For Canadian Pricing

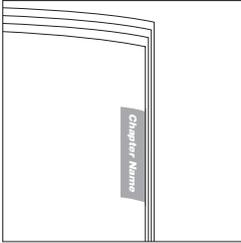

Canadian factor can be found at www.steelcase.com/CADpricing/.

Calculate in the following order to avoid rounding errors:

- Multiply the base price and each option by the Canadian factor.
- Round each to the nearest dollar.
- Add base and options for total list price.

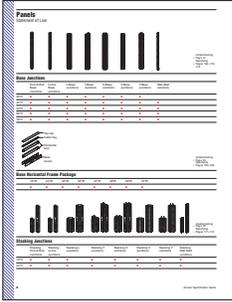

Ten Tips: How to Get the Most Out of This Book

Tip 1

Watch the tabs on the right-hand edges of the pages. They'll always indicate which chapter you are in.

Tip 2

Use the Statement of Line pages for an overview of the available components, their sizes, and page references for additional information. Each *Understanding* chapter includes a statement of line after the table of contents.

Tip 3

Find cross references by looking for page numbers flagged with an arrow.

Tip 4

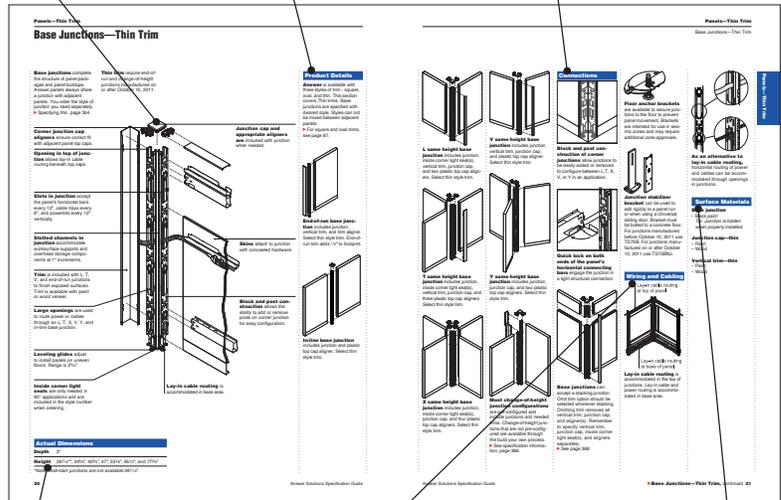

Study the product detail pages in the *Understanding* section to learn everything an expert knows about specific products. Each product detail page in this section contains the following features, where applicable:

- Product Drawing
- Actual Dimensions
- Product Details
- Connections
- Wiring and Cabling
- Surface Materials
- Application Topics

Product Drawing shows you what the product looks like and points out important features.

Product Details gives specific information on the product and how it is used.

Connections describes how the product is assembled or how it attaches to another product.

Actual Dimensions table lists the dimensions of the product.

Wiring and Cabling details the power and cable-management and cable routing capabilities of the product.

Surface Materials lists what material is used for each part of the product.

Additional Resources

Product brochures and planning tools can be ordered through your Steelcase area office by calling 1.800.784.0358 or through the Marketing Resources website at village.steelcase.com.

This specification guide contains multiple Steelcase product lines which are designed into one specification guide for your convenience.

Additional storage products can be found in the *Storage Specification Guide*.

Printed Materials

Express Program Specification Guide
This specification guide describes all Steelcase and Coalesse products including the finishes and options that are available as Express orders - manufactured and shipped within 7 business days.

Surface Materials Reference Manual

This publication provides:

- An explanation of the surface materials
- "Available on" matrices
- Vertical surface fabric and seating upholstery selection listing
- Technical data for surface materials
- Surface material care and cleaning instructions

Computer Tools

Electronic Catalog
Accurate sales quotations and purchase orders for Steelcase products are created with specification software that uses Steelcase Electronic Catalog data. Use the data to specify and price style numbers and options for every Steelcase product. The data is updated bimonthly by Steelcase and provided to software programs including: the Hedberg Business System, SmartTools – Steelcase's design and specification software (for more information on SmartTools, please email SmartTools@steelcase.com), the ProjectMatrix Project-Symbols libraries, as well as 20-20 CAP Studio.

Furniture Symbol Graphic Data

Steelcase creates 2D and 3D furniture symbols (with attributes) for planning and initially specifying Steelcase products. This data is incorporated into several add-on software packages that work in either a Microstation or an AutoCAD drafting environment.

Digital Publications

You can access these digital publications at www.steelcase.com or village.steelcase.com.

Planning Ideas

Planning ideas are available to help inspire, envision, and plan great solutions. 2D and 3D AutoCAD drawings, Sketch-Up files, and SmartTools drawings are available on the Planning Ideas site: www.steelcase.com/planningideas.

Support

Steelcase Capabilities
Steelcase products are distributed, installed, and serviced through a network of more than 600 dealers worldwide. Steelcase is also represented with offices and corporate showrooms in 26 U.S. cities, 4 Canadian cities, and in France, Germany, Great Britain, and Japan. Every Steelcase product meets our exceptionally high standards of quality and durability and comes with the Steelcase assurance of excellence in service.

For ordering or product assistance, call your local dealer, the Steelcase Solutions Resource Team, or the Steelcase Solutions Fulfillment Team at 1.888.STEELCASE (1.888.783.3522) or send an e-mail to lineone@steelcase.com.

Call the Steelcase Solutions Resource Team prior to placing an order, when working on a bid, or when you need information about product applications and specifications.

Call the Steelcase Solutions Fulfillment Team if you have submitted an order to Steelcase and you need to speak to your Solutions Fulfillment Team Representative about the order. Also call if you have any post-shipment quality concerns or service parts questions.

For warranty information, please go to <http://www.steelcase.com/warranty/>.

Outside the U.S.A., Canada, Mexico, Puerto Rico, and the U.S. Virgin Islands, call 1.616.247.2500.

Related Products

Steelcase worktools include a full line of ergonomically designed products that enhances and improves the work setting. Product platforms include computer support tools, organizational worktools, and personal lighting.

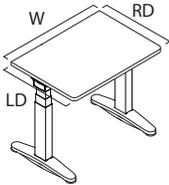

► For additional information, refer to *Steelcase Worktools Specification Guide*.

Sustainability

At Steelcase, we believe business can be a force for good. We create long-lasting products that are better for people and better for the planet. Our products and operations use life cycle thinking to meet our commitment to reducing climate change. This commitment is reinforced by practices such as designing to minimize global warming and other life cycle impacts, ensuring material health, and enabling end-of-use strategies. To learn more at a corporate level, visit: www.steelcase.com/discover/steelcase/esg-overview/environmental/ProductEnvironmentalProfiles, which provide key environmental attributes such as recycled content, embodied carbon and recyclability, as well as product certifications can be found by searching for Steelcase at Origin.build.

Workstation Design Guidelines and Requirements

WARNING

Risk of serious injury.

Bases-only warranty limitations and potential for injury: The use of worksurfaces that do not comply with the Steelcase defined criteria and limitations could cause personal injury or property damage due to pinch points, instability, or other problems, and voids all Steelcase Warranties, expressed or implied.

Potential for non-compliance: The use of worksurfaces that do not comply with Steelcase criteria voids any Steelcase claims of compliance with ANSI/BIFMA, UL, LEED, or other applicable requirements. The use of non-Steelcase worksurfaces on Steelcase adjustable-height bases may not be accepted as compliant to municipal electrical codes or OSHA federal workplace standards, because this use does not create an NRTL (UL, ETL, etc.) listed product. Steelcase is not responsible for the ultimate determinations of compliance for height-adjustable bases with non-Steelcase worksurfaces, and assumes no liability for their compliance with standards when height adjustable bases are used without a Steelcase worksurface as intended.

Overview

Designed for movement with dynamic seating, adjustable worktools and height-adjustable desks are important for today's office workers.

To determine the best height-adjustable solution, consider these four criteria:

1. **Adjustability Needed:**
What is the height range requirement? (seated or sit-to-stand)
2. **Worksurface Size Needed:**
What does the physical space look like? (worksurface configuration)
3. **Equipment/Tools Used:**
What type of computer equipment and other worktools are being used on the worksurface? (load capacity)
4. **Use:**
What is the height-adjustable desk being used for (individual or shared, touchdown space or full workstation, sit-to-stand or seated)?

WARNING

Risk of Serious Injury. If not used as intended, moving worksurfaces can pinch or injure people, or damage property. Always follow these Instructions:

1. Keep height-adjustment range free from obstructions above and below the worksurface.
2. Plan for a minimum 1" gap against a panel or wall.
3. Plan for a minimum 1" gap to adjacent furniture.

Tips

Obstructions

Moving worksurfaces can collide with other objects. Do not install overhead storage, stationary pedestals or components in the path of height-adjustable desks.

Weight

The maximum allowable load (varies by height-adjustable desk) should be evenly distributed and must not be exceeded.

Width

Specify a minimum 1" gap to adjacent furniture. This minimizes any pinch points between a height-adjustable desk and a fixed object.

Depth

When placing a height-adjustable desk against a panel or wall specify the worksurface depth shorter to provide a minimum 1" gap. This minimizes pinch points and adds clearances for cable access.

Managing Technology

Design workstations with computer equipment in mind so that the height-adjustment range of the height-adjustable desk is not impeded because of cables. Consider the addition of a cable riser or cable basket to help harness these wires and cables.

Power

Plan easy and unobstructed access to electrical outlets for computer equipment and height-adjustable desks (when applicable).

Worksurface Criteria and Limitations

The use of non-Steelcase workspaces is not recommended. Any use of a non-Steelcase workspace requires additional investigation by the customer regarding the appropriateness for use. It is the sole responsibility of the customer to determine the suitability and safety of the selected workspace construction and attachment means.

The following information is provided as a guideline, but does not address all potential issues. Customers should seek professional guidance as to the appropriateness of their chosen workspace.

Mandatory Requirements

Height-adjustable bases include fasteners intended for use with Steelcase workspaces. These fasteners may be suitable for workspaces meeting the following criteria:

- Medium-density or higher particleboard or fiberboard cores, with High- or Low-Pressure Laminates and backers.
- Thickness of 1" or greater (Ology, Flex, and Migration SE)
- Thickness of 13/16" or greater
- Fasteners located a minimum distance of 1" from any edge

Any other workspace construction will require different and/or additional fastening means and these means must be determined by the project's designer, architect, or engineer. For example, solid-surface materials should use appropriate threaded inserts and corresponding fasteners or similar attachment means.

In all cases, all fastener locations provided in the base attachment features must be used (e.g. if attachment plate has six screw holes, all six holes must be used for attachment).

Flammability: Any workspace or similar large part >10ft ^ 2 must have a flame spread <200 and a smoke developed index <450 when tested per UL 723.

Sharp edges: All accessible edges of the workspace must meet 1439 test for sharp edges.

Dimensional limitations: Rectangle workspace depth 23", 24", 28", 29", or 30". Workspace width for Migration Intro (HA1 styles) not to exceed 78".

How to Calculate Power Needs

Use This to Determine How Many Power-Ins You'll Need

When planning a power network, you must calculate the amperage requirements of all your electrical components so you can provide sufficient electricity to power them.

If your usage is not known in advance: The National Electrical Code (NEC) allows a maximum of 13 receptacles on each 20-amp circuit. This provides up to 30 receptacles for each 3-circuit power-in.

If your usage is known in advance:

Add up the amperage used by each piece of equipment in the workstation. Whenever you reach 60 amps (20 amps times 3 circuits) from items that are likely to be used at the same time, you have reached the limit for a single power-in. Specify another power-in and continue until all equipment is powered.

If the circuits will normally be subject to a continuous load (three or more hours of continuous use, such as lights or computers), the NEC requires that circuit capacity be "de-rated" by 20 percent. Therefore, treat circuits used for continuous loads as if they were rated at 16 amps instead of the regular 20 amps.

Try to anticipate future increases in power requirements and build some excess capacity into your plan.

▶ See table at right for typical and actual amperage usages for components.

To calculate amperage when the wattage of a device is known, divide watts by 120.

Some appliances, such as large copiers, coffee makers, or space heaters require most of the current available on a 20-amp circuit. It is recommended that such devices be supplied with their own receptacle/circuit, directly from the building. This leaves the capacity of the furniture circuits available for the more dynamic requirements of the office equipment.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper planning of electrical circuits in your locale.

Approximate power consumption for common devices

• Device	• Wattage	• Amperage	• Voltage	• Number of Devices Supported on Single 20 Amp Circuit
Laptop (Low)	30	0.25	120	64
Laptop (High)	100	0.83	120	19

Refrigerator (High)	1500	12.50	120	1
Vacuum (Low)	200	1.67	120	10
Vacuum (High)	1500	12.50	120	1
Space Heater (Low)	400	3.33	120	5
Space Heater (High)	1500	12.50	120	1
Height-Adjustable Desk (Low Power Consumption)*	200	1.67	120	10
Height-Adjustable Desk (High Power Consumption)*	550	4.58	120	3

Tip: These calculations are estimations and are meant solely for informational purposes. It is important to conduct proper power planning for each installation to prevent overloading a circuit.

** Refer to the Height-Adjustable Desks Specification Guide for specific product information.*

Basics of Ergonomic Seating

A well-designed, ergonomically advanced chair that allows a full range of healthy postures throughout the day and can contribute to worker wellness and productivity.

Neck is straight or slightly forward.

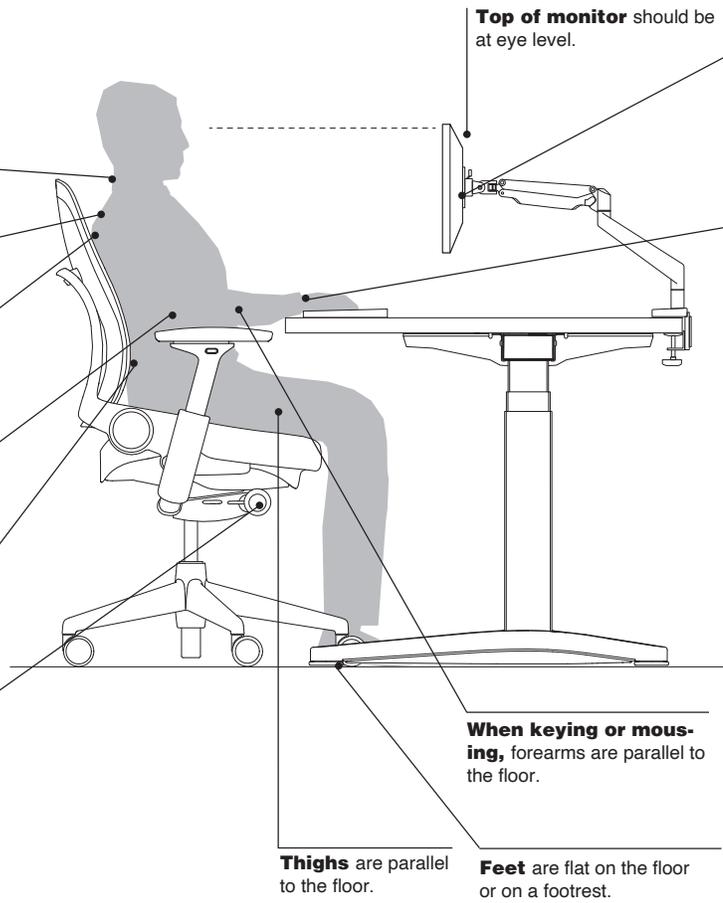

Shoulders are relaxed so arms hang naturally.

Back has full contact with the backrest (sit all the way back in your chair).

Elbows and forearms can rest comfortably on the arms of your chair, or on worksurfaces.

Lower back fits into curved lumbar support.

Tension is adjusted so backrest reclines easily, yet provides smooth, even support, and encourages postural change.

Top of monitor should be at eye level.

Screen is 20 to 30 inches from the eyes. Screen is at eye level slightly lower and directly in front of worker so head is not turned.

Wrists should be straight when keying or mousing, not bent up or down.

When keying or mousing, forearms are parallel to the floor.

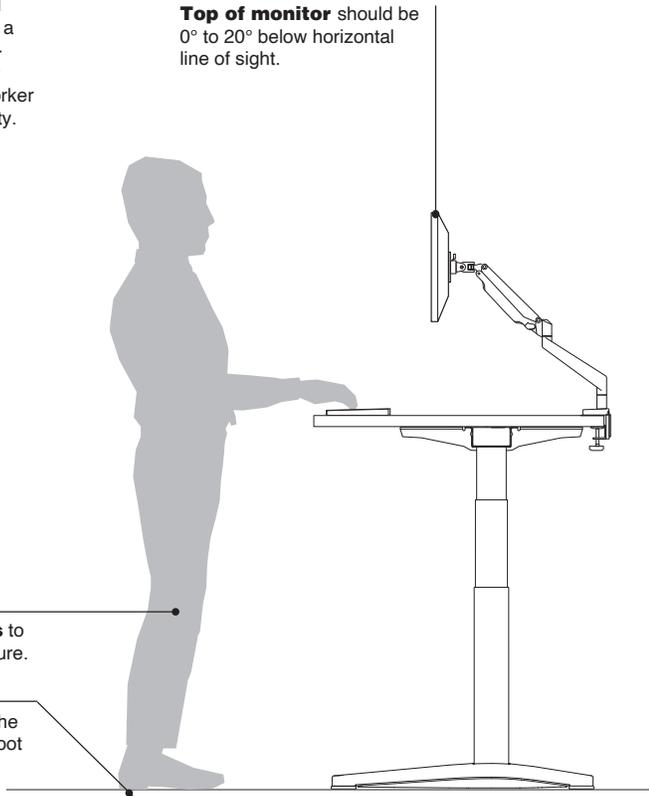

Thighs are parallel to the floor.

Feet are flat on the floor or on a footrest.

Basics of Standing and Monitor Arm Positioning

Height-adjustable desks, when combined with monitor arms, allow a full range of healthy postures throughout the day and can contribute to worker wellbeing and productivity.

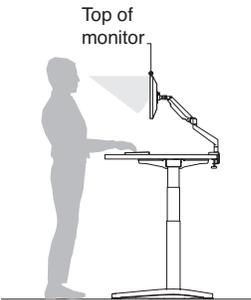

Top of monitor should be 0° to 20° below horizontal line of sight.

Avoid locking knees to help maintain good posture.

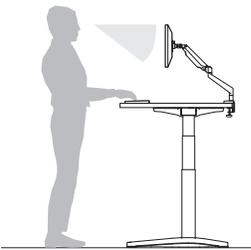

Feet should be flat on the floor or use foot rest or foot pad.

Height

Top of the monitor should be positioned at or slightly below eye level.

Distance

Monitor should be 20" to 30" from the eyes or approximately an arm's length away.

Worksurface Shape Overview

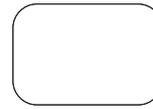

Extensive worksurface shape and size offering allows designers to meet a variety of planning applications and footprints.

Worksurface Edge Options

High-Pressure Laminate Worksurfaces

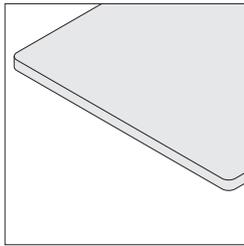

Front (user's) edge profile is available with a 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

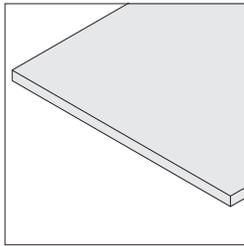

▶ See *Surface Materials* in this book for specific PVC-free availability, page 362.
Tip: Universal Tables (rounded corners) have a continuous 3 mm edge.

Edge profile finishes are specified separately from laminate color.

Radius corners have rounded corners on all four sides with a continuous user edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

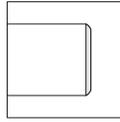

Tip: Ology, when optioned with rounded corners and with integrated rail, will have 1/4" radius corners on the two front (user's) corners and 90° corners on the rear two corners.

Square corners and wood veneer worksurfaces have 90° corner on all four sides with a front user's edge.

Tip: Flex rectangle and 120° corner desk wood veneer worksurfaces have radius corners on all four sides.

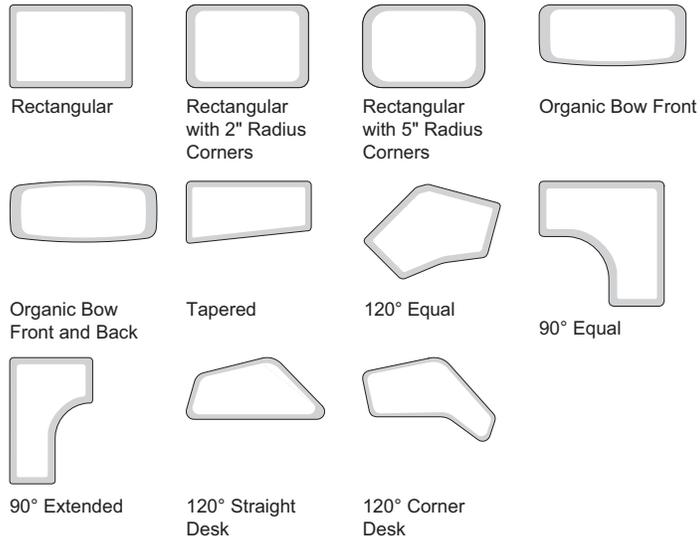

Wood Veneer Worksurfaces

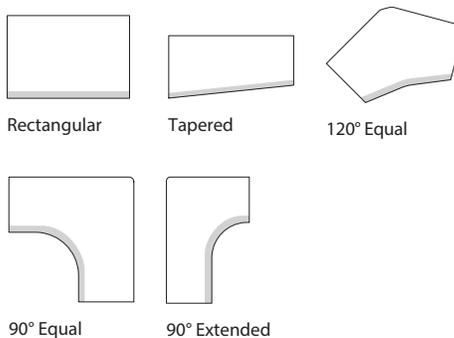

Front (user's) edge profile is wood veneer with a square (3 mm) radius. Back edge and edge that joins to adjacent worksurfaces are flat. Wood edge color matches finish specified for worksurface.

Tip: Wood veneer worksurfaces are available on Airtouch through specials.

Radius Corner Edge Profiles

Square Corner and Wood Edge Profiles

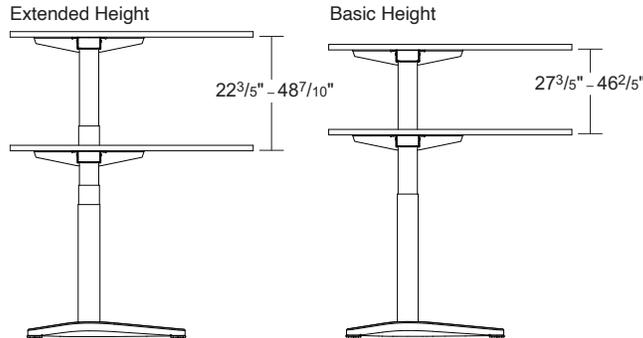

Height-Adjustable Desks Comparison Chart

Height-adjustable desks transform to meet the needs of someone 5' to 6'4" tall. Adjustables offer several selections; Ology, Flex, Migration SE, and Airtouch.

The chart below will help you determine which product line best meets your needs.

Ology

Enhanced sit-to-stand height-adjustability

A push button delivers electric adjustability at 1½" per second. Includes three controller options:

- Simple touch
- Active touch
- 4 Pre-sets

Weight capacity of 360 pounds (2-leg) to 500 pounds (3-leg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

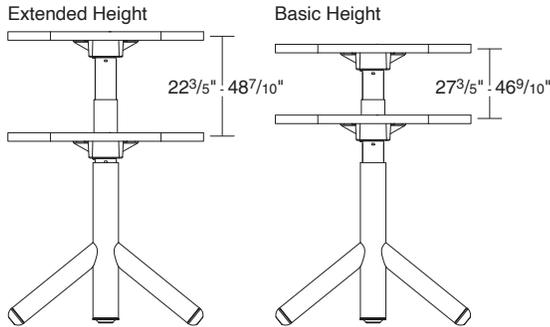

Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).

▶ See page 70 for worksurface weights.

Adjustables Comparison Chart

Migration Pro with Boost High-Speed Fast sit-to-stand height-adjustability

Controller adjusts the height of the desk at a rate of 3 1/10" per second. Includes three options:

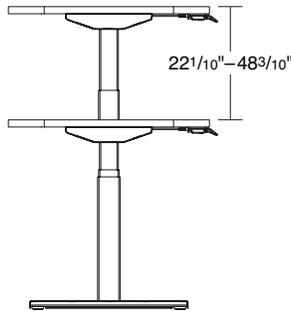

- Simple touch
- Active touch
- 3-Preset

Worktools Compatibility Charts

To determine worksurface compatibility with acrylic privacy/modesty screens, SOTO rail, and SlatRail worktools for each configuration and shape, see compatibility chart below.

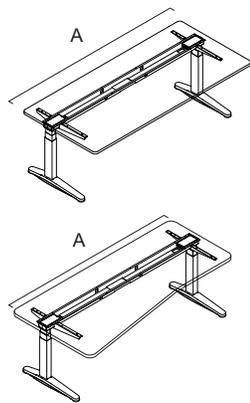

Tip: The Ology integrated rail option does not apply to these rules because the rail matches the worksurface width.

Tip: Slatwall stanchions are not applicable because they allow Slatwall to overhang mounting area.

Tip: SlatRail stanchions do not work with the same size screen or SOTO rail, (e.g. 48"W SlatRail will not work with 52"W screens) because of clamp location. Specify the SlatRail one size smaller or larger when using in combination (if applicable).

▶ See page 316

Steelcase Monitor Arm Guidelines

Application Guidelines for Migration Pro, Migration Pro with Boost High-Speed, and Migration Intro

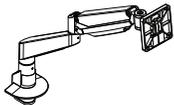

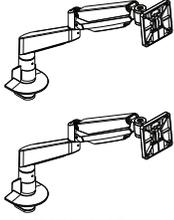

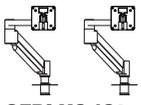

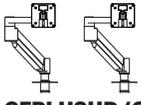

Rules:

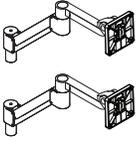

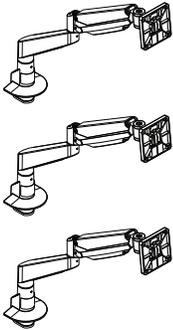

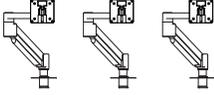

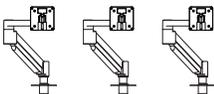

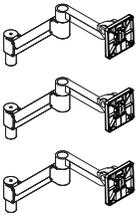

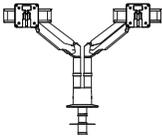

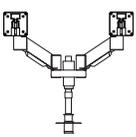

- Single monitor arm and monitor requires a minimum worksurface size of 23/24"D x 46"W
- Dual and triple monitor arms and monitors require a minimum worksurface size of 28/29/30"D x 58"W
- Up to three single monitor arms with maximum monitor weight of 15 lbs. each
- Maximum of six tiered monitors with a maximum monitor weight of 10 lbs. each (60 lbs. in total)

Tip: Attached monitor arms on freestanding desks must not extend beyond the perimeter of the desk. This includes the front, sides, and back edge of the work-surface.

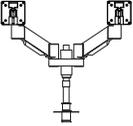

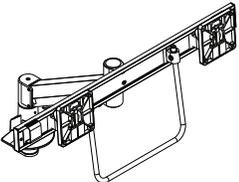

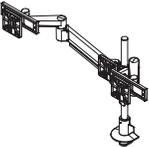

Dynamic adjustment: Up to three single arms with maximum 15 lbs. each monitor (45 lbs. total)

- **CFINTRO** – 20 lbs.
- **CFPLUS** – 17 lbs.
- **CFPLUSHD** – 28 lbs.
- **CFMAX** – 40 lbs.
- **CFINTROSLIDE** – 20 lbs.
- **CFSTDDUALBAR** – 28 lbs.

Steelcase Monitor Arm Guidelines

Application Guidelines for Single, Dual, and Triple Monitor Arm Applications on 2-Leg Height-Adjustable Desks

Rules:

- Single monitor arm and monitor requires a minimum worksurface size of 23/24"D x 46"W
- Dual and triple monitor arms and monitors require a minimum worksurface size of 29/30"D x 58"W
- Monitor arms are not permitted on two leg desks with casters

Monitor Arm Assemblies	Migration SE C-Leg	Migration SE T-Leg	Ology	Flex
Single Dynamic/Single Static Monitor Arm	Yes	Yes	Yes	Yes
Dual Dynamic/Dual Static Monitor Arm	Yes	Yes	Yes	Yes
Triple Dynamic/Triple Static Monitor Arm	Static only	Yes	Yes	Static only

Tip: For other height-adjustable desks, please see their respective product catalogs for further information.

Tip: When using 3-leg Ology and Migration SE applications, total weight of monitors and assemblies must be distributed evenly across the application.

Tip: Attached monitor arms on freestanding tables must not extend beyond the perimeter of the desk. This includes the front, sides, and back edge of the worksurface.

Steelcase Monitor Arm Guidelines

Application Guidelines for Tiered Monitor Arm Applications on 2-Leg Height-Adjustable Desks

Rules:

- Minimum worksurface size of 29/30"D x 58"W required for multiple monitors
- Six monitors maximum permitted on a 2-leg desk
- 60 pounds total maximum monitor weight per 2-leg desk
- Monitor arm applications are not permitted on 2-leg desks with casters
- When calculating height-adjustable desk lifting capacity, subtract the weight of the worksurface, understructure, options, and add-on products (e.g. flat panel monitor arm, monitors, and CPUs)

Monitor Arm Assemblies	Migration SE C-Leg	Migration SE T-Leg	Ology	Flex
One over One Static Monitor Arm	No	Yes	Yes	No
Two over Two Static/Wide Static Monitor Arm	No	Yes	Yes	No
Three over Three Static/Wide Static Monitor Arm	No	Yes	Yes	No

Tip: Attached monitor arms on freestanding tables must not extend beyond the perimeter of the desk. This includes the front, sides, and back edge of the worksurface.

CarbonNeutral Product Certification

CarbonNeutral.com

To be a CarbonNeutral product, the emissions of each desk are measured, calculated and third-party verified across every stage of the desk's lifecycle. The amount of carbon emissions from manufacturing that can't be avoided are offset by investing in trusted projects that focus on emissions avoidance and removal, and social good. Through the investment of these projects, the carbon emissions of these desk options equal zero.

The following style numbers have CarbonNeutral product certification options:

Ology

- **OLSLRQCN**
- **OLELRQCN**
- **OLSL3CN**
- **OLELL3CN**

Migration SE

- **MGSLTRQCN**
- **MGELTRQCN**
- **MGSLCRQCN**
- **MGELCRQCN**

Exceptions:

- Stand alone add on accessories are not available with CarbonNeutral product certification.

: Desks that are FSC Mix credit help organizations meet their sustainability goals. Worksurfaces are made with a mixture of materials from FSC-certified forests, recycled materials, and/or FSC-controlled wood.

Ology Height-Adjustable Desks

Ology brings together physiology and biology to support wellbeing at work. It allows users to quickly, quietly, and intuitively change posture without disrupting their coworkers. Ology offers a one button solution for quick eye-to-eye collaboration. The integrated rail offers today's workers a range of ergonomic tools. Ology provides Bactiblock, an antimicrobial additive, can be molded into the most frequently touched components.
 ▶ Specifying, page 98.

Desk has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

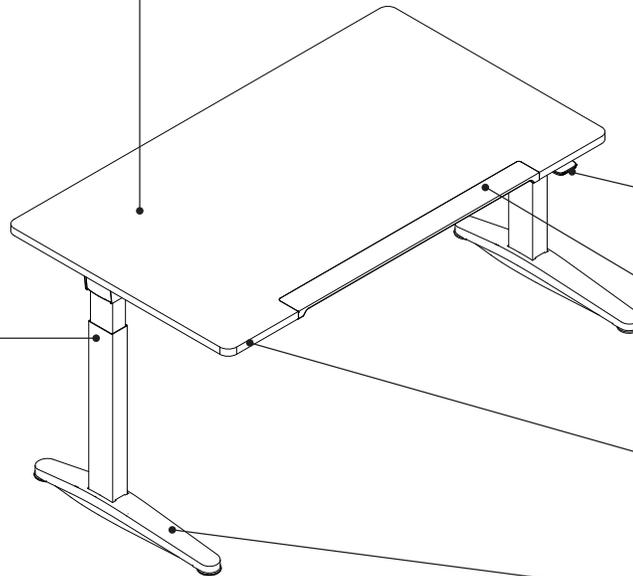

Access door and tray with power provides user access to 120V and USB A+C 20W power and data as well as cord management. Available as an option.

Integrated rail, available as an option, supports space division, lighting, or worktools to give users choice and control for their physical wellbeing.

Extended height-adjustable base adjusts from 22³/₈"H to 48⁷/₁₀"H in any increment.

Basic height-adjustable base adjusts from 27³/₈"H–46²/₅"H in any increment.

Leveling glides adjust 1/2" to install desk on uneven floors. 1" adjustable glides are available as an option.

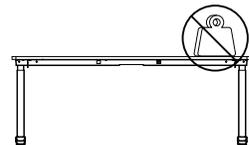

Now available as a CarbonNeutral product, making sure our commitment to a more sustainable future helps yours too.

Push button simple touch controller adjusts height at a rate of 1 1/2" per second.

Soft edge, available as option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W.

Edge is available in 3 mm edge profile for radius corner and square corner is 3 mm on the user's edge and 1 mm sides and back.

Distribute weight evenly. **Base** supports a maximum distributed weight load of 360 pounds (2-leg) and 500 pounds (3-leg).
Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).

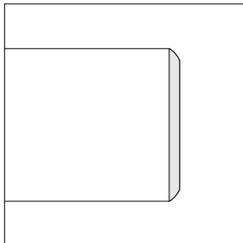

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.
 ▶ See page 70 for worksurface weights.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Active touch controller is standard.
Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Product Details

High-Pressure Laminate Desks

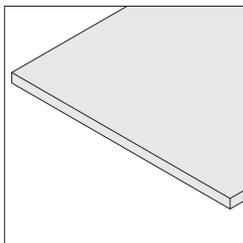

Front (user's) edge profile is available in 3 mm edge profile.

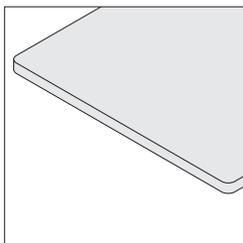

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 362.

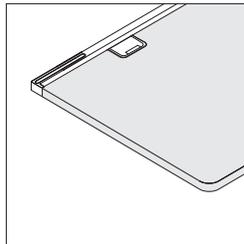

Edge profile finishes are specified separately from laminate color.

Square corners, available as an option, have 90° corners on all four sides with a front user's edge.

Radius corners, available as an option, have 1¼" radius on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for freestanding furniture.

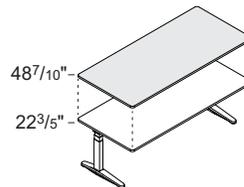

When radius corners are specified in applications with integrated rail, the front corners of the desk will be radius and the back corners will be square.

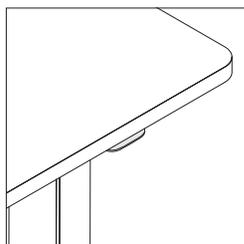

Wood Veneer Desks

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for desk. Corner style for wood veneer desks are square corners.

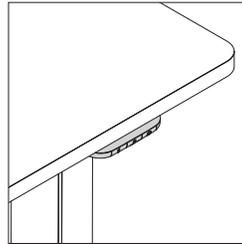

Extended ology desks adjust 22¾"H to 48 7/10"H in any increment. Basic height-adjustable base adjusts from 27¾"H–46¾"H in any increment.

