standard Includes

- 48"D top: High-Pressure Laminate price group 1 with 3 mm plastic edge
- Long grain direction
- Straight shape type
- Metal asymmetric trestle legs: paint price group 1
- Leg insert: furniture linoleum, Forbo

Required to Specify

- 1 Style number
 - 2 Size option (see below under Required Selections)
 - 3 Width (see below under Required Selections)
 - 4 Edge profile (see below under Required Selections)
 - 5 Laminate color number for top, if selected
 - 6 Plastic color number for 3 mm plastic edge, if selected
 - 7 Paint color number for metal legs
 - 8 Furniture linoleum color number for leg insert
 - 9 Options, if selected (see below)
- See *Surface Materials*, page 440.

3 mm Edge,
Plastic or Wood
Veneer

Slice Edge,
Plastic or Wood
Veneer

Drop Edge,
Solid Wood

Tip: Wood edge finish will match top finish.

Tip: Solid drop wood edge not available on softened shapes.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials.

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Wood

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

Wood veneers and solid wood finishes will not be an exact match to woodgrain laminates. We highly recommend ordering physical samples to understand visual differences.

Forest Stewardship Council (FSC) certified wood (veneer and core) is available on most Steelcase wood products through the Specials RFQ process.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Ⓔ = Established

Steelcase Surfaces

Veneer

Veneers are matched for proper balance and consistency. Veneers are available or quarter cut, except for Oak, which is rift cut.

► Refer to the *Veneer Cut Guidelines* on page 444 for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

3VFX	OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as part of our Select Surface program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

Select Surfaces

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

3HVX QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1000 fee at any point within five years after the \$1500 initiation fee was paid. If the finish is not reactivated within five years after the \$1500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Laminate

Steelcase Surfaces

High-Pressure Laminate

Price Group 1

Applies to:

Custom Surfaces**Open Line Laminate (OLL)**

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Specify appropriate 2K finish number for the edge finish.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:
• Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Veneer Cut Guidelines

Flat Cut

Veneer is cut parallel to the flat side of the cant at a tangent to the growth rings of the tree. This produces a cathedral or oval pattern. On average, there is a 6-8" wide leaf width. On an 18" wide surface, there will likely be three leaves showing a repeated pattern.

Quarter Cut

Veneer is cut from quarter sections of the log which are produced by cutting each cant in half. Cutting lines are at an angle of approximately 90 degrees to the growth rings at the center of the quarter. This produces a straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

Rift Cut

This veneer cut is specifically for oak. Cutting lines are an arc approximately perpendicular to the growth rings. This produces a comb-like straight grain or ribbon pattern. On average, leaves are 2½-4" wide.

media:scape Tables TC

media:scape tables TC (Technology of Choice)

support small team, collaborative meeting spaces. The tables are offered in three heights to facilitate collaborative work in multiple postures.

► Specifying, page 460

media:scape tables TC

are available in three table heights: 28½"H desk-height and 38"H stool-height. Surfaces are 1⅝" thick with a wood core and are supported by a column structure. All surfaces are available in laminate or veneer and come standard with a knife edge.

Desk-height and stool-height tables TC

are available in ten shapes: square, rectangular, pear, round, small D-shaped, medium D-shaped, large D-shaped, capsule, offset, and TeamStudio (stool-height only). All are offered with an attached totem, except round.

Offset tables TC have a two-piece top which comes standard with two totems, one on each end of the table.

Totem is available in three finishes. Totems may be attached to all media:scape tables except round. The totem supports one flat screen monitor with an option to support two. An infill must be specified and is available in painted aluminum.

Surfaces are available in both laminate and veneer.

Profile surfaces have a 3 mm edge banding along all sides.

media:scape tables TC can be specified with or without the media well (cutout/power well). When a media well is specified, it houses six power receptacles, data ports, and has a hinged cover. No PUCKs, cables, or power button are included in media:scape tables without technology.

Base is available in three finishes and includes a column and legs. A stainless steel foot ring is standard on the stool-height tables.

Glides provide 1" of adjustment for leveling.

Tip: Tables can be specified without media well (cutout/power well).

Product Details

Laminate surface edges are plastic and finish selection is available.
► See *Recommended Surface Edge Finishes*, page 497, for recommendations.

Veneer surface edges are veneer and match the top surface.

Seismic anchor brackets secure the media:scape leg to the floor in seismic zones or in settings that need to be permanently attached to the floor. Brackets are ordered separately in a package of two (two packages should be ordered per table).
► See page 468.

