A Season of Optimism

The workplace is thriving again. People are back — bringing fresh ideas, renewed purpose and a desire to make the most of every moment together. At Steelcase, we're inspired by this momentum and proud to support it with solutions that help people do their best work.

In this Winter New + Notable catalog, you'll find products and insights that elevate the work experience, designing spaces that are functional, beautiful and better for the planet. Because when people thrive, so do the communities around them.

Products for a Better Planet

We're doing better for the planet by extending the lifecycle of our products, offering remanufacturing programs and sourcing sustainable materials to help us on our journey to net zero.

**Circular by Steelcase: Remade**  
Steelcase

Through Circular by Steelcase: Remade, your used or damaged versions of Gesture®, Leap®, Think®, Amia® and Criterion® chairs can be remade to be like new — with nearly half the carbon emissions and a low landfill diversion rate — allowing you to enjoy them longer.

**Ethos**

DesignTex

Exemplifying sustainable innovation, Ethos by DesignTex is a coated textile made with biobased polyurethane. Its third-party ASTM D6866 testing verifies its biobased content, derived from the fermentation of industrial (non-food) corn biomass sourced from the USA. Ethos takes the next step in sustainability, without compromising durability or material health.

*New!*

**Steelcase Flex Mobile Power**

Steelcase

The all-new Steelcase Flex Mobile Power features a 2.5x longer battery life and an industry-leading 3-year warranty, ensuring units are replaced less frequently. At end of use, the battery can be responsibly recycled through Call2Recycle, the nation's largest battery stewardship and recycling program.

### Prestigious Private Office

This welcoming private office features a Slim Leg Height-Adjustable Desk with other refined products including storage, shelving, a custom coffee table, textured walls, and Moooi lighting — blending comfort, function, and elevated design in a curated space.

**Slim Leg Height-Adjustable Desk**  
Steelcase

Blend simplicity and sophistication in private offices by pairing Elective Elements and Slim Leg Height-Adjustable Desk.

### Spaces for a Tailored Workplace

Inspired by modern textures, warm tones, and curated details that evoke a sense of calm, confidence, and executive presence, a tailored workplace is designed to impress.

### Comfortable Conferencing

A cozy, hospitality-inspired conference room features a Studio C1 table, leather chairs, warm finishes, Elective Elements storage, textured walls, and Moooi lighting — blending comfort, function, and elevated design in a welcoming, curated space.

**Elective Elements® Credenza**  
Steelcase

Add a touch of elegance and hospitality to meeting rooms with an Elective Elements Credenza.

## Spaces for Modern Banking

Grounded in new research, we explore how spatial design can support the people who power today's retail banks — improving focus, workflows, wellbeing, and the ability to deliver meaningful service.

### Adapting to Every Branch Footprint

Private wellness and focus spaces help frontline employees manage stress, reset between interactions, and stay energized throughout the day. Thoughtfully placed rooms with acoustic and visual privacy empower staff to stay grounded and perform at their best.

#### Everwall™ Steelcase

Everwall brings architectural privacy and acoustic comfort to rejuvenation and small-group workspaces. Its scalable, quick-install panels make it easy for employees to step away, refocus, and recharge — even in branches with limited square footage.

### Empowering the frontline workforce.

Behind the scenes, high-performing staff spaces help people transition between tasks, store belongings securely, and take restorative breaks. Our research shows how adaptable products — like reconfigurable furniture and secure storage — give bank employees the tools and environments they need to manage daily demands with dignity, clarity, and confidence.

#### WorkValet™ Steelcase

WorkValet's secure, modular storage system streamlines daily routines for frontline teams. Designed for easy organization, quick access, and flexible configuration, it supports smooth shift transitions and reduces operational friction across all branch styles and formats.

# Freedom to move. Power to work.

Steelcase Flex Mobile Power gives people the freedom to connect and collaborate anywhere while keeping devices charged. Its sculptural form fits seamlessly into any setting, bringing beauty and function together wherever work happens.

**Refined Design**  
The sleek and modern shape fits beautifully into any space.

**Adaptive Power**  
USB-C and USB-A ports charge personal devices of all sizes and types.

**Advanced Technology**  
New internal components allow units to last longer and recharge faster using the proprietary tray.

