## At the Ready

Floorspace within healthcare environments is at a premium, and it's often difficult to provide enough seating without creating too much clutter. Light in scale and stackable, Sorrel™ adds great seating options that help maximize every square foot of a

healthcare setting. Sorrel can be used and then easily stacked and stowed out of the way until next time. Interconnected and freestanding tables provide natural separation and convenient, visible storage.

### **Breadth of Options**

Sorrel is an elegant alternative to the traditional stack chair. Options include a maple wood back in a range of finishes, armed or armless seating, wider versions and straight or wallsaver legs.

### **Added Ease + Support**

Bariatric and easy access chairs provide extra support and easy entrance and exit, with the same aesthetics of other Sorrel seating. Steel frame construction provides a rigid structure that lasts.