To secure a monitor to media:scape, a locking mechanism can be ordered from an external supplier such as PDR (pdrrmounts.com/pdr2/) model number PDM-0108.

Safety Disclaimer

All Steelcase warranties and certifications are explicitly limited to the Steelcase product. For information regarding any non-Steelcase electrical or electric components, refer to the identification label(s) and use instructions provided with those components.

Power and Data

Power is included whenever the media well (cutout/power well) is specified.

Wires can be housed in the column media well.

Data:

End user accessible network cables can be connected within the media:scape media well for end users who require a physical network connection.

media:scape TeamStudio TC (Technology of Choice)

is designed for active project teams collaborating on video.

The tables are offered in stool-height to optimize for video sight lines and for multiple work modes. media:scape TeamStudio facilitates the sharing of both digital and analog information, while amplifying project team collaboration for both sides of the video conference.

► Specifying, page 467

Two opposing trapezoid-shaped tables are both optimized for video conferencing sight lines, promoting active collaboration within the space.

Circulation space allows participants the ability to move freely throughout the space, providing them easy access to analog tools such as whiteboards and flipcharts.

Displays on both sides of the application

allow for the appropriate placement of both content and video participants. TeamStudio can be specified with a single totem, dual totems, or no totems for displays.

Product Details

Safety Disclaimer

Please note that these are the parameters used by Steelcase. We do not have a way of checking that the work done in the field meets all our quality standards. Therefore, please be aware that by doing a field cutout/ retrofit/mounting additional equipment, you assume full responsibility for local inspections, workmanship, reliability, and ultimate performance of the product.

The safety certifications for this product, as it is sold without electronics, are provided by Steelcase. This product as sold has no EMC certifications because there are no electronic components using any frequency above 9,000hz (cycles per second). Any required safety and EMC certifications for any third party electronic systems provided by the owner will need to be acquired by the owner at its expense. Steelcase cannot provide any assistance in this electronic equipment certification.

Extension cables for media:scape TeamStudio are provided and can be routed through the floor (raised floor or cored) or via a cable track from an external supplier such as Connectrac model 3.7 In-carpet or On-floor Wireway (www.connectrac.com). The overall length of the cable track should be at least 116".

TeamStudio TC can be specified with or without the media well (cutout/power well). When a media well is specified, it houses six power receptacles, data ports, and has a hinged cover. No PUCKs, cables, or power button are included in media:scape without technology tables.

Under the Hood—media:scape TC

Under the Hood—
media:scape TC

A single monitor table with totem should be specified with a 46"–50" diagonal screen dimension for optimal viewing. A dual monitor table with totem should be specified with a 40"–42" diagonal screen dimension. The inside dimension of the totem, from above the table top to the underside of the totem, is 28 $\frac{1}{2}$ "H, and the internal width between the two sides of the totem is 47 $\frac{1}{2}$ "W.

Media well provides power receptacles. Data ports can be added if desired.

A 7' power cord exits the base of the column and can be plugged into the floor or wall.

Six power supply plugs are provided within the media well of every media:scape table, when specified with media well (cutout/power well).

For dual monitor solutions with a totem, a shroud is supplied to which 43" monitors can be attached.

A bridge cover for ease of cable management is included on all tables with a totem. The dimensions for this bridge cover is 5"W x 7 $\frac{7}{8}$ "H.

media:scape TC—Data Cable Routing

Data cables can be routed up through the column and connected to the data jacks housed in the media well.

When the unit is specified with no media well (no cutout/power well), the space available is 21"D x 11.32"W x 3.45"H.

Pyramid covers create a 5"W x 0.97"H opening for cables to be routed.

1. Remove covers.

2. Route cables.

Dimensions of the space available within the column for cables is 0.93"D x 3.15"W.

3. Plug in data cables.

CommScope black faceplates M13C-003 (included)

Tip: The faceplates can be removed and replaced with other standard faceplates. The faceplate opening size is 1.38"H x 2.71"W.

media:scape - well

4. Replace covers.

Slotted support structure can fit 5.5"D x 10"W x 1.6"H technology devices or components. Note that this opening exists on both sides of the column.

media:scape Display Recommendations

media:scape can work with many different brands and display sizes. For a display to seamlessly integrate with media:scape, the following physical and feature requirements must be met.