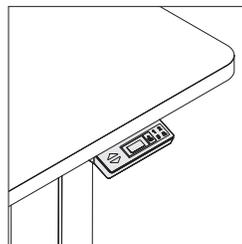

Simple touch controller is available as an option and easily adjusts height of desk, at a rate of 1½" per second, by lifting or pressing down on the controller.

Tip: Optional antimicrobial additive available.

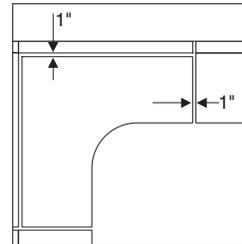

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

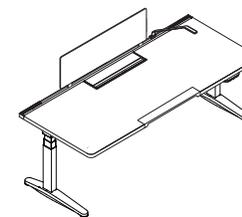

4 pre-set programmable controller is available as an option. It allows users to set the seated and standing height positions or pre-set heights for multiple users. The collaboration button can be programmed to raise the desk to an average standing height for shoulder to shoulder/dyadic collaboration. Digital display will show the height of the desk when adjusting and at rest before it enters sleep mode.

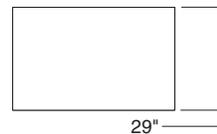

Gyroscopic obstruction sensing technology is standard with all Ology desks. The worksurface will backtrack when it makes contact with an object or detects tilt.

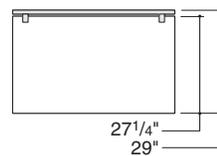

Desk sizes are listed in actual dimensions to allow for 1" gap to adjacent furniture eliminating any pinch points.

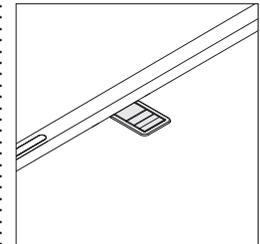

Integrated rail, available as an option, allows for the mounting of personal/modesty screens, lights, power strips, and other worktools.

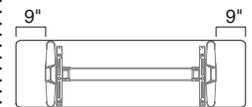

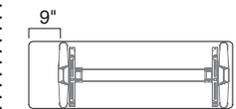

The overall dimension of the worksurface is 23"D, 29"D, or 35"D. If full depth worksurfaces are desired, add 1" to each depth.

Integrated rail is optional and must be specified on initial order. It cannot be added after install. Worksurface depth is shortened by 1¾" to accommodate the integrated rail so the overall footprint remains the same.

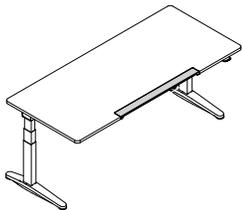

Cord drop is standard when rail is specified and power door or grommets are not optioned to allow for cords to drop below the surface. Corner desks will have a cord drop on opposite side when power door or grommets are specified on a single side.

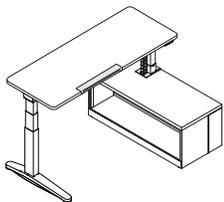

Desk overhang for CPU holder or layering of low storage and pedestals is available as an option on rectangular desks. The overhang is 9" and available on 64"W or larger desks. Desk widths 70"W or larger allow for single or dual overhang.

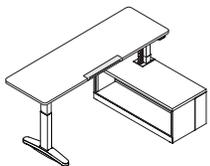

Tip: Overhang not available on 35"D or 36"D.

Soft edge, available as an option, is polyurthane and is offered with Bactiblock, an antimicrobial additive. Soft edge is available on rectangular and tapered desks that are 58"W or wider without overhang. With a left or right overhang, soft edge is available on 70"W and 76"W only. Soft edge cannot be used on desks that have overhang on both left and right.

Soft edge can be positioned left or right on desks that are 64"W or wider for use with integrated storage. *Tip: Soft edge is shifted 3" on 64"W, 6" on 70"W, and 9" on 76"W, without overhang.*

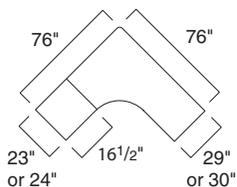

Worksurface overhang can be positioned left or right on desks that are 70" wide or wider for use with integrated storage. *Tip: Overhang not available on 35"D or 36"D.*

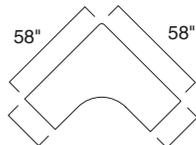

Ology desk with integrated storage must be specified with modular widths only. When opting for parametric widths, integrated storage is not available.

Steelcase guidance for height adjustment obstruction sensing technology (OST):

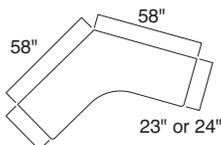

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

90° desks, 60¹/₁₆" x 60¹/₁₆" and wider, are manufactured in two pieces due to laminate sheet size. Flush mounted desk bracing is provided. The desk split is located on the left side if an equal corner is specified. The split is located on the longest side if an extended corner is specified.

90° desks can be specified 23", 24", 29", or 30" deep. Right- and left-hand depths are not required to match.

120° desks can be specified 23", 24", 29", or 30" deep. Right- and left-hand depths must match.

CarbonNeutral.com
CarbonNeutral product in the Ology portfolio helps organizations achieve their carbon emissions goals. Order **OLSLRQCN, OLELRQCN, OLSLL3CN, or OLELL3CN** to specify Ology with CarbonNeutral product certification.

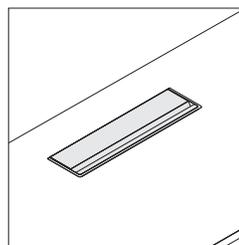

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1 1/2" per second. Motor is 110V and includes a 10⁴/₅' power cord. Motor has 0.1W standby power.

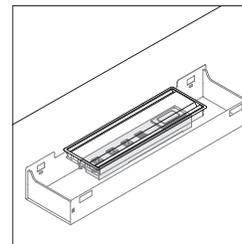

Chicago requires that desks shipping into Illinois ship with a 9' power cord.

Ology desks are NRTL listed, and the Ology base is NRTL listed when constructed in accordance with the assembly directions.

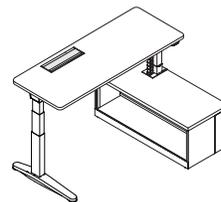

Controller may be placed on either the left or right side of the desk.

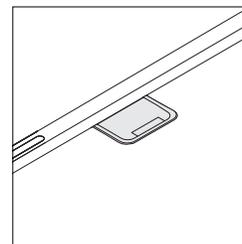

Power and data access door and tray with USB A+C 20W is available as an option. The door is 16 1/2"W and centered on the surface, can be off set starting at 64"W providing user access to power, data, and USB A+C 20W, as well as cord management. Corner desks can support the access door on either side of the desk or on both sides and will have a cord drop on opposite side when an integrated rail is specified.

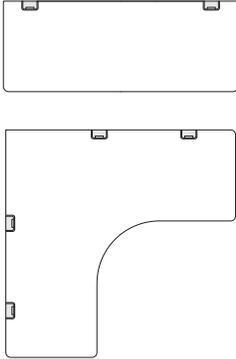

Power strip, located in tray, includes three outlets and easy access to two USB A+C 20W charging ports. Cord length is 10'. Data can be terminated and accessed in the tray, and it is positioned to the right. Both modular furniture and NEMA faceplates can be used. Chicago and California have special requirements. Desks shipping to Illinois and California with the power access door option have a powerstrip with overcurrent protection.

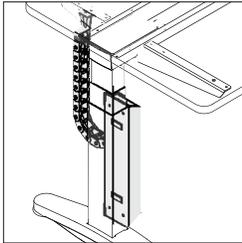

Power and data access door and tray can be positioned left or right on desks that are 64"W or wider for use with integrated storage. *Tip: Power and data access door and tray is shifted 3" on 64"W, 6" on 70"W, and 9" on 76"W, without overhang.*

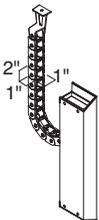

Grommets, available as an option, help manage cable/cords going from the top of desk to the underside. Grommet inside dimensions are 3 1/4"W X 3 3/4"D.

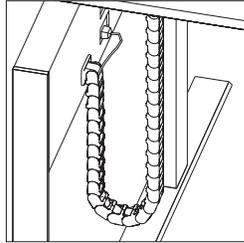

Grommets come in pairs. 90° and 120° corners offer pairs of grommets on the left side, right side, or both sides. 90° widths smaller than 58"W and 120° widths smaller than 40"W have a single grommet.
Tip: When grommet is optional, power and data access door cannot be applied on the same side of the worksurface.

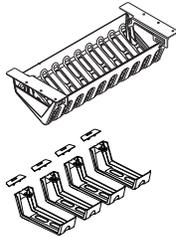

Cable riser supports cable management vertically between the floor and the underside of the desk. It is available in 6527 Merle and is specified separately.
▶ Specifying, page 135

Cable riser, with leg connection, inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

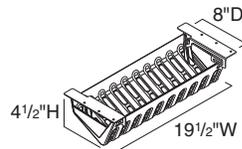

Cable riser, with fence connection, inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

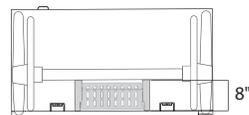

Cable basket and cable brackets, ordered separately, support horizontal cable management below the worksurface.
▶ Specifying, page 135

Cable baskets are available on rectangular, tapered, and 90° corner desks 46 1/16"W or larger, and 120° corner desks 40"W or larger.

Cable baskets inside dimensions are 6"D x 17 3/4"W x 4 1/4"H and the overall dimensions are 8"D x 19 1/2"W x 4 1/2"H.

Cable basket requires 8"D of clearance to install. The cable basket bracket is universal which allows for front or back facing orientation. Front access only when used with integrated rail.

Inside dimensions of cable brackets are 6"D x 2"H.

Surface Materials

High-Pressure Laminate Desk

- Laminate
- ▶ See *Surface Materials*, page 362
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

3 mm edge profile

- Plastic

Wood Veneer Desk

- Wood veneer (standard)
- Customiz stain (option)
- Full-Fill Finish (option)

Square 3 mm edge profile

- Wood veneer to match desk

Height-adjustable base

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle

Soft edge and grommet

- 6527 Merle

Power and Data Access Door and Tray

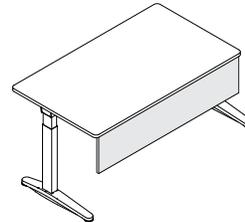

- Door**
- Paint
- Anodized Aluminum

Door bezel

- 6527 Merle

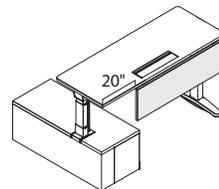

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.
▶ See page 32

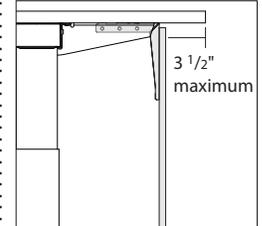

Modesty panels, available in laminate and wood veneer, attach to the understructure of the desk. It is parametric in width from 1/16". Width of modesty panel can be equal to or less than the width of the desk.

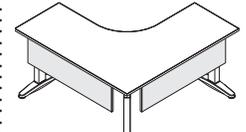

Tip: Full-width modesty panels cannot be used on desks with integrated rail. To use with the integrated rail, the modesty panel must be undersized by a minimum of 20" (rectangular and tapered), or 19" (90°), and 16" (120°) and inset from the edge of the worksurface.

When using modesty panels with integrated storage, modesty panels must be specified 20" smaller than the width of the desk.

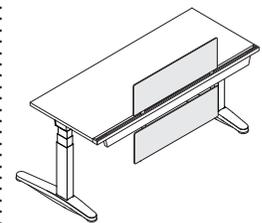

Modesty panels may be inset a maximum of 3 1/2" from the back of the worksurface to allow for c-clamping.
Tip: Inset modesty panels do not work with the power access door option or the cable basket and cable brackets.

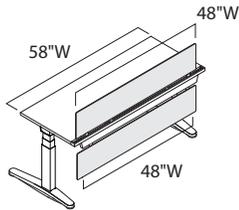

In order to inset, modesty panels must be specified a minimum of 16" or less (rectangular and tapered) or 14" or less (90°) and 10" or less (120°) than the width of the desk understructure.

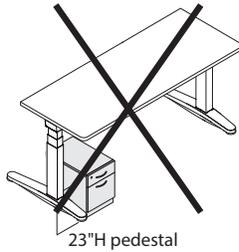

Tip: Inset modesty panels do not work with the power access door option or the cable basket and cable brackets.

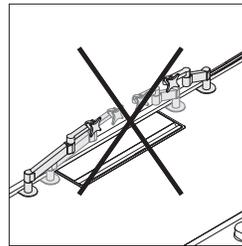

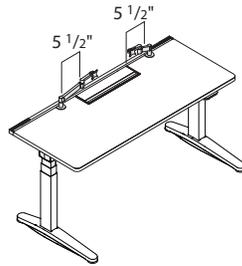

Fixed privacy/modesty screens mount on the integrated rail above for privacy and below for modesty.
Tip: 19 1/2"H and 24"H are for privacy use only.

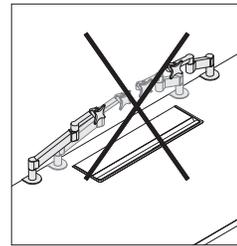

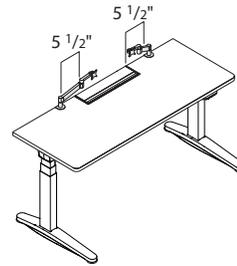

When using fixed screens in the modesty position, the desk must be at least 10" wider than the width of the screen.

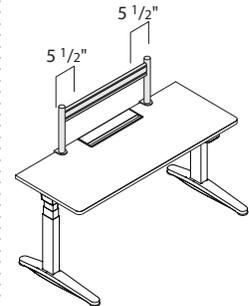

On extended height desks, any storage higher than 18" will impede the height range of the desk. On basic height desks, any storage higher than 23" will impede the height range of the desk.
Tip: Do not place storage underneath controller.

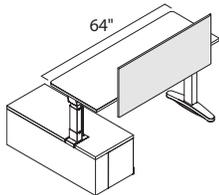

When optioning both the integrated rail and power access door, monitor arms cannot be c-clamped 5 1/2" on either side of the power door.

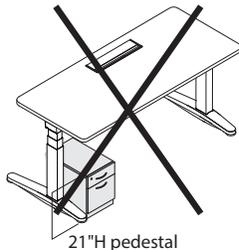

When optioning the power access door only, monitor arms cannot be c-clamped behind the power door or within 5 1/2" to either side.

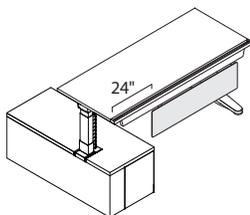

When installing SlatRail with a power door only, do not c-clamp the stanchions within 5 1/2" on either side of the power door.

When mounting Universal privacy/modesty screens with One-High integrated storage, desks must be 64"W and wider.

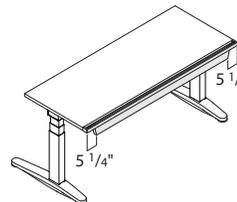

When the power access door is optioned, on extended height desks any storage taller than 15 1/2"H will impede the height range of the desk. On basic height desks, any storage taller than 20 1/2"H will impede the height range of the desk.
Tip: Do not place storage underneath controller.

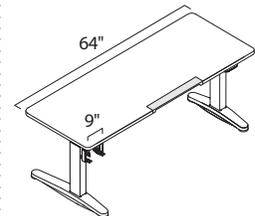

When using fixed screens in the modesty position with One-High integrated storage, the desk must be at least 24" wider than the width of the screen.

Monitor arms cannot be rail mounted.
▶ See page 58 for *Steelcase Monitor Arm Guidelines*.

When optioning the integrated rail and using a cable basket, there will not be enough room to C-clamp behind the basket.

When attaching lighting to the integrated rail, there is a 5 1/4" mounting free zone on each end of the rail.

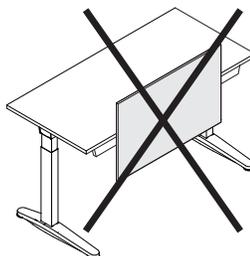

When mounting CPU holders, specify the overhang option.
Tip: CPU holders that require less than 12"D clearance may be mounted inboard of legs.

Tip: Maximum CPU weight capacity is 40 lbs.

Tip: Only standard Stella or 5" lift and lock mechanisms should be used.

Tip: CPU holders are not allowed on 35"D or 36"D worksurfaces.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

On extended height desks, CPUs installed in a CPU holder should not be installed over the foot or exceed 16" high, or it will impede the height range of the desk.

All assemblies meet or exceed ANSI/BIFMA standards.

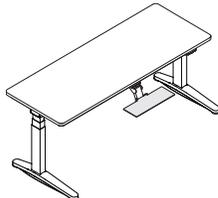

Read base only warranty limitations.

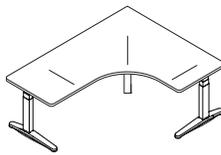

► See page 32 for *Workstation Design Guidelines and Requirements*.

Keyboard assemblies are not allowed on rectangle or tapered 24"D or smaller and smaller than 46"W height-adjustable desks. They do not meet minimum safety requirements.

Steelcase keyboard assemblies can be installed on rectangle or tapered 29"/30"D Ology. Specify desks 46"W and wider and with an 11" track.

For rectangle and tapered desks:

- 23"D/24"D - keyboard not allowed
- 29"D/30"D and 46"W or wider - specify 11" track
- 35"D/36"D - specify up to 17" track

For 90°/120° desks (keyboard mounted on sides):

- 23"D/24"D - keyboard not allowed
- 29"D/30"D - specify 11" track

For 90° desks (keyboard mounted on corner):

- Specify up to 20" track

For 120° desks (keyboard mounted on corner):

- Specify up to 17" track

Ology Height-Adjustable Desks, continued

Installation

Desks ship with pre-drilled holes for mounting bases.

Two-piece tops ship with flush mounted desk bracing.

Height-adjustable base requires attachment to the worksurface.

Base supports a maximum distributed weight capacity of 360 pounds (2-leg) and 500 pounds (3-leg).

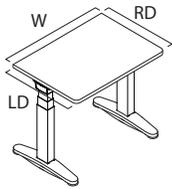

Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure and options (i.e. integrated rail, power and data access door or soft edge).

Tip: A label applied to the underside of the worksurface will include the load-capacity for each desk.

Ology Height-Adjustable Desks, continued

Base supports a maximum distributed weight capacity of 360 pounds (2-leg) and 500 pounds (3-leg).

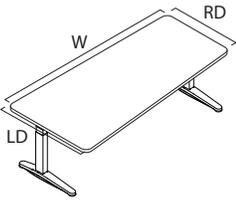

Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, under-structure and options (i.e. integrated rail, power and data access door or soft edge).

Tip: A label applied to the underside of the worksurface will include the load-capacity for each desk.

Tip: When the 90° desk width is 40"-42" and 23"/24" deep on one end AND the opposite end is 29"/30" deep, product size limits apply. The width must be increased to 46"W or greater.

Tip: When specifying 3-leg 90° equal corners the smallest width available is 52" x 52", regardless of depth.

Tip: When specifying 3-leg 90° extended corners the smallest width available is 40" x 52", when 23"/24" deep is selected on both ends.

Tip: When specifying 3-leg 90° extended corners the smallest width available is 46" x 52", when 29"/30" deep is selected on both ends.

For Canadian Pricing

Multiply U.S. Price by the Canadian price factor.

	52WL x 30DL x 40WR x 23DR	N.A.	52WL x 23DL x 40WR x 30DR	\$5654
	52WL x 30DL x 40WR x 24DR	N.A.	52WL x 24DL x 40WR x 30DR	\$5654

Tip: When the 90° desk width is 40"-42" and 23"/24" deep on one end AND the opposite end is 29"/30" deep, product size limits apply. The width must be increased to 46"W or greater.

Tip: When specifying 3-leg 90° equal corners the smallest width available is 52" x 52", regardless of depth.

Tip: When specifying 3-leg 90° extended corners the smallest width available is 40" x 52", when 23"/24" deep is selected on both ends.

Tip: When specifying 3-leg 90° extended corners the smallest width available is 46" x 52", when 29"/30" deep is selected on both ends.

Overhang	Not available	Left or Right	Left or Right or Left and Right	Left or Right or Left and Right				
Overhang + Power Door	Not available	Center	Center	Center				
Overhang + Soft Edge	Not available	Center	Center					
Power Door	Not available	Center	Center	Center	Center	Left, Right, or Center	Left, Right, or Center	Left, Right, or Center
Soft Edge	Not available	Not available	Not available	Not available	Center	Left, Right, or Center	Left, Right, or Center	Left, Right, or Center

	Tapered			
	58"W	64"W	70"W	76"W
Grommet	Available	Available	Available	Available
Integrated Rail	Available	Available	Available	Available
Power Door	Center	Left, Right or Center	Left, Right or Center	Left, Right or Center
Soft Edge	Center	Left, Right or Center	Left, Right or Center	Left, Right or Center

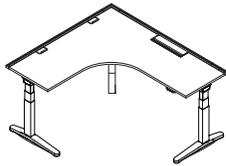

Tip: When integrated storage is present, power door and soft edge can be positioned left or right on desks that are 64"W or wider. Position must shift away from the storage.

Tip: Overhang can be positioned left or right on desks that are 70" wide or wider when used with integrated storage.

Tip: Overhang not available on 35"D or 36"D.

Tip: When choosing location of power door and soft edge, both will be on the same side.

Tip: 70"W or wider with double overhang does not allow soft edge.

Ology Modesty Panels

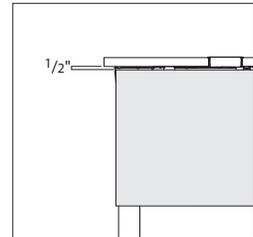

Modesty panels provide modesty when needed. Modesty panels, available in laminate and veneer, connect to the desk frame.

- Specifying, page 134

Brackets are attached to the panel.

Product Details

Gap is $\frac{1}{2}$ " between underside of the worksurface and top of modesty panel. Panel can be flush to the worksurface or inset.

Modesty panels, both modular and parametric, are undersized $2\frac{1}{2}$ " for square corner or radius corner options. If planning for full width on square corner, add $2\frac{1}{2}$ ". Verify in SmartTools the manufactured width vs modular or parametric widths.

C-clamp mounting is not allowed with flush mount. C-clamp mount when panel is inset.

Modesty panels are defaulted in the horizontal grain direction for both laminate and wood veneer. Optional vertical grain direction can be specified, however, laminate specification is only allowed up to 60" wide.

Actual Dimensions

Modular Modesty Panels

Width	31 $\frac{1}{2}$ ", 37 $\frac{1}{2}$ ", 43 $\frac{1}{2}$ ", 49 $\frac{1}{2}$ ", 54 $\frac{1}{2}$ ", 61 $\frac{1}{2}$ ", 67 $\frac{1}{2}$ ", or 73 $\frac{1}{2}$ "
Height	14 $\frac{3}{8}$ "
Overall height	14 $\frac{7}{8}$ "
Thickness	$\frac{3}{4}$ "

Tip: Overall height is measured from bottom of mounting surface to the bottom of the screen.

Tip: Parametric modesty panel widths can be specified from 34"–78"W in $\frac{1}{16}$ " increments.

Tip: Verify in SmartTools the manufactured width vs modular or parametric widths, that are undersized by $2\frac{1}{2}$ ".

Square 3 mm edge profile

- Wood veneer to match panel

Bracket

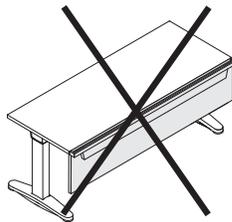

- 7360 Merle

Application Topics

Modesty panels are parametric in width from 34"W to 78"W in 1/16" increments. Modesty panel can be equal to the width of the desk or shorter.

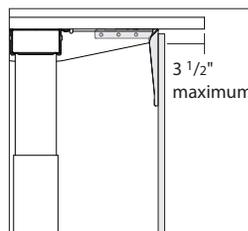

Tip: When using a modesty panel on straight and taper parametric sized desks, modesty panel width must be verified in CET to avoid interference.

When used with integrated storage, modesty panel must be a minimum of 20" shorter than worksurface width to allow for pinch point clearances.

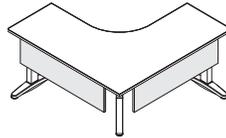

Full width modesty panels cannot be used on desks with integrated rail.

Tip: To use with the integrated rail, the modesty panel must be undersized by a minimum of 20" (rectangular and tapered) or 19" or less (90°) and 16" or less (120°) than the width of the desk understructure.

Modesty panels may be inset a maximum of 3 1/2" from the back of the worksurface to allow for c-clamping.

Tip: Inset modesty panels do not work with the power access door option or the cable basket and cable brackets.

In order to inset, modesty panels must be specified a minimum of 16" or less (rectangular and tapered) or 14" or less (90°) and 10" or less (120°) than the width of the desk understructure. Utilize the mounting plates and screws to attach the modesty panel to the underside of the worksurface.

Tip: Inset modesty panels do not work with the power access door option or the cable basket and cable brackets.

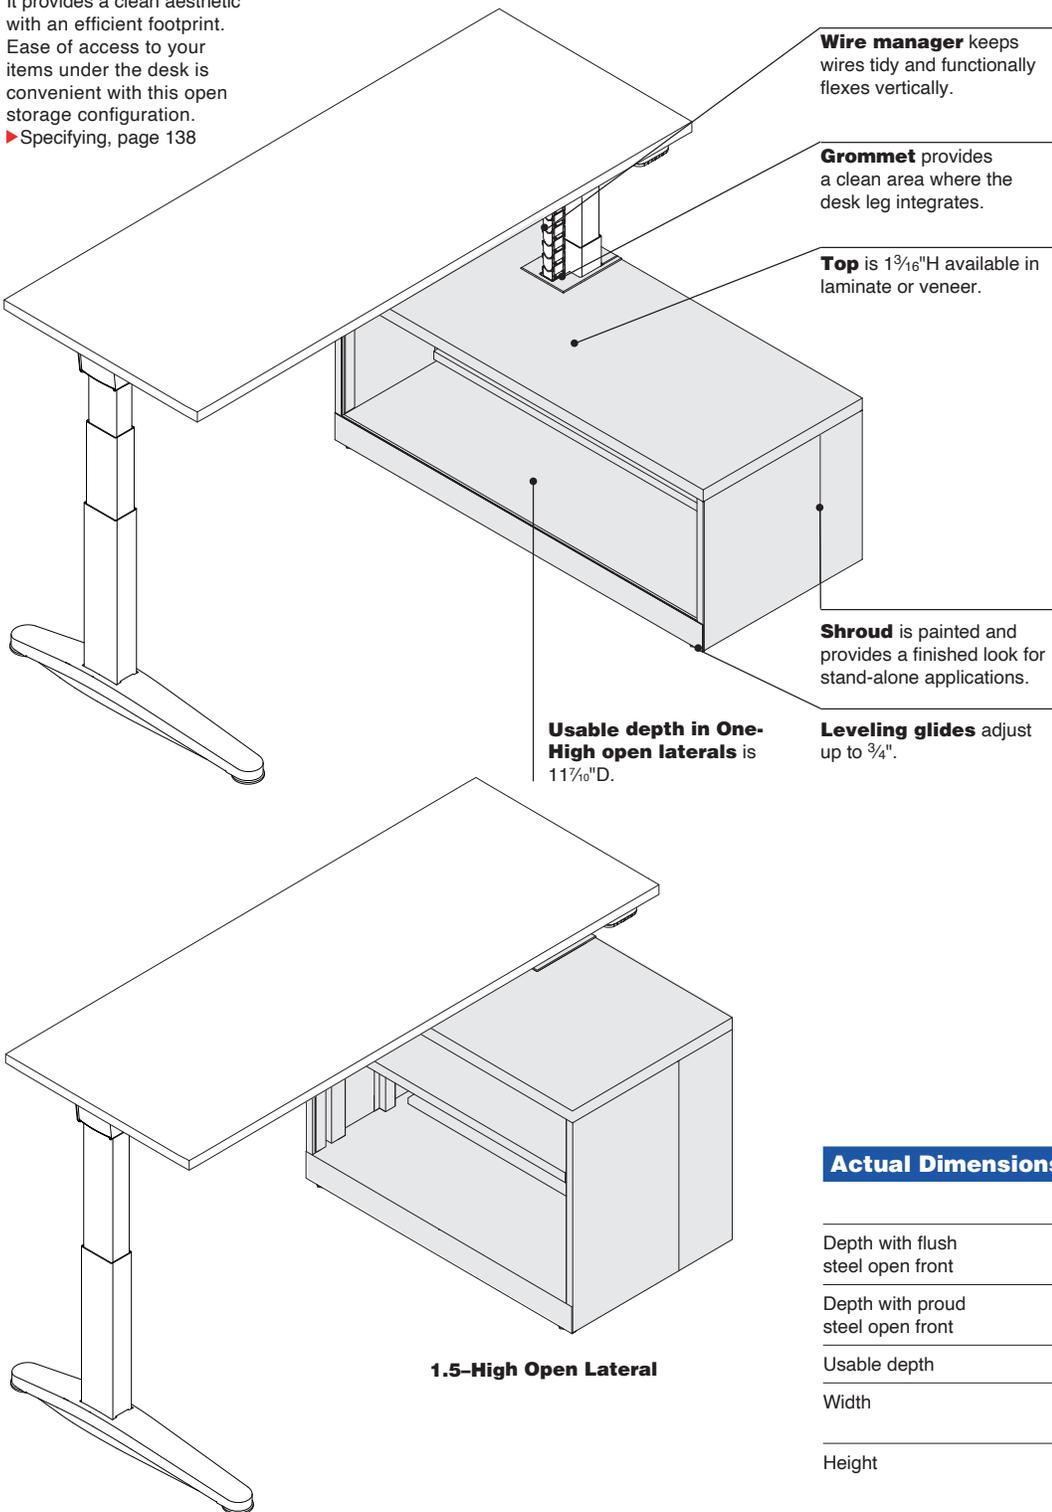

Universal or Sarto privacy/modesty screens cannot be used with Ology modesty panels.

When using a modesty panel with Universal or Sarto privacy screens, verify placement in CET to avoid interference.

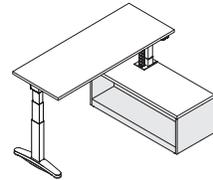

Universal Steel One-High and 1.5-High Open Laterals

For Ology Application

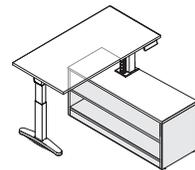

Universal One-High and 1.5-High open laterals for Ology application seamlessly integrates the Ology desk leg into universal storage. It provides a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with this open storage configuration.
 ▶ Specifying, page 138

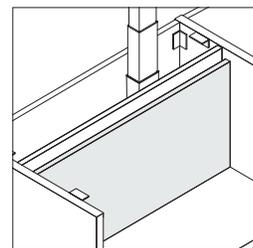

Product Details

One-High storage can be used with Ology extended range desks or basic range desks.

1.5-High storage can only be used with Ology basic range desks.

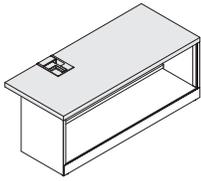

One-High and 1.5-High storage for Ology application have a removeable interior back panel to allow access to the Ology base.

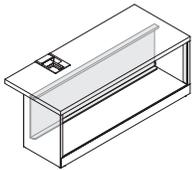

Ology desk with integrated storage must be specified with modular widths only. When opting for parametric widths, integrated storage is not available.

Actual Dimensions

	One-High	1.5-High
Depth with flush steel open front	18"	18"
Depth with proud steel open front	18 ⁷ / ₈ "	18 ⁷ / ₈ "
Usable depth	11 ⁷ / ₁₀ "	11 ⁷ / ₁₀ "
Width	30", 36", and 42"	30", 36", and 42"
Height	16"	22"

Laminate and wood veneer tops with square edge profile are available. Tops are 1³/₁₆"H.

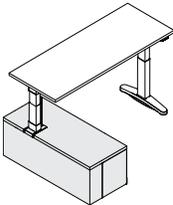

Removable interior cover provides access to power outlets that can be located in the panel behind storage unit.

Case Widths and Ology Foot Dimensions

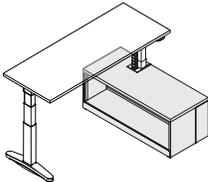

30"W Ology open laterals can house Ology legs of 24" or 30" in length. 36"W and 42"W units can house Ology legs with feet of 24", 30", or 36" in length.

Integrated leg options apply to One-High and 1.5-High units only and are meant for use with Ology height-adjustable desks only.

Application Topics

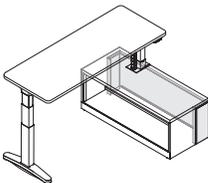

Application: Ology left

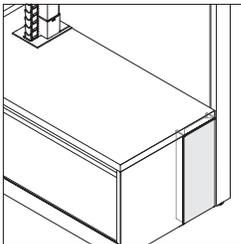

Application: Ology right

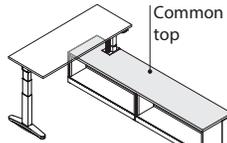

Application is determined by which leg of the Ology desk is located inside the storage.

Shroud is used to finish off the back of the storage when application is used as stand-alone unit.

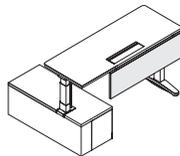

Filler is used in end-of-run applications where end of storage unit will be visible.

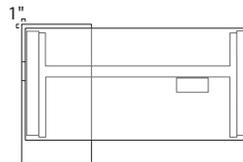

No top option on lateral file is available for use with a Universal common top shared with an adjacent lateral.

Universal common top for Ology application, ordered separately, is available in laminate or veneer. Cut-out for Ology leg is available on the left side or the right side of the Universal common top. Ology desk cannot be placed in the middle of the Universal common top.

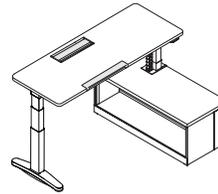

Ology modesty panel or fixed personal/modesty screens must be undersized and justified to the outside when used with One-High and 1.5-High storage units. Only one open lateral file is permitted on Ology 90° corner desks.

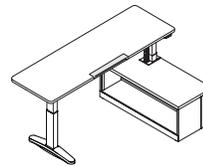

When used with One-High and 1.5-High integrated storage, screens used in the modesty position must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

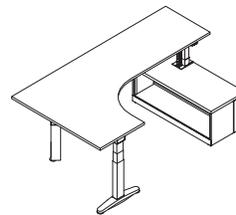

To help avoid pinch points, the Universal One-High and 1.5-High open laterals for Ology application extends 1" past the back of the Ology worksurface.

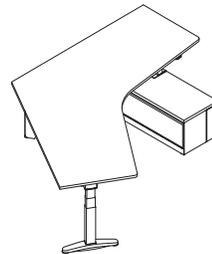

Soft edge and power and data access door can be positioned left or right on Ology desks that are 64"W or wider for use with One-High and 1.5-High integrated storage.

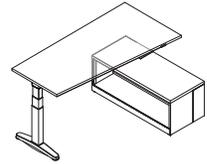

Worksurface overhang can be positioned left or right on desks that are 70" wide or wider.
Tip: Overhang not available on 35"D or 36"D.

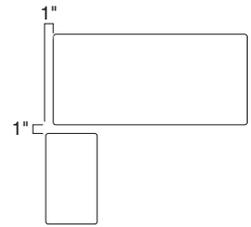

Ology 90° corners that are 70" wide and wider can be used with One-High and 1.5-High storage units.

