Steelcase Flex Active Frames
Storage

Steelcase Flex Active Frames are adaptable structures that define space by creating productive, flexible and inspiring homes for teams. With a broad range of customizable configurations and technology integration, Active Frames provide shelter, privacy and space for teams to collaborate in the hybrid workplace.

APPLICATIONS

A shared team space featuring Active Frames with media tower and external mounted technology provides a place for people to informally connect with remote colleagues in the open plan.

This hardworking social space with Active Frames as space division allows both sides to be utilized — external mounted technology on one side and storage on the other.

An enclosed meeting space is enabled for hybrid collaboration with Active Frames. The media tower with a seated height attached table and internal mounted monitor provides a better meeting experience.

Active Frames provides storage, space divison and privacy in an owned team space, giving the team members a place to store artifacts and personal items.

Steelcase®

FEATURES

FRAME

Consists of bases and tubes that provide the overall structure of the frame.

COAT ROD

Secures under the shelf and can be moved front to back.

FIXED BOARD

Two sided fixed boards connect to the frame and are available in PET/PET and PET/Whiteboard.

MOBILE BOARD CLIP

Fits securely on the frame to integrate with Flex mobile boards, power hanger and cup.

INFILLS

Provide enclosure to the frame. Available in high-pressure laminate and PET.

DOORS

High-pressure laminate doors are standard with fabric door pulls and available with optional locks.

SHELVES

High-pressure laminate that connects to the frame with shelf connectors, allowing for ease of reconfiguration.

BOOKEND

Fits on the front side of a shelf.

INTERNAL MONITOR MOUNT

A technology-agnostic VESA mount enables installation of monitors and technology.

EXTERNAL MONITOR MOUNT

A technology-agnostic VESA mount enables installation of monitors and technology.

POWER

Utility power on the worksurface keeps devices connected..

TABLE

An optional table is available in seated or standing height in D-shape. straight and sightline shapes.

CABLE MANAGEMENT

Cut-outs in the shelves and base allow to drive cable to the power source. Technology can be safely stored behind a door.
