

Making space for— Care,
Connection, Support, Respite,
Compassion, Healing, Comfort,
Wellbeing, Resilience, Work,
Flexibility, Patients, Family,
Clinicians, Communities—Health.

We believe that experiences of care begin with more caring spaces.

Through our commitment to human-centered design and our focus on research, we create evidence-based, safe and sustainable solutions that support better experiences of care for patients, families, clinicians and entire communities.

At the same time, our work is grounded in compassion, to make sure that these environments are as welcoming, inclusive and comforting as possible for the people who will use them.

We're inspired to make space for health.

How We Can Help 48

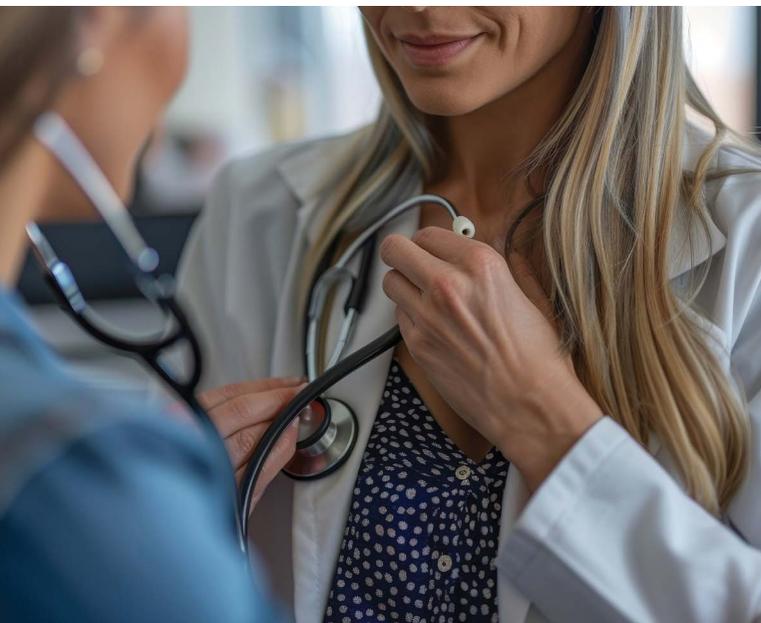

More than ever, we understand that intentional, human-centered design can have a very positive effect on healthcare experiences and outcomes for everyone involved.

Right
West Elm Health Mesa Sectional, Extremis Sticks Divider, West Elm Work Lily Pad Nesting Table, Blu Dot Note Side Table

Healthcare experiences are inherently vulnerable and personal. Starting from that reality, we know that putting people first matters in creating better healthcare spaces. Our approach is grounded in the study of the daily experiences of real people having real experiences. And we follow the evidence by using peer-reviewed research from controlled, high-quality studies. The insights we gain allow us to create applications and products with the highest understanding of people's needs. We're dedicated to making spaces that care for the whole person.

It's possible to help people feel better by designing healthcare spaces with the comforts and aesthetics of home.

Care Story

Comforting environments help people have better care experiences.

Studies show that a welcoming space can reduce stress and create more positive associations with wellness.

Residentially inspired design can help close this gap by turning to warmer, more familiar elements in clinical settings. This approach understands that people find wellbeing in the comforts and aesthetics of home.

And there's plenty of opportunity to make more caring spaces. Most people spend only a small percentage of their time with their provider during an appointment, which leaves a lot of time in settings that may feel uncomfortable and cold. We're inspired to use residential design as a way to help healthcare become a more effective healing place.

Spaces

Better healthcare spaces balance the caring with the clinical. We know that thoughtfully designed and supportive environments help improve experiences and outcomes for everyone engaged in care, including unique considerations for safety, productivity and resilience. From welcoming waiting and transition areas to reassuring exam and patient rooms; infusion bays to places for clinician work and respite — all play a meaningful part in making space for health.

Waiting + Transition Spaces

Waiting and transition spaces with a sense of welcome and style take better care of both patients and family members. We help create hospitable settings that combine warmth, comfort and familiarity with the rigor of safety and durability.

Equipped for mobile work and set up for personal connection, the best spaces meet practical and emotional needs with a flexible range of hosting amenities, inviting seating options and convenient access to power.

Exam + Consultation Rooms

Approachable exam and consultation rooms can help ease the stress of healthcare visits by fostering a comfortable connection between clinicians, patients and family. Flexible and calming environments can serve a growing range of in-person and virtual interactions—balancing clinical relevance and safe materials with evolving technology and design appeal.

Designing for better connection and clear communication between patients, family and clinicians can help calm the stress that often accompanies health visits.