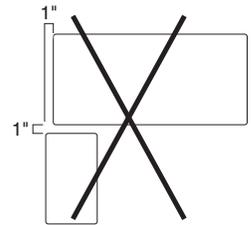

Ology 120° corners that are 52" wide and wider can be used with One-High and 1.5-High storage units. Only one open lateral file is permitted on Ology 120° corner desks.

Tapered desks that are 70" wide and wider can be used with One-High and 1.5-High storage units.

When specifying One-High and 1.5-High storage that matches the worksurface depth, only One-High storage should be placed adjacent to the desk.

Pinch point clearances are not maintained when 1.5-High or taller storage is used adjacent to One-High integrated storage that matches the worksurface depth.

Elective Elements One-High Open Plinth Base Pedestals and Common Tops

For Ology Application

One-High open plinth base pedestal and common top for Ology application seamlessly integrate the Ology desk into Elective Elements. They provide a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with this open storage configuration.

► Specifying, pages 144 and 146.

Tip: Use Elective Elements common tops with Ology base to create an Elective Elements height adjustable desk.

Actual Dimensions

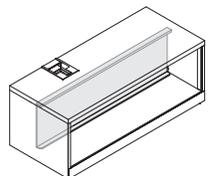

One-High Open Plinth Base Pedestal	
Depth	17 1/4"
Width	24", 30", 36", and 42"
Height	15 1/2"
Common Top	
Depth	18"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", 96", 102", 108", 114", and 120"
Height	N.A.

Product Details

Pedestal Base

3" Base

Removable interior cover provides access to power outlets that can be located in the panel behind storage unit.

Base widths and Ology foot:

- 24"W Ology base units can house Ology legs 24" in length.
- 30"W Ology base units can house Ology legs of 24" or 30" in length.
- 36"W and 42"W units can house Ology legs of 24", 30", or 36" in length.

Ology desk with integrated storage must be specified with modular widths only. When opting for parametric widths, integrated storage is not available.

Surface Materials

Pedestal case

- Laminate

Laminate top on pedestal and common top

- Laminate
- Open Line laminate (option)

Edges on pedestal and common top

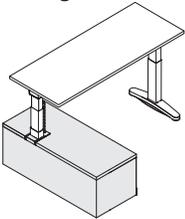

- Wood veneer
- Plastic

Wood veneer top on pedestal and common top

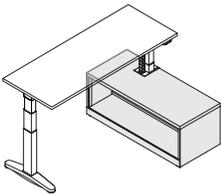

- Wood veneer—open pore finishes
- Full-fill (option) is available on wood veneer tops only.

Application Topics

Storage

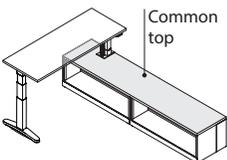

Application: Ology left

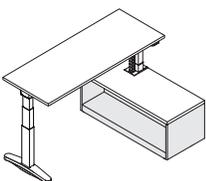

Application: Ology right

Application is determined by which leg of the Ology base is located inside the pedestal.

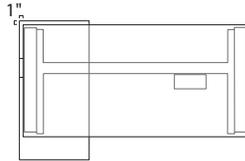

Common tops for Ology application can be used with two units side-by-side when one storage unit is required for Ology leg integration.

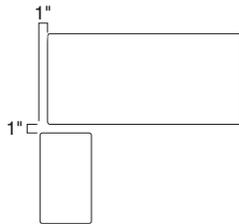

Common top for Ology application, ordered separately, is available in laminate or veneer. Cut-out for Ology leg is available on the left side or the right side of the common top. Ology desk cannot be placed in the middle of the common top.

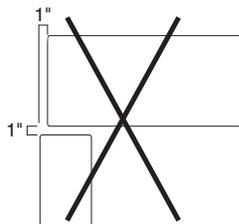

Common tops for Ology application are available when ganging Ology base units to other Elective Elements pedestals of the same height.

To help avoid pinch points, the pedestal for Ology application extends 1" past the back of the common top.

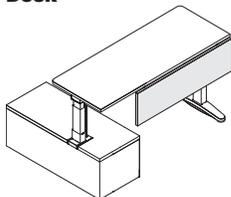

When specifying One-High storage that matches the worksurface depth, only One-High storage should be placed adjacent to the desk.

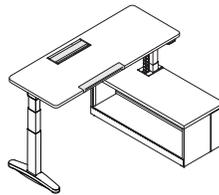

Pinch point clearances are not maintained when 1.5-High or taller storage is used adjacent to One-High integrated storage that matches the worksurface depth.

Desk

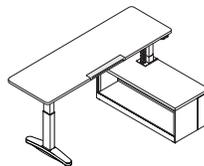

Modesty panel or fixed personal/modesty screens must be under-sized and justified to the outside of the common top when used with pedestal.

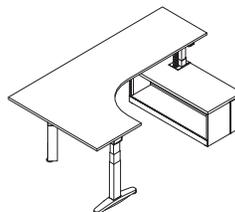

When used with One-High integrated storage, screens used in the modesty position must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

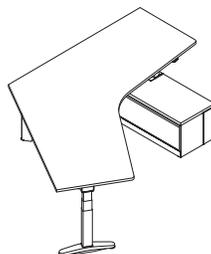

Soft edge and power and data access door can be positioned left or right on Ology desks that are 64"W or wider for use with One-High integrated storage.

Worksurface overhang can be positioned left or right on desks that are 70" wide or wider.
Tip: Overhang not available on 35"D or 36"D.

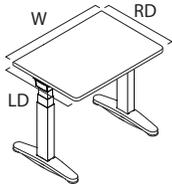

Ology 90° corners that are 70" wide and wider can be used with One-High storage unit.

Ology 120° corners that are 52" wide and wider can be used with One-High storage unit.

Ology Height-Adjustable Rectangular Desks

High-Pressure Laminate or Composite Veneer

Tip: On extended height desks, any storage higher than 18", or 15½" if the power access door is optioned, will impede lowest height range of worksurface. On basic height desks, any storage higher than 23", or 20½" if the power access door is optioned, will impede lowest height range of worksurface. Do not place storage underneath controller.

Tip: One single monitor is allowed on desks 23"D or deeper and 46"W and wider.
▶ See page 58 for *Steelcase Monitor Arm Guidelines*.

Tip: Dual monitors are allowed on 29"D or deeper and 58"W and wider.
▶ See page 58, *Steelcase Monitor Arm Guidelines*.

Tip: Base supports a maximum distributed weight capacity of 360 pounds (2-leg) and 500 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).
▶ See page 70 for *worksurface weights*.

Tip: Antimicrobial additives can be specified only when specifying simple touch controller and/or soft edge.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Ology Height-Adjustable 3-Leg Corner Desks

High-Pressure Laminate or Composite Veneer

Tip: On extended height desks, any storage higher than 18"H, or 15½"H if the power access door is optional, will impede lowest height range of worksurface. On basic height desks, any storage higher than 23"H, or 20½"H if the power access door is optional, will impede lowest height range of work-surface. Do not place stor-age underneath controller.

Tip: Base supports a maximum distributed weight capacity of 500 pounds (3-leg). When calculating lifting capacity, subtract the weight of the worksurface, understructure and options selected.

▶ See page 70 for worksur-face weights.

Tip: Antimicrobial additives can be specified only when specifying simple touch controller

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: For a conversion chart of old to new 3-leg corner style numbers refer to page 374.

Tip: The standard active touch controller is Bluetooth-enabled to allow pairing with the Steelcase Rise app.

Tip: At least one side must be 52"W or greater.

Tip: Equal corner widths are parametric to 1/16" from 52"W-78"W.

Tip: 90° desks, 60¹/₁₆"W x 60¹/₁₆"W and wider, are manufactured in two pieces. The worksurface split is located on the left side of an equal corner and on the longest side of an extended corner.

Tip: At least one side must be 52"W or greater.

Tip: Equal corner widths are parametric to 1/16" from 52"W–78"W.

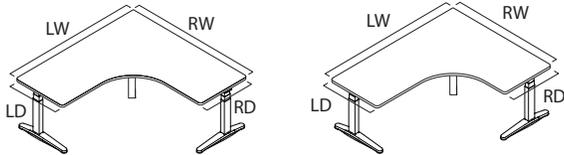

Tip: 90° desks, 60¹/₁₆"W x 60¹/₁₆"W and wider, are manufactured in two pieces. The worksurface split is located on the left side of an equal corner and on the longest side of an extended corner.

► See page 1 for details.

Ology Height-Adjustable Bases

Tip: Any storage higher than 18"H will impede lowest height range of worksurface. On basic height desks, any storage higher than 23"H will impede lowest height range of worksurface. Do not place storage underneath controller.

Tip: One single monitor is allowed on desks 23"D or deeper, and 46"W and wider.

▶ See page 58 for Steelcase Monitor Arm Guidelines.

Tip: Dual monitors allowed on 29"D or deeper, and 58"W and wider.

▶ See page 58, Steelcase Monitor Arm Guidelines.

Tip: Base supports a maximum distributed weight capacity of 360 pounds (2-leg). When calculating lifting capacity, subtract the weight of the worksurface and understructure.

Tip: 2-leg desks that have an overhang, or are 35"D or 36"D will have a distributed weight capacity of 300 pounds (136.1 kg).

▶ See page 70 for understructure weights.

Tip: Antimicrobial additives can be specified only when specifying simple touch controller.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Tip: 9" overhang is available on desks 64"W and larger. Overhang on both sides is available on 70"W and 76"W only.

Tip: Overhang not available on 35"D or 36"D.

Tip: Overhang is available on rectangular bases only.

Ology Modesty Panels

High-Pressure Laminate or Composite Veneer

Tip: Full width modesty panels cannot be used on desks with integrated rail. To use with the integrated rail, the modesty panel must be undersized by a minimum of 20" (rectangular and tapered) or 19" (90°) and 16" (120°), and inset from the edge of the worksurface.

For laminate price group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Modular and parametric modesty panels are undersized 2 1/2" to account for desks with radius corners.

Modular and parametric modesty panels are undersized by 2 1/2" for square corner and radius corner options to account for desks with radius corners.

Tip: When using a modesty panel on straight and taper parametric sized desks, modesty panel width must be verified in CET to avoid interference.

Tip: Modesty panels are defaulted in the horizontal grain direction for both laminate and wood veneer. Optional vertical grain direction can be specified, however, laminate specification is only allowed up to 60" wide.

Flex Rectangle Height-Adjustable Desks and Bases

Height-adjustable

desks bring mobility and wellbeing, allowing users to change posture and location to suit their work needs. Optional integrated power includes a single power cord that comes out of the desk for ease of movement.

► Specifying, pages 162–166

Desk has a wood core with a High-Pressure Laminate or wood veneer surface, and is 1" thick.

Edge is available in 3 mm edge profile, when High-Pressure Laminate is selected.

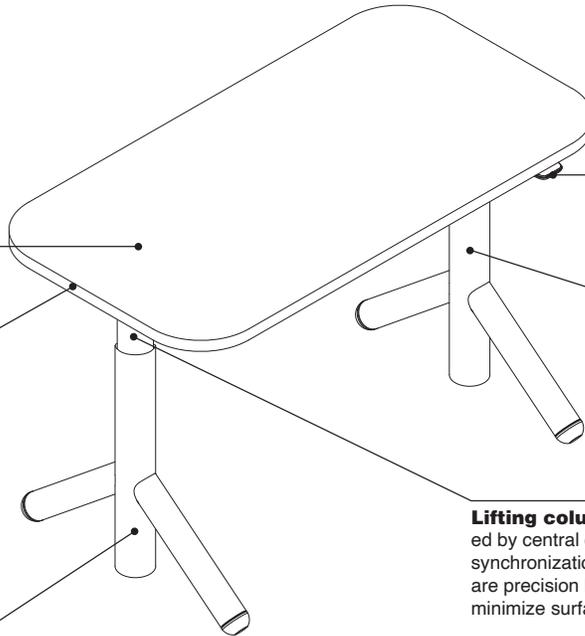

Square edge is available in 3 mm edge profile, when wood veneer is selected.

Basic height-adjustable base adjusts from 27³/₈"H–46⁷/₁₀"H in any increment.

Extended height-adjustable base adjusts from 22³/₈"H to 48⁷/₁₀"H in any increment.

Brakes are available as an option or can be specified separately. Brake can be activated by the user to fix the mobile desk into place and is engaged by spinning the ring to the floor.

Tip: Brake is recommend for use on hard floors.

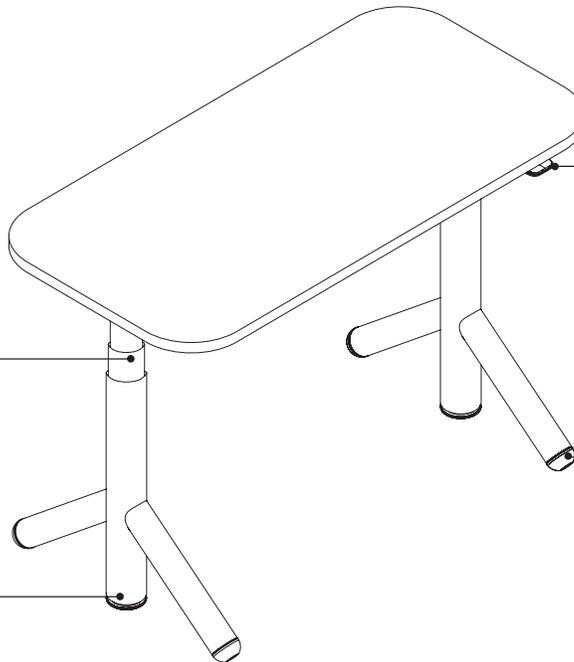

Push button simple touch controller adjusts height at a rate of 1¹/₂" per second.

Base supports a maximum distributed weight load of 360 pounds (2-leg).

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

► See page 153 for worksurface weights.

Lifting column is controlled by central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

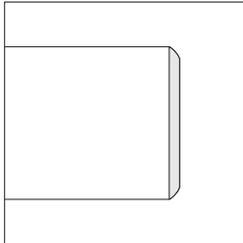

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Directional rollers provide intentional user mobility.

Product Details

High-Pressure Laminate Desks

Edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and woodgrain finishes.

Edge profile finishes are specified separately from laminate color.

Radius corners are standard and have a 5" radius on all four sides with a continuous user edge. Radius corners eliminate sharp edges and are appropriate for mobile furniture.

Wood Veneer Desks

Edge profile is wood veneer with a square (3 mm) radius.

Simple touch controller is available as an option and easily adjusts height of desk, at a rate of 1½" per second, by lifting or pressing down on the controller.

Tip: Available with an antimicrobial option.

Active touch controller is Bluetooth-enabled and is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Obstruction sensing technology is standard with all Flex desks. The worksurface will backtrack when it makes contact with an object.

The overall depth of the worksurface is 23"D, 24"D, 29"D, or 30"D.

Desk overhang for CPU holder or layering of low storage and pedestals is available as an option. The overhang is 9" and available on 58"W or larger desks. Desk widths 70"W or larger allow for single or dual overhang.

Extended height Flex desks adjust 22¾"H to 48⅞"H in any increment. Basic height-adjustable base adjusts from 27¾"H–46⅞"H in any increment.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10' power cord. Motor has 0.1W standby power.

Chicago requires that desks shipping into Illinois ship with a 9' power cord.

Flex desks and bases are listed by ETL.

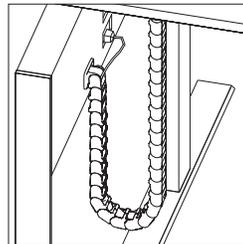

Cable trays are available as an option or can be ordered separately. 46"W–57½"W desks use the 28" cable tray. 58"W–72"W desks use the 40"W cable tray. When specifying a desk overhang, see the chart below for additional guidelines.

Overhang	Worksurface Width			
	46"W–57½"W	58"W–65½"W	66"W–69½"W	70"W–72"W
None	28"W Cable Tray	40"W Cable Tray		
Left or Right		28"W Cable Tray	40"W Cable Tray	
Left and Right				28"W Cable Tray

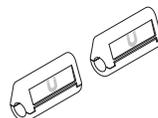

Integrated power is optional and is located in the understructure of a desk. Integrated power consolidates technology to provide one cord out of the desk for convenience to the user. Two versions are available: underworksurface only and underworksurface plus worksurface clamp on convenience power. Worksurface power has two power outlet options, either dual USB-A or USB-C. Desks 57½"W and under receive three power outlets in the understructure and desks 58"W and above receive five power outlets. Over-current power protection is standard on the integrated power option. If the over-current protection trips, reset by pushing the button located on the face of the understructure.

Integrated power is standard with a 10' standard black power cord. A 20' cord option is available if additional length is needed. For extra color, braided cord option is available.

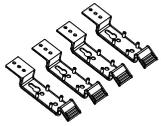

Integrated power is available with either a standard three prong NEMA plug for use with standard receptacles or with Steelcase's proprietary thread low-profile plug for use with one-door and two-door low-profile connectors.

Cable riser, with fence connection, inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

Magnetic cable clips are optimized for the Flex braided one-cord out solution. However, the magnetic cable clips will work on Ology, Migration SE, and the standard Flex power cords. The clips are used to manage power cords out of the users way. Orderable as a separate style number.

Cable brackets, ordered separately, support horizontal cable management below the worksurface.
 ▶ Specifying, page 177

Inside dimensions of cable brackets are 6"D x 2¼"W x ½"H.

9010 Light Peacock	4CZ8 Light Peacock
9011 Seagull	4858 Seagull

*Default finish on integrated power.

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

On extended height desks, any storage higher than 19" will impede the height range of the desk. On basic height desks, any storage higher than 23⁷/₁₀" will impede the height range of the desk.

Tip: Do not place storage underneath controller.

When mounting CPU holders, specify the overhang option.
Tip: CPU holders that require less than 12"D clearance may be mounted inboard of legs.

All assemblies meet or exceed ANSI/BIFMA standards.

Read base only warranty limitations.

▶ See page 153 for *Workstation Design Guidelines and Requirements*.

Keyboard assemblies are not allowed for use on height-adjustable desks. They do not meet minimum safety requirements.

Installation

Desks ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Base supports a maximum distributed weight capacity of 360 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options.

Tip: A label applied to the underside of the worksurface will include the load-capacity for each desk.

Tip: Flex 90° desk mounted wraps will work on Flex rectangular height-adjustable desks 23"D x 52"W and above.

Worksurface Weight

Worksurface Shape	W	D	Options							Accessory
			Worksurface Weight	Understructure Weight	Leg Clearance (A)	Integrated Power Weight	Desk Mounted Wrap	Curved Screen*		
			23"D		24"D

	70"	29" or 30"	52 lb	54 lb	11.7 lb	12½"	5.0 lb	29 lb	5.5 lb	

*For detailed curved screen information, see page 157.

120° Height-Adjustable Desks

120° height-adjustable desks bring mobility and wellbeing, allowing users to change posture and location to suit their work needs. Optional integrated power includes a single power cord that comes out of the desk for ease of movement.
► Specifying, pages 168–170

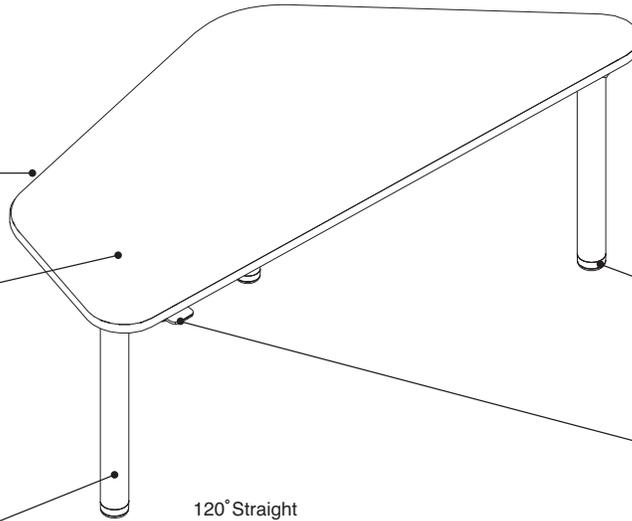

Edge is available in 3 mm edge profile, when High-Pressure Laminate is selected.

Desk has a wood core with a High-Pressure Laminate or wood veneer surface, and is 1" thick.

Base is available in extended or basic height: extended height-adjustable base adjusts from 22³/₅"H to 48⁷/₁₀"H in any increment.

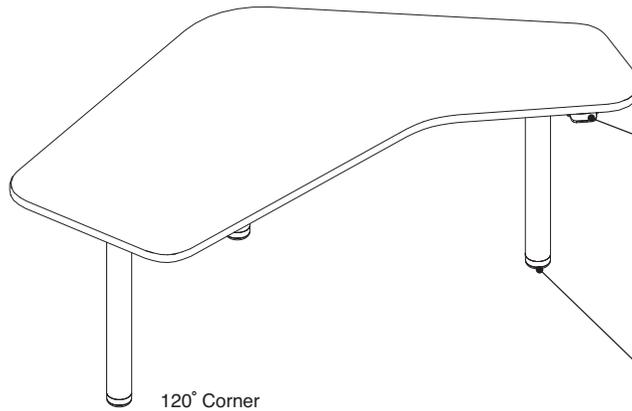

Base supports a maximum distributed weight load of 540 pounds (3-leg).
Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options selected.

Basic height-adjustable base adjusts from 27³/₅"H–46⁹/₁₀"H in any increment.

Lifting columns are controlled by a central control box for synchronization. Columns are precision balanced to minimize surface vibrations.

Push button simple touch controller adjusts height at a rate of 1½" per second.

Active touch controller is Bluetooth-enabled; is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

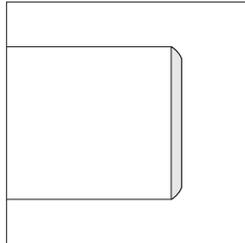

Tip: Steelcase Rise mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.

Slide glide on 120° height-adjustable desks provides intentional user mobility.

Product Details

High-Pressure Laminate Desks

Edge profile is available in 3 mm edge profile.

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and woodgrain finishes.

Edge profile finishes are specified separately from laminate color.

Radius corners are standard with a continuous user edge. Radius corners eliminate sharp edges and are appropriate for mobile furniture.

Wood Veneer Desks

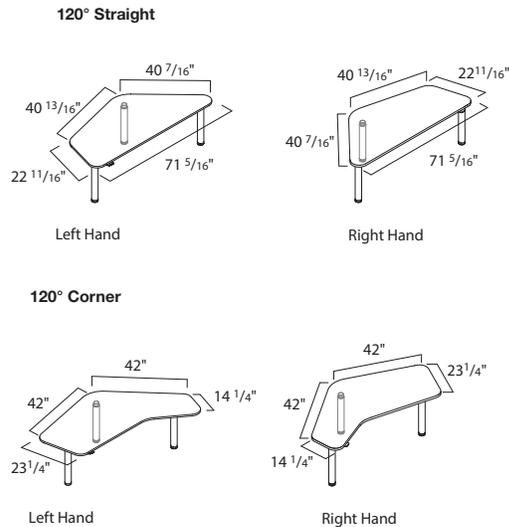

Edge profile is wood veneer with a square (3 mm) radius.

Simple touch controller is available as an option and easily adjusts height of desk, at a rate of 1½" per second, by lifting or pressing down on the controller.

Tip: Available with an antimicrobial option.

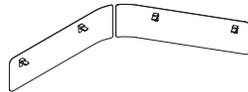

Active touch controller is standard and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Mobile app is available that pairs with any active touch controller to support preferences, presets, and activity tracking.*

Obstruction sensing technology is standard with all Flex desks. The worksurface will backtrack when it makes contact with an object.

Extended height Flex desks adjust 22¾"H to 487/10"H in any increment.

Basic height-adjustable base adjusts from 27¾"H–469/10"H in any increment.

Modesty panels are available on the 120° height-adjustable desks as an option, or can be ordered separately. The two piece design provides modesty for the user, and attachment for the magnetic cable clips to keep the height-adjustable power cord out of the users way.

Steelcase guidance for height adjustment obstruction sensing technology (OST):

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

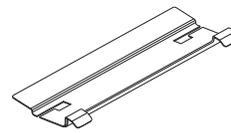

Monitor arms approved for use with Flex 120° height-adjustable desks are: **CSFSTDDUALBAR**, **CFINTROSLIDE**, **CFINTRO**.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1½" per second. Motor is 110V and includes a 10' power cord. Motor has 0.1W standby power.

Chicago requires that desks shipping into Illinois ship with a 9' power cord.

Flex desks and bases are listed by ETL.

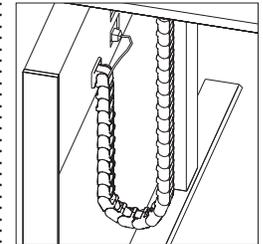

120° cable tray is available on the 120° height-adjustable desks as an option, or can be ordered separately.

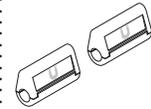

Integrated power is optional and is located in the understructure of a desk. Integrated power consolidates technology to provide one cord out of the desk for convenience to the user. Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

On extended height desks, any storage higher than 19" will impede the height range of the desk. On basic height desks, any storage higher than 23⁷/₁₆" will impede the height range of the desk.
Tip: Do not place storage underneath controller.

All assemblies meet or exceed ANSI/BIFMA standards.

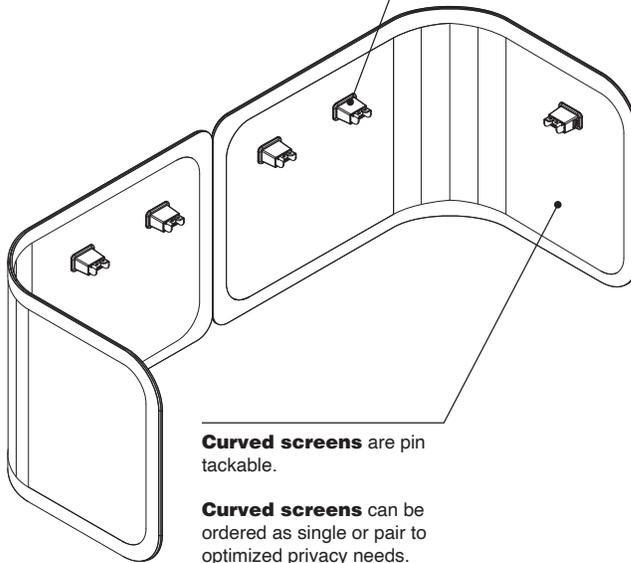

Read base only warranty limitations.

Keyboard assemblies are not allowed for use on height-adjustable desks. They do not meet minimum safety requirements.

Curved screens provide user adjustable privacy and modesty for height-adjustable desks and work tables.

► Specifying, page 172

Curved screens are attached to the worksurface with magnetic brackets allowing for user adjustability between privacy and modesty modes.

Curved screens are pin tackable.

Curved screens can be ordered as single or pair to optimized privacy needs.

Actual Dimensions	
Width	46", 58", or 70"
Height	18"
Weight	1.9 lb, 3.7 lb, 5.5 lb
Depth	1/2"

Product Details

Curved screens perform to an NRC rating of 0.45.

Application Topics

Curved screens are sized to work with modular size desks. Mounting a pair of screens on a parametric sized desk will create a gap between screens.

Tip: It is recommended that CET SmartTools be used to evaluate the gap on the desk.

Curved screen is mounted with a 5/8" cord drop.

Fabric is applied in a warp horizontal direction. Due to the size of the screens, fabric is unable to be applied in a warp vertical direction.

Privacy configuration provides 11 1/2" of screen above the worksurface and 5 1/2" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. Screens are meant to be handled by the user. Choose fabrics colors that will wear well over time.

Modesty configuration provides 3 1/2" of screen above the worksurface and 13 1/2" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen.

When ordering a single screen, selecting the correct hand is important. Handedness is assigned from the user position when the curved screen is mounted in privacy mode.

Single curved screens

mounted to a modular size desk will cover half the width of the desk. If more coverage is desired, order the next size larger of screens. *Tip: It is recommended that CET SmartTools be used to evaluate the placement of the screen on the desk.*

Curved screens are allowed on rectangular 5" radius and organic bow front worksurfaces from Migration Pro, Migration Pro High-Speed, and Migration Intro. *Tip: Screens are not allowed with the knife edge option.*

Personal Spaces

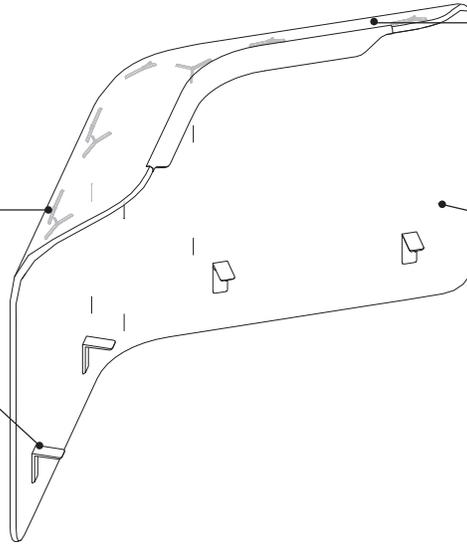

Desk Mount Privacy Wraps

Tackable acoustic privacy wraps offer acoustic privacy and personalization for the user.

► Specifying, pages 173–174

Upholstery details continue the curvature of the wrap.

120° desk mount privacy wraps are attached via brackets to the 120° straight and 120° corner height-adjustable desks.

Integrated light option minimizes shadows under privacy wrap, and enhances backdrop for video calls.

Wrap knit covers the entire frame creating a warm and enclosed privacy element.

Actual Dimensions

120° Privacy Wrap

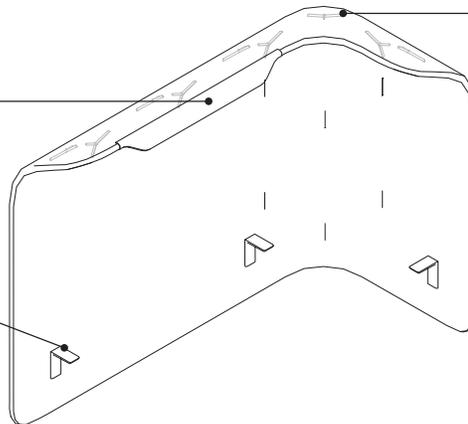

Width Left 40⁹/₁₀"

Width Right 40⁹/₁₀"

Height 45¹/₄"

Integrated light option minimizes shadows under privacy wrap, and enhances backdrop for video calls.

90° desk mount privacy wrap attaches to Flex rectangular height-adjustable desks and worksurfaces that offer a 5" radius corner.

Upholstery details continue the curvature of the wrap.

Frame can accept magnetic name tag or Flex freestanding screens to add personalization and privacy to the workstation.

Actual Dimensions

90° Privacy Wrap

Depth 25⁴/₅"

Width 52⁹/₁₀"

Height 45¹/₄"

Wrap Knit and Light Finish Matrix

Wrap Finish Name	Wrap Finish Code	Light Finish Name	Light Finish Code
Dark Grey/ Merle	5KJ1	Merle	6527
Blue	5KJ2	Seagull	6053
Light Grey/ Platinum	5KJ3	Seagull	6053
Light Brown/ Beige	5KJ4	Milk	6052

Application Topics

90° desk mount privacy wraps are allowed on rectangular 5" radius and 28/29/30"D organic bow front work-surfaces from Migration Pro, Migration Pro High-Speed, and Migration Intro.

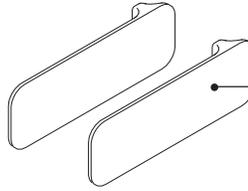

Tip: Privacy wrap is not allowed with the following worksurface options: knife edge profile, 23"D, mounted on the same side as an overhang.

Tip: Desks must be 52"W and wider.

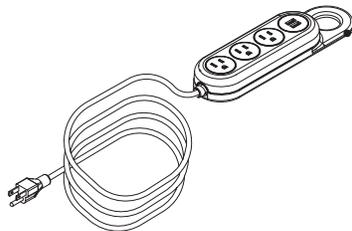

Accessories

Flex accessories can be used across the collection to provide functionality and personalization.

► Specifying, pages 175–178

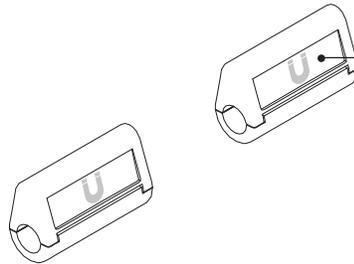

Magnetic name tag attaches to all privacy wraps for personal notes in the workstation. Name tags have an erasable finish and are sold in packages of two or ten.

Power hangers are available in two configurations: four power and three power with USB.

Power hangers hang from the pegs on work tables.

Magnetic cable clips manage the height adjustable power cord. Cable clips are sold in packages of two or ten.

Braided Cord Color Matrix

Braided cord samples are not available to order. Use matrix below that compares the braided cord finish to the nearest Steelcase finish or Pantone color for color reference purposes.

Finish	Similar Steelcase Color
9003 Fuchsia	PerfectMatch
9004 Marlin	4AZ5 Marlin
9006 Chili	6338 Chili

9008 Honey	4CZ5 Honey
9009 Black	0835 Black
9010 Light Peacock	4CZ8 Light Peacock
9011 Seagull	4858 Seagull

Tip: Braided cord color is defaulted to cover finish but can be changed if desired.

Actual Dimensions

	Depth	Width	Height
Power Hanger	2 ³ / ₁₀ "	10"	1 ³ / ₈ "

Product Details

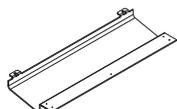

Power hangers are standard with a 10' standard black power cord. A 20' cord option is available if additional length is needed. For extra color, braided cord option is available.

Power hangers are available with either a standard three prong NEMA plug for use with standard receptacles or with Steelcase's proprietary thread low-profile plug for use with one-door and two-door low-profile connectors.

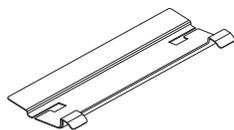

Power hangers are weighted and have a rubberized back to allow them to sit firmly on the worksurface.

Power cords should not be routed in walkways or where subject to damage.

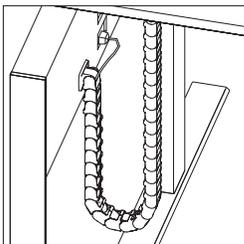

Over-current protection is standard on power hangers. The reset button is located on the side of the power hanger. If the over-current protection trips, reset by pushing the button back into place.

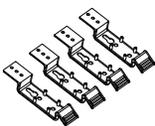

Rectangular cable trays are available as an option or can be ordered separately. 46"W–57¹⁵/₁₆"W desks use the 28"W cable tray. 58"W–72"W desks use the 40"W cable tray. When specifying a desk overhang, see additional cable tray specifying details chart on page 175.

120° cable tray is available on the 120° height-adjustable desks as an option, or can be ordered separately.

Cable riser, with fence connection, inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. Overall depth is 2".

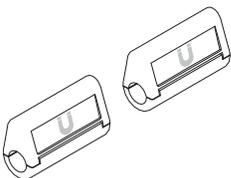

Cable brackets, ordered separately, support horizontal cable management below the worksurface.

► Specifying, page 177

Inside dimensions of cable brackets are 6"D x 2¹/₄"W x 1¹/₂"H.

Magnetic cable clips are finished in 6053 Seagull with a 6527 Merle magnet logo.