Inspiring Products for All the Ways You Work

Explore solutions from our community of brands — designed to elevate every corner of your workspace and adapt to how you work.

*New!*

**Manto Lounge**  
Vicarbe

Designed by Monica Armani, Manto has an elegant silhouette and generous seat. Its rigid oak plywood shell is paired with a soft interior — a thoughtful composition providing exceptional comfort and freedom of movement.

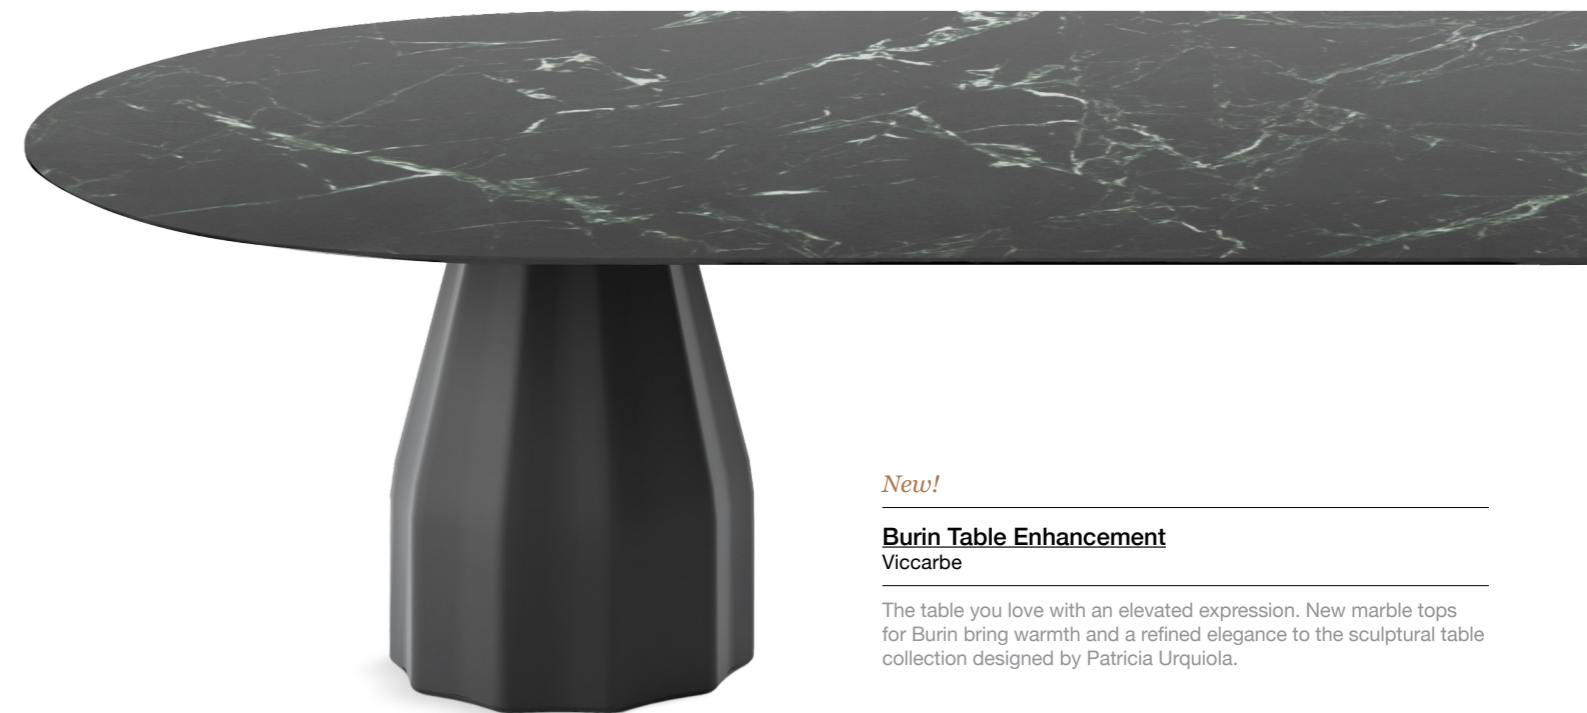

**West Elm Work Slope Collection**  
West Elm

**WorkValet™ Lockers**  
Steelcase

**Bindu Conference Chair**  
Coalesse

*New!*

**Burin Table Enhancement**  
Vicarbe

The table you love with an elevated expression. New marble tops for Burin bring warmth and a refined elegance to the sculptural table collection designed by Patricia Urquiola.