Patient Rooms

Comforting patient rooms do more than just care for the patient; they make space, day and night, for the presence of visiting family members. That means providing a more holistic environment with furniture that's adaptable, accommodating and safe, where family can continue to be productive and supported while the patient is being cared for.

“It’s so important to provide a supportive environment to family members while they are caring for their loved ones.”

Infusion Spaces

Treatment spaces are vital in support of healing, but they can always work better for the wellbeing of patients and families. Providing for the emotional and physical comfort of patients is essential. Making space for companions and visitors helps, too. Central to these rooms, clinical furniture plays a role in the healing process by promoting safety, accessibility and privacy.

Clinician Work + Respite Spaces

Clinicians do so much more in a day than see patients. They need adaptable workspaces where they can collaborate and do timely tasks, and better spaces for respite so that they can take care of themselves.

From lounges and cafes to quiet nooks, a well designed space is a tool that can truly help counter clinician and staff burnout. Considered places for connection, recharging and focus are an important step in helping healthcare work better for everyone.

Left

Right
Steelcase Surround Lounge, Steelcase Brody Footrest

Healthcare workers need better spaces and time for on-the-job respite and connection.

Care Story

Restorative spaces to support caregivers.

People whose jobs are about taking good care of others deserve spaces that take care of them, too.

According to Steelcase Health research, over half of physicians currently report at least one symptom of burnout; as a group, their overall wellbeing is in stark decline. There's a growing recognition that clinicians need appealing, supportive places where they can go to restore during stressful workdays. New design solutions can help improve those conditions through a focus on comfort and biophilia to turn ordinary spaces into more restorative destinations for respite and connection.

Many studies underscore the need for change in the way we support our healthcare workers:¹

25-50%
of nurses report feeling "used up," "fatigued," "burned out" or "at the end of the rope."

1 in 5
physicians say it is likely they will leave their current practice within 2 years.

1 in 3
doctors and other health professionals say they intend to reduce work hours in the next year.

Administrative Spaces

Clinical settings are the most visible part of the healthcare experience. We know administrative spaces are a big part of helping healthcare work well, too. We support organizations by providing all the elements needed to create a range of impactful work environments—tailored to both focused and collaborative work modes designed your way for the style of your workplace.

We can help healthcare organizations work better across all their workspaces, supported by the full range of Steelcase products and our Community of Brands.

Solutions

Every piece of furniture in a care setting must be designed and purpose-built to meet the most rigorous health requirements. Using our foundations in primary research and our human-centered design approach, we create a variety of insight-led, clinically relevant products for the full range of healthcare spaces. We apply our deep understanding of the physical and emotional needs of users to furnishings with supportive style. At the same time, these solutions take care to promote safety and optimal performance, with peak durability, maintenance and cleanability for these demanding environments.

Radia Single

Radia Armless

Radia High Back

Radia Loveseat

Radia Bariatric

Radia

Refined and resilient, Radia accommodates a range of spaces and body types. The delightfully simple design brings together durability and function with a warm, unexpected and welcoming aesthetic.

Embold

Embold seating and tables combine high-performance clinical features with inviting and expressive design. Choices for creative residential styling are expanded with a variety of appealing materials.

Embold Rounded Rectangle Table

Embold Circular Table

Sorrel

Light in scale and stackable, Sorrel adds versatile seating options that help maximize every square foot of a healthcare setting — for convenience that’s always at hand, wherever and whenever it’s needed.

Aspekt

Aspekt seating and tables offer a clean, minimal aesthetic for patients and guests in a variety of healthcare settings. Practical, generous combinations of single chairs and multi-unit seating create distinctive, dynamic profiles that help define waiting and transition spaces.

Surround

The Surround lounge and sleeper provide much-needed space close to loved ones for supporting families. These solutions offer a comfortable place where visitors can sit and converse, rest and relax, work, or talk with clinicians.

Surround Lounge

Surround Sleeper

Lounge Seating

Our extended lounge seating portfolio adds greater choice for all the spaces where comfort and style are key to an inviting, longer sit.

Mitra, Leela, Sieste

Empath

Empath

The Empath recliner is a crucial step forward in the health process – one developed entirely from real-world insights based on thousands of hours of observation and analysis. Its design considers the needs of both patients and clinicians as primary users.

Empath Upholstered Arms

Empath Upholstered Arms and Legs

Regard

The Regard modular lounge system supports times of transition to make waiting more meaningful. A blend of thoughtful product solutions can create spaces that help people work while they wait, with greater comfort, connection and privacy.