Physical Requirements

Features	Display Size (Diagonal)	Maximum Width		Maximum Height		Maximum Depth		Weight	VESA Pattern (Maximum)
	Inches	mm	Inches	mm	Inches	mm	Inches		mm
media:scape Tables TC									
Tables with single display totem	46"–50"	1194 mm	47"	711 mm	28"	91 mm	3 ¹⁰ / ₁₆ "	150 pounds	770x485 mm
Tables with dual display totem	40"–43"	991 mm	39"	711 mm	28"	91 mm	3 ¹⁰ / ₁₆ "	150 pounds	566x333 mm

Feature Requirements

- Must** have at least one HDMI input. media:scape digital switchers output audio, video, and control signals over HDMI.
- Must** support both power-on and power-off CEC commands (digital switchers only). media:scape digital switchers send a power-on command when the system wakes up and a power-off command when the system goes to sleep using CEC (Consumer Electronics Control). Consult the display's user manual and, in some cases, contact the display manufacturer's technical support staff to determine if the display supports this functionality and how to enable this functionality.
- Should** be commercial-grade such as Samsung commercial-grade displays. media:scape will work with noncommercial-grade displays; however, most noncommercial-grade displays do not support long periods of continuous usage. Double-check the warranty restrictions before purchasing a display to ensure the warranty will not be voided if the display is installed in a commercial environment.

ScapeSeries Tables

ScapeSeries table

invites others to walk up and collaborate in multiple postures. It combines cornerless curves with straight sides that may dock alongside walls more effectively than typical round café tables, resulting in a more thoughtful relationship between worksurfaces, users, and the interior architecture.

► Specifying, page 472

Shroud comes standard with the table. It clamps to the underside of the work-surface and conceals power strip (specified separately).

Surfaces are available in both laminate and veneer.

Profile surfaces have a 3 mm edge banding along all sides.

Base is available in three finishes and includes a column and legs. A stainless steel foot ring is standard on the stool-height tables.

Glides provide 1" of adjustment for leveling.

Product Details

Laminate surface edges are plastic and finish selection is available.

► See *Recommended Surface Edge Finishes*, page 497, for recommendations.

Veneer surface edges are veneer and match the top surface.

Surface Materials

Wiring and Cabling Accessories

Power and Communication Spheres and Port

Power and communication spheres and port provide convenient desktop access to power outlets and data jacks. Spheres and ports are field installed only.

Power spheres have four electrical outlets and two 6' cords with plug.
► Specifying, page 486

Power and communication spheres provide two electrical outlets, faceplates for two customer-supplied voice/data jacks, and a 6' cord with plug or conduit.
► Specifying, page 486

Oval power and communication ports have low-profile covers that are almost flush with worksurface.
► Specifying, page 487

Round power and communication port includes two outlets and two adapters to accommodate customer-supplied standard voice/data jacks.

Oval power and communication port includes four outlets and can accommodate up to six voice/data jacks. Port ships with six Cat 5e RJ 45 jacks and six Cat 3 RJ11 jacks.

Product Details

Power and communication spheres are field installed. You can specify a factory-cut mounting hole in Convene tables to accommodate spheres, or use a 3" diameter drill to cut mounting hole at desired location.

Oval power and communication ports contain an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Power and communication port contains an opening in one side of lower port that allows excess wire and cable cords to drop beneath the worksurface, leaving the port clear.

Port is field installed. Use a 3½"-diameter drill to cut mounting hole at desired location.

You can specify a factory-cut mounting hole in Convene tables to accommodate port, or use a 3½" diameter drill to cut mounting hole at desired location.

Oval port is ideal for use with conference tables or other installations requiring high-capacity power and communication. You must specify a factory-cut mounting hole to accommodate oval ports in Convene tables.

Lid of port in up position allows low-profile routing.

Lid can drop down when port is not in use and conceal outlets. Twist lid until legs line up with slots and push down until lid is flush with housing.

Lid on oval port can drop down when not in use and conceal outlets. Turn lid 180° and push down so lid will be flush with housing.

Wire manager is available to organize cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.

► Page 489

Wire clip has an adhesive back to allow it to stick to painted metal components under a worksurface for routing and managing cords. Double clip can be screwed to the underside of a worksurface.

► Page 490

Cable storage trays, field installed under the worksurface, hold cables out of the way.

Wiring & Cabling

6' power cord is included on power and communication spheres and port.

Chicago, New York City, and Los Angeles have special requirements.

Underwriters Laboratory (UL) and Canadian Standards Association (CSA) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary. Consult a qualified electrician or electrical engineer for proper installation of all electrical equipment.

Surface Materials

Power and communication ports

- Black plastic only

Wiring and Cabling Accessories, continued

Power/Power Box

► Specifying, page 488

Product Details

Power/Power box, ordered separately, provides additional electrical outlets where needed. Boxes are field-installed and can be mounted to the underside of worksurface anywhere access to power is needed.