Surface Materials

Power hangers

- 4AY2 Chili
- 4AZ5 Marlin
- 4BQ7 Fuchsia
- 4CZ8 Light Peacock
- 7243 Seagull
- 7360 Merle

Rectangular and 120° cable trays

- P631 Dark Heather Grey

Cable bracket

- 6527 Merle

Cable riser

- 7360 Merle

Cable catch

- P630 Medium Heather Grey
- P631 Dark Heather Grey

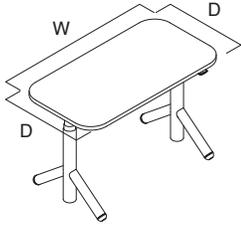

Magnetic cable clips

- 6053 Seagull with 6527 Merle magnet symbol

Magnetic name tag

- 6009 Arctic White (erasable)

Rectangle Height-Adjustable Desks

Tip: Height-adjustable desks shipping to Illinois will receive 9' power cord.

Tip: Attachment hardware is intended for worksurfaces 1" thick only.

Tip: Composite veneer group 2 upcharge is in addition to the composite veneer group 1 cost.

Tip: Veneer group 3 and veneer full-fill upcharge is in addition to the veneer group 1 cost.

Tip: The 9" overhang is available on 58"W or larger desks.

Tip: Desks 70"W or larger allow for single or dual overhang.

Tip: When specifying a desk overhang, see understanding for additional cable tray specifying details.

* Knife edge is only available on laminate worksurfaces.

** Soft edge is only available on rectangular laminate worksurfaces. Soft edge is centered between the cantilevers. If one overhang is selected, the soft edge will be off-center on the worksurface. Soft edge cannot be specified on a knife edge worksurface.

*** C-leg is only available with rectangular columns and is only available in 28", 29", or 30" depths.

Tip: Grommets can be specified left, right, and/or center. When overhang is also specified, grommet positions will match the understructure width, not the worksurface width.

Tip: Metal cable trays are not available on organic bow front and back worksurfaces.

Tip: Flush and pop-up power can be specified on center. Left or right positions availability depend on width and overhang conditions. Only one integrated power feature can be specified per desk.

Tip: Metal cable trays are available in three widths: 30", 42", and 52".

Tip: See the Migration Pro understanding pages for detailed information on worksurface overhang(s).

Tip: Overhang not available on basic height Migration Pro desks.

Tip: Sarto curved screens, Flex curved, and Flex privacy wrap are not allowed on Migration Pro desks with side knife edge.

Migration Pro Height-Adjustable Desks and Bases

Migration Pro is a high-performance height-adjustable desk that is designed and engineered to match the unique needs of users.

► Specifying, pages 220, 224, and 224

Available as a FSC Mix product, the worksurface is made with a mixture of materials from FSC-certified forests, recycled materials, and/or FSC-controlled wood. The FSC Mix credit claim number is published on the customer invoice.

Rectangular worksurfaces are available with square or radius corner options. The radius corner option can be specified with 2" or 5" radius.

Lifting column is controlled by a central box for synchronization. Columns are precision balanced to minimize surface vibrations.

Rectangular columns are offered in both T- and C-leg configurations.

Edge is available in 3 mm edge profile.

Organic worksurfaces are available in bow front or bow front and back options. Bow front has 5" radius corners at the back.

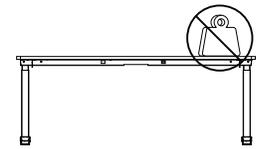

Round columns are offered in T-leg configurations.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Controller adjusts the height of the desk at a rate of 1 $\frac{1}{2}$ " per second. Three options are available - active touch, simple touch, and 3-preset with digital display.

Soft edge, available as an option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W.

Distribute weight evenly

Base supports a maximum distributed weight capacity of 360 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.

► See page 211 for worksurface weights.

Extended height-adjustable base adjusts from 22 $\frac{3}{5}$ "–48 $\frac{7}{10}$ " in any increment.

Basic height-adjustable base adjusts from 27 $\frac{3}{5}$ " – 47 $\frac{3}{10}$ " in any increment.

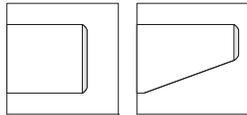

Leveling glides adjust $\frac{1}{2}$ " to install desk on uneven floors. Slide glides and 1" adjustable spacers are available as an option.

Knife edge, available as an option, is a thin profile worksurface edge that wraps three sides of the desk.

Product Details

High-Pressure Laminate Desks

Front (user's) edge profile is available in 3 mm edge profile.

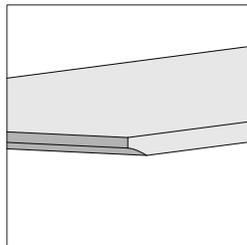

3 mm plastic edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and three woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

▶ See *Surface Materials* in this book for specific PVC-free availability, page 362.

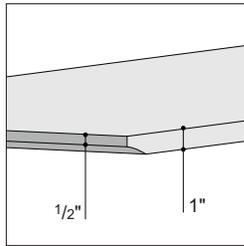

Edge profile finishes are specified separately from laminate color.

Knife edge with 3 mm user and side edges is available on rectangular and organic worksurfaces as an option. On radius corners the knife edge wraps to the back of the worksurface.

Tip: Knife edge is available on laminate worksurfaces only.

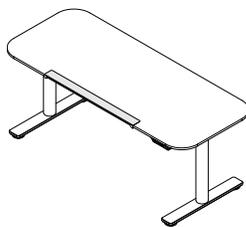

Tip: Knife edge and soft edge cannot be specified together.

Knife edge is 15° and edge profile is 1/2". Overall thickness of worksurface is 1".

Tip: The sloping underside of the edge is finished to match the backer on the underside of worksurface.

Tip: Monitor arms and power strips can still be c-clamped at the back of the worksurface.

Soft edge, available as an option, is made of polyurethane and is offered on rectangular worksurfaces 58"W or wider without overhang. When specified with a left or right overhang or left and right overhang, soft edge availability varies.

▶ See *Migration Pro Options Availability Chart*, page 181.

Tip: Soft edge is available on laminate worksurfaces only.

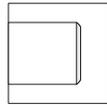

Tip: Soft edge is available as non-antimicrobial only.

Tip: Soft edge and knife edge cannot be specified together.

Tip: Soft edge, when specified with 3-preset controller, has additional width limitations due to the size of the controller.

Wood Veneer Desks

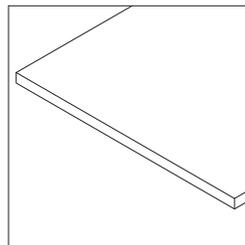

Front (user's) edge profile is wood veneer with a square 3 mm radius.

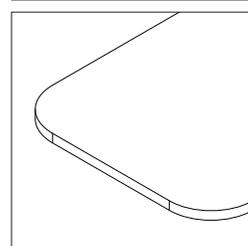

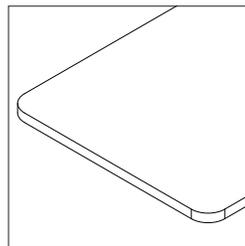

3 mm wood square profile

Rectangular worksurfaces are available with square or radius corners.

Square corners are standard on rectangular desks and have 90° corners on all four sides.

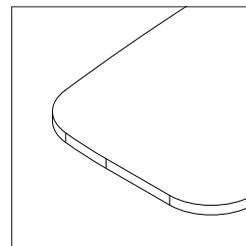

Radius corners, available as an option on rectangular desks, have 2" or 5" radius on all four sides with a continuous 3 mm user's edge. Radius corners eliminate sharp edges suitable for freestanding desks.

Tip: Wood veneer worksurfaces are available with a 5" radius only.

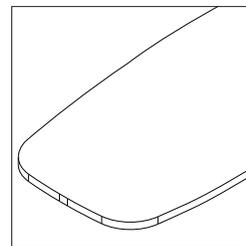

Organic worksurfaces are available in two shapes: bow front or bow front and back.

Tip: Side screens are not allowed on organic worksurface shapes.

Organic bow front worksurfaces have a 5" radius on the back corners.

Organic bow front and back worksurfaces are symmetric.

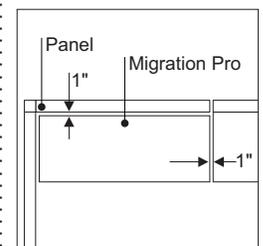

Tip: Organic bow front and back worksurfaces work with Soffio screens only.

Tip: Metal cable tray cannot be specified with organic bow front and back worksurfaces.

Desks that are FSC Mix credit help organizations meet their sustainability goals. Order **HA2ERFSC** or **HA2EOFSC** to specify Migration Pro with FSC product certification.

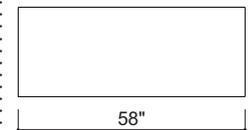

Tip: Product is not labeled. The FSC Mix credit claim number is published on the customer invoice.

Tip: FSC worksurfaces have minimal worksurface finish limitations.

Rectangular and organic worksurface sizes

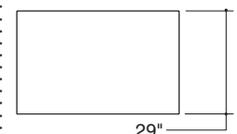

are listed in actual dimensions to allow for 1" gap to adjacent furniture, eliminating any pinch points.

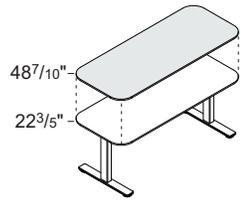

The overall width of the worksurface is 40"W–96"W. Modular widths account for 1" pinch point on each side. Parametric widths are available in 1/16" increments.

Worksurfaces 78" and wider may have different configuration and application rules.

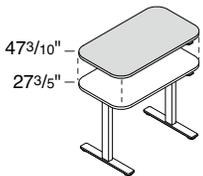

▶ See *Migration Pro Options Availability Chart*, page 181

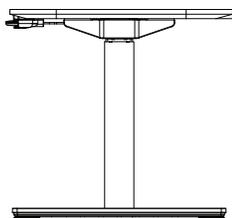

The overall depth of the worksurface is 23", 24", 28", 29", or 30". Modular depths account for a 1" pinch point clearance at the back or full depth is available.

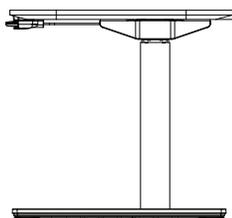

Extended height desks adjust 22³/₅"H to 48⁷/₁₀"H in any increment.

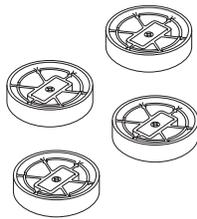

Basic height desks adjust from 27³/₅"H to 47³/₁₀"H in any increment.

T-leg configuration with round or rectangular columns is an option for 23", 24", 28", 29", and 30" depth options. All worksurface widths are available with this option.

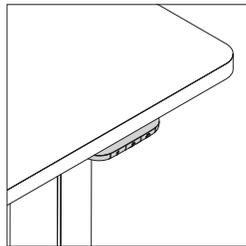

C-leg rectangular column configuration is an option for 28", 29", and 30" depth options, maximizing user knee depth clearance below the desk. Worksurfaces up to 78"W are available with this option.
Tip: Round columns are not available as a C-leg configuration.

1" glide spacer is available as an option. Added to the existing glide, it raises the overall height of the glide by 1/2" for uneven floors.

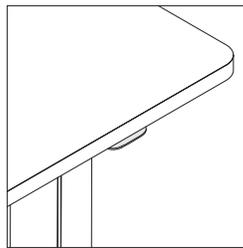

Slide glides are available as an option to aid in user-controlled mobility within the workstation.
Tip: Overall height of desk is increased by 1/2".

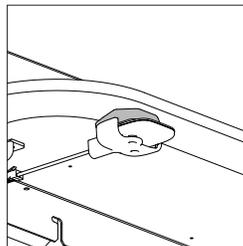

Active touch controller is standard, Bluetooth-enabled, and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.

Tip: When specified on knife edge worksurfaces, a knife edge adapter is shipped with the controller.

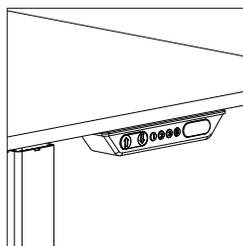

Simple touch controller is available as an option and easily adjusts the desk by lifting up or pressing down on the controller.
Tip: Simple touch is available as non-antimicrobial only.

Tip: When specified on knife edge worksurfaces, a knife edge adapter is shipped with the controller.

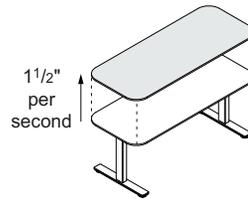

When knife edge is specified, an adapter is shipped with active touch and simple touch controllers for ease of use.

Three preset controller with digital display is available as an option and easily adjusts the desk by pushing the up and down arrows. It allows users to set the seated and standing height positions. Digital display will show the height of the desk when adjusting and at rest before it enters sleep mode.

Tip: Does not use a knife edge adapter bracket. The controller is not mounted flush to front of worksurface, it is inset mounted underneath the desk at the knife edge transition.

Desks adjust at a rate of 1¹/₂" per second.

Gyroscopic obstruction sensing technology is standard with all Migration Pro desks. The worksurface will backtrack when it contacts an object or detects tilt.
Tip: Desks greater than 78"W ship with two obstruction sensing dongles.

Steelcase guidance for height adjustment obstruction sensing technology (OST):

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

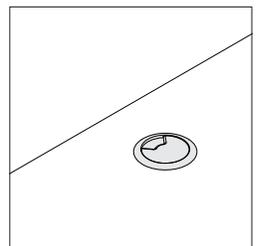

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 1¹/₂" per second. Motor is 110V and includes a 10¹/₂' power cord. Motor has 0.1W standby power.

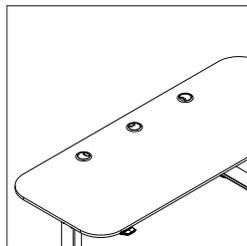

Ships with 10¹/₂' power cord. To meet Chicago power cord requirements, refer to the Migration Pro assembly directions.
Tip: If specifying flush mount or pop-up power with utility power the desk power cord is 4'. Utility power cord is available in three options: standard smooth straight, braided, or curly. Standard and braided cords are 10'. Curly cord is 163".

Underwriters Laboratory (UL) Listed. Migration Pro desks are designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Height-adjustable base is UL listed when constructed in accordance with assembly directions. Local electrical codes vary; consult the local authority having jurisdiction to verify the product as installed is compliant with local code.

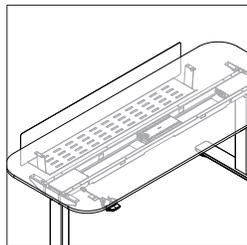

Round grommets, available as an option, help manage cable and cords routing from above to below the desk.
Tip: Grommets are centered between the base, not the worksurface, when overhang is specified.

Round grommet inside dimension is 2".

Grommets can be specified left, right, and/or center on the worksurface.
Tip: Grommets are centered between the base, not the worksurface, when overhang is specified.

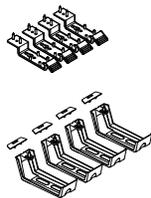

Metal cable tray, available as an option, manages cables and disguises clamps and power strips at the worksurface for a clean aesthetic.
Tip: Metal cable tray is not available as an option on organic bow front and back worksurfaces.

*Tip: Worktools smart straps **DSBULKSTRP**, can be ordered separately to manage bundled cables in the tray.*

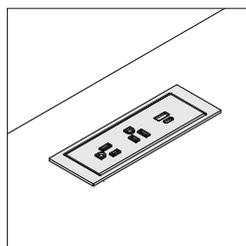

Tip: Metal cable tray can be ordered separately; however, pilot holes will not be provided.

► Specifying, page 243

Small and large cable brackets, ordered separately, support horizontal cable management below the worksurface.

► Understanding, page 204

Flush and pop-up power strips are available as an option and can be specified left, right or center depending on the worksurface width.

Tip: Only one integrated power feature can be specified per desk.

► See Migration Pro Options Availability Chart, page 181.

3 power

2 Power

Utility Power
Mounting Bracket

Flush and pop-up power strips with utility power optioned ship with worksurface mounting brackets. Can be used in conjunction with metal cable tray or small and large cable brackets.

USB A+C 20W 

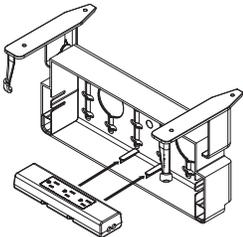

Flush and pop-up powerstrips USB A+C 20W recommended for charging cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices.

Dual 45W or 100W USB-C 

USB-C 100W recommended for all the above and compact laptops.
Tip: For USB-C 100W port, use USB-C charging cable rated for 100W use for full charging benefits. Charging cables not included.

Universal cable management kit, ordered separately, is designed to mount the utility power and mounting brackets would be unused.

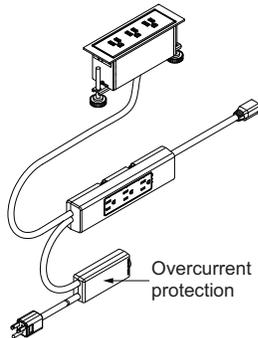

Tip: The flush and pop-up powerstrip should not be enclosed within the universal cable management tray because the tray will not fully open. The tray should be mounted to the side.

Optional data port adapter information chart.

(Coupler/jack not included)

Note: Please verify fit of jack in adapter before ordering large quantities as manufacturer designs may change without notice.

Adapter	Manufacturer
BBB	L-Com Keystone Modular
BBB	NETCONNECT, and 110 Connect Series Modular Jack
BBB	Siemon ZMAX Style
BBB	Allen Tel Versa Tap Series
BBB	Leviton Quick Port Series
BBB	Belden REVConnect
BBB	HDMI Adapter Cable
CCC	Hubbell Nextspeed Keystone Series
CCC	ADC Truernet series
DDD	Blank (no coupler/jack)
EEE	Ortronics TracJack Series
FFF	Panduit Mini-Com Series
HHH	Video Monitor Jack/DB-15, panel mount solder style

Overcurrent protection is included as standard with flush or pop-up power with utility power configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Overcurrent protection via circuit breaker prevents the powerstrip from drawing more than 15 amps of power.

Flush or pop-up power plug options are:

- Standard NEMA 5-15, 3 prong
- 90° NEMA 5-15, 3 prong
- Thread low profile plug

Powerstrips with C-clamp or front edge mount are field-installed and provide users with convenient power access and/or utility power beneath the worksurface.

▶ See page 243 for *Migration Pro and Intro Cable Management*.

Application Topics

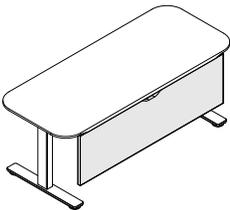

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

On extended height desks, any storage higher than 18 1/2" will impede the height range of the desk.
Tip: Do not place storage underneath controller.

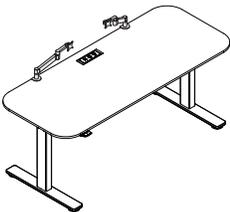

Integrated storage, designed for Migration SE, cannot be used with Migration Pro.

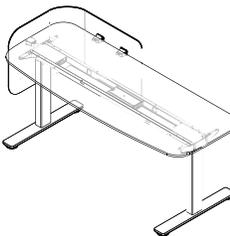

Modesty panels, ordered separately, are parametric in $\frac{1}{16}$ " increments from 40"-96". Modesty panels are specified to match the desk options. Widths will vary depending on if knife edge, square or radius corners are specified.

► Specifying, page 248

When optioning either flush or pop-up power, flat panel monitor arms cannot be c-clamped behind the power. Install arm to the side.

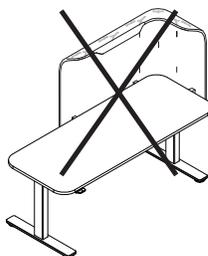

5" radius corners, optioned on rectangular and standard on organic bow front worksurfaces, ship with pilot holes for Flex curved screens (**FLXCS**), and Flex 90° desk mount privacy wrap (**FLXDWR**).

Tip: Flex screens and wraps are not allowed on knife edge worksurfaces.

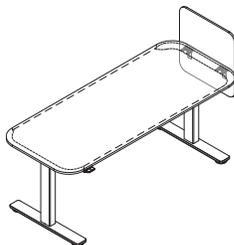

When attaching 90° desk mount privacy wrap (FLXDWR**) to 5" radius corners or organic bow front worksurfaces, a worksurface overhang is not allowed on the same side the wrap is mounting.**

Tip: A worksurface overhang can be specified on the opposite side as the wrap is mounted.

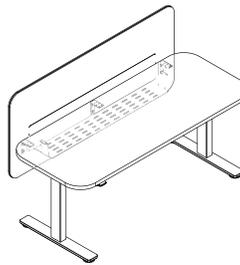

Flex privacy wrap (FLXDWR**) is not allowed on 23"D worksurfaces or 24"D bow front worksurfaces.**

When attaching Sarto privacy or privacy/modesty screens to the side of a knife edge worksurface, select Migration side knife attachment bracket option for the screen to receive the knife edge adapter brackets.

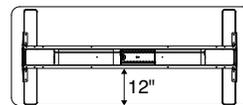

Tip: Standard attachment brackets will be sent with both "no brackets" and "Migration side knife attachment bracket" options.

Tip: Sarto privacy and Sarto privacy/modesty side screens are not allowed with organic bow front and back worksurfaces.

Universal and Sarto privacy/modesty screens can be installed with the metal cable tray.

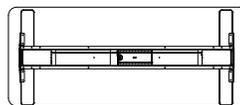

Tip: When specifying a Sarto privacy/modesty screen equal to or greater than 60"W to use with the cable tray, select the with metal cable tray application option.

CPU holders that require less than 12"D clearance on T-leg desks, and 15"D on C-leg desks may be mounted inboard of legs.

Tip: Maximum total weight of CPU holder and CPU is 40 pounds. CPU weight should not exceed 25 pounds.

Tip: CPU holders are not intended for use on 23" or 24" deep desks without specifying worksurface overhang.

When no overhang is specified up to 76"W, modular widths have a standard 3" overhang on both sides.

Tip: Parametric width overhangs will vary. Use the SmartTools dimension tool to determine exact overhang.

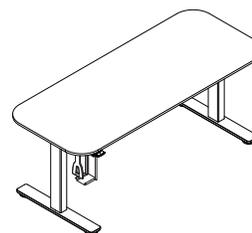

Desk overhang for CPU holder or layering of low storage and pedestals is available as an option. The overhang is 9" and available on 58"W or wider desks. Desk widths 64"W or larger allow for single or dual overhang.

► See Migration Pro Options Availability Chart, page 181.

Tip: When specifying parametric width and left or right overhang, the overhang on the opposite side will vary. When dual overhangs are selected, both overhangs will match. Use the SmartTools dimension tool to determine exact overhang.

Tip: Desks 82"-87 $\frac{15}{16}$ "W may be specified with single or dual overhang. Desks 88"W and wider will have dual overhang.

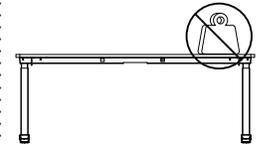

On extended height desks, CPUs installed in a CPU holder should not be installed over the foot or exceed 15 $\frac{3}{4}$ " high, or it will impede the height range of the desk.

*Tip: Vertical locking and non-locking CPU cradles **CPRCCL** and **CPRCCN** are not allowed on extended height desks.*

All assemblies meet or exceed ANSI/BIFMA standards.

Desks ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

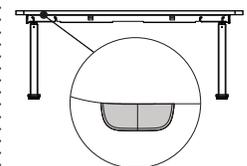

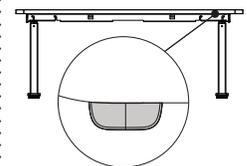

Distribute weight evenly

Height-adjustable base supports a maximum distributed weight capacity of 360 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.

► See page 211 for worksurface weights.

Controllers can be mounted on either the left- or right-hand side of the desk.

Migration Pro with Boost High-Speed Height-Adjustable Desks and Bases

Migration Pro with boost high-speed is a height-adjustable desk equipped with advanced technology that enriches the user experience allowing for quick posture changes.

► Specifying, pages 230, 234, and 237

Available as a FSC Mix product, the worksurface is made with a mixture of materials from FSC-certified forests, recycled materials, and/or FSC-controlled wood. The FSC Mix credit claim number is published on the customer invoice.

Soft edge, available as an option, reduces unhealthy pressure on forearms, as well as feelings of shoulder and neck fatigue. Soft edge is 36"W.

Controller adjusts the height of the desk at a rate of $3\frac{1}{10}$ " per second. Three options are available - active touch, simple touch, and 3-preset with digital display.

Lifting column is controlled by a central box for synchronization. Columns are precision balanced to minimize surface vibrations.

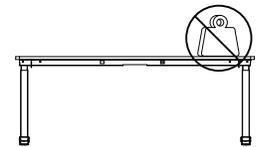

Edge is available in 3 mm edge profile.

Organic worksurfaces are available in bow front or bow front and back options. Bow front has 5" radius corners at the back.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.

Rectangular worksurfaces are available with square or radius corner options. The radius corner option can be specified with 2" or 5" radius.

Worksurface has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Distribute weight evenly

Base supports a maximum distributed weight capacity of 270 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.

► See page 211 for worksurface weights.

Extended height-adjustable base adjusts from $22\frac{3}{5}$ "– $48\frac{7}{10}$ " in any increment.

Knife edge, available as an option, is a thin profile worksurface edge that wraps three sides of the desk.

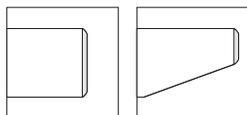

Columns are rectangular shaped and are available as a T-leg configuration.

Leveling glides adjust $\frac{1}{2}$ " to install desk on uneven floors. Slide glides and 1" adjustable spacers are available as an option.

Product Details

High-Pressure Laminate Desks

Front (user's) edge profile is available in 3 mm edge profile.

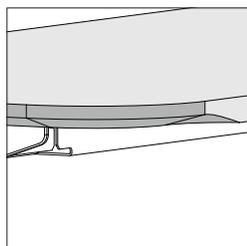

3 mm plastic edge profile Knife edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and three woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

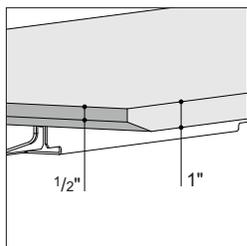

▶ See *Surface Materials* in this book for specific PVC-free availability, page 362.

Edge profile finishes are specified separately from laminate color.

Knife edge with 3 mm user and side edges is available on rectangular and organic worksurfaces as an option. On radius corners the knife edge wraps to the back of the worksurface.
Tip: Knife edge is available on laminate worksurfaces only.

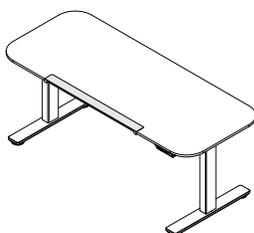

Tip: Knife edge and soft edge cannot be specified together.

Knife edge is 15° and edge profile is 1/2". Overall thickness of worksurface is 1".

Tip: The sloping underside of the edge is finished to match the backer on the underside of worksurface.

Tip: Monitor arms and power strips can still be c-clamped at the back of the worksurface.

Soft edge, available as an option, is made of polyurethane and is offered on rectangular worksurfaces 58"W or wider without overhang.

▶ See *Migration Pro with Boost High-Speed Options Availability Chart*, page 181

Tip: Soft edge is available on laminate worksurfaces only.

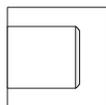

Tip: Soft edge is available as non-antimicrobial only.

Tip: Soft edge and knife edge cannot be specified together.

Tip: Soft edge, when specified with 3-preset controller, has additional width limitations due to the size of the controller.

Wood Veneer Desks

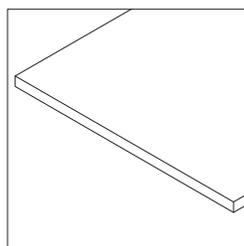

Front (user's) edge profile is wood veneer with a square 3 mm radius.

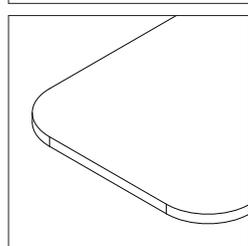

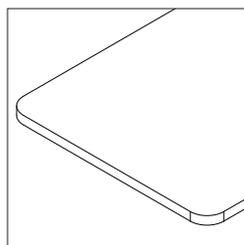

3 mm wood square profile

Rectangular worksurfaces are available with square or radius corners.

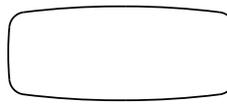

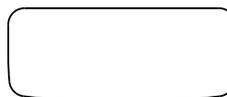

Square corners are standard on rectangular desks and have 90° corners on all four sides.

Radius corners, available as an option on rectangular desks, have 2" or 5" radius on all four sides with a continuous 3 mm user's edge. Radius corners eliminate sharp edges suitable for freestanding desks.

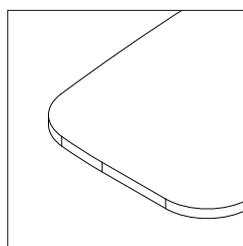

Tip: Wood veneer worksurfaces are available with a 5" radius only.

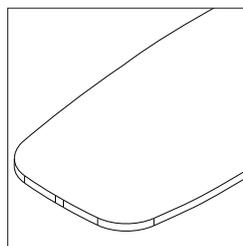

Organic worksurfaces

are available in two shapes: bow front or bow front and back.

Tip: Side screens are not allowed on organic worksurface shapes.

Organic bow front worksurfaces have a 5" radius on the back corners.

Organic bow front and back worksurfaces are symmetric.

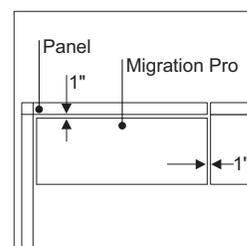

Tip: Organic bow front and back worksurfaces work with Soffio screens only.

Tip: Metal cable tray cannot be specified with organic bow front and back worksurfaces.

Desks that are FSC Mix credit help organizations meet their sustainability goals. Order **HA3ERFSC** or **HA3EOFSC** to specify Migration Pro with FSC product certification.

Tip: Product is not labeled. The FSC Mix credit claim number is published on the customer invoice.

Tip: FSC worksurfaces have minimal worksurface finish limitations.

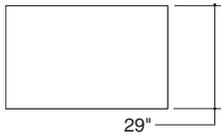

Rectangular and organic worksurface sizes

are listed in actual dimensions to allow for 1" gap to adjacent furniture, eliminating any pinch points.

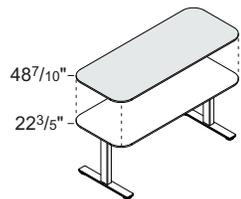

The overall width of the worksurface is 40"W-78"W. Modular widths account for 1" pinch point on each side. Parametric widths are available in 1/16" increments.

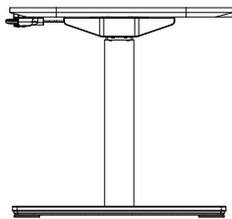

The overall depth of the worksurface is 23", 24", 28", 29", or 30". Modular depths account for a 1" pinch point clearance at the back or full depth is available.

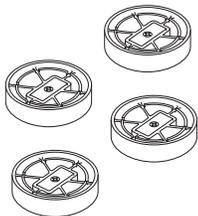

Tip: Sarto privacy and Sarto privacy/modesty side screens are not allowed with rectangular 5" radius corners or organic bow front and bow front and back worksurfaces.

Extended height desks adjust 22³/₅" to 48⁷/₁₀" in any increment.

T-leg rectangular column configuration is standard for 23", 24", 28", 29", and 30" depth options.

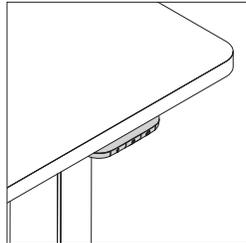

1" glide spacer is available as an option. Added to the existing glide, it raises the overall height of the glide by 1/2" for uneven floors.

Slide glides are available as an option to aid in user-controlled mobility within the workstation.

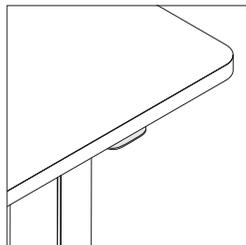

Tip: Overall height of desk is increased by 1/2".

Active touch controller is standard, Bluetooth-enabled, and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.

Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.

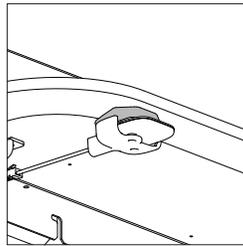

Tip: When specified on knife edge worksurfaces, a knife edge adapter is shipped with the controller.

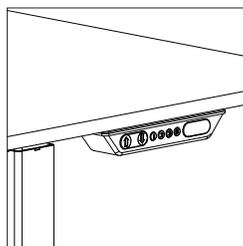

Simple touch controller is available as an option and easily adjusts the desk by lifting up or pressing down on the controller.

Tip: Simple touch is available as non-antimicrobial only.

Tip: When specified on knife edge worksurfaces, a knife edge adapter is shipped with the controller.

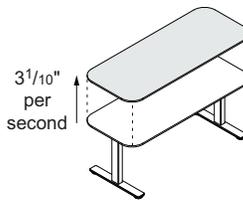

When knife edge is specified, an adapter is shipped with active touch and simple touch controllers for ease of use.

Three preset controller with digital display is available as an option and easily adjusts the desk by pushing the up and down arrows. It allows users to set the seated and standing height positions. Digital display will show the height of the desk when adjusting and at rest before it enters sleep mode.

Tip: Does not use a knife edge adapter bracket. The controller is not mounted flush to front of worksurface, it is inset mounted underneath the desk at the knife edge transition.

Desks adjust at a rate of 3¹/₁₀" per second.

Gyroscopic obstruction sensing technology is standard with all Migration Pro desks. The worksurface will backtrack when it contacts an object or detects tilt.

Steelcase guidance for height adjustment obstruction sensing technology (OST):

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

Wiring and Cabling

Low surge electric motor with quiet operation adjusts at 3¹/₁₀" per second. Motor is 110V and includes a 10¹/₂' power cord. Motor has 0.1W standby power.

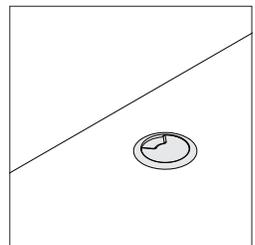

Ships with 10¹/₂' power cord. To meet Chicago power cord requirements, refer to the Migration Pro assembly directions.

Tip: If specifying flush mount or pop-up power with utility power the desk power cord is 4'. Utility power cord is available in three options: standard smooth straight, braided, or curly. Standard and braided cords are 10'. Curly cord is 163".

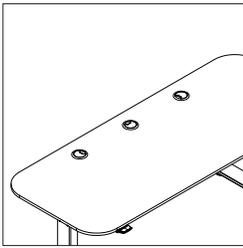

Underwriters Laboratory (UL) Listed.

Migration Pro desks are designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Height-adjustable base is UL listed when constructed in accordance with assembly directions. Local electrical codes vary; consult the local authority having jurisdiction to verify the product as installed is compliant with local code.

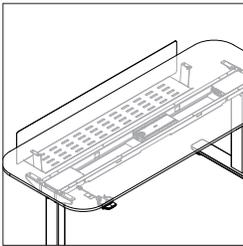

Round grommets, available as an option, help manage cable and cords routing from above to below the desk.

Round grommet inside dimension is 2".

Grommets can be specified left, right, and/or center on the worksurface.

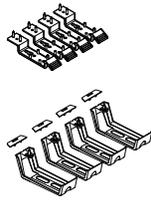

Metal cable tray, available as an option, manages cables and disguises clamps and power strips at the worksurface for a clean aesthetic.

Tip: Metal cable tray is not available as an option on organic bow front and back worksurfaces.

