Smartworking® – A diverse landscape of solutions for today's agile, collaborative workplace.

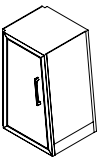

When you need a ‘little’ privacy...

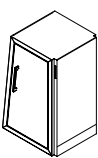

Phone booths are becoming a popular addition to today’s office environment, and it’s often hard to find one that isn’t already in use. People want them for more than a quick call—occupying them for a few hours instead of a few minutes.

And that’s not going to change anytime soon, which is why we’ve evolved the phone booth space so you can stretch out and stay awhile longer.

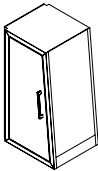

Product Range

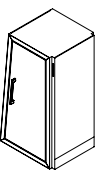

OB1QT01
Short Angled Phone Booth
(Left Hinge Opening)
75"H x 48"W x 40"D

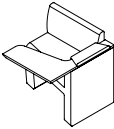

OB1QT02
Short Angled Phone Booth
(Right Hinge Opening)
75"H x 48"W x 40"D

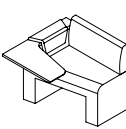

OB1QT03
Tall Angled Phone Booth
(Left Hinge Opening)
87"H x 48"W x 40"D

OB1QT04
Tall Angled Phone Booth
(Right Hinge Opening)
87"H x 48"W x 40"D

OB1QTF01
Seated Unit for OB1QT01
(LH Seat)
32"H x 19"SH x 35"W x 25"D

OB1QTF02
Seated Unit for OB1QT02
(RH Seat)
32"H x 19"SH x 35"W x 25"D

01

A **comfortable** and **intuitive**
space to take a video call...

It's unlike any other phone booth out there...

When Sitting...

Our short booth offers plenty of legroom when seated, for a nice little getaway without disrupting your open floor plan design.

When Standing...

With added room for a stool, our tall booth comes with a soft corner to lean into for added comfort, privacy and soundproofing.

Keeping It Flexible

- Placing a row of booths against a wall offers privacy without the need to build in
- Group short booths with whiteboard options to create new collaborative spaces
- When used in tandem, tall and short booths let people decide if they want a shorter or longer stay

Choose Your Aesthetic

Customize your space with a variety of materials. For the exterior, choose from an array of laminates. For the interior, select fabric for the baffles and optional lounge furniture.

...On the Qt's
unique "kink"
shape creates a
fresh story both
aesthetically and
functionally.

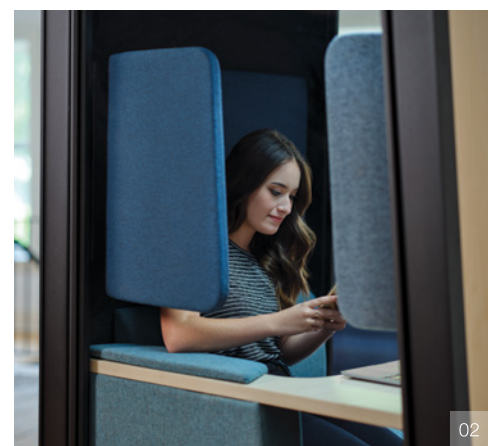

Sound Thinking

- Designed specifically for Orangebox, our sound-blocking technology ensures conversations remain discreet
- Innovative panels reduce reverb flutter while adding visual privacy
- Cassette walls absorb and block sound
- Super-rigid doorframe gives a consistent seal
- Acoustic laminated glass balances out critical speech frequency loss

So Tell Me About the "Kink"

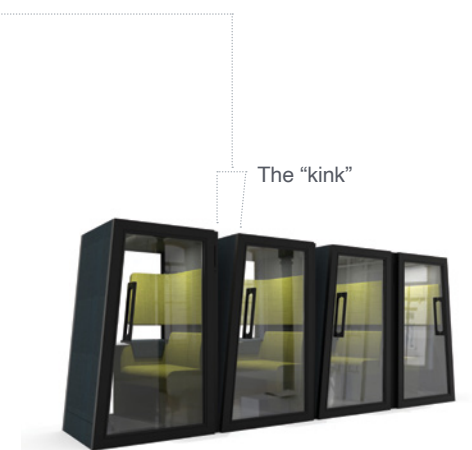

The angled, or "kinked" air gap between booths allows sound to bounce down and away—minimizing reverb and the distance sound travels.

- When booths are facing the same direction, users talk into the gap, reducing the amount of noise from booth to booth
- When booths are back-to-back, sound is naturally projected away from other users

Air, Light and Power

- Intuitive airflow reduces pressure buildup inside, making it more comfortable
- Automatic lighting and ventilation
- Optional occupancy light
- Available power options

04

05

Fire Safety

- Designed for optimum fire safety
- E84 Class A rating
- Height of less than 4 feet means sprinkler integration may not be needed

Easy to Set Up and Easy to Move

- Setup takes as little as 2 hours
- Remove both panels, slide a pallet jack underneath and wheel it wherever you'd like

At Orangebox, we think happiness and productivity should go hand in hand.

With advanced ventilation, a unique “kink” shape and seated or standing options, On the Qt’s small office footprint makes a big impact. Now you can videoconference, take a call or focus on the task at hand—in privacy and comfort.