Surface Materials**Box**

- Black paint

Actual Dimensions

Depth 3"

Width 3"

Height 1"

2½" Round Grommet

► Specifying, page 488

Product Details

2½" round grommet, ordered separately, provides wire and cable management for worksurfaces.

Surface Materials**Round grommet**

- 0835 Black
- 4799 Platinum Metallic
- 7241 Arctic White
- 7360 Merle
- 9201 Polished Chrome
- 9211 Nickel

Actual Dimensions

Depth 2½"

Width 2½"

Universal Worksurface Wire Manager

► Specifying, page 489

Product Details

Worksurface wire managers are available to convert cable scallops into grommets in freestanding applications. They are included with wood veneer worksurfaces. Wire managers can be used with Universal worksurfaces.

Surface Materials**Universal worksurface wire manager**

- 6000 Black
- 6009 Arctic White
- 6052 Milk
- 6053 Seagull
- 6249 Platinum Solid
- 6654 Sand
- 6695 Midnight
- 6697 Fog

Cable and Fiber Reel

Cable and fiber reel is available to store excess fiber-optic cable lengths. It is also suitable for storing power cables.
► Specifying, page 489

Mounting slots allow installation of reel vertically beneath worksurface.

Inner reel accommodates copper wire and other cables that can be wound tightly.

Outer reel accommodates the preferred bend radius of fiber-optic cables.

Tabs prevent cables from slipping off reel.

Key-shaped mounting hole allows quick installation and removal of reel mounted horizontally to underside of worksurface.

Product Details

Capacity of reel is approximately 12' of standard power or communication cable on outer reel and 18' of telephone-type cord on inner reel depending on the specific cable used. Neatness of installation can affect capacities. In critical situations, you should conduct a test using the specific cable types your installation requires.

Connections

Reel can be field installed vertically or horizontally in the kneespace of freestanding desks or panel-supported worksurfaces.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

- Reel**
- Black plastic only

Actual Dimensions

Depth	1 1/4"
Width	8"
Height	8 5/16"

Wiring and Cabling Accessories, continued

Termination Plate

Termination plate is available for field installation to accommodate junction boxes for connections of fiber-optic cables and other cable types.

► Specifying, page 489

Bracket allows termination plate to be connected to worksurface.

NEMA standard hole pattern allows virtually all conventional boxes and termination devices to be connected.

Opening provides access to a termination device.

Actual Dimensions	
Depth	3/4"
Width	7 1/8"
Height	7 1/8"
Center opening	2 3/4" diameter

Product Details

Faceplates and junction boxes can be added to support fiber-optic or ordinary voice/data networks.

Connections

Termination plate is field installed beneath the worksurface in any position needed. Usually, it is located at the back of the worksurface so it doesn't obstruct kneespace.

Wiring & Cabling

Chicago, New York City, and Los Angeles have special requirements.

Local electrical codes vary. Consult a qualified electrician or electrical engineer for the proper installation of electrical equipment.

Surface Materials

Termination plate

- Black plastic only

Cord Reels

► Specifying, page 490

Product Details

Cord reels, field installed under the worksurface, take up excess cord or cable.

Surface Materials

- Cord reel**
- Black paint

Wire Clips

► Specifying, page 490

Product Details

Wire clips can be used under a worksurface for routing and managing cords.

Surface Materials

- Wire clips**
- Black plastic

Wire Manager

► Specifying, page 490

Product Details

Wire manager, ordered separately, organizes cables routed vertically or horizontally beneath the worksurface. It can be cut on site as needed.

Surface Materials

- Wire manager**
- Black plastic

Actual Dimensions

Surface Materials

media:scape

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the *Surface Materials Reference Manual*. Additional details, like product approvals by geography and finish number conversions, can also be found in the *Surface Materials Reference Manual* or see steelcase.com/surface-materials under the Select Surfaces section.

Surface Materials Binders include:

- *Surface Materials Reference Manual*
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

- 2UH2 Reclaimed Gravel
- 2UH4 Cement*
- 2UH6 Sheetrock

*2UH4 Cement has limited availability, determined by product sizing and/or options.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$102 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate

on media:scape, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Surface Materials Reference Manual*.