*Tip: Worktools smart straps **DSBULKSTRP**, can be ordered separately to manage bundled cables in the tray.*

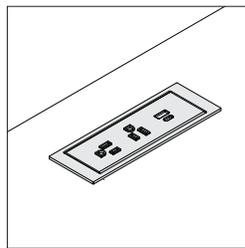

Tip: Metal cable tray can be ordered separately; however, pilot holes will not be provided.

► Specifying, page 243

Small and large cable brackets, ordered separately, support horizontal cable management below the worksurface.

► Understanding, page 204.

Flush and pop-up powerstrips are available as an option and can be specified left, right, or center depending on the worksurface width.

Tip: Only one integrated power feature can be specified per desk.

► See Migration Pro with Boost High-Speed Options Availability Chart, page 181.

HHH	Video Monitor Jack/DB-15, panel mount solder style

Overcurrent protection is included as standard with flush or pop-up power with utility power configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Overcurrent protection via circuit breaker prevents the powerstrip from drawing more than 15 amps of power.

Flush or pop-up power plug options are:

- Standard NEMA 5-15, 3 prong
- 90° NEMA 5-15, 3 prong
- Thread low profile plug

Powerstrips with C-clamp or front edge mount are field-installed and provide users with convenient power access and/or utility power beneath the worksurface.

Application Topics

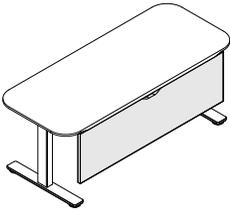

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

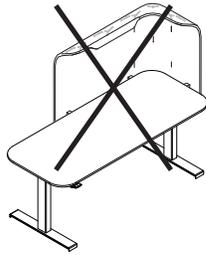

On extended height desks, any storage higher than 18 1/2" will impede the height range of the desk. *Tip: Do not place storage underneath controller.*

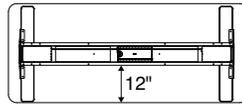

Integrated storage, designed for Migration SE, cannot be used with Migration Pro with boost high-speed.

Modesty panels, ordered separately, are parametric in 1/16" increments from 40"–96". Modesty panels are specified to match the desk options. Widths will vary depending on if knife edge, square or radius corners are specified.
▶ Specifying, page 248

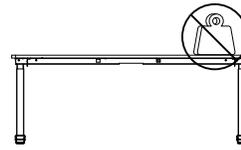

Flex privacy wrap (FLXDWR) is not allowed on 23"D worksurfaces or 24"D bow front worksurfaces.

CPU holders that require less than 12"D clearance on T-leg desks may be mounted inboard of legs.

Tip: Maximum total weight of CPU holder and CPU is 40 pounds. CPU weight should not exceed 25 pounds.

Tip: CPU holders are not intended for use on 23" or 24" deep desks.

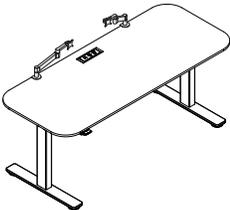

Distribute weight evenly

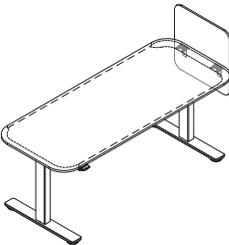

Height-adjustable base supports a maximum distributed weight capacity of 270 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.

▶ See page 211 for worksurface weights.

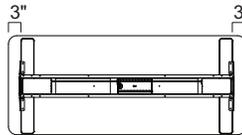

When optioning either flush or pop-up power, flat panel monitor arms cannot be c-clamped behind the power. Install arm to the side.

When attaching Sarto privacy or privacy/modesty screens to the side of a knife edge worksurface,

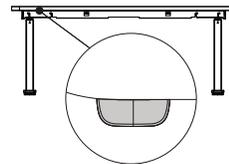

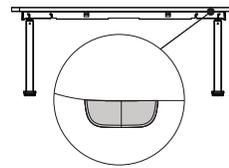

select Migration side knife attachment bracket option for the screen to receive the knife edge adapter brackets.

Tip: Sarto privacy and Sarto privacy/modesty side screens are not allowed with rectangular 5" radius corners or organic bow front and bow front and back worksurfaces.

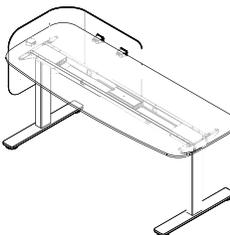

Modular widths have a standard 3" overhang on both sides.

Tip: Parametric width overhangs will vary. Use the SmartTools dimension tool to determine exact overhang.

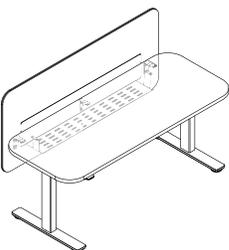

Controllers can be mounted on either the left- or right-hand side of the desk.

5" radius corners, optioned on rectangular and standard on organic bow front worksurfaces, ship with pilot holes for Flex curved screens (**FLXCS**), and Flex 90° desk mount privacy wrap (**FLXDWR**).

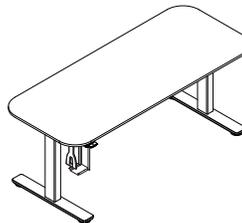

Tip: Flex screens and wraps are not allowed on knife edge worksurfaces.

Universal and Sarto privacy/modesty screens can be installed with the metal cable tray.

Tip: When specifying a Sarto privacy/modesty screen equal to or greater than 60"W to use with the cable tray, select the with metal cable tray application option.

Tip: Screen width must be 10 1/2" wider than metal cable tray.

On extended height desks, CPUs installed in a CPU holder should not be installed over the foot or exceed 15 3/4" high, or it will impede the height range of the desk.

*Tip: Vertical locking and non-locking CPU cradles **CPRCCL** and **CPRCCN** are not allowed on extended height desks.*

All assemblies meet or exceed ANSI/BIFMA standards.

Desks ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Migration Intro Height-Adjustable Desks and Bases

Migration Intro is a simply designed height-adjustable desk complete with the essential features that support the posture needs of users.

► Specifying, page 220

Available as a FSC Mix product, the worksurface is made with a mixture of materials from FSC-certified forests, recycled materials, and/or FSC-controlled wood. The FSC Mix credit claim number is published on the customer invoice.

Worksurface has a wood core with a High-Pressure Laminate surface and is 1" thick.

Edge is available in 3 mm edge profile.

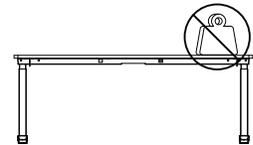

Paddle controllers adjust the height of the desk at a rate of 1¹/₅" per second. Two options are available—basic or active touch.

Primary column with integrated control PCB connects to the secondary column via a motor cable and is run by an external power supply.

Organic worksurfaces are available in bow front or bow front and back options. Bow front has 5" radius corners at the back.

Leveling glides adjust 1/2" to install desk on uneven floors.

Rectangular worksurfaces are available with square or radius corner options. The radius corner option can be specified with 2" or 5" radius.

Distribute weight evenly

Base supports a maximum distributed weight capacity of 270 pounds.
Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.
 ► See page 211 for worksurface weights.

Extended height-adjustable base adjusts from 22¹/₁₀"–48³/₁₀" in any increment.

Columns are rectangular shaped and are available as a T-leg configuration.

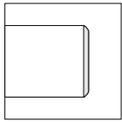

Basic height-adjustable base adjusts from 26⁹/₁₀"–46³/₅" in any increment.

Active touch controller is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders.
Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.

Product Details

High-Pressure Laminate Desks

Front (user's) edge profile is available in 3 mm edge profile.

3 mm plastic edge profile

PVC-free, 3 mm edge profiles

are proprietary polyolefin blend for all solid colors and three woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

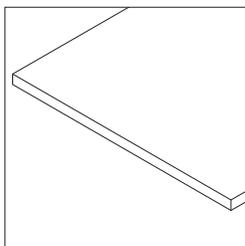

▶ See *Surface Materials* in this book for specific PVC-free availability, page 362.

Edge profile finishes

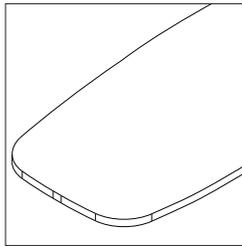

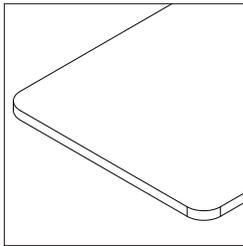

are specified separately from laminate color.

Rectangular work surfaces are available with square or radius corners.

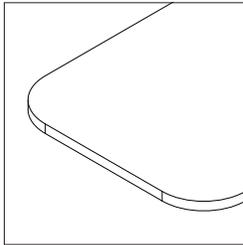

Square corners are standard on rectangular desks and have 90° corners on all four sides.

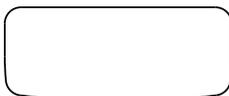

Organic bow front and back work surfaces are symmetric.

Tip: Organic bow front and back work surfaces work with Soffio screens only.

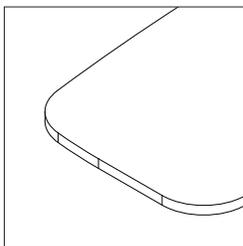

Tip: Metal cable tray cannot be specified with organic bow front and back work surfaces.

Radius corners, available as an option on rectangular desks, have 2" or 5" radius on all four sides with a continuous 3 mm user's edge. Radius corners eliminate sharp edges suitable for freestanding desks.

Organic work surfaces are available in two shapes: bow front or bow front and back.

Tip: Side screens are not allowed on organic work surface shapes.

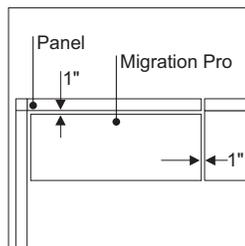

Organic bow front work surfaces have a 5" radius on the back corners.

Desks that are FSC Mix Credit help organizations meet their sustainability goals. Order **HA1ERFSC** or **HA1EOFSC** to specify Migration Intro with FSC product certification.

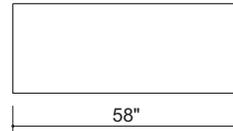

Tip: Product is not labeled. The FSC Mix credit claim number is published on the customer invoice.

Tip: FSC work surfaces have minimal work surface finish limitations.

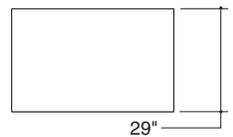

Rectangular and organic work surface sizes

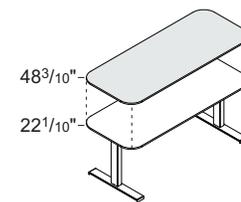

are listed in actual dimensions to allow for 1" gap to adjacent furniture, eliminating any pinch points.

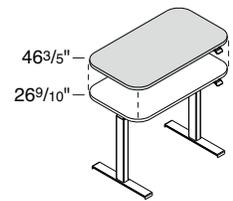

The overall width of the work surface is 40"W–78"W. Modular widths account for 1" pinch point on each side. Parametric widths are available in 1/16" increments.

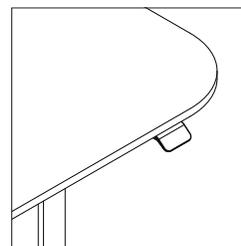

The overall depth of the work surface is 23", 24", 28", 29", or 30". Modular depths account for a 1" pinch point clearance at the back, or full depth is available.

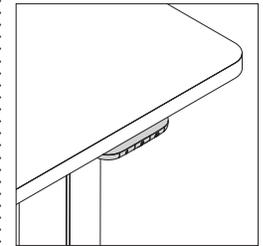

Extended height desks adjust 22 1/10"H to 48 3/10"H in any increment.

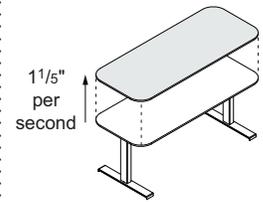

Basic height desks adjust from 26 9/10"H to 46 3/5"H in any increment.

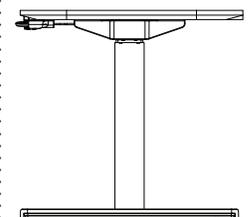

Basic controller is standard and easily adjusts the desk by lifting up or pressing down on the controller.

Active touch controller, available as an option, is Bluetooth-enabled and includes digital display, two preset buttons, double-tap automatic drive, and active motion posture reminders. *Tip: Steelcase Rise mobile app is available for download on Apple and Google Play stores. Pair to any active touch controller to access preferences, presets, and posture activity tracking.*

Desks adjust at a rate of 1 1/5" per second.

T-leg rectangular column configuration is standard for 23", 24", 28", 29", and 30" depth options.

Gyroscopic obstruction sensing technology

is standard with all Migration Intro desks. The work surface will backtrack when it contacts an object or detects tilt. *Tip: Desks greater than 72"W ship with a secondary obstruction sensing dongle.*

Steelcase guidance for height adjustment obstruction sensing technology (OST):

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

Wiring and Cabling

Primary and secondary electric columns operate quietly and adjust at 1¹/₅" per second.

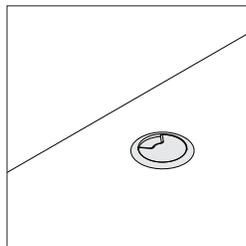

External power supply is 110V and has 0.1W standby power.

Ships with 10¹/₂" power cord. To meet Chicago power cord requirements, refer to the Migration Intro assembly directions.

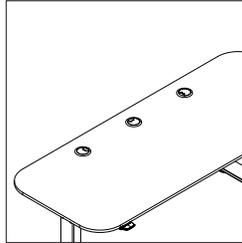

Underwriters Laboratory (UL) Listed.

Migration Intro desks are designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Height-adjustable base is UL listed when constructed in accordance with assembly directions. Local electrical codes vary; consult the local authority having jurisdiction to verify the product as installed is compliant with local code.

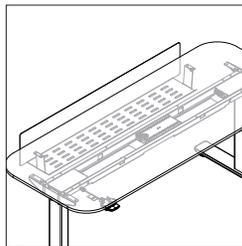

Round grommets, available as an option, help manage cable and cords routing from above to below the desk.

Round grommet inside dimension is 2".

Grommets can be specified left, right, and/or center on the worksurface.

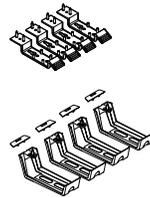

Metal cable tray, available as an option, manages cables and disguises clamps and power strips at the worksurface for a clean aesthetic.

Tip: Metal cable tray is not available as an option on organic bow front and back worksurfaces.

Tip: Worktools smart straps (DSBULKSTRP) can be ordered separately to manage bundled cables in the tray.

Tip: Metal cable tray can be ordered separately; however, pilot holes will not be provided.

▶ Specifying, page 243

Small and large cable brackets, ordered separately, support horizontal cable management below the worksurface.

▶ Understanding, page 204

Power strips with C-clamp or front edge mount are field-installed and provide users with convenient power access and/or utility power beneath the worksurface.

▶ See page 204 for Migration Pro and Intro Cable Management.

Surface Materials

High-Pressure Laminate Desks

- Laminate
- ▶ See page 362
- Open Line laminate (option)

A program including non-Steelcase laminates which are suitable for use on Steelcase products.

▶ See *Surface Materials Reference Manual.*

Tip: FSC worksurfaces and modesty panels are not available with an OLL option.

3 mm edge profile

Height-adjustable base

- 0835 Black
- 4231 Arctic White
- 4243 Merle
- 4799 Platinum Metallic

Round grommet

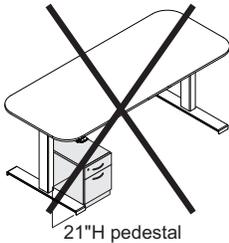

- 6000 Black

Metal cable tray

- Paint

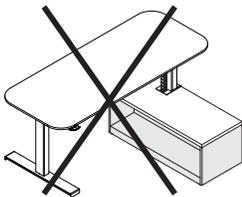

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

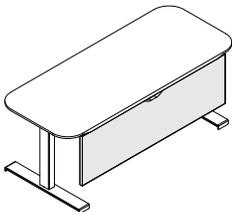

21"H pedestal

On extended height desks, any storage higher than 17³/₄" will impede the height range of the desk.
Tip: Do not place storage underneath controller.

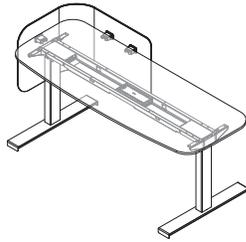

Integrated storage, designed for Migration SE, cannot be used with Migration Intro.

Modesty panels, ordered separately, are parametric in 1/16" increments from 40"—96". Modesty panels are specified to match the desk options. Widths will vary depending on whether square or radius corners are specified.

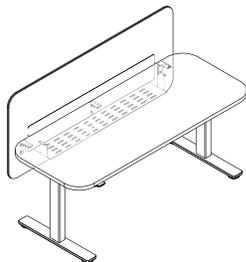

► Specifying, page 248

5" radius corners, optioned on rectangular and standard on organic bow front worksurfaces, ship with pilot holes for Flex curved screens (**FLXCS**), and Flex 90° desk mount privacy wrap (**FLXDWR**).

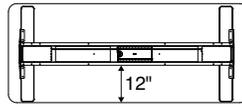

Flex privacy wrap (FLXDWR) is not allowed on 23"D worksurfaces or 24"D bow front worksurfaces.

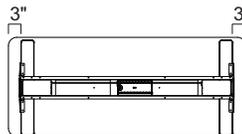

Universal and Sarto privacy/modesty screens can be installed with the metal cable tray.
Tip: When specifying a Sarto privacy/modesty screen equal to or greater than 60"W to use with the cable tray, select the with metal cable tray application option.

Tip: Screen width must be 10¹/₂" wider than the metal cable tray.

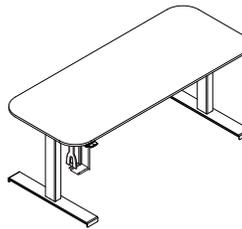

CPU holders that require less than 12"D clearance may be mounted inboard of legs.

Tip: Maximum total weight of CPU holder and CPU is 40 pounds. CPU weight should not exceed 25 pounds.

Modular widths have a standard 3" overhang on both sides.

Tip: Parametric width overhangs will vary. Use the SmartTools dimension tool to determine exact overhang.

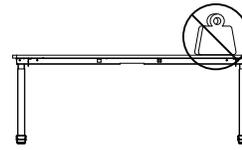

On extended height desks, CPUs installed in a CPU holder should not be installed over the foot or exceed 15" high, or it will impede the height range of the desk.

*Tip: Vertical locking and non-locking CPU cradles **CPRCCL** and **CPRCCN** are not allowed on extended height desks.*

All assemblies meet or exceed ANSI/BIFMA standards.

Desks ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

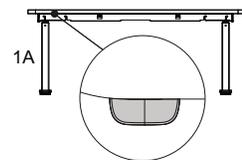

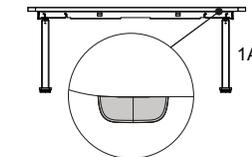

Distribute weight evenly

Height-adjustable base supports a maximum distributed weight capacity of 270 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, channel, and options selected.

► See page 211 for worksurface weights.

Controllers can be mounted on either the left- or right-hand side of the desk.

Tip: Controller must be located next to the primary leg, which is labeled 1A on the part label.

Migration Intro Height-Adjustable Desks and Bases, continued

Installation

Migration Pro (HA2) bases support a maximum distributed weight capacity of 360 pounds.

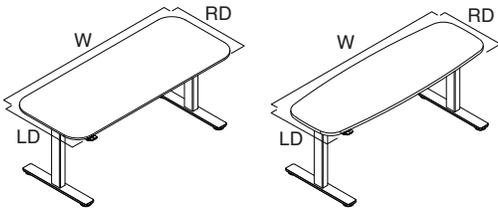

Migration Pro with boost high-speed (HA3) bases support a maximum distributed weight capacity of 270 pounds.

Migration Intro (HA1) bases support a maximum distributed weight capacity of 270 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface, understructure, and options (i.e., integrated power, soft edge, or cable tray).

Worksurface Weight

Worksurface W Shape	D	Worksurface Weight	Options					Accessory Modesty Panel Weight
			Under structure Weight*	Flush and Pop-Up Power**	Soft Edge Weight	Cable Tray Weight		

Rectangular	W	D	Worksurface Weight					Under structure Weight*	Flush and Pop-Up Power**	Soft Edge Weight	Cable Tray Weight	Accessory Modesty Panel Weight

	88"	23", 24", 28", 29", or 30"	58 lb	60 lb	70 lb	73 lb	76 lb	12.4 lb	4.0 lb	2.6 lb	11.5 lb	27.1 lb
	94"	23", 24", 28", 29", or 30"	62 lb	65 lb	75 lb	78 lb	81 lb	12.4 lb	4.0 lb	2.6 lb	11.5 lb	28.9 lb

*Understructure weight is without optional worksurface overhang (available on Migration Pro only).

** Flush and pop-up power weights include two utility power options. Without utility power, the weight is two pounds.

Tip: Not all worksurface widths and options are available on all desks. See options availability chart for each product (prefixes HA1, HA2, and HA3).

Migration Pro and Intro Cable Management

Both vertical and horizontal cable management are important elements for cleaning up the cords that exists beneath today's height-adjustable desks.

Metal cable tray manages cables and power at worksurface height for a clean aesthetic. Available as an option or can be ordered separately.

► Specifying, page 243

Small and large cable brackets, ordered separately, manage cables and cords horizontally under the worksurface.

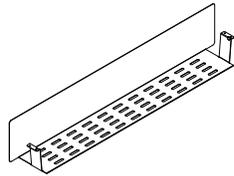

► Specifying, page 245

Universal cable management kit, ordered separately, provides easy management and access to cords, cables, and utility power under the desk.

► Specifying, page 246

Cable riser, ordered separately, supports high-capacity cable management vertically from the floor to the underside of the desk. Leg attachment is available in 24 paint finishes. Chain is available in 6527 Merle or 6053 Seagull.

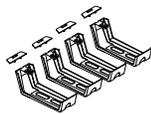

► Specifying, page 244

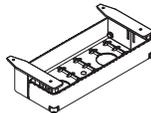

Metal cable tray

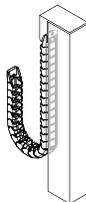

Small cable brackets

Large cable brackets

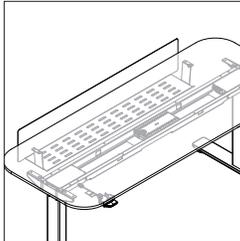

Universal cable management kit

Migration Pro and Intro cable riser

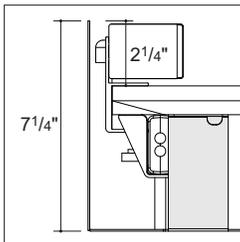

Product Details

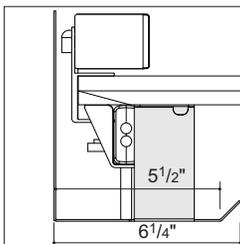

Metal cable tray, available as an option, manages cables and disguises clamps and power strips at the worksurface for a clean aesthetic.

Tip: Metal cable tray is not available as an option on organic bow front and back worksurfaces.

Tip: Metal cable tray can be ordered separately; however, pilot holes will not be provided.

Metal cable tray is a fixed height 2 1/4" above the worksurface. The overall height of the tray is 7 1/4".

Inside dimension of the metal cable tray is 5 1/2". The overall depth of the tray is 6 1/4".

Tip: CF maximum-duty arm bracket (CFSPSGLBASE), does not fit within the metal cable tray.

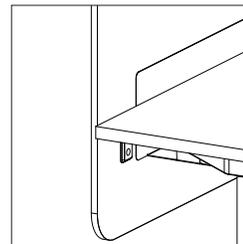

Smart straps are available in a bulk pack of 100 straps, **DSBULKSTRP**.

Tip: Smart straps can be used to manage bundled cables in the metal cable tray.

Metal cable tray, when optional, is sized to not interfere with grommet locations and work with Universal and Sarto privacy/modesty screens.

Tip: If ordered separately, the mounting brackets require under worksurface clearance that is 1 1/2" shorter than the metal cable tray width.

Metal cable tray can be installed with Sarto and Universal privacy/modesty screens. When specifying a Sarto screen equal to or greater than 60"W to use with the cable tray, select **WTRAYAPP** option.

Tip: Screen width must be 10 1/2" wider than metal cable tray.

Small and large cable brackets, ordered separately, support horizontal cable management below the worksurface.

Inside dimensions of the small cable brackets are 3 5/8"D x 1 3/8"W x 1 3/16"H.

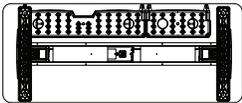

Inside dimensions of the large cable bracket are 6"D x 2 1/4"W x 1/2"H.

	Metal Tray Width	Minimum Allowed Desk Width	Minimum Allowed Screen Width
Small	30"W	40"W	41 1/2"W
Medium	41 1/2"W	48"W	52"W
Large	52"W	58"W	63 1/2"W

Tip: Follow the minimum width rules when mounting a metal cable tray only or when used in combination with Sarto or Universal privacy/modesty screens.

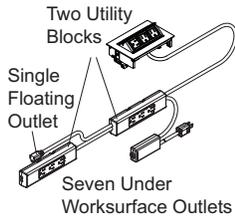

Tip: When specifying separately from the desk, verify fit in the field to ensure it is mounted free from interferences with worksurface options (i.e. integrated flush or pop-up power, grommets, etc.).

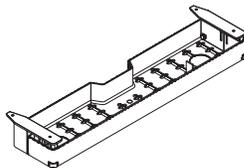

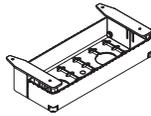

Universal cable management tray is designed to fit behind the understructure on Migration Pro and Intro for both T- and C-leg configurations.

Tip: On C-leg desks, universal cable management tray and modesty panel cannot be used together.

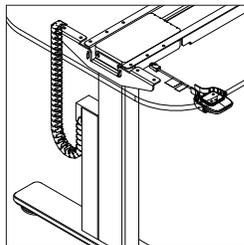

Tip: Universal cable management trays and flush mount power option will not fit on 23/24"D T-leg or 28/29/30"D C-leg desks because of interference.

Universal cable management tray - small tray, **DSMTRAYSM**, holds four outlets and large tray, **DSTRAYLG**, holds seven outlets under worksurface utility power.

Universal cable management tray is available in two sizes: small and large.

Cable riser connects to the back of the leg. The inside dimensions of the high-capacity chain are 1¹/₄"D x 1⁷/₁₆"W to accommodate a variety of cord sizes. Overall depth of chain is 1⁷/₁₆".

Tip: Select the rectangular column shape to work with Migration Intro and Migration Pro with boost high-speed.

Tip: Migration Pro is available with a rectangular or round column option.

- 6053 Seagull
- 6527 Merle

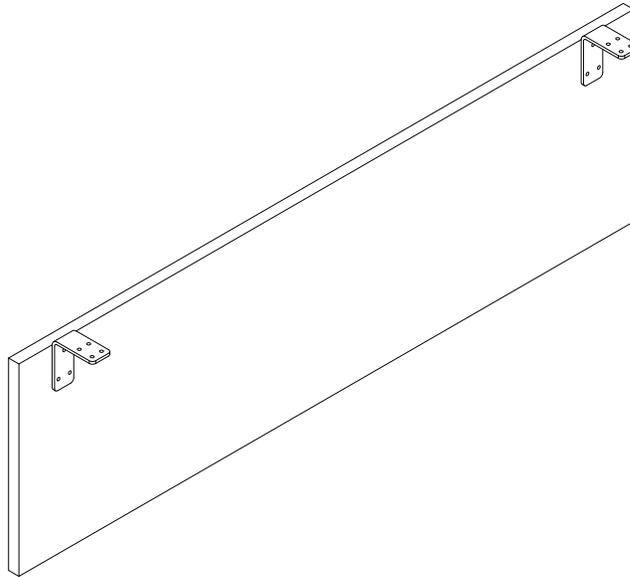

Desk Width	Maximum Allowed Universal Tray Size
40"W–45 ¹⁵ / ₁₆ "W	Small
46"W–51 ¹⁵ / ₁₆ "W	Small
52"W–57 ¹⁵ / ₁₆ "W	Small
58"W–63 ¹⁵ / ₁₆ "W	Large
64"W–69 ¹⁵ / ₁₆ "W	Large and Small
70"W–75 ¹⁵ / ₁₆ "W	Large and Small
76"W–96"W	Two Large

Tip: If optioning integrated flush or pop-up power, grommets, or mounting screens, the universal cable management tray size recommendations may not apply. Fit should be verified in the field.

Migration Pro and Intro Modesty Panels

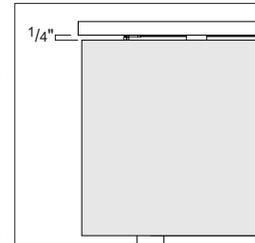

Modesty panels provide modesty when applications require this aesthetic. Modesty panels, available in laminate and veneer, attach to the worksurface.

► Specifying, page 248

Product Details

Modesty panels are parametric in width from 40"W to 96"W in 1/16" increments. To specify modesty panel, desk width, worksurface shape, and knife edge condition must be selected to provide full width modesty.

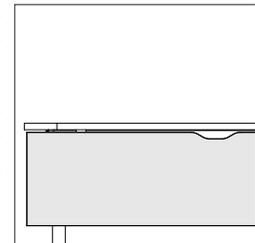

Gap is 1/4" between underside of worksurface and top of modesty panel. Panel can be flush to the worksurface or inset.

Tip: CF C-clamp,

CFSERIESCC, fits with the modesty panel with or without scallop.

Tip: CF maximum-duty arm C-clamp, CFSPSGLBASE, does not fit with the modesty panel in any condition.

Modesty panel can be optioned with a scallop on laminate panels only.

Modesty panels are defaulted in the horizontal grain direction for both laminate and wood veneer. Optional vertical grain direction can be specified. Grain direction specification is only allowed up to 60" wide.

Actual Dimensions

	Modesty Panel Widths (Flush to back of worksurface)	
	Without Knife Edge	With Knife Edge*
Rectangular worksurface with square corners	1/8" shorter than desk width	4" shorter than desk width
Rectangular worksurface with 2" radius corners	4" shorter than desk width	11" shorter than desk width
Rectangular worksurface with 5" radius corners	10" shorter than desk width	11" shorter than desk width
Organic bow front worksurface	10" shorter than desk width	11" shorter than desk width
Organic bow front and back worksurface	Inset only	Inset only
Height	14 ³ / ₈ "	14 ³ / ₈ "
Overall height	14 ⁷ / ₈ "	14 ⁷ / ₈ "
Thickness	3/4"	3/4"

* Modesty panel will align with the knife edge transition at the back of the worksurface.

Tip: Size determined by desk width, corner type, and knife edge condition.

Tip: Overall height is measured from bottom of worksurface to bottom of panel.

Tip: Parametric modesty panel widths can be specified from 40"W to 96"W in 1/16" increments.

Surface Materials

High-Pressure Laminate Panel

- Laminate
 - ▶ See page 362
 - Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.
- Tip: FSC worksurfaces and modesty panels are not available with an OLL option.*

3 mm edge profile

- Plastic

Wood Veneer Panel

- Wood veneer (standard)
- Customiz stain (option)
- Full-Fill finish (option)

3 mm edge profile

- Wood veneer to match panel

Bracket

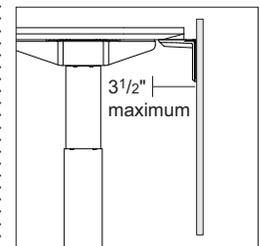

- 7360 Merle

Application Topics

When specifying a modesty panel, consider flush or pop-up power and/or grommets to cleanly manage cables below the desk.

Tip: If specifying veneer modesty panel, the scallop is not an option, so a grommet is recommended.

Tip: On C-leg desk configurations, universal cable management tray and modesty panel cannot be used together.

Modesty panels may be inset a maximum of 3 1/2" from the back of the work-surface on C-leg desks. On T-leg desks the maximum inset varies by worksurface depth; 23"D maximum is 4 1/2" and 30"D is 8".

Tip: Inset modesty panels do not work with pop-up power on 23" or 24"D T-leg or C-leg desks. Flush power, round grommets, and cable brackets do not work on C-leg desks.

Privacy/modesty, curved, or wrap screens cannot be used with a modesty panel.

When using a modesty, panel with Universal or Sarto privacy screens verify placement in CET to avoid interference.

Migration SE Height-Adjustable Desks and Bases

Migration SE supports wellbeing at work by allowing users to move between seated and standing postures throughout the workday.
 ▶ Specifying, page 250

CarbonNeutral.com

Now available as a CarbonNeutral product, making sure our commitment to a more sustainable future helps yours too.

Corners are available in both square or radius options. The radius corner option offers both a 2" and 5" radius.

Push button controller adjusts height at a rate of 1 $\frac{3}{10}$ " per second. Two options are available—up/down or 4 pre-set.

Base supports a maximum distributed weight capacity of 250 pounds (2-leg) and 330 pounds (3-leg).
Tip: When calculating lifting capacity, subtract the weight of the worksurface.
 ▶ See page 211 for worksurface weights.

Edge is available in 3 mm edge profile.

Desk foot is available in square, mitered edge, or height saver foot with casters.

The extended height adjustable base adjusts from 22 $\frac{2}{5}$ "-48 $\frac{7}{10}$ " in any increment.

Migration SE offers both T- and C-leg configurations on rectangle desks, and T-leg configurations on 3-leg corner desks.

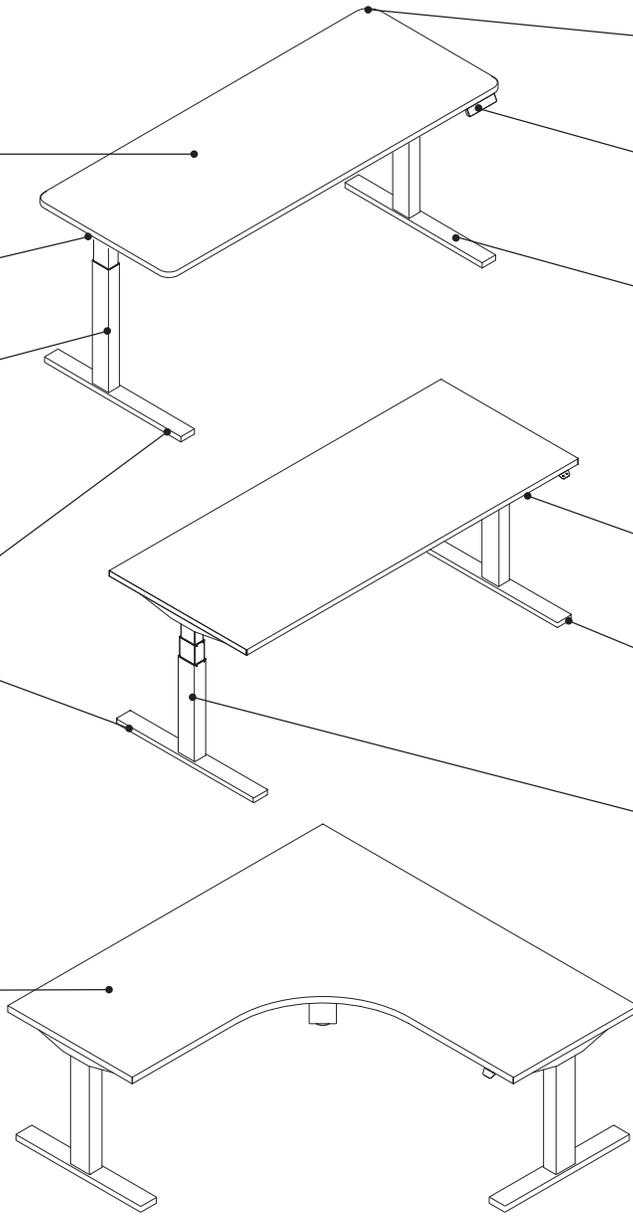

Desk has a wood core with a High-Pressure Laminate or wood veneer surface and is 1" thick.

