

### **Convenient Companion**

Steelcase Health is here for people. Our COVID-19 response can be quickly mobilized to help deliver care when and where it is needed - filling crucial needs for both patients and clinicians. The mobile overbed table plays a pivotal role for basic tasks, but can also provide a boundary for personal space or act as a social bridge to ease conversations between everyone involved in the care experience.

**FIXED-HEIGHT MOBILE OVERBED TABLES**

Simple to move and easy to clean, fixed-height overbed tables provide three convenient surface levels for use with beds, patient seating, or as a clinician worksurface. Featuring a mobile, low-profile U-base and rectangular thermoform top with built-in spill edge, these overbed tables help give patients a sense of control over personal belongings and clinicians a place for care essentials while attending to patient needs.

**STATEMENT OF LINE**

**30”H Rectangular Top, U-Base**

**36”H Rectangular Top, U-Base**

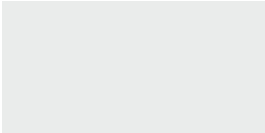

**42”H Rectangular Top, U-Base**

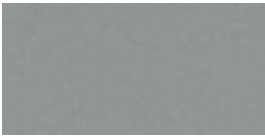

**DIMENSIONS**