E = Established

Wood

Applies to:

- media:scape tables
- ScapeSeries tables

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer

Wood Group 1

Flat-Cut Open-Pore

- 3062 FC/OP Graphite Walnut
- 3402 FC/OP Clear Cherry (Aged)
- 3412 FC/OP Natural Cherry **E**
- 3422 FC/OP Medium Cherry
- 3522 FC/OP Clear Maple
- 3592 FC/OP Blonde on Maple **E**
- 3702 FC/OP Clear Walnut
- 3712 FC/OP Natural Walnut
- 3752 FC/OP Medium Walnut **E**
- 3762 FC/OP Dark Walnut
- 3772 FC/OP Medium Mahogany on Walnut

Flat-Cut Open-Pore, Natural Veneer

- 3342 FC/OP Black Walnut
- 35A2 FC/OP Blanch Maple
- 37A2 FC/OP Thunder Walnut

Quarter-Cut Open-Pore

- 3042 QC/OP Ash **E**
- 3222 QC/OP Clear Maple
- 3292 QC/OP Blonde on Maple **E**
- 3302 QC/OP Clear Walnut
- 3312 QC/OP Natural Walnut
- 3352 QC/OP Medium Walnut **E**
- 3362 QC/OP Dark Walnut
- 3372 QC/OP Medium Mahogany on Walnut
- 3382 QC/OP Graphite Walnut

- 32A2 QC/OP Blanch Maple
- 33A2 QC/OP Thunder Walnut
- 3392 QC/OP Black Walnut

Rift-Cut Open-Pore

- 3602 RC/OP Desert Oak

Rift-Cut Open-Pore, Natural Veneer

- 36A2 RC/OP Volcanic Oak

Wood Group 3

Flat-Cut Open-Pore, Natural Veneer

- 3082 FC/OP Washed Walnut

Wood Group 1

Open-Pore Planked Veneer

- 3P41 OP Planked Cherry
- 3P51 OP Planked Maple
- 3P61 OP Planked Oak
- 3P71 OP Planked Walnut
- 3VFX OP Unmarked Oak

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2

Flat-Cut Full-Fill

- 3064 FC/FF Graphite Walnut
- 3404 FC/FF Clear Cherry (Aged)
- 3414 FC/FF Natural Cherry **E**
- 3424 FC/FF Medium Cherry

- 3374 QC/FF Medium Mahogany on Walnut
- 3384 QC/FF Graphite Walnut

Quarter-Cut Full-Fill, Natural Veneer

- 3394 QC/FF Black Walnut

Rift-Cut Full-Fill

- 3604 RC/FF Desert Oak

Wood Group 3

Flat-Cut Full-Fill, Natural Veneer

- 3084 FC/FF Washed Walnut

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is Wood Group 3 as part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3

Quarter-Cut Open-Pore

- 3832 QC/OP Figured Anegre

E = Established

Surface Materials, media:scape, continued

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are available as Wood Group 1 pricing as part of our Select Surfaces program.

Composite veneers are not available on Answer trims.

Wood Group 1**Flat-Cut Open-Pore**

3JDX FC/OP Oak Composite
3JJX FC/OP Walnut Composite

Quarter-Cut Open-Pore

3F8X QC/OP European Walnut Composite
3GGX QC/OP Zebano Composite
3HGX QC/OP Oak Composite
3HVX QC/OP Walnut Composite
3ZNX QC/OP Night Cerused Oak Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesce standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Lock and Keying

All locking products, are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available — the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (optional on some product lines). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders. ▶ See below.

Key Random

Required to Specify

Master key random +\$36 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field. *Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.*

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation — random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key Random

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

Key Specific

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Key Consecutive

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR FR320
5	LOCK9201FR FR350
15	LOCK9201XF XF1100
30	Total
1	877102003SR standard lock tool
1	877102002SR master lock tool

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

▶ See page 1 for details.

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes		Required to Specify
<ul style="list-style-type: none"> Lock cylinder, keyed random: 9201 Polished Chrome or 9250 Ember Chrome Two keys 		1 Style number 2 Options, if selected (see below)

Options	U.S. Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and must select beginning key number from FR305–FR454.
Master key random	+\$36 each	Specify <i>master key random</i> .
Master key specific	+\$36 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$36 each	Specify <i>master key consecutive</i> and must select beginning key number from XF1001–XF1150.

Wood Touch-Up Kits

How to Order Wood Touch-Up Kits

Order wood finish touch-up kits from J.Kaltz Co. Specific Steelcase finish codes (such as 3422) can be found under Finishes > Dealer Kits. Each kit contains one brush tip marker and one fill stick.

Place orders as follows:

- Phone: 616.942.6070
- Web: <http://www.jkaltzco.com>