**Campers & Dens**  
Orangebox

**West Elm Work Kent Collection**  
West Elm

**West Elm Work Sterling Collection**  
West Elm

**Potrero415 Table**  
Coalesse

**Migration™ Pro Height Adjustable Desk**  
Steelcase

**Steelcase Karman™ Chair with High Back**  
Steelcase

*New!*

**Fat Sofa**  
Tom Dixon

**Air³**  
Orangebox

Air³ acoustic pod range can act as a freestanding meeting room, private space, phone booth or touchdown room.

**On the QT™**  
Orangebox

On the QT phone booths strike the balance between the need for efficient space and workable comfort — so you can take a video call, carry out focused work or simply think for a while.

**Park Bedside Table**  
Steelcase Health

*New!*

**Steelcase Flex Mobile Power**  
Steelcase

**Amia® Chair**  
Steelcase

Amia is an ergonomic task chair that blends sleek design with smart functionality. With intuitive manual adjustments, two back styles and dynamic support, Amia adapts to your needs and elevates any workspace.

**Coalesse Ensemble Lounge System**  
Coalesse

**Millbrae Contract Lounge Sofa**  
Coalesse

**Qivi® Conference Chair**  
Steelcase

**Answer® Panel Systems**  
Steelcase

Engineered for dynamic environments, the Answer desk privacy panel provides customizable privacy and seamlessly adapts to evolving workspace requirements.

**Ocular™ Sightline Table**  
Steelcase

Ocular Sightline Table creates more inclusive hybrid meeting spaces for up to 10 in-person participants with a design that improves visibility and encourages engagement.

## Take Work Outdoors

Outdoor spaces give people even greater choice for different work modes. Terraces, rooftops, atriums and adjacent spaces extend the workplace, providing a change of scenery and connection with nature while still supporting social, collaborative and individual work.

## Improve employee wellbeing.

Comfortable outdoor spaces give people a place to connect with nature, reducing stress and mental fatigue. These spaces boost overall wellbeing, creativity, productivity and satisfaction.

### **Picnik Table**

Extremis

Picnik is a modern take on the classic picnic table with a striking and stylish silhouette. Incredibly durable and made to withstand the elements, Picnik is perfectly suited for outdoor spaces.

### **Panigiri Table**

Extremis

Inspired by the warmth of Greek festivals, Panigiri combines intelligent design and hospitality in a modular table that allows you to endlessly extend the surface and add chairs, benches and other elements.

### **Captain's Chairs**

Extremis

Designed for comfort, the wide, contoured seat of Captain's Chairs was inspired by the captain's chair on a yacht. The chairs are stackable and have water drainage holes for lasting cleanability throughout the year.

Better Spaces for Those Who Make a Difference

We design environments that meet the distinct needs of healthcare professionals and educators, creating spaces that support their work.

### Reimagining faculty workspaces.

Today's educators need environments that foster focus, collaboration and connection — spaces that empower them to teach and learn. Individual offices offer privacy, ergonomic comfort, flexible mentoring spaces and tools for planning and display.

**Cluvo Height-Adjustable Desk**  
AMQ

**Steelcase Series™ 1 Chair**  
Steelcase

**Currency® Storage**  
Steelcase

### Supportive Clinical Workspaces

Active care environments require intuitive organization and lasting durability. Solutions designed to support caregiver mobility and fast access to supplies, help clinical teams deliver consistent, high-quality care.

**Convey® Modular Casework + Mobile Storage**  
Steelcase Health

Modular and mobile, Convey keeps supplies close for point-of-care delivery. Soft-close hinges, white interiors, and durable design enhance safety, visibility, and efficiency for clinicians in fast-paced care environments.

Cool Collabs, Smarter Spaces

Partnering with leading technology innovators makes hybrid work better. Strategic alliances like these elevate Steelcase from an office furniture manufacturer to a thought leader in the world of work, enabling us to roll out the next era of workplace technology globally.

*New!*

Spaceti's environmental sensors work within Steelcase-designed spaces to deliver real-time data that supports workplace wellness and sustainability. This creates healthier, more responsive environments aligned with organizational wellbeing and climate goals.