Regard

Cura

The Cura collection of healthcare seating brings elegant ergonomics to patient rooms, treatment spaces and family waiting areas — lending outstanding support, easy movement and breathable comfort to situations where it's important to increase comfort and relieve anxiety.

Sync

Designed to support clinicians in action, Sync workstations facilitate collaboration between colleagues, connection to patients, and access to the technologies and information vital to quality care.

Pocket

Pocket

Pocket is the mobile worksurface that empowers connected care from task to task and space to space — letting clinicians get close to their work and their patients in comfort. The intentionally simple, small-scale cart moves easily and quietly even in tight spaces, pairing with changing technology and procedures for a long, useful life.

Verge

Verge offers a convenient, comfortable and quick place to sit for eye-to-eye conversations or individual work.

Verge

Convey Modular Casework

With its spectrum of mixable components, Convey Modular Casework provides an elevated level of choice, quality and design flexibility. Pieces can be combined in many ways for smart space planning and a variety of dynamic care needs.

Convey Mobile Storage

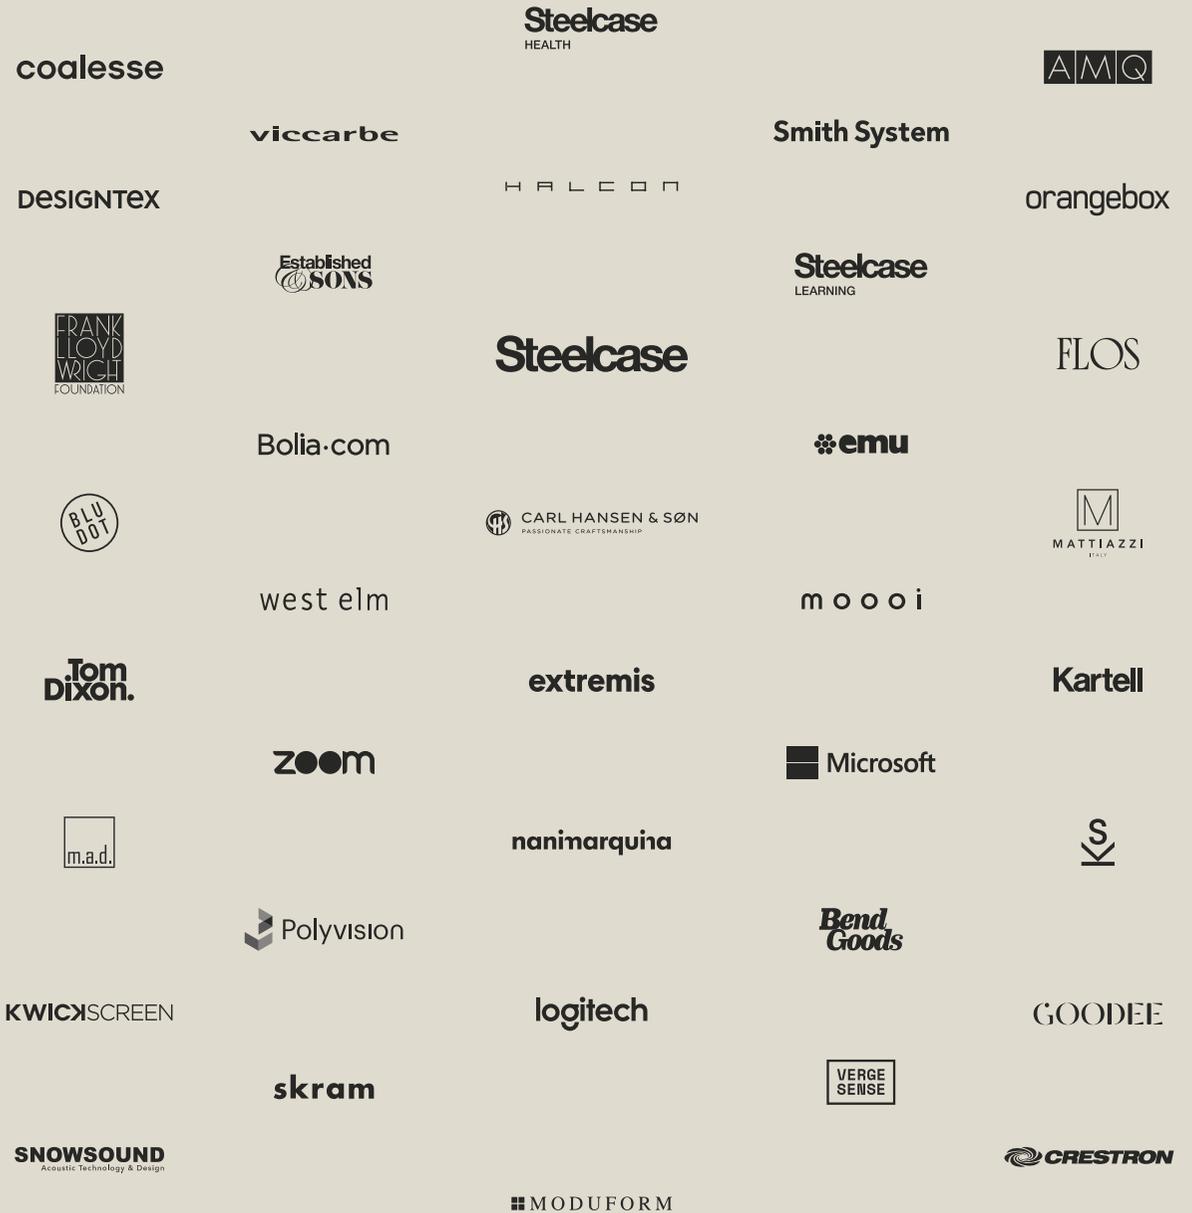

Convey Mobile Storage provides on-demand access to supplies, improving efficiency and helping caregivers deliver streamlined point of care services to patients.

Convey Mobile Storage

The Steelcase Community of Brands

Steelcase and our community of brands bring together an expansive range of furnishings and solutions to help create places that work better. We partner with many of the world's forward-thinking companies in design, technology, materials, learning and health, to provide seamless choice and boundless possibility for all the ways people work.

west elm

Partnering with popular retail brand West Elm, we're optimizing design for health. West Elm creates stylish furniture that we bring to life with all the necessary modifications to meet strict safety, cleanability and durability requirements for healthcare settings. We're excited to offer these pieces through a partnership that focuses on beautiful design, to help people feel more at home in their health experiences.

“Many of us have been there with a loved one, sleeping in a makeshift ‘bed’ of chairs. Our question is, how can we make more engaging furniture to help those difficult experiences become more hospitable?”

James Killinger
West Elm, Senior Designer

DESIGNTEX

Designtex, a Steelcase brand, is responding to the unique needs of healthcare systems with numerous innovations to surface materials. Advances in material science are powering new, responsive textiles and wallcoverings that can actually help combat infection and keep people safer. Biophilia is another key part of these solutions, emphasizing sensorial colors and patterns to evoke the healing properties of nature.

