

Product Compliance Laboratory Confirmation of Product Compliance

17-Nov-2022

Steelcase Privacy Wall products have been designed, engineered, and manufactured, to meet or exceed all applicable ANSI/BIFMA (American National Standards for Office Furnishings) requirements for safety and performance.

Samples representative of current production have been tested and found to be in compliance with the following ANSI/BIFMA Test Requirements:

ANSI/BIFMA X5.6-2016 (R2021) – Panel Systems Tests

In addition to ANSI/BIFMA Standards the Privacy Wall products have been tested and found to be in compliance with the following standards:

UL 723 Surface Burning Characteristic of Building Materials (ASTM E 84 test methods) ^{1,2}

*Class 1 with 100% polyester fabric or painted steel

ASTM E90 Standard Test Method for Sound Transmission Loss (Acoustic Testing)

STC 41, Solid Wall w/ Hollow Core (Style GPSS___) with Recessed Ceiling Track

STC 42, Solid Wall w/ Hollow Core (Style GPSS___) with Overlapping Ceiling Track

STC 45, Solid Wall w/ Enhanced Core (Style GPSAS___) with Overlapping Ceiling Track

International Building Code (IBC) 2018 Section 1607.15, Interior Walls and Partitions, tested in accordance with ASTM E72-98 Strength Test of Panels for Building Construction, Section 12, Transverse Load.

International Building Code (IBC) Section 2403.4 Interior Glazed Areas ¹, all safety glass is specified to meet industry and regulatory standards, ANSI Z97.1, CPSC 16CFR1201, and CAN/CGSB-12.1-M

2010 ADA Standards for Accessible Design: 404.2.9 Door Opening Force ¹, Forces to open/close sliding and swing doors is 5 lbs or less. These forces do not apply to the initial force needed to overcome the inertia of the door, to retract latch bolts, or disengage other devices that hold the door in a closed position.

This product line is Listed to the applicable UL and CSA Standards in accordance with the National and Canadian Electrical Codes. ^{1,3}

¹ This specification is not included in the Steelcase Laboratory's scope of accreditation.

² This testing was performed by an accredited independent lab.

³ Listing compliance is evidenced by the Nationally Recognized Test Lab (NRTL) certification Mark affixed to the product.

Steelcase uses its own ISO 9001 registered and ISO 17025 accredited laboratories, and accredited independent laboratories, to verify compliance to the Standards and requirements listed. A list of accredited independent laboratories is available upon request.

Sincerely,

Jeff Musculus – Director, Global Testing

Note:

This document may be reproduced in full only.

Steelcase products are designed and tested for code and standard compliance when installed and used as an integrated product solution in accordance with Steelcase application guidelines and assembly directions. The use of unauthorized non-Steelcase components, parts, or materials with integrated Steelcase product solutions VOIDS all Steelcase claims of product compliance to BIFMA, UL, CSA, LEED, and / or any office furniture safety or performance standards, including all building, fire, and electrical codes. This exclusion includes but is not limited to the use of non-Steelcase panel supported work surfaces, leg supports, panels, brackets, shelves, overhead bins, and other integral components. The use of non-Steelcase components in an integrated product solution not designed, tested, or supported, by Steelcase is an unauthorized modification of the original product which voids all Steelcase warranties, expressed or implied.