Internal motors with electronic synchronization drive.

The basic height adjustable base adjusts from 28 $\frac{3}{10}$ "-46 $\frac{9}{10}$ " in any increment.

Leveling glides adjust $\frac{1}{2}$ " to install desk on uneven floors.

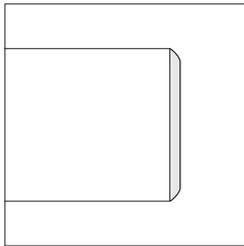

Migration SE desks are available in 90° and 120° 3-leg configurations.

Product Details

High-Pressure Laminate Desks

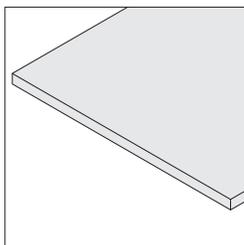

Front (user's) edge profile is available in 3 mm edge profile.

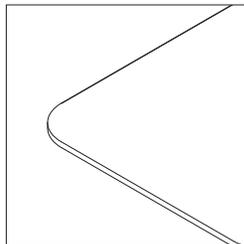

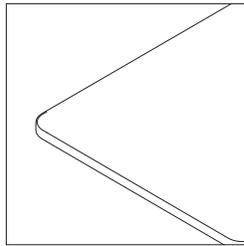

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and three woodgrain finishes. Matching 1 mm side and back edges are also PVC-free.

► See *Surface Materials* in this book for specific PVC-free availability, page 362.

Edge profile finishes are specified separately from laminate color.

Square corners are standard and have 90° corners on all four sides.

Radius corners are available as an option on rectangle desks with 2" radius or 5" radius on all four corners and will include 3 mm edge profile on all sides.

Tip: Radius corners are not available on 90° and 120° corner desks.

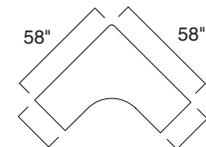

Wood Veneer Desks

Front (user's) edge profile is wood veneer with a square (3 mm) radius.

Side and back edges are flat. Wood edge color matches finish specified for desk.

Overhang is available as an option. The maximum overhang available as a standard option is 12"W.

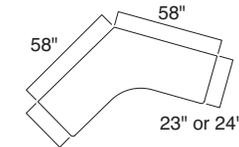

Tip: 76"W rectangle desks come with a 4" overhang on each side.

23", 24", 29", or 30" depth

90° corner desks can be specified 23", 24", 29", or 30" deep. Right- and left-hand depths are not required to match. Right- and left-hand widths are not required to match.

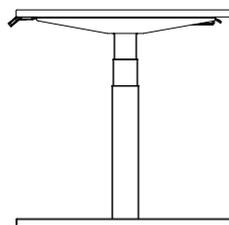

Tip: If left or right width is greater than 60"W, then the opposite side width must be less than or equal to 60"W.

23" or 24"

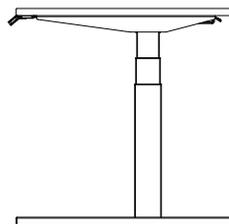

120° corner desks can be specified 23" or 24" deep. Right- and left-hand depths must match and right- and left-hand widths must match.

Overhangs on 90° corner desks are allowed on one side only. Overhangs on 120° corner desks are not allowed.

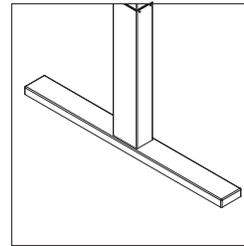

T-leg configuration is available on rectangle and corner desks. Rectangle T-leg desks are available in 23"/24", 28"/29"/30", and 35"/36" depth options. Corner T-leg desks are available in 23", 24", 29", and 30" depth options.

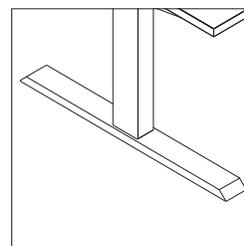

Corner desks are 3-leg desks and are available in a T-leg configuration.

C-leg configuration is available on rectangle desks only in a 29"/30" depth option to maximize leg clearance below.

Squared-edge foot offers a squared front and back edge flush to the floor. The glide adjustments on this foot are 1/2".

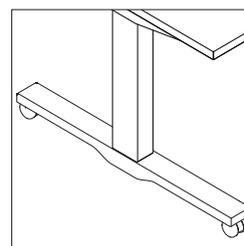

Mitered-edge foot is available as an option on rectangle desks. This style of foot offers a mitered front and back edge flush to the floor. The glide adjustments on this foot are 1/2".

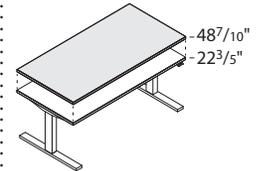

Tip: Mitered-edge foot is only available on rectangle desks.

Slide glides are available and can be added for user mobility.

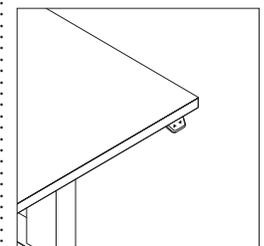

► See page 275

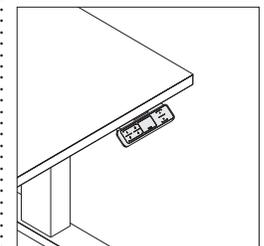

Height saver foot is available as an option on T-leg rectangle desks. This style foot offers 50 mm casters without changing the height range of the desk. The front two casters lock while the back two casters do not lock.

Migration SE extended height adjustable desk adjusts from 22³/₅"–48⁷/₁₀" in any increment. The basic height adjustable desk adjusts from 28³/₁₀"–46⁹/₁₀" in any increment.

Up/down controller is available as an option and easily adjusts height of desk, at a rate of 1³/₁₀" per second, by simply pushing the up and down arrows.

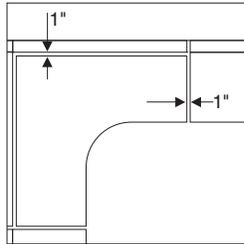

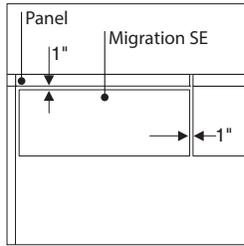

4 pre-set programmable controller is available as an option. It allows users to set the seated and standing height positions or pre-set heights for multiple users. When activated, the digital display will show the height of desk.

Obstruction sensing technology is standard with all Migration SE desks. The worksurface will back-track when it makes contact with an object.

Steelcase guidance for height adjustment obstruction sensing technology (OST):

- Always read and follow all instructions and safety messages before positioning and using powered, height-adjustable products. Obstruction Sensing Technology (OST) is primarily intended to protect internal mechanisms and is only one part of the overall product system.
- OST is intended to detect hard, immovable objects that contact the desk during raising or lowering.
- OST may not detect soft and/or flexible objects such as padded arm caps, compliant seating surfaces, and cushion tops of peds.
- OST may not detect dynamic and/or articulating objects such as adjustable chair backs and chair arms.
- Different Steelcase height adjustable desks and benches have different types of OST that does not all behave the same.
- OST is disabled during the recalibration/synchronization process, but the unit moves at a much slower speed.

Rectangle and corner desk sizes are listed in actual dimensions to allow for 1" gap to adjacent furniture eliminating any pinch points.

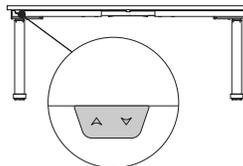

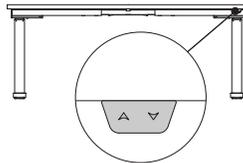

CarbonNeutral.com
CarbonNeutral product in the Migration SE portfolio helps organizations achieve their carbon emissions goals. Order **MGSLTRQCN**, **MGELTRQCN**, **MGSLCRQCN**, or **MGELCRQCN** to specify Migration SE with CarbonNeutral product certification.

Wiring and Cabling

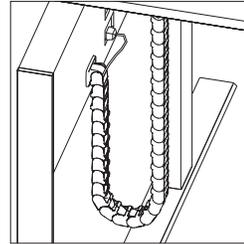

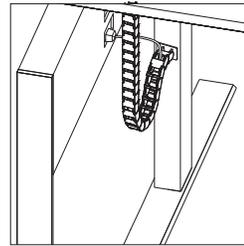

Electric motor with whisper quiet operation adjusts at 1 $\frac{3}{10}$ " per second. Motor is 24V DC and includes a 9' power cord. Motor for 2-leg desk has a 0.3W standby power and 3-leg desk has a 0.1W standby power.

Migration SE desks and bases are listed by ETL.
Tip: Migration SE base only is ETL recognized because alternative worksurfaces do not create an ETL listed product.
 ▶ See page 32

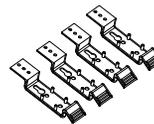

Controller can be mounted on either the left- or right-hand side of the top and is field-installed.

Power and data strips are field-installed on either a SOTO rail or worksurface. Specify appropriate attachment bracket depending on application.
 ▶ See page 318 for *Cable and Power Management*.

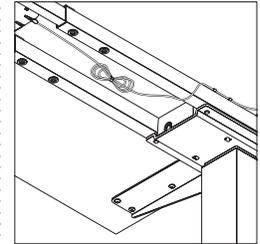

Cable riser-fence connections inside dimensions are 1"D x 1"W to accommodate a variety of cord sizes. The fence connection can go to the leg or the fence. Overall depth is 2".

Cable brackets, ordered separately, support horizontal cable management below the worksurface.
 ▶ Specifying, page 274

Inside dimensions of cable brackets are 3 $\frac{5}{8}$ "D x 1 $\frac{3}{8}$ "W x 1 $\frac{1}{16}$ "H.

Cable management includes two cable clips and two ties to help manage desk cables.

Surface Materials

High-Pressure Laminate Desk

- Laminate
- ▶ See page 362
- Open Line laminate (option)
- A program including non-Steelcase laminates which are suitable for use on Steelcase products.
- ▶ See *Surface Materials Reference Manual*.

3 mm edge profile

- Plastic

Wood Veneer Desk

- Wood veneer (standard)
- Customiz stain (option)
- Full-fill finish (option)

Square 3 mm edge profile

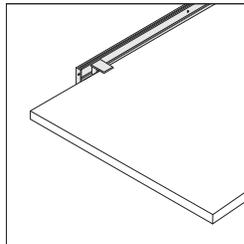

- Wood veneer to match desk

Height-adjustable base

- 4799 Platinum Metallic
- 7207 Black
- 7241 Arctic White
- 7360 Merle
- *Tip: 2-leg understructure will always be 7207 Black.*

Application Topics

Moving desks can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable desks.

SOTO rail and SlatRail mount to desks to support worktools, freeing up desk space.

- ▶ See *Steelcase Worktools Specification Guide*.

Integrated storage is allowed on Migration SE rectangle and corner desks. Two storage units may be used on one rectangle desk, however, user space will be limited. Only one storage unit can be used on corner desks.

76"W Migration SE desks ship standard with a 4" overhang, which only allows it to be used with integrated storage in a stand-alone application. The desk extends past the integrated storage below.

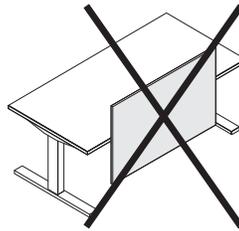

Integrated storage on Migration SE corner desks cannot be used if the desk has an overhang.

Migration SE 90° corners with one side that is 70"W and wider can be used with integrated storage.

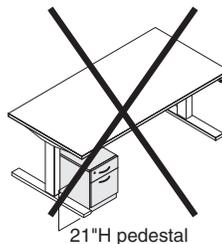

Migration SE 120° corners that are 52"W or wider can be used with integrated storage.

Integrated storage cannot be used on Migration SE desk with 5" radius corners.

When attaching 90° desk mount privacy wrap to the Migration SE worksurface with radius corners, a worksurface overhang is not allowed on either side of the worksurface.

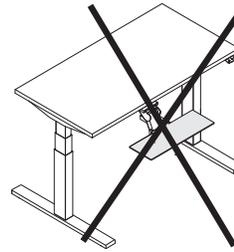

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

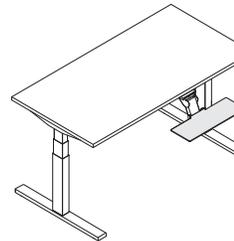

On extended height desks, any storage higher than 18³/₄" will impede height range of desk. On basic height desks, any storage higher than 24" will impede the height range of the desk.

All assemblies meet or exceed ANSI/BIFMA standards.

Keyboard assemblies are not allowed on 23"D or smaller than 46"W height-adjustable desks. They do not meet minimum safety requirements.

Steelcase keyboard assemblies can be installed on 29"/30"D Migration SE. Specify with an 11" track.

WARNING

Read base only warranty limitations.

- ▶ See page 32 for *Workstation Design Guidelines and Requirements*.

Installation

Desks ship with pre-drilled holes for mounting bases.

Height-adjustable base requires attachment to the worksurface.

Base supports a maximum of distributed weight capacity of 250 pounds (2-leg rectangle) and 330 pounds (3-leg corner).

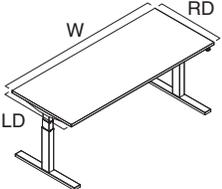

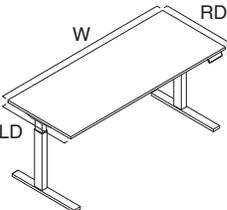

Tip: When calculating lifting capacity of rectangle desks, subtract the weight of the worksurface (see below) and the weight of the understructure (18.2 pounds).

Tip: When calculating lifting capacity of corner desks, subtract the weight of the worksurface (see below) and the weight of the understructure (27.8 pounds).

Migration SE Height-Adjustable Desks and Bases, continued

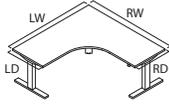

Base supports a maximum distributed weight capacity of 250 pounds (2-leg) and 330 pounds (3-leg).
 Tip: When calculating lifting capacity, subtract the weight of the worksurface and understructure.

Tip: 120° corner desks do not allow overhangs.

Universal One-High and 1.5-High Open Laterals

For Migration SE Application

Universal One-High and 1.5-High open laterals for Migration SE application seamlessly integrates the Migration SE T-leg into universal storage. It provides a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with this open storage configuration.
 ▶ Specifying, page 268

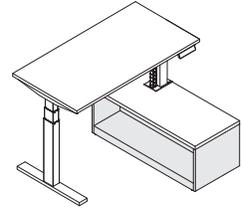

Usable depth in One-High and 1.5-High open laterals is 10 $\frac{7}{10}$ "D.

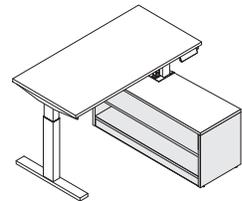

Actual Dimensions

	One-High	1.5-High
Depth with flush steel open front	18"	18"
Depth with proud steel open front	18 $\frac{7}{8}$ "	18 $\frac{7}{8}$ "
Usable Depth	10 $\frac{7}{10}$ "	10 $\frac{7}{10}$ "
Width	30", 36", and 42"	30", 36", and 42"
Height	16"	22"

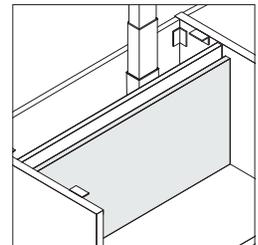

Product Details

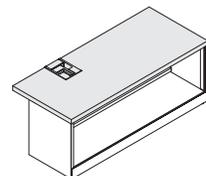

One-High storage can be used with Migration SE with T-leg extended range desks or basic range desks.

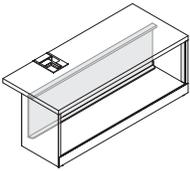

1.5-High storage can only be used with Migration SE with T-leg basic range desks.

One-High and 1.5-High storage for Migration SE with T-leg application have a removeable interior back panel to allow access to the Migration SE with T-leg base.

Laminate and wood veneer tops with square edge profile are available. Tops are 1 $\frac{3}{16}$ "H.

Removable interior cover provides access to power outlets that can be located in the panel behind storage unit.

Integrated open laterals do not accommodate 24"D, 30"D, or 36"D Migration SE workspaces.

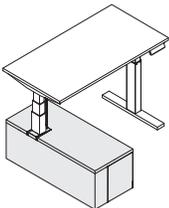

Case Widths and Migration SE Foot Dimensions

		Migration SE Worksurface Depth		
		23"	29"	35"
Migration SE Open Lateral Width	30"	•	N.A.	N.A.
	36"	•	•	•
	42"	•	•	•

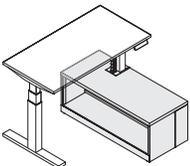

30"W Migration SE open laterals are not permitted with 29"D or 35"D Migration SE desks due to the size of the desk foot. All other integrated storage widths are permitted with all Migration SE desk depths.

Integrated leg options apply to One-High and 1.5-High units only and are meant for use with Migration SE T-leg height-adjustable rectangle and corner desks.

Application Topics

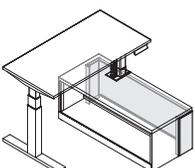

Application: Migration SE left

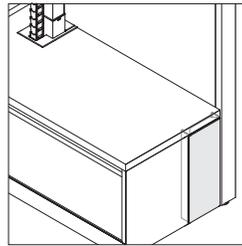

Application: Migration SE right

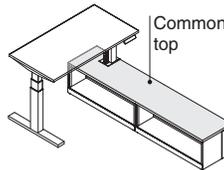

Application is determined by which leg of the Migration SE desk is located inside the storage.

Shroud is used to finish off the back of the storage when application is used as stand-alone unit.

Filler is used in end-of-run applications where end of storage unit will be visible.

No top option on lateral file is available for use with a Universal common top shared with an adjacent lateral.

Universal common top for Migration SE application, ordered separately, is available in laminate or veneer. Cut-out for Migration SE T-leg is available on the left side or the right side of the Universal common top. Migration SE desk cannot be placed in the middle of the Universal common top.

76"W Migration SE desks ship standard with a 4" overhang, which only allows it to be used with integrated storage in a stand-alone application. The desk extends past the Universal One-High and 1.5-High open lateral storage below.

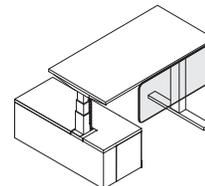

Integrated storage on Migration SE corner desks cannot be used if the desk has an overhang.

Migration SE 90° corners with one side that is 70"W and wider can be used with integrated storage.

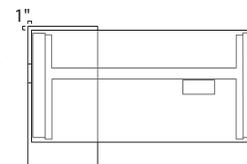

Migration SE 120° corners that are 52"W or wider can be used with integrated storage.

Integrated storage cannot be used on Migration SE rectangle desk with 5" radius corners.

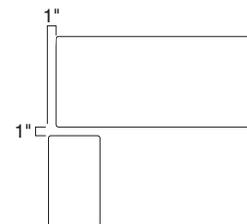

Universal privacy/modesty or Sarto privacy/modesty screens must be undersized and justified to the outside when used with One-High and 1.5-High storage units.

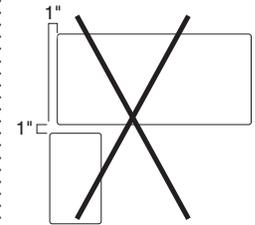

When used with One-High and 1.5-High integrated storage, screens used in the modesty position must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

To help avoid pinch points, the Universal One-High and 1.5-High open laterals for Migration SE application extend 1" past the back of the Migration SE worksurface. Open laterals for Migration SE are only available on Migration SE T-leg desks 23"D, 29"D, and 35"D.

When specifying One-High and 1.5-High storage that matches the worksurface depth, only One-High storage should be placed adjacent to the desk.

Pinch point clearances are not maintained when 1.5-High or taller storage is used adjacent to One-High integrated storage that matches the worksurface depth.

Universal One-High and 1.5-High open laterals for Migration SE application can only be used with Migration SE T-leg desks.

Surface Materials

Lateral case

- Paint

Laminate top

- Laminate
- Open Line laminate (option)

Edge on laminate top

- Plastic

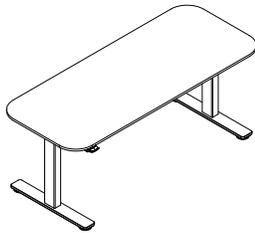

Wood veneer top

- Wood veneer—open pore finishes
- Full-fill (option) is available on wood veneer tops only.

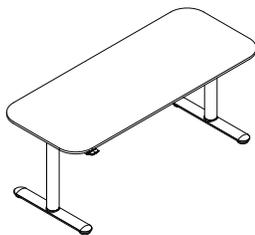

Shroud and filler

- Paint

Migration Pro Height-Adjustable Desks

Rectangle Column Shape Shown

Round Column Shape Shown

Tip: C-leg is only available with rectangle columns and is only available in 28", 29", or 30" depths.

Tip: Knife edge is only available on laminate worksurfaces.

Tip: Overhang not available on basic height Migration Pro desks.

Tip: Soft edge cannot be specified on a knife edge worksurface.

Tip: Soft edge is only available on rectangular laminate worksurface, and centered between the cantilevers. If one overhang is selected, the soft edge will be off-center on the worksurface.

	• Round grommet	+\$ 32	Specify <i>with round grommet on center</i> .
	• Flush power	+\$519	Specify <i>with flush power on center</i> and specify plastic color number.
	• Pop-up power	+\$519	Specify <i>with pop-up power on center</i> and specify paint color number.
Grommet and Integrated Power – Right Position	• None	No cost	Specify <i>with none</i> .
	• Round grommet	+\$ 32	Specify <i>with round grommet on right</i> .
	• Flush power	+\$519	Specify <i>with flush power on right</i> and specify plastic color number.
	• Pop-up power	+\$519	Specify <i>with pop-up power on right</i> and specify paint color number.
Height-Adjustable Base Power Cord	• 10' standard cord	No cost	Specify <i>with 10' standard cord</i> .
	• 4' standard cord	No cost	Specify <i>with 4' standard cord</i> .

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Base upper paint finish defaults to match base lower paint finish.

Tip: Only one flush or pop-up integrated power can be specified per desk.

Tip: When overhang is also specified, left, right, and/or center grommet positions will match the understructure width, not the worksurface width.

Tip: When flush or pop-up power is specified with utility power, a 4' height-adjustable base power cord is automatically shipped.

*Tip: Height-adjustable base must be specified with 10 1/2' power cord unless utility power is optioned. When selecting 4' cord to minimize cable management, **DSPINTRO** or **DSPOWER** with utility power is required.*

Migration Pro with Boost High-Speed Height-Adjustable Desks

► Need help? Product details, page 192

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 with 3 mm plastic edge
- Electric height-adjustable sit-to-stand base: paint
- Column shape: rectangle
- T-leg configuration
- Active touch controller
- Square corners, if selected
- Depth: 23", 24", 28", 29", or 30"
- Modular width: 40", 46", 52", 58", 64", 70", or 76"
- 1/2" glide
- Power cord: 10 1/2'
- Attachment hardware

Required to Specify

- 1 Style number
 - 2 Desk depth
 - 3 Desk width
 - 4 Corner (see below under Required Selections)
 - 5 Edge profile (see below under Required Selections)
 - 6 Glides (see below under Required Selections)
 - 7 Controller (see below under Required Selections)
 - 8 High-Pressure Laminate, composite veneer, or wood color for worksurface
 - 9 Plastic color number for profile edge on laminate worksurface
 - 10 Paint color number for lower base
 - 11 Options, if selected (see below)
- See *Surface Materials*, page 362

Tip: Knife edge is only available on laminate worksurfaces.

Tip: Soft edge cannot be specified on a knife edge worksurface.

Tip: Soft edge is only available on rectangular laminate worksurface, and centered between the cantilevers. If one overhang is selected, the soft edge will be off-center on the worksurface.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: Base upper paint finish defaults to match base lower paint finish.

Tip: Height-adjustable base must be specified with 10 1/2' power cord unless utility power is optioned. When selecting 4' cord to minimize cable management, **DSPINTRO** or **DSPower** with utility power is required.

Migration Intro Height-Adjustable Desks

► Need help?
Product details,
page 198

Standard Includes

- Worksurface: High-Pressure Laminate price group 1 with 3 mm plastic edge
- Electric height-adjustable sit-to-stand base: paint
- Column shape: rectangle
- T-leg configuration
- Basic controller
- Square corners, if selected
- Depth: 23", 24", 28", 29", or 30"
- Modular width: 40", 46", 52", 58", 64", 70", or 76"
- 1/2" glide
- Power cord: 10'1/2'
- Attachment hardware

Required to Specify

- 1 Style number
 - 2 Desk depth
 - 3 Desk width
 - 4 Corner (see below under Required Selections)
 - 5 Controller (see below under Required Selections)
 - 6 High-Pressure Laminate, composite veneer, or wood color for worksurface
 - 7 Plastic color number for profile edge on laminate worksurface
 - 8 Paint color number for base
 - 9 Options, if selected (see below)
- See *Surface Materials*, page 362

Migration SE Height-Adjustable Desks

T-Leg

Tip: 76"W Migration SE desks ship standard with a 4" overhang on both sides.

Tip: The height saver with casters option is only available on 29/30"D or 35/36"D desks.

Tip: On extended height desks, any storage higher than 18³/₁₀" will impede height range of desk. On basic height desks, any storage higher than 24" will impede the height range of the desk.

▶ See page 211 for overhang rules.

Tip: 5" corner radius option available on desks 58"W or wider.

Tip: On 23"/24"D and less than 58"W desks, only single and dual flat panel monitor arm applications are permitted for use.

▶ See *Steelcase Worktools Specification Guide*.

Tip: For desks 29"/30"Dx58"W and greater additional monitor arm configurations are allowed.

▶ See page 58, *Steelcase Monitor Arm Guidelines*.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Tip: **MGSLTLCG** is for GSA use only.

Tip: For modular sized desks, if width left or right is greater or equal to 64"W, then opposite side width must be less than or equal to 58"W.

For parametric sized desks, if width left or right is greater than 60"W, then opposite side width must be less than or equal to 60"W.

Tip: Widths are parametric in 1/16" increments.

Migration SE
Height-Adjustable
Bases

Tip: Attachment hardware is intended for desks 1" to 1 1/8" thick.

Standard Includes		Required to Specify
▶ Need help? Product details, page 208	<ul style="list-style-type: none"> • Electric height-adjustable sit-to-stand base: paint price group 1 • Depth: 23", 24", 28", 29", 30", 35", or 36" • Power cord: 9' • 1/2" adjustable glides • Attachment hardware 	<ol style="list-style-type: none"> 1 Style number 2 Depth 3 Paint color number for base: <ul style="list-style-type: none"> 4799 Platinum Metallic 7241 Arctic White 7207 Black 7360 Merle 4 Controller (see below under Required Selections) 5 Foot (see below under Required Selections) 6 Options, if selected (see below)

Tip: The height saver with casters option is only available on 29/30"D or 35/36"D base.

Tip: Any storage higher than 20" will impede lowest height range of worksurface. Do not place storage underneath controller.

Tip: On 23"/24"D and less than 58"W desks, only single and dual flat panel monitor arm applications are permitted for use.

▶ See *Steelcase Worktools Specification Guide*.

Tip: For desks 29"/30"Dx58"W and greater additional monitor arm configurations are allowed.

▶ See page 58, *Steelcase Monitor Arm Guidelines*.

Tip: Base supports a maximum distributed weight capacity of 250 pounds. When calculating lifting capacity, subtract the weight of the worksurface.

Tip: Worksurface for use on this base needs to be 2" wider than the base.

⚠ WARNING

Read base only warranty limitations.

Universal One-High and 1.5-High Open Laterals

for Migration SE Application

Drawings show right-hand application, left hand is also available.

Tip: Open laterals are only for Migration SE T-leg desks.

Tip: 30"W integrated storage is not permitted with 29"D and 35"D Migration SE worksurfaces due to the size of the desk foot. All other integrated storage widths are permitted with all Migration SE desk depths. ▶ See page 219 for chart showing restrictions

Tip: Migration SE desk depth is necessary in specification for integrated storage due to the placement of the Migration SE leg.

Tip: Right-hand or left-hand application is determined by which leg of the Migration SE desk is located inside the storage.

Tip: 76"W Migration SE desks ship standard with a 4" overhang, which only allows it to be used with integrated storage in a stand-alone application.

 **For Canadian Pricing**
Multiply U.S. Price by the Canadian price factor.

Universal One-High and 1.5-High Open Laterals **278**

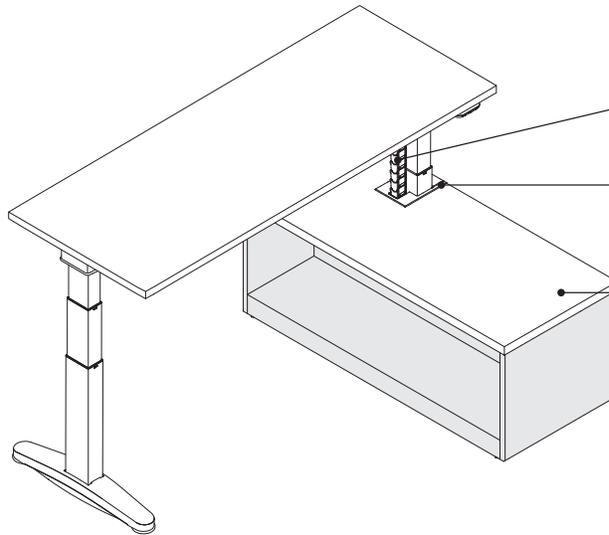

Specifying

Universal One-High and 1.5-High Open Laterals **282**

One-High and 1.5-High Open Storage for Ology and Migration SE Applications

One-High and 1.5-High open storage are available with options to accommodate Ology and Migration SE integration. They provide a clean aesthetic with an efficient footprint. Ease of access to your items under the desk is convenient with the open storage configuration.

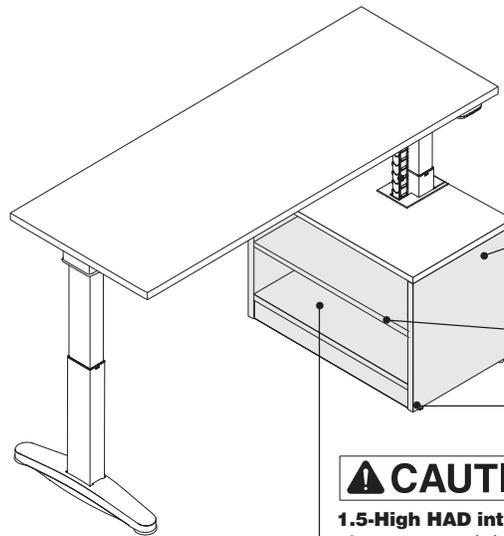

► Specifying, page 282

Wire manager keeps wires tidy and functionally flexes vertically.

Grommet provides a clean area where the desk leg integrates.

Units come without tops. Tops for Ology and Migration SE applications are ordered separately (style number **CRHADCT**).

Usable depth in One-High and 1.5-High open storage is 10⁴/₅"D for Ology application and 9⁵/₈"D for Migration SE applications.

Shelf thickness is 3/4".

Leveling glides adjust to install on uneven floors and have a 1¹/₄" adjustable glide range.

CAUTION

1.5-High HAD integrated storage can only be used with basic height Ology and Migration SE.

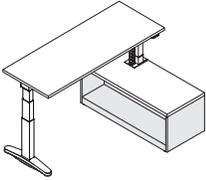

Actual Dimensions

	One-High	1.5-High
Depth	18 ⁷ / ₈ "–24"	18 ⁷ / ₈ "–24"
Usable Depth for Ology application	10 ² / ₅ "*	10 ² / ₅ "*
Usable Depth for Migration SE application	9 ³ / ₁₀ "	9 ³ / ₁₀ "
Width	30"–72"	30"–72"
Height	15 ³ / ₈ "	21 ³ / ₈ "

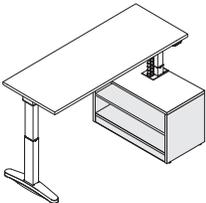

* Top depth is 18⁷/₈", case depth is 18", to align with any other open low storage (example: open credenza).

* The case on One-High and 1.5-High open units is 18¹/₈"D. When top is added, the top matches the depth of units with drawers and doors.

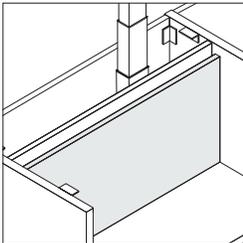

Product Details

One-High open storage can be used with Ology extended range desks, Ology basic range desks and Migration SE extended range desks and Migration SE basic range desks.

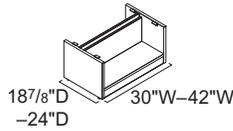

1.5-High open storage can be used with Ology basic range desks and Migration SE basic range desks.

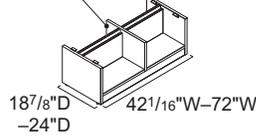

One-High and 1.5-High open storage have a merle painted steel, removable interior back panel to allow access to the base.

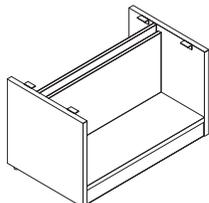

One-High and 1.5-High open storage cannot be interchanged. Use Ology open storage with Ology desk and Migration SE open storage with Migration SE desk.

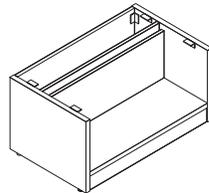

Center support

Units smaller than or equal to 42" W have one opening. Units 42 1/16" and larger have a center support.

Open back

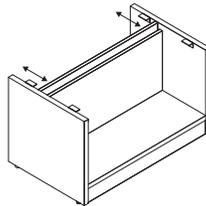

Finished back

Ology and Migration SE open units offer an option of open back or a finished back for use in applications where the back of the unit is exposed, such as an aisle-way.

Tip: Units have removable back to allow access to desk leg and can be specified with open or finished back.

Ology desk with integrated storage must be specified with modular widths only. When opting for parametric widths, integrated storage is not available.

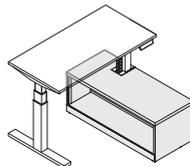

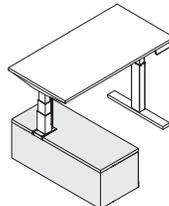

Open back units for Ology desks have 6" clearance. Open back units for Migration SE units have 7 2/25" clearance.

Integrated storage options that apply to One-High and 1.5-High units are only meant for use with the specified height-adjustable desk. For example, open storage specified for Migration SE cannot later be blended with Ology.

Integrated open laterals do not accommodate 24"D, 30"D, or 36"D Migration SE worksurfaces. See actual dimensions chart on next page.

Application Topics

Base units are non-handed. Handedness is identified in the specification of the tops, which are ordered separately.

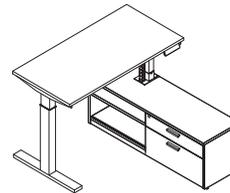

Application is determined by which leg of the desk is located inside the storage.

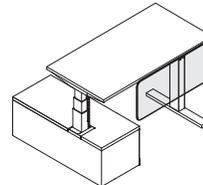

Location of the Ology and Migration SE port in tops is determined by the application orientation. If right leg is integrated into storage, it is a right application. Ology or Migration SE desks cannot be placed in the middle of the common top.

Tops for Ology and Migration SE application feature a cutout for legs and are used on individual storage units.

