

Privacy Wall Legacy to Enhanced – Free Conversion Services!

How can we help:

If you or your team has an active Privacy Wall Legacy project that cannot be ordered in Legacy styles due to the business transformation, our team can help by redrawing and re-specifying your project in [Privacy Wall Enhanced](#) at no charge to you!

To understand if your project needs to be converted to Privacy Wall Enhanced, please be aware of these key dates:

Privacy Wall Legacy:

- Last order entry: February 16th, 2025
- Last ship date: May 2nd, 2025

If your project will be ordered after February 16th, 2025, or ships after May 2nd, 2025, it must be converted to Privacy Wall Enhanced.

What's Included:

- Re-specification of existing Legacy product in the same layout and finishes. This also applies to product that needs to be converted due to an upcoming reconfiguration.
- Requoting of all specials needed to complete the project
- Updating of all legends and elevations

As is our standard policy, the dealer is ultimately responsible for performing a final review of all work before placing an order.

Requesting Assistance:

Click on this [link](#) to submit a **Privacy Wall Conversion** request to our team. Don't forget to upload your existing CET file!

Additional Support:

If you need help reconfiguring your product, adding additional scope or revising your project after the conversion is complete, our team provides additional spec support at our standard rate of \$60/hr.
