EDUCATION

Learning happens everywhere.

Learning is a continuous process, and on today's campuses it extends beyond the classroom to every available space. As active learning increases in and out of the classroom, libraries and other informal learning spaces need to accommodate a broader range of student needs.

The Regard™ furniture system provides a range of spaces to support many modes of learning in informal learning spaces, from individual studying to working in groups or socializing with others.

Diverse needs require flexible spaces.

Informal learning spaces should provide students with a choice of destinations to support their individual learning needs. **Self-directed learning spaces are critical to the overall campus environment, and are often where authentic discovery occurs.**

Students shift between focused study, collaboration and socialization throughout their day. To support these diverse needs, informal learning spaces must provide choice and control, accommodating short- and long-term stays, individual and group work—as well as supporting a variety of technology.

IM#: 13-0004433

PROVIDING CHOICE AND CONTROL

Regard gives students control over when and how they study. Access to a variety of settings provides students with different levels of privacy and promotes both group and solo study.

IM#: 13-0004433

SUPPORTING COMFORT

Steelcase research shows that working and studying in multiple postures over time is healthier than sitting in one static position. Regard's extra-wide seating and soft armrests allow for a range of postures for keyboarding, reading, relaxing and intense studying, while also providing space for bags and work materials.

IM#: 13-0004433

MEETING TECHNOLOGY NEEDS

Students require multi-functional spaces that support their study needs before and after class: digital and analog, individual and collaborative. Regard provides easy access to power and information as well as large worksurfaces for computers, mobile devices, books and other materials.

Leveraging real estate.

Providing students with control, comfort and connection to technology in hallways, common areas and lounge spaces leverages often under-utilized real estate. The simplest in-between spaces become multi-purpose spaces for self-directed learning, socializing and collaboration.

SPACE TO LEARN
Extra space for individuals encourages side-by-side seating, improving density and providing more room for belongings.

ROOM TO STUDY
Booth settings provide large workspaces, supporting group work or individuals who need to spread out their materials.

POWER WHERE YOU NEED IT
Integrated outlets put power close at hand and easy to find. Modular power brings electricity to the middle of any space.

DURABILITY & CLEANABILITY
Performance fabrics are durable and easy to clean. The open-base design allows for easy floor maintenance.

TOUCHDOWN SPACES
Easy-to-access touchdown spaces support check-in, library database access, printing and more.

KEEPING THE CAMPUS CONNECTED
Booth displays enable groups to easily share content with one another for more effective collaboration, or can be used for campus information on school channels.

STATEMENT OF LINE

BASE FRAMES

Bench: 18"D; 44", 66"W
Single-sided: 27.5"D; 44", 55", 60.5", 66", 71.5", 77", 82.5", 88"W