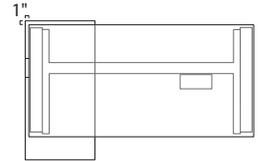

Common tops for Ology and Migration SE application can be used with two units side-by-side when one storage unit is required for leg integration.

Common tops for Ology and Migration SE open units application are available when ganging height adjustable desk integrated storage units to other lower storage units of the same height and depth.

Universal privacy/modesty screens must be undersized and justified to the outside when used with a storage unit.

To help avoid pinch points, the One-High and 1.5-High lower storage for height-adjustable desk application extends 1" past the back of the height-adjustable desk worksurface.

One-High and 1.5-High Open Storage

For Ology and Migration SE Applications

Tip: The actual thickness between Low-Pressure Laminate (LPL) and High-Pressure Laminate (HPL) worksurfaces is slightly different. It is recommended that only worksurfaces of the same type are specified in a given application. In addition, there may be sheen or texture differences when using LPL and HPL in adjacent applications.

For laminate price group 2 and higher pricing, please refer to the electronic catalog or SmartTools.

Airtouch Height-Adjustable Worksurfaces

Airtouch worksurfaces

support computer-intensive users and mobile users in single occupant, multi-occupant, or high-churn environments. They allow users to quickly and effortlessly raise and lower their worksurfaces between seated and standing positions.

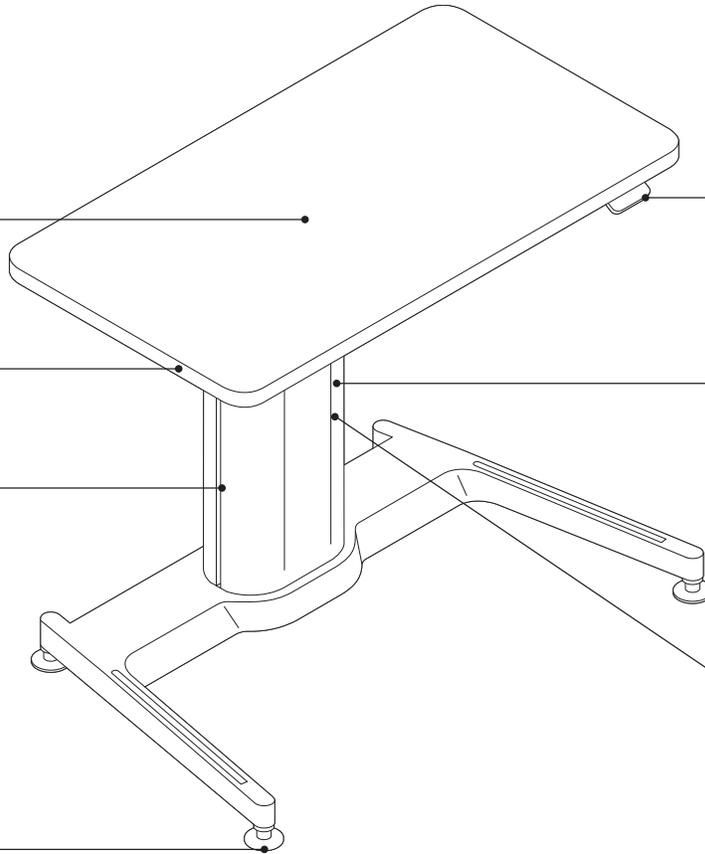

► Specifying, page 290

Worksurface has a wood core with a High-Pressure Laminate surface and is 1³/₁₆" thick.

Edge is available in 3 mm profile.

Base allows unique applications without having to tether any power cords.

Leveling glides adjust 1" to install unit on uneven floors.

Ergonomic lift handle activates smooth, effortless height adjustments.

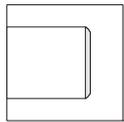

Airtouch has an adjustment feature on the column which allows the unit to function properly with any weight up to 150 pounds. *Tip: When calculating lifting capacity, subtract the weight of the worksurface.* ► See page 289 for worksurface weights.

Height-adjustable column adjusts from 26"H to 43"H in any increment.

Product Details

High-Pressure Laminate Worksurfaces

Front (user's) edge profile is available in 3 mm edge profile.

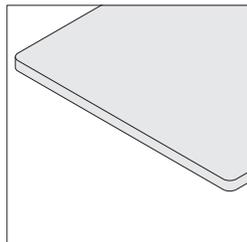

3 mm edge profile

PVC-free, 3 mm edge profiles are proprietary polyolefin blend for all solid colors and seven woodgrain finishes. Matching 1 mm side and back edges are also PVC-free. See surface material listing in this book for specific PVC-free availability.

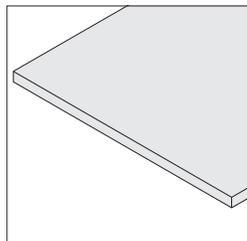

Tip: Universal Tables have a continuous 3 mm edge.

Edge profile finishes are specified separately from laminate color.

Edge profile provides a flush interface with universal pedestals.

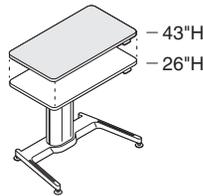

Universal tables have 2" radius corners on all four sides with a continuous user's edge. Radius corners eliminate sharp edges and are appropriate for free-standing furniture.

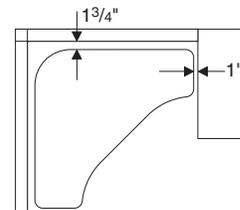

Universal Systems have 90° corners on all four sides with a front user's edge.

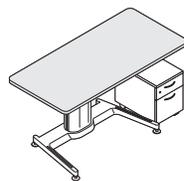

Airtouch height-adjustable tables are available in straight and corner shapes.

Airtouch worksurfaces adjust 26"H to 43"H in any increment.

At least a 1³/₄" gap must separate backs of a table and panels to accommodate cables and prevent pinching. A 1" gap separates sides and adjacent furniture.

Worksurface overhang for pedestal storage varies by shape and size of worksurface.

- 7207 Black

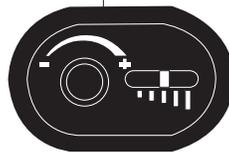

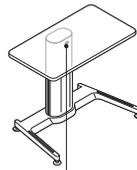

Height-adjustable column

- 4799 Platinum paint

Application Topics

Moving tables can collide with other components. Do not install overhead storage, desk-height power, or desk accessories in the path of height-adjustable worksurfaces.

Airtouch is designed to support up to 150 pounds including the worksurface. An adjustable feature on the column allows the amount of lift assist to be set for various cargo loads.

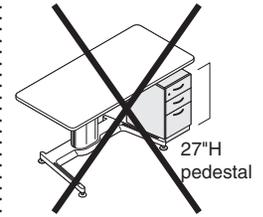

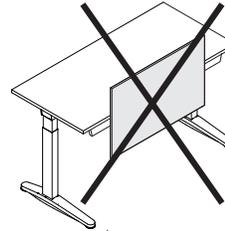

The gauge located near the top of the column

shows the amount of lift assist in use. The amount of lift assist can be dialed up for heavier loads and dialed down for lighter loads. If the unit is not moving smoothly, the lift assist mechanism needs to be adjusted. For example, if the top raises too fast, dial the lift assist down. If the top is difficult to raise, dial the lift assist up.

Typical workload weights are:

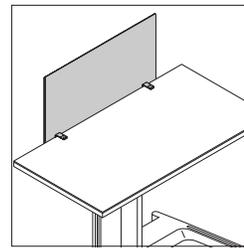

- Laptop 5–8 lb
- Small flat screen 10–16 lb
- Monitor arm 10–14 lb
- Desk lamp 5–10 lb
- Keyboard 2–3 lb
- Inch of paper 2¹/₂ lb
- Desk phone 3–5 lb

Worksurface travels at the speed designated by the user. Users can adjust the table from seated to standing in one natural motion (approximately 1 second).

Any storage higher than 24¹/₂" will impede the lower height range of worksurface.
Tip: Do not place storage underneath paddle.

Universal boundary screens are not permitted on height-adjustable desks, as they do not pass minimum safety requirements which could result in the desk tipping over.

Screens mount to worksurfaces in privacy or below the worksurface for modesty.

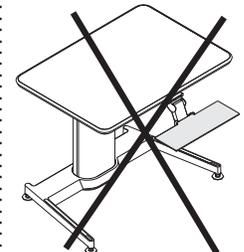

▶ See *Worktools Compatibility Charts*, page 48, for help determining appropriate screen widths for each Airtouch worksurface size.

SOTO rail and SlatRail mount to worksurfaces to support worktools, freeing up worksurface space.

▶ See *Worktools Compatibility Charts*, page 48, for help determining appropriate SOTO rail and SlatRail widths for each Airtouch worksurface size.

Worksurface weight plates may be necessary to order if there is not enough weight on the worksurface. Applications using the smallest width worksurface without additional worktools (i.e. touch-down spaces) will require these counterweights (946900053SR).

All assemblies meet or exceed ANSI/BIFMA standards.

Keyboard assemblies are not allowed on height-adjustable desks. They do not meet minimum safety requirements.

Installation

Worksurfaces ship with pre-drilled holes for mounting bases.

Airtouch column requires attachment to the base and worksurface.

Airtouch Height-Adjustable Worksurfaces, continued

Base supports a maximum distributed weight capacity of 150 pounds.

Tip: When calculating lifting capacity, subtract the weight of the worksurface.

Airtouch Height-Adjustable Worksurfaces

High-Pressure Laminate Universal Tables

Tip: Airtouch height-adjustable base requires assembly and attachment to the worksurface.

Tip: Worksurfaces ship with pre-drilled holes for mounting bases.

Tip: Any storage higher than 24½" will impede the lower height range of the worksurface. Do not place storage underneath paddle.

For laminate group 2 and 3 pricing, please refer to the electronic catalog or SmartTools.

Tip: An adjustment feature on the column allows the unit to function properly with any load up to 150 pounds, including the worksurface.

Tip: Counterweights may be necessary to order if there is not enough load on the worksurface. Order service part (946900053SR).

Tip: For help determining privacy/modesty screen, SOTO rail, and SlatRail width compatibility, see Worktools Compatibility Charts, page 48.

Tip: Wood veneer worksurface options are available through specials.

Tip: Paint surface options apply to base only. Paint surface option does not apply to column.

Tip: Only single and dual flat panel monitor arm applications are permitted for use with single column height-adjustable tables.

For Canadian Pricing
Multiply U.S. Price by the Canadian price factor.

Universal Privacy/Modesty Screens

Universal privacy/modesty screen provides a boundary element for height-adjustable desks and fixed worksurfaces. It can be used with Ology desk, Migration Desking Collection, Airtouch, Elective Elements, Universal tables, and Universal panel mount worksurfaces. Privacy/modesty screens are not to be used on height-adjustable benching.
▶ Specifying, page 330

Universal privacy/modesty screens are available in one height, 25⁷/₁₀" , with two mount location options to provide either privacy or privacy/modesty.

Universal privacy/modesty screens cannot be used on surfaces that have intergrated rails or an additive SOTO rail.

Universal privacy/modesty screen is pin tackable.

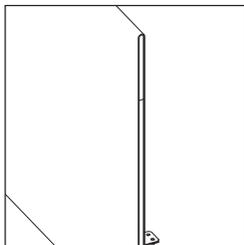

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Actual Dimensions

Width	42", 48", 54", 60", or 66"
Height	25 ⁷ / ₁₀ "
Weight	9.79 lb, 10.315 lb, 10.84 lb, 11.365 lb, 11.89 lb
Thickness	3/4"

Product Details

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on $\frac{3}{4}$ "– $1\frac{1}{2}$ " thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Surface Materials

Screen

- Fabric
- ▶ See *Surface Materials*, page 362.

Edge (upper segment)

- 7360 Merle

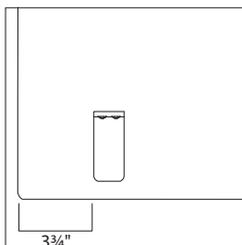

Edge (lower segment)

- P630 Medium Heather Grey PET
- P631 Dark Heather Grey PET

Brackets

- 7360 Merle

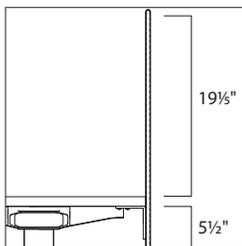

Application Topics

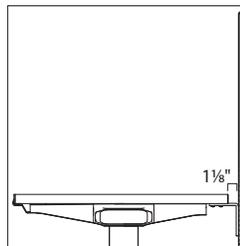

Universal privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned $3\frac{3}{4}$ " in from each side of the screen.

Tip: When specifying grommets on Ology, verify the position of the screen in CET SmartTools Planning.

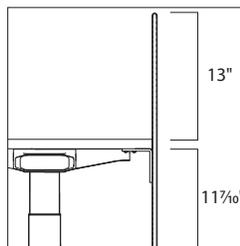

Screen height attachment locations are determined when specifying privacy (top of screen will be at 48") or privacy/modesty (top of screen will be at 42"). The location cannot be changed in the field.

Privacy configuration provides $19\frac{1}{2}$ " of screen above the worksurface and $5\frac{1}{2}$ " of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 48"H Answer panel.

Screen can be mounted with a $\frac{1}{8}$ " cord drop or flush with no cord drop.

Privacy/modesty configuration provides 13" of screen above the worksurface and $11\frac{7}{10}$ " of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen. The top of the screen will align with the bottom of the top trim on a 42"H Answer panel.

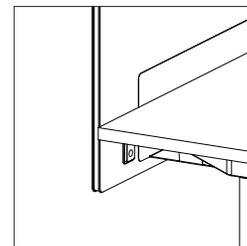

Both the privacy and privacy/modesty configurations allow the height-adjustable desks to be lowered to the lowest position (22") while preserving pinch point gap. Privacy version will not interfere with integrated storage.

Privacy/modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools Planning aid be used to ensure proper application of screen to worksurface or tables.

Universal privacy/modesty screens cannot be used with 58"W Ology desks with leg integrated into storage. The smallest screen width is 42" which would collide with the storage. Must use a minimum 64"W desk when using storage and Universal privacy/modesty screens.

Universal privacy/modesty screens cannot be used with Ology and Migration Pro/Intro modesty panels.

When used with One-High integrated storage, Universal privacy/modesty screens must be a minimum of 18" shorter than worksurface width to allow for pinch point clearances.

Universal privacy/modesty screen can be installed with the Migration metal cable tray. Tray can be optioned on the desk or ordered separately.
Tip: Screen width must be $10\frac{1}{2}$ " wider than metal cable tray.

Maximum Rear Screen Sizes Based on Worksurface Edge Types on Migration Intro, Migration Pro, and Pro with Boost High-Speed

Screen Type	Square or Square with Knife Edge or 2" Radius	5" Radius	2" Radius with Knife Edge or 5" Radius with Knife Edge

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Universal Privacy Screens and Aligners

Universal privacy screens provide a boundary and privacy element for height adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, panel supported Universal worksurfaces, and TS Series worksurfaces.
 ▶ Specifying, page 332

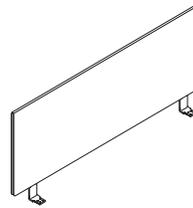

Actual Dimensions

Height	12½" or 18½"
Overall Height	13½" or 19½"
Width	24", 30", 36", 42", 48", 54", 60", 66", 72", 78", 84", 90", or 96"

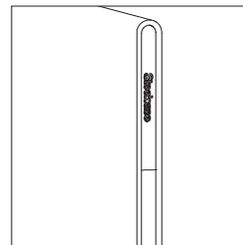

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Tip: 13½"H screen aligns with a 42" datum from the floor. 19½" screen aligns with a 48" datum from the floor.

Product Details

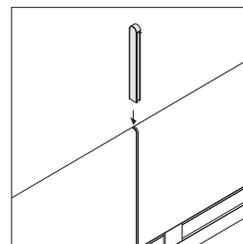

Universal privacy screens are tackable and available in 13½"H and 19½"H, and have widths from 24"W to 96"W.

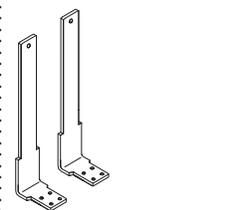

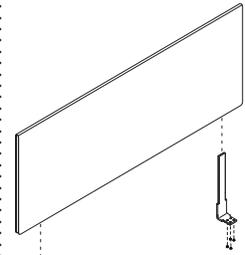

The edge of the screen is comprised of two different materials. The upper segment is merle plastic. The lower portion is PET which can be specified in medium heather grey to provide contrast or dark heather grey for a uniform visual.

The screen may be used on ¾"-1½" thick worksurface.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

When fabric screens are placed directly adjacent to each other, a small aligner can be placed in between the screens at the top to connect them for planar alignment. Aligners are ordered separately in packages of 10.

Brackets are included with screens. Two brackets are used on all screens.

Universal privacy screen slides onto brackets.

Tip: Measurements provided do not include cutouts and overhang rules.

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Sarto Privacy/Modesty Screens

Sarto privacy/modesty screen provides a boundary element for height-adjustable desks and fixed worksurfaces. It can be used with Ology desk, Migration Desking Collection, Airtouch, Elective Elements, Universal tables, and Universal panel mount worksurfaces. Sarto privacy/modesty screens are not to be used on height-adjustable benching.
▶ Specifying, page 334

Sarto privacy/modesty screens are available in overall heights from 24" to 30", with a privacy height option to provide varying levels of privacy and modesty.

Sarto privacy/modesty screen is pin tackable.

The screen is attached to the worksurface using simple L-brackets and 1" screws.

Actual Dimensions

Width 23"-70"

Height 24"-30"

Thickness 9/16"

Product Details

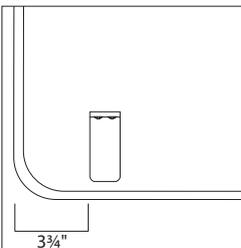

The screen may be used on 3/4"-1 1/2" thick worksurfaces.

Screens are available in modular or parametric sizes.

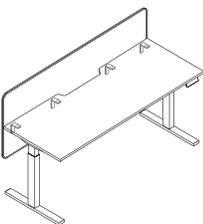

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Weight of screens are calculated as follows:
Screen: 0.0044 pounds per inch² Bracket: 0.2 pounds per bracket.

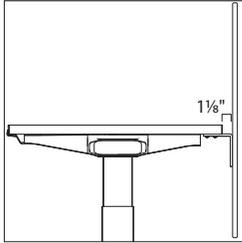

Application Topics

Sarto privacy/modesty screen mounts to worksurfaces using simple L-brackets and screws. The brackets are positioned 3 3/4" in from each side of the screen. Two L-brackets are included with screens narrower than 60"W. Three or four L-brackets are included on screens 60"W and wider.

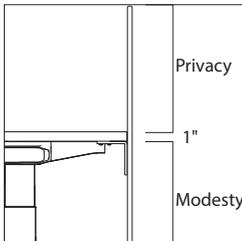

Worksurface type is available for screens 60" wide or wider, and allows the Sarto privacy/modesty screen to mount to a scalloped worksurface (for example Bivi Height-Adjustable Desk).

Screen can be mounted to the back edge of the worksurface with a 1 1/8" cord drop or flush with no cord drop.

Screens 36"W and narrower can be mounted as side screens, and are always mounted flush to the edge of the worksurface. This application grows the footprint of the workstation by 9/16" per screen.

Screens are specified with a privacy height above the worksurface. A 1" thick worksurface is assumed. This privacy height sets the position of the brackets and cannot be changed in the field.

Screens are specified by first selecting an overall screen height (24"-30"), then specifying a privacy height. Privacy height is measured from the top of the worksurface. Allowable privacy height selection changes based on the specified overall height.

All privacy heights allow a height adjustable desk to be lowered to the lowest position (22") while preserving pinch point gap.

To match screens ordered on or before June 20, 2021, please consult the following information to determine proper privacy height.

- 24"H Screen, Privacy/Modesty Configuration – Privacy Height = 13 1/2"
- 24"H Screen, Privacy Configuration – Privacy Height = 16 1/2"
- 30"H Screen, Privacy Configuration – Privacy Height = 22 1/2"

Sarto privacy/modesty screens can be used with universal worksurfaces and tables where surface supports and leg brackets are not in same location of the screen L-bracket attachment points.

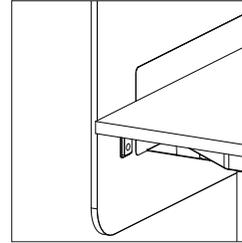

- Example 1—Worksurfaces supported by a panel side bracket or cantilever can accept privacy/modesty screen placed 6" in from end with these brackets.
- Example 2—Tables with cabby leg or double elliptical post C-legs can accept screens 6" shorter than total table width but not same width.

Sarto privacy/modesty screens cannot be used with Ology or Migration Pro/Intro modesty panels.

When a parametric Sarto screen is used on a parametric Ology desk, verify the screen width and placement in CET SmartTools planning to avoid interference.

Privacy/modesty screens can also be used with Elective Elements surfaces with some restrictions when combined with gate leg or the Elective Elements adjustable-height leg.

Privacy/modesty screens must never be wider than the surface to which they are attached.
Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Sarto privacy/modesty screens can be installed with the Migration metal cable tray. When specifying a Sarto screen equal to or greater than 60"W to use with the cable tray, select the "with tray application" option. The metal tray is an option with the desk or can be ordered separately.
Tip: Screen width must be 10 1/2" wider than the metal cable tray.

Sarto Privacy Screens

Sarto privacy screens provide a light scale boundary and privacy element for height-adjustable desks and fixed worksurfaces. It can be used with Ology, Migration Desking Collection, Elective Elements, universal worksurfaces, and TS Series worksurfaces.

► Specifying, page 336

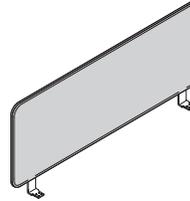

Actual Dimensions

Screen Height	12½"–34½"
Overall Height	13½"–25½"
Width	24"–96"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

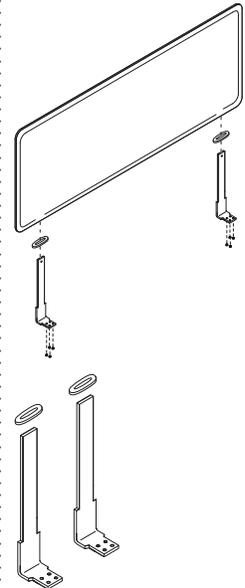

Sarto privacy screens are tackable. They are available in four modular heights, 13½"H, 19½"H, 23½"H, and 35½"H, and have widths ranging from 24"W to 96"W. Screens can also be specified parametrically.

The screen may be used on ¾"–1½" thick worksurfaces.

The width of the screen can be equal to or less than the width of the worksurface to which it will attach. Some restrictions apply due to location of worksurface legs and supports.

Tip: It is recommended that CET SmartTools planning aid be used to ensure proper application of screen to worksurface or tables.

Brackets and hard stops are included with screens. Screens narrower than 60"W use two brackets, while screens 60"W and larger utilize three brackets. The third bracket is centered on the width of the screen.

Offset brackets are included with 29"W screens, to help maintain appropriate pinch points between the screen and adjacent objects. Side screen option is available for screens 36"W and narrower.

Sarto privacy screen slides onto brackets.

Alignment brackets are available to help eliminate gapping and misalignment between back and side screens. Alignment brackets are available as their own style (**PSCB**).

Weight of screens are calculated as follows: Screen: 0.0044 pounds per inch² Bracket: 1.2 pounds per bracket.

Sarto Privacy/Modesty Screen (PSPM) with Option SIDESCEN Selected	Max Screen Width = Depth of Desk	Max Screen Width = Depth of Desk	N/A	N/A

Tip: Measurements provided do not include cutouts and overhang rules.

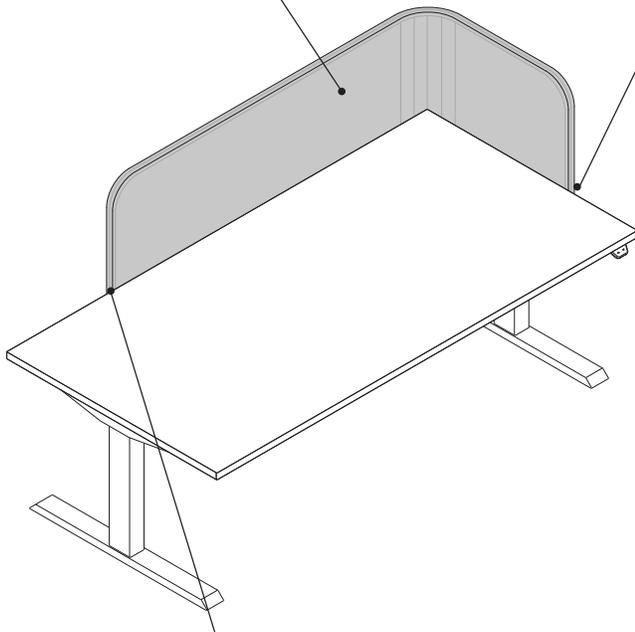

Tip: Side screens are not compatible with Migration Pro and Intro organic bow front and back shape.

Sarto Curved Screens

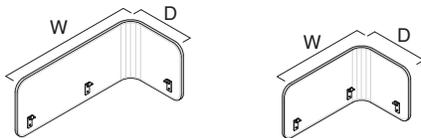

Sarto curved screens provide light scale privacy and modesty for height-adjustable desks and work tables.
 ▶ Specifying, pages 340–342

Curved screens are pin tackable.

Curved screens are attached to the worksurface with simple metal L-brackets.

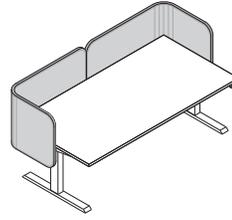

Sarto curved screens sit flush against the worksurface. If 1" cord drop is needed, please reach out to Specials for alternative bracket.

Actual Dimensions

	L-Screen	Half-Desk Screen
Overall Width	43"–66"	43", 49", or 55"
Depth	20"	20"
Width	23"–46"	23", 29", or 35"
Height	17.909", 18", or 24"	17.909", 18", or 24"
Thickness	7/8"	7/8"
Weight: 18"H	5.7 lb, 6.5 lb, 7.2 lb	5.0 lb, 5.6 lb, 6.2 lb
Weight: 24"H	7.3 lb, 8.4 lb, 9.4 lb	6.4 lb, 7.2 lb, 8.0 lb

Application Topics

Half desk screens are sized to work with modular size desks. Mounting a pair of half desk screens on a parametric sized desk will create a gap between screens. Parametric width screens are available to create a full wrap of parametric worksurfaces.

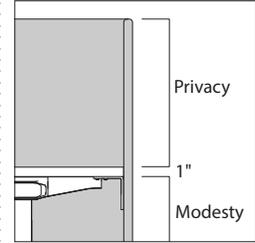

Tip: It is recommended that CET SmartTools be used to evaluate the gap on the desk.

L-screens are sized to work with popular sized modular width desks. When mounted, the modular widths of the L-screen are designed to cover two thirds of the back of the worksurface.

Tip: It is recommended that CET SmartTools be used to evaluate the placement of the screen on the desk.

Fabric is applied in a warp horizontal direction. Due to the size of the screens, fabric is unable to be applied in a warp vertical direction.

Screens are specified by first selecting an overall screen height (18"-24"), then specifying a privacy height. Privacy height is measured from the top of the screen to the top of the worksurface. Allowable privacy height selection changes based on the specified overall height.

All privacy heights allow a height-adjustable desk to be lowered to the lowest position (22") while preserving pinch point gap.

To match screens ordered on or before June 20, 2021, please consult the following information to determine proper privacy height.

- 24"H Screen, Privacy/Modesty Configuration – Privacy Height = 13½"
- 24"H Screen, Privacy Configuration – Privacy Height = 16½"

When ordering a single screen, selecting the correct hand is important. Handedness is assigned from the user position when the curved screen is mounted.

Screen is not applicable on shaped worksurface edges (knife edge, bullnose, P-edge, etc).

Surface Materials

Brackets

- 6527 Merle

Universal and Sarto Screens Specific Guidelines

Migration SE Specific Guidelines

Rectangular 29"D and 35"D

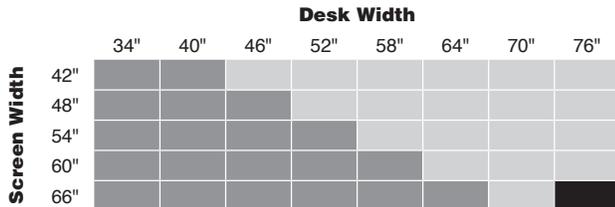

All guidelines assume the screen is centered on the desk.

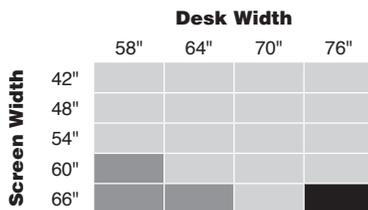

Screens are sized to be a minimum of 4" smaller than worksurfaces. They can be placed anywhere along the back edge of a desk but cannot extend past the desk edge.

Ology Specific Guidelines

Rectangular 23"D, 29"D, and 35"D

Tapered 23"D and 29"D

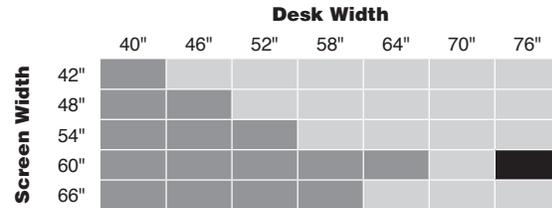

The screen can be placed on the back edge of an Ology without an integrated rail desk utilizing either the 1½" cord drop or no cord drop placement. Screens are sized to be a minimum of 4" smaller than worksurfaces. Optional cable trays and grommets on Ology may cause some interference with screen mounting brackets.

Legend

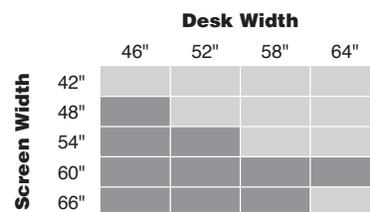

No interference
Interference or cannot be used
Cannot specify a grommet

Ology Specific Guidelines, continued

90° Corner 23"D

120° Corner 23"D

All guidelines assume the screen is centered on the desk.

When using the universal or sarto privacy/modesty screen on Ology with 1½" cable drop, there are no limits on the horizontal placement of the cable tray beneath the desk.

The Universal and Sarto privacy/modesty screens can not be used with the Ology modesty panel without causing interference.

When a parametric Sarto screen is used on a parametric Ology desk, verify the screen width and placement in CET SmartTools planning to avoid interference.

The universal or sarto privacy/modesty screen can be used on either back edge of a 90° or 120° corner desk configuration.

Ology desks using an integrated storage leg may only mount the universal privacy/modesty screen in the privacy position and cannot use sarto screens due to interference. See SmartTools for more information.

The universal or sarto privacy/modesty screen does not mount to an Ology rail or into the Ology cantilevers.

If using overhangs, the leg must be at least 3½" in from its standard position to avoid interference with the screen bracket.

Airtouch Specific Guidelines

Rectangular 22¹/₄"D and 28¹/₄"D

		Worksurface Width		
		40"	46"	58"
Screen Width	42"			
	48"			
	54"			
	60"

120° 22¹/₄"D

		Worksurface Width
		34"
Screen Width	42"	
	48"	
	54"	
	60"	
	66"	

Universal or sarto privacy/modesty screen weight should be considered, along with other items to be used on Airtouch, so as not to exceed weight limit.

Universal or sarto privacy/modesty screens can be placed on the back edge of an Airtouch worksurface, utilizing either the 1¹/₈" cord drop or no cord drop placement without creating interference. The screen must be narrower than the width of the worksurface. Screen cannot exceed the width of table.

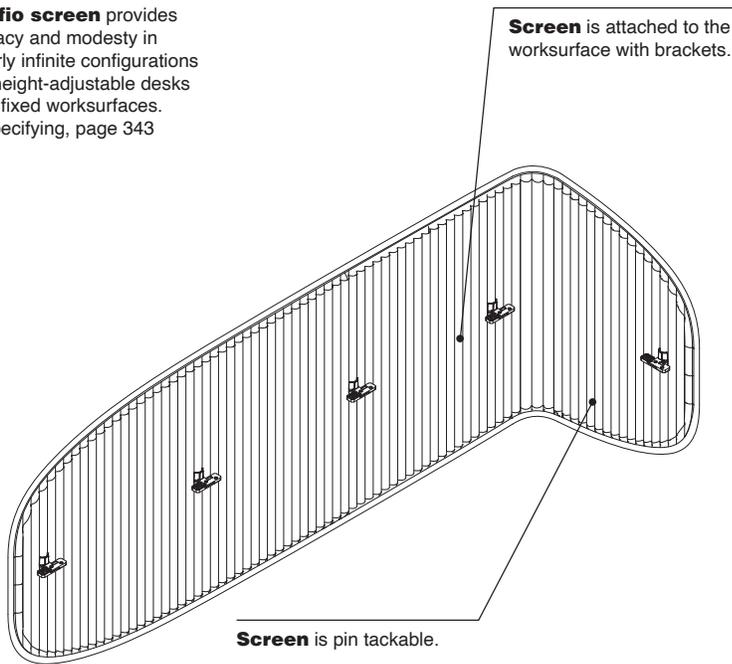

Legend

	No interference
	Interference or cannot be used
	Cannot specify a grommet

Soffio Screen

Soffio screen provides privacy and modesty in nearly infinite configurations for height-adjustable desks and fixed workspaces.

► Specifying, page 343

Screen is pin tackable.

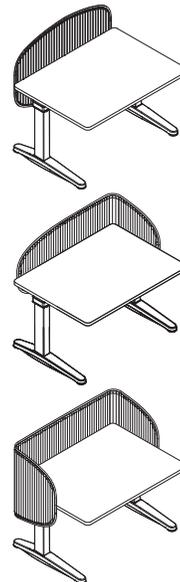

Screen includes corrugations, allowing for the screen to curve at any point along the width.

Screen is attached to the worksurface with brackets.

Application Topics

Screen is available in three standard sizes, allowing for a variety of mounting configurations on desks of different sizes.

Tip: It is strongly recommended that CET SmartTools be used to evaluate the placement of the screen on the desk.

Fabric is applied in a warp horizontal direction. Due to the size of the screens, fabric is unable to be applied in a warp vertical direction.

Screen provides 13" of screen above the worksurface and 12" of screen below the worksurface. The height is measured from the top of the mounting surface to the top of the screen, and from the bottom of the mounting surface to the bottom of the screen.

Screen is not handed. The screen can be mounted in a right- or left-hand configuration.

Screen is not applicable on shaped worksurface edges (knife edge, bullnose, P-edge, etc).

Surface Materials

Brackets

- 6527 Merle

Actual Dimensions

Desk width	56", 68", or 80"
Height	26"
Weight	2.9 lb, 3.6 lb, 4.2 lb
Thickness	1"

Fixed Personal/Modesty Screens

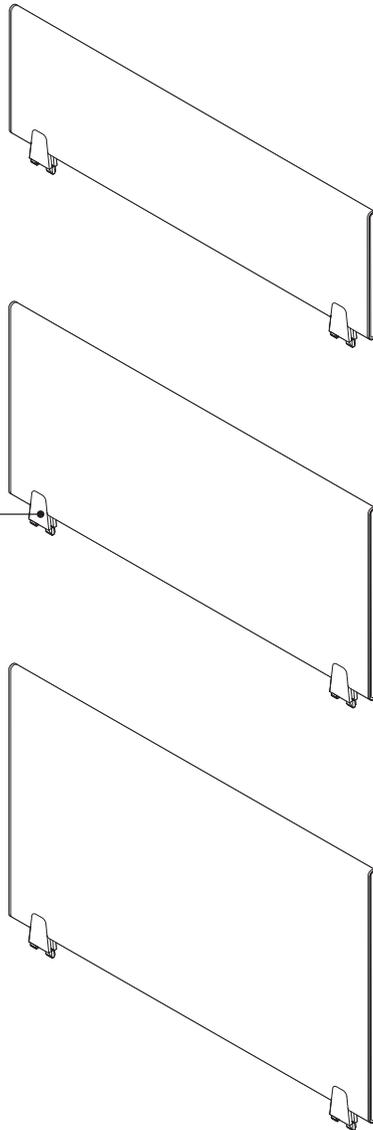

Fixed Personal/
Modesty Screens

Personal screens are tackable and provide variable privacy when and where it is needed. The screens can be used on the Ology integrated rail and the SOTO rail. 19½"H and 24"H are not intended for use in modesty position when used with a height-adjustable desk.