## zoom

Zoom's intuitive software integrates with Steelcase's collaborative spaces to support spontaneous teamwork, inclusive communication, and hybrid workflows — reducing meeting fatigue while enabling equitable participation across locations, devices, and workstyles.

### VERGE SENSE

VergeSense's real-time occupancy analytics integrate with Steelcase environments to create adaptive spaces that respond to human behavior — helping organizations make smarter decisions, reduce wasted space, and improve overall workplace ROI.

## logitech

Logitech's high-performance video and audio solutions integrate seamlessly with Steelcase's products and environments, creating flexible workspaces that support clear communication and immersive collaboration — making remote participants feel fully present in every meeting.

### Microsoft

Microsoft's AI-powered tools integrate with Steelcase's spatial design to create intuitive hybrid environments that support secure, real-time collaboration — bridging physical and digital work modes to boost engagement, productivity, and future-readiness.

### CRESTRON

Crestron's automation technology streamlines room scheduling and AV control within Steelcase-designed spaces, simplifying workflows and improving resource efficiency — making it easier to reserve, manage, and optimize work environments for greater productivity.

## Designers on Design

Contract interiors are evolving to meet rising expectations for health, inclusivity, and adaptability. Khoi Vo, CEO of ASID, shares insights from the Society's Trends and Economic Outlook reports, highlighting how neuro-inclusive design, AI integration, and adaptive reuse will shape spaces that foster wellness, flexibility, and measurable impact in a rapidly changing world.

For a multigenerational workforce, flexible spaces such as hybrid rooms can transition to support different workstyles.

Biophilic elements, such as plants and natural light, create a welcoming backdrop in collaborative zones and support employee wellbeing.

Consumers are prioritizing wellness by reducing exposure to toxins and choosing products that support long-term health and sustainability.

*“Contract designers are stewards of societal transformation. Through inclusive, sustainable, and evidence-based design, they shape how communities live, work, heal, and learn — embedding equity, resilience, and belonging into the built environment.”*

**Khoi Vo**, CEO of ASID, brings over 20 years of leadership across interior design, architecture, and education. He's known for advancing inclusive design, industry collaboration, and research-driven innovation in the built environment.

What emerging trends from the ASID 2025 Outlook do you see gaining the most traction in contract interiors by this year? Why is this so important right now?

Trends like neuro-inclusive design, adaptive reuse, and flexible work modes are really picking up speed. With rising costs and a more diverse workforce, it's crucial to create spaces that support wellness, inclusivity, and efficiency. These shifts help people work better and make a real impact.

Wellness is no longer just a residential concern. How are commercial interiors adapting to support mental and physical well-being in the workplace?

Workplaces today are focusing more on wellness, not just at home but in the office too. Designers are bringing in outdoor elements like garden terraces, creating flexible zones for movement and rest, and using non-toxic, low-emission materials to improve air quality and support both mental and physical wellbeing.

How can designers leverage AI and generative tools without losing the human-centered essence of design?

AI can be a powerful tool for designers. It helps speed up tasks like generating concepts or analyzing data. But the heart of design is still human. By testing ideas with real users, adding cultural stories, and using AI ethically, designers keep their work personal and impactful.

With a multigenerational workforce and shifting workplace expectations, how should contract designers approach flexibility and inclusivity in office design?

With so many generations sharing the workplace, flexibility and inclusivity are key. Designers are creating spaces that offer choice — quiet zones, collaborative areas, and hybrid rooms. Add adjustable furniture, lighting, and climate controls, plus accessible layouts and amenities, and you've got a workplace that truly supports everyone.

What are the biggest business challenges and opportunities you foresee for contract designers in 2026?

This year, contract designers will face some real challenges — rising costs, labor shortages, and slower new builds. But there's also a huge opportunity: adaptive reuse, sustainability, and aging-in-place design are gaining real momentum. At the same time, expanding into services like wellness consulting and post-occupancy analytics — and using tech to show real results — gives designers a chance to stay competitive and deliver meaningful value.

## Helping the World Work Better

Steelcase is a global design and thought leader in the world of work. Along with our expansive community of brands, we design and manufacture innovative furnishings and solutions to help people do their best work in the many places where work happens.