“The combination of form and function is amplified by all the clinical concerns we have to solve for in healthcare. We are working on materials that really allow beauty and performance to go hand in hand.”

Sara Balderi
Designtex Director of Design

KWICKSCREEN

KwickScreen is a specialized Steelcase partner that creates portable, retractable partition screens for healthcare environments. Combining protection, safety and flexibility with visual interest, these patented mobile screens are designed to prevent infection by separating people or beds. They are easy to clean, providing a healthy, long-lasting alternative to curtains. Just as important, the screens can be fully customized with any surface design, introducing the considerable healing benefits of art to clinical spaces. In addition, KwickSwitch is the latest innovation from KwickScreen, offering the choice between opaque or transparent windows at the push of a button.

MODUFORM

Our partner ModuForm has been humanizing behavioral healthcare furniture for nearly 50 years. These unique solutions reflect a level of compassion and vigilance for patient and clinician welfare, developed in a range of styles that support recovery-oriented, safe and inviting spaces. ModuForm products are comfortable and approachable, designed to encourage independence and socialization. Always engineered for durability and integrity, they are also abuse-resistant, simple to maintain, and easy to disinfect and clean.

Industry Leading Warranty

No one in the industry offers a warranty as broad, deep and extensive as Steelcase. The quality and durability of our products are demonstrated in lower warranty expenses per sales dollar despite the strength of the warranty coverage.

The Steelcase Dealer Community

Creating the places where people can do their best work is a complex effort. Every Steelcase dealer is an engaged partner who can help you navigate every aspect of your workplace journey, from creation to installation and beyond — providing the capabilities and tailored solutions you need. We're with you every step of the way. Together, we deliver local expertise with the global power of Steelcase behind every experience.

Purchasing Contracts

Steelcase Health group purchasing options can be attained through multiple buying organizations. We work closely with clients to understand their eligibility and intent of how they want to use a group purchasing contract. Group purchasing options can be attained through the following organizations:

HealthTrust Performance Group, Kinetic GPO, Premier and Vizient.

Get in Touch

Experience our curated spaces, including our newest solutions for healthcare and work, while engaging with experts in health through in-person or virtual tours of our showrooms.