► Specifying, page 344

Fixed personal screens are available in three heights; 12", 19½", and 24" - and four widths to accommodate varying levels of privacy. Height is measured from the top of the mounting surface to the top of the screen.

Brackets are attached to the screen.

Actual Dimensions

Fixed Personal/Modesty Screens

	Fixed Personal/Modesty Screens
Width	30", 36", 42", or 48"
Height	11", 18½", or 23"
Overall height	12", 19½", or 24"
Thickness	¾"

Tip: Overall height is measured from top of mounting surface to the top of the screen.

Product Details

Personal screens can be mounted on the rail. The overall height from the floor will vary depending on the height of the adjustable worksurface.

Gap is 1" between personal screen and rail.

Surface Materials

Infill

- Fabric

Brackets

- 4799 Platinum paint

front

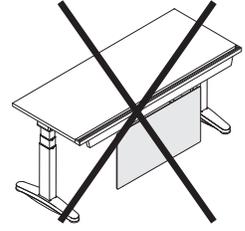

back

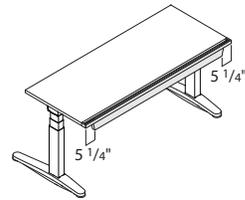

Fabric without pattern is recommended when using a COM fabric to provide a consistent visual. Fabric with patterns could result in the above visual.

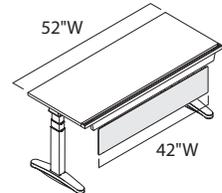

Application Topics

19½"H and 24"H personal screens cannot be used in the modesty position on Ology desks.

When attaching fixed personal/modesty screens to the Ology integrated rail, there is a 5¼" mounting free zone on each end of the rail.

When using fixed screens in the modesty position, the desk must be at least 10" larger than the width of the screen.

When used with One-High integrated storage, fixed modesty screens must be a minimum of 24" shorter than worksurface width to allow for pinch point clearances.

Worksurface Side Screens

For Use on Desking, Benching, and Table Worksurfaces with Varying Thickness

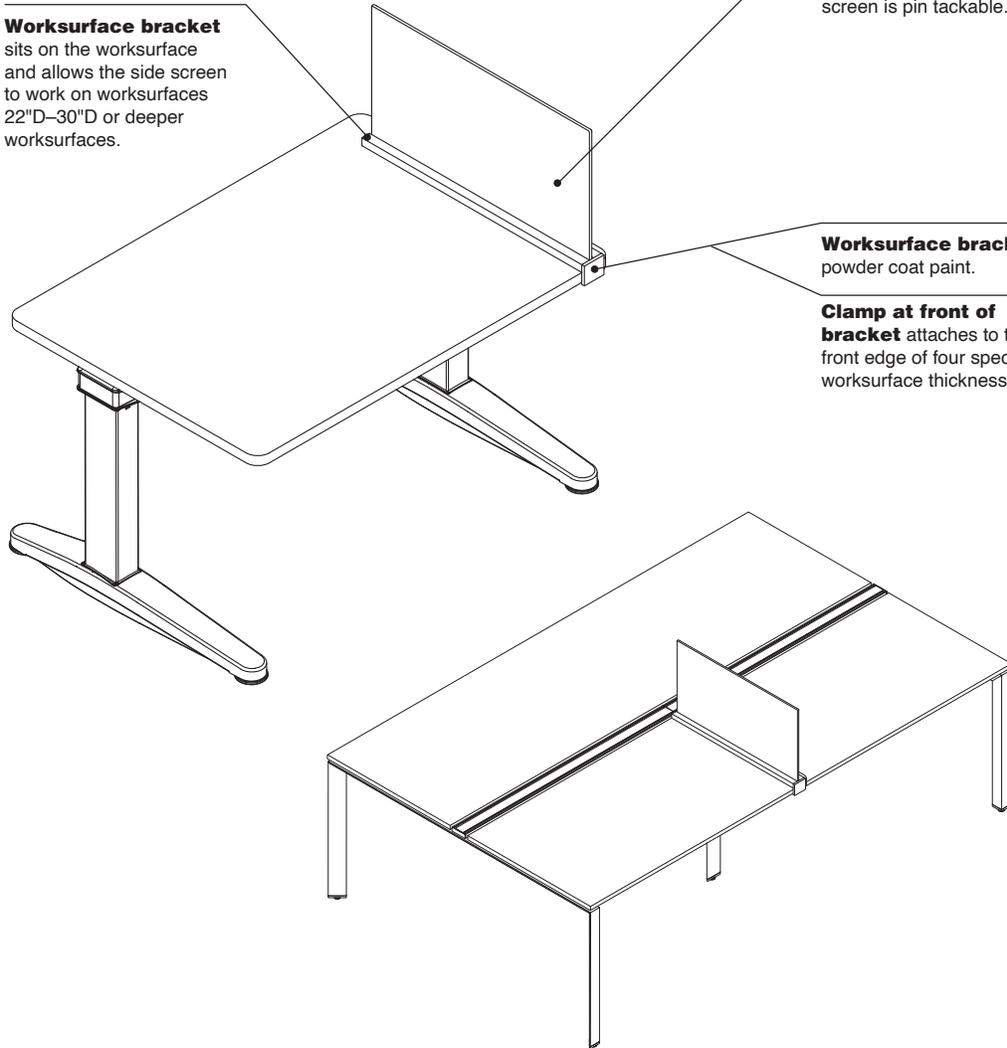

Worksurface side screens provide a territorial boundary between users. Fabric, frosted glass, or clear glass screens are available for different levels of privacy. They are used on worksurfaces 0.808", 1", 1.185" and 1.5" thick. ▶ Specifying, pages 346–348

Worksurface bracket sits on the worksurface and allows the side screen to work on worksurfaces 22"D–30"D or deeper worksurfaces.

Worksurface side screen is available in fabric or glass. Fabric screen is pin tackable.

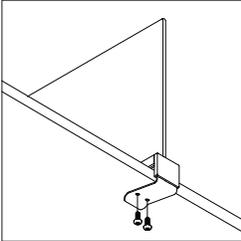

Worksurface bracket is powder coat paint.

Clamp at front of bracket attaches to the front edge of four specific worksurface thicknesses.

Actual Dimensions

	Fabric and Glass Screen	Application
Width	22" or 28" 24" or 30" 23½" or 29½"	FrameOne, Ology, Migration SE, and Flex worksurfaces Elective Elements and Universal worksurfaces Universal worksurfaces with cord drop
Height	12" or 19½"	
Fabric Screen Thickness	¾"	
Glass Thickness	¼"	
Worksurface Bracket Clamp	0.808" thickness 1" thickness 1.185" thickness 1.5" thickness	FrameOne worksurfaces Ology, Migration SE, and Flex worksurfaces Universal worksurfaces Elective Elements worksurfaces

Product Details

Worksurface side screens attach with two screws (#8 x 1/2" large buttonhead wood screws) through the clamp at the front on the underneath of the worksurface. The bracket clamp must be flush to the worksurface flat front edge.

Worksurfaces 0.808" thick utilize the smallest clamp at the front (FrameOne).

Worksurfaces 1" thick utilize a different clamp at the front (Ology, Migration SE, Flex).

Worksurfaces 1.185" thick utilize another clamp at the front (Universal).

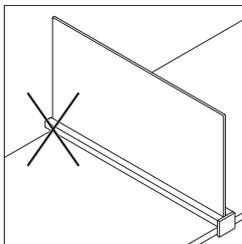

Worksurfaces 1.5" thick utilize the largest clamp at the front (Elective Elements).

Tip: Worksurface bracket clamp must be used with the corresponding top thickness as noted above.

Application Topics

Side screens run parallel to the side (depth) of a worksurface only. They can attach anywhere along the front edge of a worksurface as long as the underworksurface clearance is free from any obstructions.

Worksurface side screen must be clear of any obstruction or interference on top of the worksurface.

The width of screens can be equal to or less than the depth of the worksurface to which it will attach. No overhang is allowed. Some restrictions apply due to location of worksurface legs and supports. *Tip: Consult SmartTools for any application restrictions.*

Powerstrip Intro

► Specifying, page 354

Product Details

Powerstrip intro offers desktop C-clamped powerstrips with combinations of power outlets, USB A+C 20W, and optional under worksurface utility power 4 or 7 power outlets.

Desktop power configuration options and specifications include:

- Two power
- One power and USB A+C 20W
- Two power and one USB-A+C 20W
- Power outlet is 15A, 120V, 60Hz
- Tamper resistant power outlets

Meets spill test criteria.

Two power with 20 watt intelligent USB A+C:

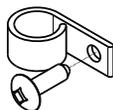

- If only USB-C in use: delivers what the device needs up to 20 watts
- If only USB-A in use, up to 10 watts
- If both USB A+C in use, USB-A delivers up to 10 watts and 10 watts to USB-C. If USB-A device needs less than 10W, the remainder up to 20 watts goes to the USB-C device
- USB-A watt/amp output (2 port) is 10W/2A per port with dedicated charging ports

C-clamp is designed to accommodate worksurfaces up to 1½" thick.

USB A+C 20W

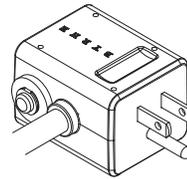

Powerstrip intro USB ports are recommended for charging: cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices. Not recommended for devices needing higher output, more than 20-watts, like compact laptops. See Powerstrip Plus for higher output USB options.

Cable management clips, 2-pack, comes standard with each powerstrip. Mounts under the worksurface to manage cords.

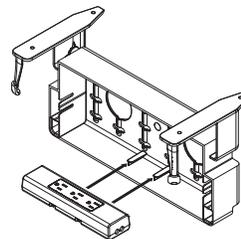

Tip: Cord clip screw length for minimum worksurface thickness of ¾".

Powerstrip intro without optional under worksurface utility power includes a 9-foot standard smooth cord with a diameter of 3/8".

Powerstrip intro includes a standard straight 3-prong plug. An overcurrent protection (OCP) 90-degree plug is also an option. Check with your local authorities having jurisdiction to see if overcurrent protection is required.

Optional Under Worksurface Utility Power

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management trays, sold separately. These help keep the powerstrip in place when the tray is opened or closed.

Optional under worksurface utility power blocks do not ship with independent mounting hardware. They are designed to mount into the universal cable management kit without additional hardware. Kit sold separately.

Universal cable management tray - small tray, **DSTRAYSM**, holds four outlets and large tray, **DSTRAYLG**, holds seven outlets under worksurface utility power.

Overcurrent protection, OCP, via a circuit breaker prevents one powerstrip intro assembly from drawing more than 15 amps of power.

Overcurrent protection is included as standard with powerstrip intro configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Overcurrent protection (OCP) includes a circuit breaker rated for 15 amps.

Powerstrip intro with optional under worksurface utility power comes standard with OCP inline box and optional 6-foot or 8-foot standard smooth power cord with a diameter of 3/8". Choice of standard straight or 90 degree NEMA 5-15 3-prong plug.

Without overcurrent protection

With overcurrent protection

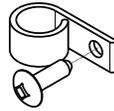

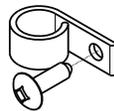

► Specifying, page 356

Product Details

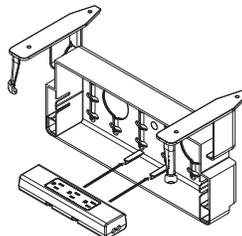

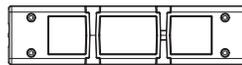

Desktop power offers multiple power, USB, and data options; and can be specified with a C-clamp, rail mount, or front edge mount. Meets spill test criteria.

C-clamp is designed to accommodate worksurfaces between 1/2" and 1 3/8" thick. Also available with rail mount or front edge mount.

Under worksurface optional utility power blocks do not ship with independent mounting hardware. They are designed to mount into the Universal cable management kit without additional hardware. Kit sold separately.

Cable management kit comes standard with each powerstrip. Mounts under the worksurface to manage cords.
Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management kit. These help keep the powerstrip in place when the tray is opened or closed. Universal cable management kit sold separately.

USB A+C 20W

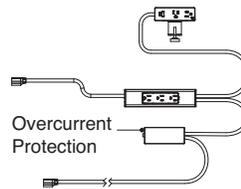

Powerstrip Plus's USB A+C 20W recommended for charging: cell phones, tablets, headphones, wearable fitness trackers, or other small electronic devices.

Dual 45W or 100W USB-C

USB-C 100W recommended for all of the above and compact laptops.

Overcurrent protection via a circuit breaker prevents one powerstrip plus assembly from drawing more than 15 amps of power.

Overcurrent protection is included as standard with powerstrip plus configurations with more than three outlets and is an option on configurations with less than four outlets. Check with your local authorities having jurisdiction to see if overcurrent protection is required for assemblies with less than four outlets.

Optional Under Worksurface Utility Power Dimensions

Under Worksurface Utility Power

► Specifying, page 358

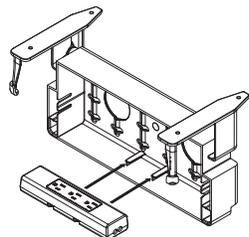

Product Details

Under worksurface utility power provides multiple power outlets for plugging in a height adjustable desk, computer, and desktop necessities with a one cord out solution.

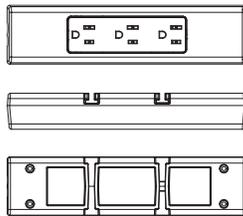

Cable management kit comes standard and mounts under the worksurface to manage cords.

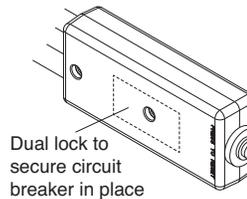

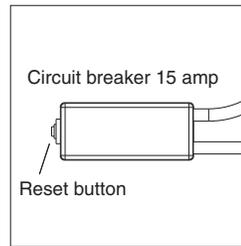

Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

Under worksurface utility power does not ship with independent mounting hardware. The blocks are designed to mount into the universal cable management kit without additional hardware. Kit sold separately.

The bottom of each utility powerstrip block has slots. The slots allow the block to slide onto raised bars in the universal cable management kit trays. This design helps keep the powerstrip in place when the tray is opened or closed. Universal cable management kit's smart straps, if selected, are used to hold the power cord in place. ► See page 359 for universal cable management kit understanding content.

Overcurrent protection is required by UL on these products.

UL Listed: Utility power block outlets are hardwired together in a complete, UL listed assembly. *Tip: Underwriters laboratory (UL) listed. These products have been designed to meet U.S. and Canadian national electrical and energy codes and most local building codes. Local electrical codes vary, so consult with your local authority having jurisdiction as they have final say if the products as installed are compliant with local code.*

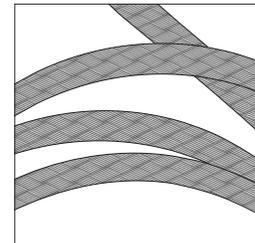

Power plug options:

- Standard NEMA 5-15 3 prong
- 90 degree NEMA 5-15 3 prong
- Thread low profile plug

Surface Materials

Power cord options and lengths:

- Smooth straight 6', 8', or 10': Black or White
- Braided 6', 8', or 10': Black or Seagull
- Curly cord 8' or 163": Black or White

Braided cord

- 9009 Black
- 9011 Seagull

Actual Dimensions

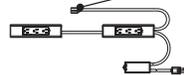

Power blocks

Depth	2"
Width	8 1/4"
Thickness	1"

Four outlets total – One utility block, with three outlets each and one floating female outlet

Seven outlets total – Two utility block, with three outlets each and one floating female outlet

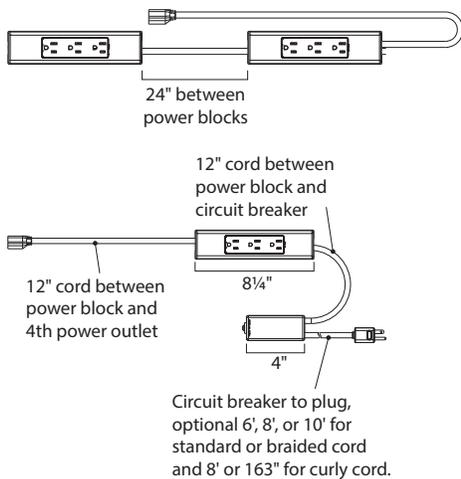

Nine outlets total – Three utility block, with three outlets each.

Floating female outlet for oversized plugs or power supplies.

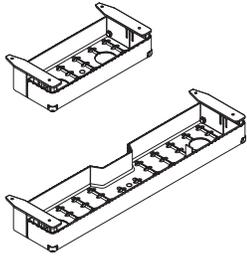

Optional standard NEMA 3-prong plug, 90° or thread low profile plug.

Dimensions

- Optional under worksurface utility power available with:
- NEMA 90°
 - Standard NEMA 5-15 3-prong
 - Thread low profile plug

Universal Cable Management Kit

► Specifying, page 359

Product Details

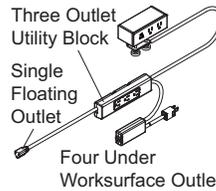

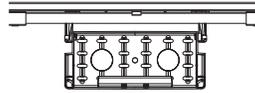

Universal cable management kit provides easy management and access to cords, cables, and power blocks under a workstation.

Optional smart straps allow for easy management of cables and cords in the cable management tray. The large tray ships with 10 straps and the small tray ships with five straps. Straps are 5³/₄" long.

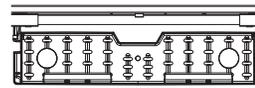

Cable management tray is designed to fit behind the stretcher bar and under-structure of most Steelcase height-adjustable tables. *Tip: Exceptions are Ology desks with integrated rail or modesty panel.*

Cable management tray provides tool-free and hardware-free mounting of under worksurface power from the powerstrip plus.

Cable management tray allows for a 1/8" gap around all four sides between the tray and the worksurface when mounted to allow for cable egress.

The small cable management tray is designed to hold one utility powerstrip and it has four outlets. The tray does not have the capacity to hold more than one utility powerstrip.

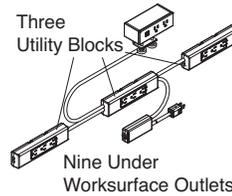

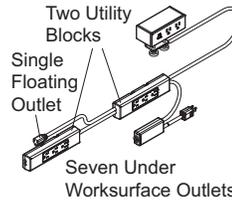

Surface Materials

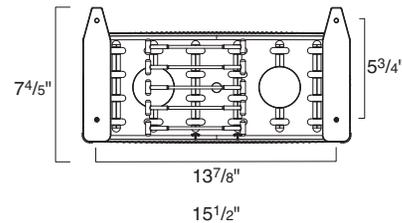

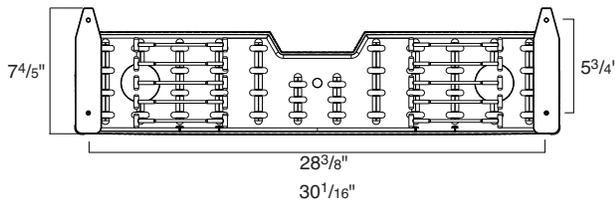

Cable tray
• 6527 Merle

Actual Dimensions

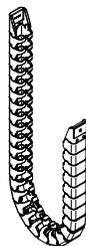

Depth	6 ⁵ / ₁₆ " (7 ⁴ / ₈ " with bracket)
Width	15 ¹ / ₂ ", 30"
Height	2 ⁵ / ₈ " (3 ¹ / ₂ " when installed)

The large cable management tray holds two utility powerstrips in the raised bars section. There is capacity to add three utility powerstrips, two in the raised bar area and one more in the tray, strapped down.

High-Capacity Cable Riser

► Specifying, page 360

Product Details

High-capacity cable riser provides vertical cable management for multiple, heavy gauge cords; recommended for height-adjustable workspaces to a magnetic metal surface connection.

Easy cord installation and disassembly with a robust hold to keep cords in place.

Each link lays flat against the other to form a concealed front to hide cords and provide a clean aesthetic.

Links will move uniformly together keeping cables aligned and well managed.

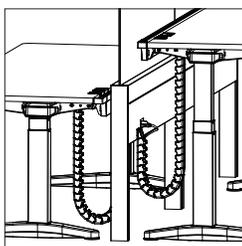

Universal fit for most applications.

Application

Recommended for height-adjustable workspaces.

Attaches to the underside of the top along the back edge to route cords and cables from top to power source.

Tip: Do not use with standard integrated storage or within enclosed areas that would restrict the movement of the cable riser's links.

Top bracket can pivot to 90 degrees and attaches directly underneath the worksurface with screws.

Bottom bracket attaches to magnetic metal surfaces near a power receptacle via a rubber-coated magnet to avoid scratching.

Ideal for use with height-adjustable desks paired with Answer fence, beam, panel system, Bivi Slim Leg application, and benching applications.

Top bracket footprint needed: 2¹/₂"D by 2"W.

Top thickness – 1" plus with hardware included. If installing on less than 1" thick surface, shorter screw lengths must be obtained.

Screw length – 7/8"

Links can be rotated 180° degrees for customization.

Minimum bend radius is 1³/₁₆".

Surface Materials

Two choices for blending in with the furniture's palette aesthetic.

Cable Riser

- 6053 Seagull
- 6527 Merle

Actual Dimensions

Cable Riser Assembly

Depth 1⁷/₁₆"

Width 1³¹/₃₂"

Length 41⁵/₁₆" (including brackets and links)

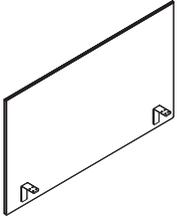

Internal Cavity

Depth 1¹/₄"

Width 1⁷/₁₆"

Cable riser weight is 1.2 pounds (without cords).

Universal Privacy/Modesty Screens

Tip: Universal privacy/modesty screens can be attached to 3/4"–1 1/2" thick worksurface, including height adjustable work-surfaces, universal work-surfaces, and Elective Elements work-surfaces.

Tip: The screens weigh between 9.79 pounds and 11.89 pounds. Take this into consideration when planning for use on height-adjustable work-surfaces.

Tip: The universal privacy/modesty screen is intended for use on the back of a worksurface.

Tip: Fabric is applied horizontally on the screen.

Tip: Screen allows for 1 1/8" cord drop or no cord drop. See understanding pages for product specific application guidelines.

Sarto Privacy/Modesty Screens

Tip: Sarto privacy/modesty screens can be attached to 3/4"-1 1/2" thick worksurface, including Ology, Migration SE, Elective Elements, universal tables, and universal panel-mount worksurfaces.

Tip: The screens weigh between 3.51 and 11.64 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces. See understanding pages to calculate screen weight.

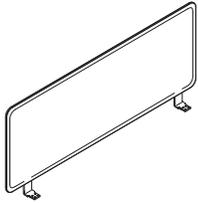

Tip: Worksurface type option adds a fourth worksurface bracket and repositions brackets to avoid worksurface scallops.

Tip: Side screen option changes standard brackets for smaller L-brackets and only mount flush to the side of the worksurface. Side screen option is only available on screens 36"W and narrower.

Sarto Curved Screens

L-Screen

Tip: Sarto screens can be attached to 3/4" – 1 1/2" thick worksurfaces, including Ology, Migration SE, Elective Elements, Universal tables, and Universal panel-mount worksurfaces.

Tip: Screens weigh between 5.7 and 9 pounds. Take this into consideration when planning for use on height-adjustable worksurfaces.

Tip: Fabric is applied horizontally on the screen.

Tip: All Sarto curved screens have a 20" side leg depth.

Tip: Width refers to the distance from the corner of the worksurface to the edge of the screen when the screen is applied to the back of a worksurface.

Tip: Sarto curved screens sit flush against the work-surface. If 1" cord drop is needed, please reach out to Specials for alternative bracket.

Fixed Personal/Modesty Screens

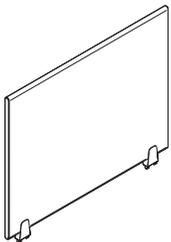

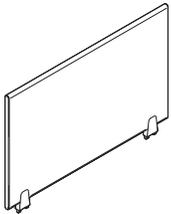

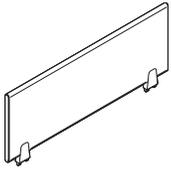

Tip: Fixed personal/modesty screens are for use with Ology integrated rail and SOTO rail.

Tip: When using COM fabric, it is recommended that non-patterned fabric be used to provide a consistent visual between adjacent screens, and from one side to the other.

Tip: 19½"H and 24"H are for personal only.

Tip: 19½"H and 24"H screens are not intended for use in the modesty position when used with a height-adjustable desk.

Tip: For Ology desks 52"W and smaller, when using fixed screens in the modesty position, the screen must be sized 10" smaller than the width of the desk.

Powerstrip Plus

	Standard Includes	Required to Specify
► Need help? Product details, page 323	<ul style="list-style-type: none"> • Powerstrip plus: plastic price group 1 and group 2 • 8' standard power cord: black or white • C-clamp mount • Cord managers 	<ol style="list-style-type: none"> 1 Style number 2 Desktop power mount (see below under Required Selections) 3 Desktop power configuration (see below under Required Selections) 4 Plastic color number for powerstrip 5 Plastic color number for power cord 6 Options, (if selected) see below <p>► Surface Materials, see page 362.</p>

Tip: C-clamp is designed to accommodate worksurfaces between 1/2" and 1 3/8" thick.

Tip: Desktop power cord exit extends 1/2" off of the back of the worksurface when C-clamped.

Tip: 20-watt USB-C provides wattage to charge cell phones and tablets. 100-watt USB-C is needed to charge larger devices like compact laptops.

Tip: Cord length between desktop power and under-worksurface power is 48" and length between under-worksurface blocks is 24".

Tip: Power cord 8' curly cannot be specified with power plug type thread low profile.

Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

Tip: Flush mount requires top surface to be field cut. See assembly directions for details.

Tip: Flush mount faceplate mounts flat just above worksurface.

Tip: For USB-C 100W port, use USB-C charging cable rated for 100W use for full charging benefits. Charging cables not included.

Tip: For Bivi with a 1/2" thick top surface, a shorter screw length is needed.

Tip: Underworksurface power blocks do not ship with independent mounting hardware. They are designed to mount into the Universal cable management kit without additional hardware. Kit sold separately.

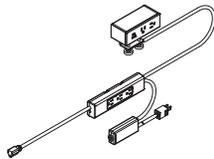

Tip: Overcurrent protection includes a 15 amp circuit breaker.

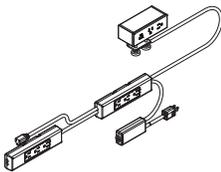

Without overcurrent protection

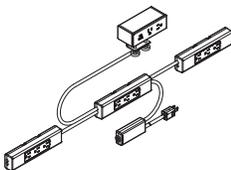

With overcurrent protection

with optional under worksurface utility power with 4 outlets

with optional under worksurface utility power with 7 outlets

with optional under worksurface utility power with 9 outlets

Specification Information

Style Number	U.S. Base Price
DSPower	\$431

Tip: Configurations with outlets under the work-surface are standard with overcurrent protection.

Tip: Check with your local fire inspector and other authorities with jurisdiction, to understand if overcurrent protection is required for your municipality on units without under worksurface outlets.

Tip: Height adjustable desks can be plugged into powerstrip plus for a 'one cord down' solution.

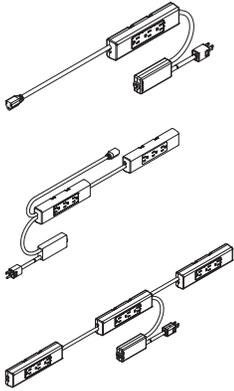

Tip: When using powerstrip plus with nine outlets under worksurface utility power, specify one large and one small universal cable management kit.

Tip: Do not use a vertical cable manager with a curly cord or braided cord.

Tip: Curly power cord cannot be used with power plug type thread.

Tip: Specify 163" curly cord and 90° NEMA plug together and add additional cord management near the plug for a more secure power connection during desk movement.

Under Worksurface Utility Power

Tip: Underworksurface power blocks do not ship with independent mounting hardware. They are designed to mount into the universal cable management kit without additional hardware. Kit sold separately.

Tip: Overcurrent protection includes a 15 amp circuit breaker.

Tip: Do not use a vertical cable manager with a curly cord or braided cord.

Tip: Cord length between blocks is 24", if applicable.

Tip: Never plug a powerstrip into another powerstrip.

Tip: 4 outlet utility block fits in the small tray universal cable management kit, 7 outlet utility block fits in large tray universal cable management kit, and 9 outlets with three utility blocks, specify one large and one small universal cable management kit. Kit sold separately.

Tip: Power cord 8' curly cannot be specified with power plug type thread low profile.

Tip: Cord clip screw length for minimum worksurface thickness of 3/4".

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders.

The global surface materials palette is a core collection of finishes that is available across multiple geographies (Americas/EMEA – Europe, Middle East, and Africa/ APAC – Asia Pacific) and on global product lines, where applicable. For a list of finishes included in the offering, see the Surface Materials Reference Manual. Additional details, like product approvals by geography and finish number conversions, can also be found in the Surface Materials Reference Manual or see steelcase.com/surface-materials.

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$111 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on Ology desks, Universal One-High tops for use on Ology, and common tops for use on Ology, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Tip: OLL is not available for specification with FSC Mix credit worksurfaces, style numbers ending in FSC.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Wood

Applies to:

- Ology desks
- Ology modesty panels
- Migration Pro desks
- Migration Pro High-Speed desks
- Migration Pro modesty panels
- Migration SE desks
- Universal One-High open lateral tops for Ology
- Universal common tops for Ology
- Flex height-adjustable desk worksurface

Steelcase carefully selects veneer and solid wood for consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to ensure even aging of wood surfaces.

When storing your wood furniture, please follow the following guidelines:

- Do not store products in trailers
- Store products in areas that simulate office temperatures (60°F to 90°F)
- Store products in areas that maintain constant, office-like humidity levels
- Keep product away from light. Cover products to make sure they are not exposed to light.

Steelcase Surfaces

Veneers are matched for proper balance and consistency. Veneers are available flat cut or quarter cut, except for Oak, which is rift cut. Refer to the *Surface Materials Reference Manual* for descriptions of each cut.

Open-pore finish is a medium gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Veneer**Wood Group 1****Flat-Cut Open-Pore**

Tip: Known for its uniqueness, planked veneer has intentional and natural variations that include, but are not limited to: character marks, grain pattern, color, and natural color aging.

E = Excluded

Full-Fill

Full-fill finish is a medium-gloss finish that completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look, and it is smooth to the touch. This finish is available on the wood worksurface or field-installed top only.

Wood Group 2**Flat-Cut Full-Fill**

- 3064 FC/FF Graphite Walnut **E**
- 3404 FC/FF Clear Cherry (Aged) **E**

- 3084 FC/FF Washed Walnut **E**

Premium Veneers

A selection of Premium veneers in this collection are available on most Steelcase brand products. The collection will be available as close to standard leadtimes as possible. However, because adequate supplies of veneer and solids must be secured, all orders will be scheduled individually. Leadtimes will vary based on Premium veneer and Premium solids availability at the time the order is placed. The collection is available as Wood Group 3 as a part of our Select Surfaces program, and supported like standard veneers to make ordering easy. Please see the Steelcase surface materials section on village.steelcase.com for sample information and product line availability. All premium veneers are in clear-coat.

Wood Group 3**Quarter-Cut Open-Pore**

- 3832 QC/OP Figured Anegre

Select Surfaces

For information on products within Select Surfaces, including accent paints and fabrics from DesignTex, Gabriel, Kvadrat, and Pollack, please refer to the *Surface Materials Reference Manual* or visit steelcase.com/surface-materials under the Select Surfaces section.

Composite Veneer

Composite veneers are an engineered wood intended to create specific grain patterns and characteristics. They are pre-stained and finished with Steelcase's Clarity water-borne UV topcoat, which protects the environment while providing durability and clarity. Only open-pore finishes are available on composite wood. Composite veneer and matching edge bands are available on most Steelcase brand products. Composites, for use as a solid nosing substitute, are not available. Steelcase does not recommend mixing composite veneers with natural solid nosings because composite and natural wood grain and color matching are rarely compatible. Composite veneers are Select Surfaces as Wood Group 1 pricing.

Composite Veneer Group 1**Composite Flat-Cut Open-Pore**

- 3JDX FC/OP Oak Composite
- 3JJX FC/OP Walnut Composite
- 3LAX FC/OP Graphite on Oak Composite
- 3LCX FC/OP Medium Cherry on Cherry Composite

Composite Quarter-Cut Open-Pore

- 3LEX QC/OP Desert Oak on Oak Composite
- 3LGX QC/OP Chai on Walnut Composite
- 3LJX QC/OP Ebony on Walnut Composite

Custom Surfaces

Customiz stain is a service that allows you to create your own stain colors and finishes on standard veneer. Customiz stain color is available on all product lines that offer wood veneer.

A \$500 stain-matching fee applies on CUSTOMIZ requests (Exception: The \$500 fee does not apply on matches to Coalesse standard finishes or for a low-gloss finish request on a standard color). The \$500 fee covers the cost of formulating the Customiz color finish and applies regardless of whether or not an order for product is placed.

In addition, an approval form must be signed to indicate customer acceptance of Customiz match. A \$1,500 initiation fee will be charged prior to first order entry. This initiation fee activates the finish for unlimited use on any Steelcase product for an 18 month time period. After the 18 month time period has lapsed, the Customiz finish may be reactivated for another 18 months for a \$1,000 fee at any point within five years after the \$1,500 initiation fee was paid. If the finish is not reactivated within five years after the \$1,500 initiation fee was paid, the finish will be culled and the customer will need to pay the \$1,500 initiation fee again. All style number related Customiz charges products are no cost as of April 2014. The matching and initiation fees are not discountable.

Customiz stain takes 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by Steelcase specials group. Customiz stain on custom veneers takes 2 to 4 weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Tip: Woodgrain laminates and the turnstone laminate collection are not available as matched sets. The grain patterns will not align.

E = Excluded

Custom Surfaces

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$111 U.S. per unit, plus the cost of the laminate.

High-Pressure Laminate pricing does not include premium or digitally printed patterns from any suppliers. Laminate cost may also vary for basic or standard laminates from other suppliers. Please contact the OLL consultant at 616.475.2426 for pricing. The cost of the laminate will be added to your invoice as a separate line on the acknowledgement.

When processing orders for Open Line laminate on height-adjustable desks, specify 2900 in the laminate finish field and enter the OLL manufacturer information. Enter the required edge finish as you would a standard laminate.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Directional Laminate Grain Directions

Directional laminates are standard with the grain directions shown.

Tip: Modesty panels are defaulted in the horizontal grain direction for both laminate and wood veneer. Optional vertical grain direction can be specified; however, laminate specification is only allowed up to 60"W.

** Ology radius corners are 1/4".*

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90° angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.
