

SMART LAYER

Smart film. Retrofitted.

Modern spaces require privacy that can shift as the environment does.

SmartLayer delivers this by adding switchable technology to standard glass, changing instantly from opaque to transparent at the flick of a switch.

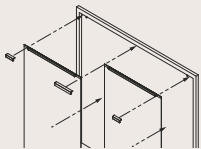

It's a clean, easy-to-install solution that provides controlled privacy with reliable, UL-listed performance to existing or new glass.

// INSTALL

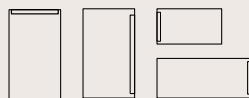

_ Fully Retrofittable

Installs onto existing glazing without altering the surrounding environment.

_ Compliance Built-in

The only UL-listed smart film system. FCC-certified for electromagnetic compliance and ASTM-certified for fire safety.

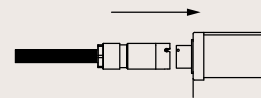

_ Easy Installation

The self-adhesive SmartLayer panel pairs with our innovative rigid Power Bar for precise handling, clean alignment, and a straightforward setup.

_ Designed to Disappear

Finishes in white, black, grey, or anodised aluminium complement common frame systems and blend seamlessly into the architecture.

_ Plug and Play

No specialist tools or electricians required. Connect a single window or an entire elevation using our pre-configured, daisy-chain system.

_ Made-to-Measure

Each PDLC film panel is cut to size, with optional door and hardware cut-outs for a clean, exact fit.
